DECISIONS IN COMMERCIAL LAW

ROBINSON, KING & CO v. LYNES.—A married woman is liable at common law for a debt contracted before her marriage. The Married Woman's Property Act leaves that liability untouched, and judgment can therefore be obtained against her personally.

REID v. WILSON AND WARD. REID v. WILSON AND KING.—A person who acts merely as the agent for the owner of a hall let for the delivery of lectures on Sunday is not the "keeper" of such hall within 21 Geo. 3, c. 49 (which Act is in force in Ontario), although he sanctions the terms on which the hall is let, and is the person to whom the license for such hall from the local authorities is granted, according to Mathew, J. A person who acts merely as chairman at a lecture delivered in a hall on Sunday to which the public are admitted on payment of small sums, and who had no control over the lecturer or the subject of the lecture, and whose sole authority is derived from the audience, is not liable, under 21 Geo 3, c. 49, as the 'person managing or conducting such entertainment or amusement." Nor is he liable as "master of ceremonies," that term being inapplicable to an entertainment in the form of a lecture. Nor is he liable as chairman, as the words in the section relating to a chairman refer only to the chairman of a meeting for public debate, which a lecture is not.

SMURTHWAITE v. HANNAY.—Where in a shipment of cotton some of the bales become unidentifiable, the several owners of the cotton become, in point of law, owners in common of the bales in proportion to their respective interests, and in an action by a single owner the shipowner can only attribute such proportion in answer to a claim for non-delivery, according to the English Court of Appeal.

SMITH & SERVICE v. ROSARIO NITRATE CO.—When a ship is chartered to load at a particular port, the charter-party is taken to have reference to the customary mode of loading at that port; and where, by the custom of the port, the mode of loading minerals is by bringing them from the mines by rail direct to the ship's side, as the bringing of the cargo from the mines is part of the loading, any exceptions in the charter-party to the charterer's liability for demurrage will commence to be applicable as soon as the cargo has left the mines, according to the English Court of Appeal.

UNIQUE SENTENCES

An original sentence was given lately by a magistrate in Missouri. A man who did not know how to read and write, convicted for a slight offence, was sentenced to imprisonment until he had learned to read. Another offender, who had a good education, was sentenced to keep him company until he had taught him to read. After a short time they were discharged as they had fulfilled their task to the full satisfaction of the magistrate.—*Detroit Free Press*

WHAT CONSTITUTES A VALID WILL.

Identification of the testator's signature and clear evidence as to his intentions, is all that is really necessary to constitute a valid will, as is well exemplified in the subjoined document by John Morris, who died in Philadelphia recently, leaving an estate valued at $2,900. This will was admitted to probate after proper identification.

"Philadelphia, Aug 16, 1894

"This shall be found, Sallie, when I am gone; and, Mamma, I shall leave all to you, and you, Mamma, shall be a Jardean over Annie, and if the boys helph you through at youre death, let what is left be eqel dived among them. It wont be long before they will miss me.

JOHN MORRIS"

—*The Albany Law Journal*

COPYRIGHT SUITS

In order to test the legality of English publishers sending over to Canada printed matter for sale here, Mr. R. T. Lancefield, librarian of the Hamilton Public Library, has, through his solicitors, issued writs against Frederick Warne & Co., of London, Eng., and the Anglo-Canadian Music Publishers' Association of Toronto, for alleged violations of the Copyright Act. The action against Warne & Co. is for selling Max O'Rell's "John Bull," and that against the Music Publishers' Association is for the well-known song, "The Man that Broke the Bank at Monte Carlo." In both cases, the publications are printed abroad, imported, and stamped to imply that they are copyrighted in Canada. But Mr. Lancefield holds they are violations of the Act, as it states that such works, to be copyright in Canada, must be printed here. Mr. Lancefield hopes, by the actions entered, to have English publishers understand that they must observe the Canadian copyright laws.

—*Canadian Bookseller*

—Reports compiled by the *Manufacturers Record* show that the Southern States this year produced more than one-third of the total corn crop of the United States.

For Durability, Simplicity and perfection, this Brace Buckle stands supreme. It's without teeth and cannot slip. the harder the pull, the tighter it gets. No need to take off the ends to adjust it up or down. A favorite with everyone who wears it, and a seller every time.

Mercantile Summary.

THE Berlin Brush Works have bought the Canada patent brush works at Sandwich, and will remove them to Berlin.

THE third annual meeting of the shareholders of the Waterloo Wood Manufacturing Co. will be held on Tuesday evening, 18th December.

THE sale of the Cornwall organ factory was completed on the 8th. L. E. N. Pratte, of Montreal, visited the village, and the deeds were duly signed.

DAVID KERR, painter, Quebec, one of the oldest tradesmen in his line, is canvassing his creditors for a settlement at the rate of 30 cents on the dollar, payable in 4, 6, and 9 months. His liabilities are about $2,000.

LALLY & CAVANAGH, dealers in tobacco and confectionery at Cornwall, Ont., have arranged a compromise at 30 cents on the dollar, liabilities being about $3,000. They got an extension of time last December, but this did not afford them the required relief.

F. D. BARRINGTON, of Montreal, doing business as a trunk manufacturer, under the style of George Barrington & Son, has assigned at the demand of his father, who is the principal creditor, for $40,000. His outside general liabilities are $7,496, and indirect to two banks, $25,900.

Mercantile Summary.

A MOVEMENT is on foot to erect an elevator at South Edmonton, Alberta. The promoters propose to apply for incorporation as a joint stock company, the stock to be sold to farmers at $5 per share.

ONE of the busiest places on the St. Croix River is the box shooks mill of Granville Chase, at Baring, near Milltown, N.B. Since April last it has run continually day and night. Mr. Chase employs from fifty to sixty hands, and has this season added a new drying-kiln.

F. X. MARTIN, a prominent dry goods merchant of Hull, Que., who has been rather given to over-trading, and who has asked two extensions of recent years, is reported to be now seeking a composition at the rate of 60 cents on the dollar, 50 cents cash, and 10 cents in six months. Liabilities are stated to be from $40,000 to $50,000.

A WEEK or two ago a sensational burglary took place at Mill Vilage, N.S., near Liverpool. A burglar was shot at midnight, while escaping from I. N. Mack's store. He is a prominent and wealthy citizen, and when arrested had over $2,000 on his person. He is worth over $10,000, and it is alleged he committed a series of burglaries. The arrest occasioned a tremendous surprise.

Mercantile Summary.

ONE day last week the shareholders of the Temiscouata Railway Company met at Quebec, Vice-President Hon. George Irvine in the chair. The annual report was read and approved. The net earnings last year were $10,000. The following were elected officers for the coming year: E. D. Boswell, president; Hon. George Irvine, vice-president; David Lindsay, secretary-treasurer. Mr. Crockett is general manager.

THE minor Montreal happenings, in the way of failure of traders for the week, are as follows: L. A. Labossiere, saloon-keeper, is reported an absentee, and a meeting of his creditors is called for the 17th inst. A. L. Deneau, a coal dealer in the western suburbs has assigned, owing about $800. G. Pelletier a small corner grocer, has compromised at 25 cents. Leopold Marchand, only a short time in business in the same line in a more pretentious way, has assigned, owing some $4,000. A third grocery failure is that of W. W. Brewis, a comparatively new beginner, who owes $2,800. The new beginners are evidently having a hard time. Alvarez & Miranda, who came from Toronto, and started cigar-making in a small way two or three years ago, have been served with a demand of assignment. The liabilities are only $1,950.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

PRESIDENT CLEVELAND says An ancient proposition of our law denying American registry to ships built abroad and owned by American citizens, appears not only to be a failure for good at every point, but to be nearer a relic of barbarism than anything that exists under the permission of a statute of the United States. I earnestly recommend it to prompt repeal.

THE dividend sheet of Eli R. Deming, dealer in men's furnishing goods at Sarnia, who succeeded Kenleyside Bros. some two years ago, shows how small estates are eaten up by official and legal charges, etc. In this instance claims amounting to $2,619 were fyled and only $795 was realized from the sale of the stock and book debts. From this sum was deducted rent, $205; wages, $195; advertising and inspection, $65; solicitors' fees, $75; trustees' commission, $100 travelling expenses, $55. Total, $695. Thus it will be seen that creditors have not been left entirely in the cold. They realize $100, or something less than three per cent., and in order to obtain this they pay $395. Hector Lamont is the assignee

THE following failures in Quebec province for the week are to be noted: S. Gobeil, of recent establishment in the general store line at Lake Megantic, has abandoned his estate to creditors ——J D Heroux general merchant St Barnabie, has made an assignment. He owes $5,000, and shows nominal assets of $6,000 ——A T Lafreniere, grocer at Louiseville, has been asked to assign Liabilities are stated at $2,000 with assets of $2,000 He failed a few years ago at Maskinonge.——J. B. Cadorette, formerly a young farmer at St Simon started trading last year He has done something in each of a variety of businesses, groceries hotel, hay, wood, etc and is now reported as assigned He has managed to roll up liabilities of $19,134 with his misplaced enterprise J E Plamondon, another farmer, of Wotton, in Wolfe county, who has done business for some years in the saw mill line and as a contractor, has also assigned He has been unfortunate in the way of fires of late.——W. J. Bertram, formerly a Montreal dry goods clerk, who began storekeeping several years ago at Bedford, and moved a twelve month since to Valleyfield, has been obliged to assign ——E Collette, hotel keeper at St. Stanislas de Kotska, whose failure we lately noted, is offering his creditors 25c on the dollar

L. J. PIERCE, who began business in the stove and tinware line at Ottawa in the fall of 1893, is already reported as assigned.

THE grocery stock of F. L. Cherrier, Hamilton, amounting to $4,288.41, has been sold to F. D. Cherrier, a son of the former owner. He will open business in the same premises in a few days.

WE seldom notice the business difficulties of farmers, because the general trader or business man has comparatively little interest in their financial affairs. However we notice that there is more than the usual number of items about farmers this week. No less than six of them have assigned in this province.

EDMOND BELANGER, a long-established dry goods merchant at Quebec, is reported to be offering his creditors 75c. on the dollar; liabilities estimated at $25,000 to $30,000. Mr. Belanger has been alone in business some fifteen years, and was previously of the firm Vandry & Belanger, who had failed.

AN assignment is made by J. E. Sanders & Co., general storekeepers at Deloraine, Manitoba. This was brought about by a Montreal firm obtaining judgment of $6,000 against them ——Another assignment is that of J. S. Kegehr, general storekeeper at Hockstadt.——For the past year L. G. Gagnon, general dealer and miller at St. Ann's, Man., has been disturbed by many judgments amounting to over $10,000, and now he endeavors to end the worry by making an assignment.

A MEETING of the creditors of J. A. Bernardin & Co., general merchants at Buckingham, Que., was held in Montreal, on the 12th inst. The firm was burned out last week, and the statement submitted showed liabilities for merchandise $17,408, mortgages $14,000—$10,000 of this latter item being in favor of his wife. Assets consist of book debts $2,600, insurance $9,000, real estate $8,500, and other items to foot up $24,100. An offer of 50 per cent. cash was favorably entertained by those creditors present.

THE Huron & Erie Loan and Savings Society has removed into its new premises, recently erected on the site of the former offices, nearly opposite the post office on Richmond street, London. The building consists of four stories and basement. The lower part is of dressed freestone, and the upper part of Toronto pressed brick. Plate glass windows and substantial architecture render its appearance handsome as well as solid. The interior arrangements provide for a visitor's and manager's room, and a large public office. All these are fitted up with quartered white oak and neat ornaments, giving a light and pleasing effect. A vault with new safes is convenient to the manager's room, and a large vault 25 feet in length for depositing the various documents of the company has been built in the rear of these. Some of the upper floors are to be used as lawyers' and other offices. The entire building is heated by hot water, and lighted by electricity.

AN offer of 70 cents in the dollar is made by L. H. Chouinard, general dealer, Matane, Que., whose embarrassment was lately reported. He owes about $15,000, while a considerable surplus is shown.——A. H. Falardeau, a somewhat important trader in the general store and lumber line at Ancienne Lorette, and Sillery Cove, Que., has suspended. At a meeting of creditors held a few days ago, he showed liabilities of $37,500, of which $12,500 are indirect, with apparent assets of $36,000. An offer of 50 cents, in instalments at 3, 6, 9 and 12 months, is now before the creditors.

OWING to real estate investments in this city Robert Bond, the well-known livery stable keeper, has been obliged to consult his creditors, but the meeting has been adjourned without coming to any conclusion——J. H. Baines, formerly of the shoe-findings firm of Wilkins & Baines, who did not make much money, retired and started in the same line. For some time he made good progress, but of late he has been trying to improve bicycle locomotion. This took both time and money, and his shoe-findings business suffered, and after being sued, he has called a meeting of creditors. He has assigned to Henry Barber.

AFTER dealing in real estate, etc., for four years in Hamilton, Oliver A. Horning finds himself heavily involved and is obliged to assign.——In the same city, Andrews & Co., furniture dealers, are asking for an extension of time. A couple of writs have been issued against them and judgments obtained.——In December, 1888, Alfred Sleep removed from Manitoba, where he had been clerking, to Seagrave. There he opened a general store in premises owned by his mother. About a year ago he claimed a surplus of $2,200, but evidently he has been going behind for some time and now assigns.——Another assignment is that of James Harding, butcher, in Hamilton.——After paying his bills regularly for a number of years, Alex. Cromar, builder, Brantford, assigns. Of late he had allowed his means to be locked up in real estate.

THE prospectus is issued of the Ontario Accident Insurance Company, headquarters Toronto. The proposed capital to be $500,000 in shares of $50. Very encouraging progress has been made with the share list, which shows good names in different parts of the Dominion.

THE Canadian Fire Extinguisher Company applies for incorporation. The capital stock to be $50,000. The petitioners are Montreal men, viz., Messrs. Joseph S. Bousquet, banker; Moses Davis, customs broker; Onesime Marin, notary; Charles Langlois, trader, and Pascal Gagnon, merchant, who will be the first directors.

A YEAR ago, R. J. Bradfield opened a grocery store at Aurora on some capital borrowed from his sister. His success has always been considered doubtful, and no one will be surprised to hear of his assignment.——The assets of McDonald & Hall, general storekeepers at Massey, were sold at 36 per cent. These include about $10,000 book accounts.

VANSICKLE BROS., who opened a general store at West Lorne, early in 1892, with a capital of $2,500 in the business, are in trouble The following year they bought the hoop business of Kerr & McIntyre for $2,000. This evidently cost entirely too much. In consequence of this purchase they were obliged, in January last, to mortgage their chattels for $6,000. Now they assign.——Wm. S. Leadbeater, who conducted a business school in Woodstock for some years, became involved, was frequently sued, and his effects were seized by his landlord. In order to get out of trouble he induced one Kenny to invest $500. This helped to pay off his liabilities, and he is now reported to be beyond the reach of Canadian bailiffs.

EARLY in 1891 the firm of Stevens & Kerr opened a general store in Enniskillen, but dissolved in June, 1892, when the latter retired and Stevens continued alone. In February of the following year a fire in his premises resulted in a loss of $500. This was too much for his slender capital and an assignment follows.——Another general storekeeper in trouble is D. H. Currie, of Nottawa, who bought the stock of Henry Wiggins in February, 1889. For some time he did quite a good trade, but was not able to compete with some of his more wealthy neighbors. He has assigned.——An offer of compromise is made by J. H. Notter, grocer at Owen Sound. It will be remembered that this is not the first time that he has been obliged to ask the kind consideration of his creditors

A MEETING of foundrymen was held in Hamilton last week to consider the advisability of forming an Ontario association.

THE quarterly meeting of a number of the hardware associations is taking place in Toronto this week. The wire, barb wire, rivet and wire nail associations are to meet.

A FEW months ago Dalton F. McCarthy became tired of working as a machinist in Toronto, and, with his little savings, opened a small grocery. Now he makes an assignment.

THE Western Wire and Nail Company of London, Ont., are applying for incorporation with a capital stock of $50,000, for the drawing of wire of all descriptions and the manufacture of wire nails.

A COMPANY named the Standard Silver Plating Co., composed of New York, Chicago and Toronto parties, has taken over the assets of the Acme Silver Plating Company, of Hayter street

THE Southwick Oil Company, which was incorporated in this city over a year ago, has decided to go into liquidation. The paid capital of only $12,500 was found entirely inadequate for the business, and the above course was adopted,

THIS has been by far the most prolific year for fires in the history of the Montreal Fire Department. To date there have been 972 fires this year, while at the end of last year, which so far held the record, there were only 871 fires.

THE bailiff is in possession of the premises of Mrs. W. C. Smith & Son, hotel keepers at Rodney. In January, 1893, they were burnt out, and became involved by rebuilding their premises, and the contractor would not permit them to occupy the same.

THE manufacturers of pressed tinware have formed an association on the basis of the hardware associations. Formerly all complaints were investigated by members of the association themselves, but now this duty is performed by an outside firm.

THE wire nail manufacturers of Montreal are complaining of the severe competition to which the western men subject them. In submitting tenders for a contract in Montreal recently, the figures stood as follows: $2.37½, $2.30, and $2.14. A Toronto man submitted the tender of $2.14; the contract called for 5-inch wire nails, and the price is said to be below the cost of production

HOLIDAY supplies are in request Silver-plated ware, fancy tinware, and cutlery are all in good demand

As the first move, the new, or rather recently revised, Canadian association in tinware have brought discounts into harmony. Formerly, upon certain lines, a discount of 70 and 12½ per cent. was allowed, and on other lines 70 and 25 per cent. Instead of these, under the new arrangement, a uniform discount of 80 per cent is now allowed. Whether this means a reduction or an appreciation in values depends upon the character of the new list which is now coming out.

MR F STANCLIFFE has been appointed manager for Canada of the Employers' Liability Assurance Corporation of London, England, which is said to be the largest company of its kind in the world, and is shortly about to commence fidelity guarantee, general accident and employers' liability assurance business. The company has a subscribed capital of $3,750,000; paid up, $750,000, and its income last yeor amounted to over $1,350,000

DOMINION COMMERCIAL TRAVELLERS' ASSOCIATION

The nominees for office in the Dominion Commercial Travellers' Association are as under: For president, Lieut.-Col. Fred. Massey, of the Massey-Gurney Company, and Mr. J. H. Morin, of Montreal; for vice-president, Messrs. John Rogers, Max Murdoch, John Taylor and Alf. Elliot; for directors, Messrs. James Armstrong, John T. McBride, Walter C. Wonham, N Tucker, W D McLaren, jr., A. D. Gall, C. H. Cochrane, C. A. Prevost, Joseph Youngheart, John Fales, and John Stewart The annual meeting for the election of officers and transaction of business generally takes place on Saturday evening December 15th The members propose holding their annual dinner at the Windsor Hotel, Montreal, on the 22nd inst No fewer than 275 tickets have already been sold Lord Aberdeen is expected to be present

TORONTO, FRIDAY, DECEMBER 14, 1894.

THE SITUATION.

There is danger that the investigation into the corruption of certain aldermen, in Toronto, would come to a stand, just at what seemed to be the point at which it was desirable it should be pushed. Two persons whom it was desirable to interrogate, ex-Alderman Hewitt and Mr. Coleman, have left the city, just when their evidence would have been necessary to probe certain matters to the bottom. Hewitt appeared to have received, under the mask of mortgage, between $20,000 and $30,000. If these instruments were mere blinds to cover certain payments in connection with the street railway franchise, as the popular notion is, it behooves us to enquire who shared the spoil with the mortgagor. Hewitt or Coleman could tell, but they are not here to be put in the box. Why did they leave the city at this juncture? We do not ask why they were permitted to leave, though that might not be out of order. Among the current rumors, some are likely to be idle and foundationless, but surely, in connection with Hewitt, there is something more to be learned. That something is, who shared with him the money of which he was the recipient ostensibly as mortgagee on second mortgage? Mr. Mackenzie, of the Street Railway company, swore that large sums were paid to the press. If the press was corrupted, it is a matter of public interest to learn the names of the culprits.

As was inevitable, the enquiry into civic corruption in Toronto has caused a demand to be made for some means of preventing a recurrence of the evil brought to light. At a meeting of citizens in the Pavilion, it was resolved that the executive and legislative functions of the aldermanic body should be divided. A Board of Control, for executive action, is proposed. That the proposed division of functions is one that ought to take place, seems plain enough; but when we come to details, difficulties will be encountered. How is the executive to be brought into existence? By popular election, or by appointment? If the latter, with whom is the power of appointment to rest? With the mayor, the aldermen, or the Provincial Government? Nomination by outside authority would scarcely be welcome, and as between choice by the mayor and the council, the former would probably be best, or, to put it negatively, the least objectionable method. We have an executive committee, in name, but its executive functions are almost *nil*. It can assent or refuse assent to certain things, generally legislative rather than executive. This committee has not been without its uses; but it is not what its name imports, and what it ought to be. The citizens' meeting got on the right track, but no mere change of machinery will of itself suffice to bring the full measure of reform needed.

Secretary Carlisle, of the United States Treasury, has laid before Congress, in his annual report, a new bank and currency scheme. He proposes to repeal all laws authorizing the deposit of United States bonds as security for note circulation, and to permit national banks to issue notes to an amount equal to 75 per cent. of their capital, on condition that they deposit with the Secretary of the Treasury 80 per cent. of the amount of the notes, in legal tenders and Treasury notes. This would leave 45 per cent. of the circulation to rest on the capital of the bank, the liability of the shareholders, and a safety fund, the latter the proceeds of taxes on the notes, to the amount of five per cent. of the issue. For half a century, the efforts of bank reformers in the Republic have been to a great extent directed to the absolute securing of the bank note; and, from the point of view from which they looked, this new scheme may be regarded as a backward step. Under a system in which the capital of the bank would largely answer for the circulation, it would be necessary to be certain that all the nominal capital was real. This was far from being the case when the Safety Fund system was in operation. The Bank Commissioners of New York, remarking on the failure of several of these banks in 1842, said that the capital, though nominally paid, was in part, at least, borrowed on short loans for this particular purpose, and repaid by discounts from the new bank;" in other words, was never paid at all. Congress is not likely to return to a discarded system, every step in the history of which is marked by ruin and disaster.

Secretary Carlisle's plan of currency provides for the gradual withdrawal of the legal tender notes of the Government. In the meantime he wants the banks to be required to keep legal tenders to the amount of 30 per cent. of their circulation. If the legal tender note had been what Secretary Woodbury intended it should be—a mere certificate of deposit of so much specie to be held inviolably for its redemption—it would have constituted as good a currency as the world has ever seen or ever will see: and in that case there would have been no necessity to make it a legal tender. The attempt to force these legal tenders on the banks is an attempt to extort from them a forced loan, in a new form. This is the political side of Mr. Carlisle's plan, and but for it the plan would probably never have been born. A system of banking should be constructed on its own merits, with special adaptations to the work required of it. You cannot introduce the political element without marring the symmetry of the scheme; favors to the Government, even when extorted by power, generally have to be paid for in some form or other. In proposing to abolish the tax on the issues of State banks and to dispense with special security for depositors, Mr. Carlisle is taking a step in the right direction. Viewed as a whole, Mr. Carlisle's plan is the produce of something else than conscientious study to produce the best practicable plan of currency and banking; it betrays the defects of its origin in several important particulars, and it is much to be feared that if put into practice it would reproduce many of the old abuses and calamities of which history proves it to have been prolific. It is only when we extend the historical view beyond the United States that the plan becomes at all hopeful. In other countries, banks not dissimilarly

constituted have succeeded. But a special danger lies in the almost indefinite multiplication of small banks which would be possible under the scheme outlined by the Secretary of the Treasury.

A question of the exact location of the boundary line between Canada and the United States, in the neighborhood of Point Pelee Island, is said to have arisen out of the recent seizure of an American fishing vessel by the Canadian authorities. The Washington officials are represented as being in a quandary over the puzzle. The ground, or rather the water, has been examined on the spot, maps have been scanned, and, after all, the light sought for has not been obtained. Perhaps the search was not made in the right quarter. Printed maps would be only secondary evidence at best, and might prove to be wrong The line was examined under the Treaty of Ghent, and the work was done by Mr. David Thompson, the British agent, and an American colleague, by whom the line was certainly traced on paper. If plans were deposited with the British and the Washington Governments, they are the documents to which appeal ought to be made. And they are, perhaps, in this enquiry, even more important than the treaty itself. The line followed the channels, which could only be found on examination by the commissioners, and what is necessary to know is what and where these channels were at the time of the treaty.

DEATH OF THE PREMIER.

The death of Sir John Thompson, Canada's Premier, sudden and unexpected, will cause universal regret, not only in this country, but through a large part of the empire. His policy had been to extend the interests of one part of the British Empire in the other parts, and he had given the leading colonies a common cause and common hopes and aspirations. In the last hours of his life, Sir John was engaged in an attempt to settle two questions which concerned alike Canada and Great Britain: the treatment by Canada of English copyrights, and the removal of the embargo on Canadian cattle. The latter had shown no symptoms of yielding to diplomatic treatment. In what state the copyright question was left by his death, we do not yet know; but it may be regarded as certain that his policy in regard to it will survive. Not only by the party to which he belonged, but to Canada as a whole, his loss will be severely felt. As Minister of Justice, it will be hard to replace him; as Premier, there is none in sight who can take his place with confidence that he will be able to command equal success.

THE NEWFOUNDLAND CRISIS.

The financial crisis which has come upon Newfoundland was not unexpected. It was the result of conditions which have long been menacing and business methods that were essentially unsound. The fish trade had been conducted on what is known as the supplying system. The merchant or dealer in fish supplied the fishermen with provisions for the winter and a schooner and fishing requisites in the spring, all on credit. To him the fisherman turned over his catch of cod and herring in the fall, and the merchant, to cover incidental losses and bad debts, charged for his credit supplies from twenty-five to fifty per cent. above the cash figures. In bad years this did not nearly meet his losses, and the depletion of the fisheries, increase in taxes, diversion of hundreds of men from fishing to railway building through the island at higher wages, and, lastly, the destruction of the city of St. John's by fire two years ago, combined to financially embarrass every firm dealing in the fisheries.

The death, at the close of November, of Mr. Hall, of the London firm Prows, Hall & Morris, financial agents of Newfoundland fish houses, caused the suspension, on Saturday last, of Edwin Duder & Co., of St. John's. On Monday, 10th instant, the Commercial Bank suspended payment, owing to the failure of several of its mercantile customers to respond to their liabilities to it. Then a run on the Union Bank began, and for about an hour it paid out gold in a steady stream. Then it suspended temporarily until it could replenish its gold reserve from the United States. The suspension of the firms of Alan Goodridge & Sons, Baine, Johnston & Co., Job Bros. & Co., and John Steer followed in quick succession. The head of the Goodridge firm is the Premier of the present Government of the Island. A run was also started on the savings bank, a Government institution, and became so severe that it had to refuse to meet the demands of its depositors for lack of specie.

The situation is one of extreme difficulty. According to the New York *Sun*, there are hundreds, if not thousands, of people who have commercial notes which are absolutely valueless at present, and the whole circulating medium consists of about $200,000 in gold, silver and copper. This amount has got not only to do for St. John's, but the whole Island, as outside that city there are no banks or exchanges. The one bright prospect in the situation is that there are about $2,000,000 worth of fish oil and other products in the city, and if this can be shipped to market and realized upon, it will turn in at least 75 per cent. of its value.

The Commercial and the Union are the two chartered banks of the Island. How they are situated may be gathered from the paragraph which follows:

> The deposits in the Savings Bank, a Government institution, amounted to $3,000,000. Half of this was in Government bonds, stocks, etc. The other half was loaned at interest to the Union and Commercial Banks to use in their ordinary business. Of this amount the Union Bank had about $1,000,000, but the Government owed it on overdrawn current Colonial account $650,000, leaving the Union Bank's indebtedness about $350,000. The Commercial Bank had about $500,000 from the Savings Bank, also without any commensurate offset, and this was its heaviest blow, the charter of both banks providing that the Savings Bank shall be a preferential creditor in the event of their failure. On Monday morning the Government enforced this proviso, and the Commercial placed its specie at its service. The Commercial also was severely hampered by its unwieldy note circulation, which was far out of proportion to its collateral.

Business is necessarily at a standstill. An effort is being made to secure outside aid. One of the members of the Government left on Monday night for Canada to arrange, if possible, for one of the Canadian banks to establish a branch at St. John's. The Government also telegraphed to the British Ministry requesting a loan of $1,000,000, or that they will guarantee the loan of $1,500,000, attempting to be floated in London. The Colonial Secretary proposed to leave for London with this object in view.

According to Montreal merchants and bankers, the Commercial Bank of Newfoundland has been considered weak for a couple of years past. Its capital was about $325,000, with a rest of $125,000, and it was stated by a St. John's, Nfld., gentleman on Monday that the bank had loaned the Government of the colony half a million dollars.

We are told that the Bank of Nova Scotia has meantime sent a staff to St. John's to look after its interests; whether a permanent branch will result remains to be seen. That an improvement of the methods of business on the Island will be one result of the present disaster may reasonably be predicted. And no such fabric of complicated indebtedness on such a scale of credit will, let us hope, hereafter be possible.

A DECISION IN CUSTOMS LAW.

In the matter of the jute seizures at Montreal, a suit to determine the legality of which was tried before Justice Burbidge in the Exchequer Court last week, the decision has been given in favor of the defendant, the Dominion Bag Company, and the seizures are quashed. We are glad of this, for it would have been a great hardship to have had a firm mulcted in six years' extra duty on all its importations. and its goods confiscated, because some suspicious landing waiter at Montreal thought he had found a mare's nest.

The grounds on which the Government's case rested were extremely technical, so much so that experts were not able to agree whether the jute fibre seized came within the law or no. The goods were entered in good faith, the judge decided, and, he added, the case, as a whole, is a doubtful one for the Crown. The same goods had been passed with the consent of the Customs authorities for many years, and His Lordship thought they had certainly as good an opportunity to find out as the importers, but nothing was done, although they were the appraisers. His Lordship held that the entries should stand and not be opened up.

This decision means, among other things, that where a clause in the Customs Act is difficult of definition the importer, provided there be no proof that he aimed at fraud, shall be entitled to the benefit of a doubtful interpretation. In the view of some Customs officials all importers are scoundrels, lying in wait to cheat the Government, and to the haste or greed of such officials this decision comes as a salutary check. A lawyer's view of the object of the law governing the case, the Judge said, would be that to give free entry to jute cloth for the manufacture of bags, but to compel the manufacturers to do the finishing in Canada. He was bound by a prior decision, he stated, [by which reference we presume the Ayer decision is meant] to hold that a tax must be imposed in clear terms, and if the matter is at all doubtful, the doubt should be decided in favor of the importers, and the tax should not be enforced. The principle of general application laid down first by the Supreme Court and now by the Exchequer Court in such circumstances, is that importers are not to be compelled to pay duties on entries of former years which had been passed with the approval of the Customs appraisers. It is just, and will be welcomed by importing merchants.

ROYAL TEMPLARS.

We have an enquiry from a correspondent as to the life insurance features of this society, which, he says, is meeting with extraordinary mortality of late, where something quite different was expected.

The original society of this name is a United States institution. The one we have in Canada is an offshoot from it, and is independent of it, in the operation of its insurance department. Concerning either the American or Canadian body, as mere temperance associations, we hear very little. Every one desiring to be insured in it, however, must belong to the secret society called the Royal Templars of Temperance, and get raised to the Select Degree, in which the insurance benefit is met with. This is the rule on both sides of the line. The respective headquarters of the two societies are at Buffalo and at Hamilton. The membership of both of them seems to be on the wane at present, both in the ordinary councils, and in the select degrees. The cause of this is not far to seek. Active competition from other kindred societies is having the usual effect on both the temperance and insurance branch, and in the latter department the death losses are beginning to come in at an alarming rate. The indications are that heavy assessments are just ahead, consequent upon too much confidence being reposed in the superiority of temperance lives, and too little care being given, on that account perhaps, to a rigid medical examination. When the examiner gets only a dollar, it is not common sense to expect that he will give five dollars' worth, or even three dollars' worth, of his time to studying up the history of the party, and closely determining his chances of long life, as he does when paid for guarding the door of the regular society.

The parent society was organized in 1877, and has therefore been about sixteen years in operation. Under the usual light death losses experienced by all societies during infancy, it attained to 15,000 members in the first seven years. Since 1884 its assessments, not its membership, have been persistently increasing, almost year by year, until the ardor of many has grown cold. The membership is now decidedly on the wane, but not so the assessment calls. The following is the record for the past ten years of the American insurance branch, apart from working expenses :—

Year	Members	Cost per Life
1884	15 113	$ 7 09
1885	14 530	9 00
1886	15 139	10 00
1887	14 065	12 00
1888	14 860	11 11
1889	15 791	10 33
1890	15 133	12 20
1891	13 698	15 88
1892	12 682	17 82
1893	12 957	19 86

Turning now to the Dominion branch of the order, we find that it has been a child of slow growth, and has now only about one-third as many members enrolled as the parent body numbered ten years ago. It started off by itself, some ten years ago, upon a different and much more sensible basis than the other-side-of-the-liners. Instead of calling for $1.00 per $1,000 at each death, supposing the member to be from 50 to 55 years of age at entry (or 50 cents if from 15 to 25 years of age), they adopted a regular monthly premium. If the applicant were 16 to 25 years of age, it was 50 cents per month, or $6.00 per year, for $1,000. If 45 to 50 years old, then 85 cents per month, equal to $10.20. And then five cents per month, equal to 60 cents per annum, was charged for working expenses in that department. Of course there is an entrance fee of $5.00, and the usual lodge dues and expenses to pay besides. By this plan of fixed monthly payments, a small surplus fund was soon created, so that no extra assessments have been needed, and none have been called, until lately. About a year ago, seeing that the fund was not growing as it was expected to have done, an assessment of one dollar was ordered to be paid by every member who did not bring one successful applicant into the degree. This created much controversy, and the result does not appear to have been very beneficial. Instead of rapidly increasing, both the fund and the membership seem to be in a sort of balky mood. In November, 1893, there was a surplus of $64,155 on hand, and in August last, $72,533. But the last published report shows only $60,517. The receipts for the past month were only $5,412, while the outgo for death losses was no less than $13,300. It would spoil things to have many months of that sort of experience. We purpose giving further attention to the society shortly.

CANADIAN LAKE GRAIN TRAFFIC.

A paragraph which emanated from Buffalo a week ago has been going the rounds of the papers in the lake cities. It is to the effect that the vessels of the Canadian lake marine have not had much benefit from the Manitoba wheat crop the past season :

"Shipments of Manitoba wheat by way of Port Arthur and Fort William were 8,400,000 bushels, but 90 per cent. of it was carried in American bottoms to Buffalo for export via New York and Boston. Hitherto the Canadian export via Kingston and Montreal has had a fair share of the carrying of Manitoba wheat, but this season the Americans have absorbed practically all the business. Duluth took 1,000,000 bushels of the Manitoba crop and ground it into flour, and shipped 2,500,000 bushels. This makes the total Manitoba crop moved this fall 12,000,000 bushels."

While the paragraph is not entirely true, there is much more truth in it than is pleasant for Canadians to admit. "Practically all" the wheat did not go to American bottoms, and "90 per cent." did not go to Buffalo. There were at least a dozen Canadian vessels carrying Manitoba wheat during the season of 1894. The "Rosedale" and "Algonquin"; the "Bannockburn" and her consort; the "St. Magnus" and "Acadia," the two Canadian Pacific Railway steamers, the "Alberta" and "Athabasca," and two Beatty line boats. Take an average of the trips and capacity of these, say 114 trips in all at 40,000 bushels each trip, and we have 4,560,000 bushels carried eastward by Canadian bottoms on the lakes, which is close on 40 per cent. of the Manitoba wheat crop moved.

That the Americans should be able to divert to their routes and ports so much of the produce of our fields after we have made such heavy outlays upon our St. Lawrence route to the sea, is not a pleasing fact to contemplate. The Americans have larger boats on the lakes than we, and can carry grain in greater bulk and therefore cheaper. Then we are handicapped by what may be termed stationary rates at the eastern end of our lake route. Steel steamers, 400 feet long, to draw 18 feet of water, to carry 4,000 tons, are, according to the *Marine Review*, among the coming monsters of the lakes to ply between Duluth and Buffalo. This surely means low grain freights. And if the Americans will carry Canadian grain cheaper to tide water than we will, there can be nothing more certain than they will get it to carry.

TORONTO TRADE FIGURES.

Cautious importing is indicated in the Toronto figures of the Board of Trade for November last. The total of imports, $1,193,448, is below that of the previous November, which was $1,277,401. Both free goods, $367,940, and dutiable goods, $805,765, are less in amount than in November, 1893. The aggregate of dry goods is smaller than usual, even for November; while the imports of metals and their manufactures are down to the low total of $105,937. Books, delf, leather, spirits, wines, fruits, all show decreased imports. Jewellery, glassware, drugs, pianos, paper, an increase.

IMPORTS.

	Nov., 1894.	Nov., 1893.
Cotton and manufactures of	$34,462	$34,973
Fancy goods	32,263	34,781
Hats, caps and bonnets	8,688	4,929
Silk goods	28,222	28,079
Woolen goods	36,706	52,514
Total dry goods	$140,341	$155,276
Brass and manufactures of	$ 5,487	$ 5,347
Copper, "	324	2,837
Iron and steel "	86,718	117,285
Lead "	4,471	6,399
Metal and composition	8,937	11,184
Total metal goods	$105,937	$143,052
Books and pamphlets	30,803	45,668
Coal, bituminous	25,708	28,841
" anthracite	106,389	116,161
Drugs and medicines	20,727	15,800
Earthen, stone and chinaware	17,637	20,200
Fruit, green and dried	62,606	66,785
Furs, dressed	10 577	10,875
Glass and glassware	31,669	30,453
Jewellery and watches	41,432	22,517
Leather and manfrs. of	17,838	18,922
Musical instruments	15,357	12,155
Oils, various kinds	9,667	15,440
Paper and manufactures of	34,452	27,736
Spirits and wines	9,192	10,495
Wood and manufactures of	9,698	20,750

Among the free imports anthracite coal bulks largely, $106,389. Raw materials of manufacture under this head include broom corn, $11,640; raw cotton and cotton waste, $5,050; hides and skins, $7,272: jute cloth, $2,780; free metals, $29,557; leaf tobacco, $6,760; wool, $13,913. Other free items are coffee, $17,675; dyes and chemicals, $29,889; raw sugar, $10,810; tea, $48,807; coin and bullion, $19,743.

EXPORTS OF CANADIAN PRODUCE.

Produce of	Nov., 1894.	Nov., 1893.
The Mine	$.....	$ 70
" Fisheries	.....	.....
" Forest	17,652	55,519
" Field	193,521	67,785
Animals and their produce	256,159	146,134
Manufactures	80,925	64,487
Miscellaneous	104	.....
	$548,361	$333,995

Analyzing the returns of Canadian produce exported, the largest item by far in the list is cured meats, $192,785; wool is not inconsiderable, 202,690 pounds, valued at $39,705, or rather less than twenty cents the pound; horses, 51 in number and $9,045 in value, that is, about $180 apiece. Canadian barley exported makes $77,279, rather less than 44 cents the bushel, but the quantity is four times as great as in the previous November; green fruits, $12,752. The only prominent item in manufactures exported is leather, $52,612. What the "other articles" under this head are we are left to guess.

MONTREAL BOARD OF TRADE.

A large gathering of members assembled in the Montreal Board of Trade rooms on the occasion of the presentation by that body of a portrait of himself to Mr. Robert Archer, who has been treasurer, vice-president, and president. An address, signed by the officers of the board, accompanied the presentation. It recorded the appreciation of Mr. Archer's labors in bringing about the amalgamation of the Board of Trade and the Corn Exchange Association, and it eulogized his efforts in connection with the erection of the present structure, "without which the Board would, in all probability, still be without a building of its own."

Addresses were made on the occasion by Mr. J. P. Cleghorn, Mr. A. G. Thompson, and Mr. E. B. Greenshields. Said the last-named gentleman, in speaking of the days not long ago when the merchants of Montreal used to ascend two flights of stairs to the bare rooms that were dignified by being called the Board of Trade rooms: "There was no artistic beauty in them, and not much convenience. But it must not be supposed that these men were in any way unworthy successors of the merchants of the past, who laid the foundations of the Montreal of to-day. No, far from this was the case. The desire for a proper home for the commerce of Montreal was there, but it was latent—waiting for the spark of fire from some energetic nature, to kindle it with such enthusiasm that every difficulty in the way would vanish The hour came at last, and the man appeared in him whom we are here to-day to honor, Mr. Robert Archer. When I had the pleasure of presiding at the ceremony of laying the corner stone of this building, I said then, and I wish to repeat it now, that to carry to a successful conclusion a great work like planning and making all the complicated arrangements for such a building as this, it must largely be the work of one man, who must have leisure, energy and capacity, and make the work his sole object in life for the time. That is what Mr. Archer did, and he rejoices now to see his labors crowned with success."

Mr. Archer acknowledged that he was gratified by the appreciation shown of his efforts, and said the address would be greatly treasured by him. "Whilst thankfully accepting the portrait, I must ask the board to take charge of it, for my domicile is not capable of holding such a large picture, nor of holding two Robert Archers—(laughter)—so that in after years, if some one should ask, 'Who was Robert Archer?' the oldest member might reply, 'an old-time bachelor member of the board who worked hard to marry the Board of Trade with the Corn Exchange Association, and to provide the united bodies with a commodious home, while he either forgot or failed by any amalgamation to make a home for himself.' He thanked them for their generosity and kindness."

The president, Mr. W. W. Ogilvie, made a brief address in accepting the custody of the portrait on behalf of the board.

QUEBEC BOARD OF TRADE

The annual meeting of the Quebec Board of Trade was held on Tuesday last, 11th December, the president, Mr. E. B. Garneau, in the chair. A review of the work done during the year by the board was given by the chairman, who referred to the death of his predecessor in the presidency, the late Mr. Thomas Brodie, and availed himself of the occasion to pay a high tribute of respect to the memory of the deceas in The election of officers for the current year took place, and resulteded the re-election of Mr. Garneau as president. Hon. John Sharples and Mr. E. Pelletier were chosen vice-presidents.

THE LATE JAMES STEVENSON

It is but a few months since we had occasion to notice the appointment of Mr. Thomas Macdougall to the position of assistant to the general manager of the Quebec Bank, whose advanced years and weakened health made necessary some delegation of his duties. We have now to announce the death of the general manager himself, Mr. James Stevenson, which took place at his residence in Quebec on Saturday last, 10th instant, in his 82nd year.

Very little more than a year ago, in the columns of THE MONETARY TIMES of 3rd November, 1893, a well-authenticated sketch was given of the career of this Nestor among Canadian bankers, and at the same time a portrait of him was furnished to our readers. Mr. Stevenson's father was a merchant in Leith, Scotland, who was, like his son after him, a man of marked individuality. He was a genius, with a turn for mechanics, and among other things invented a machine for cutting down trees, which he thought should have a wide field for use in Canadian forests. In the early thirties of the present century he emigrated to Canada and secured an appointment in the Crown Lands Department.

His son James was taken from the High School at a very early age and sent to the Continent, where he studied languages, becoming proficient in both French and German. In 1836 he followed his father to Canada, and became under-secretary to the Governor, Sir Francis Bond Head, at Toronto. Next we find him in the Crown Lands Department at Quebec. In the year 1839 he entered the service of the Bank of Montreal, and was given charge of their agency in Bytown, now Ottawa. Afterwards he managed in succession the branches at Brockville, Hamilton, Toronto and Quebec. In 1864 he left the service of the Bank of Montreal and accepted the position of chief executive officer of the Quebec Bank, which he held for over thirty years.

It is related of the deceased gentleman that in his earlier years he showed very little disposition for the routine of indoor office work, preferring the life of a farmer or a country gentleman. But having adopted the profession of banking, he resolved to stick to it, to study its theory and practice, and to get, as he expressed it to a life-long friend, "to the top of the tree." That he accomplished his resolve, and that he did honor to the responsible and influential position he attained, is well known to all who are familiar with the current of Canadian banking life. As a youth he had great taste for drawing and painting, and he used to frequent the studio of a celebrated Scottish painter of sixty years ago, Rev. Jno. Thomson, which was hard by Duddingston, the residence of the elder Stevenson. The pressure of events, however, led him away from artist life, though he devoted many of his leisure hours to the study of literature, art and history. Some valuable fruit of such studies is to be seen in the papers on historical subjects he contributed to the transactions of the Literary and Historical Society of Quebec, whose president he was during the years 1876, 1877 and 1878. Among these papers were the following, all of which were published, viz.:

"Currency with reference to Card Money in Canada during the French Domination."

"The Currency of Canada after the Capitulation."

"The Cause of and the Commencement of the War between Great Britain and America in 1812."

"The War in 1812, in connection with the Army Bill Act."

And we believe that at the time of his death he was engaged upon further pamphlets in similar directions. It is of interest to recall, in connection with his fondness for out-door life, the circumstances under which Mr. Stevenson became an enthusiast in the game of golf. He was one of a number of gentlemen, among them the late Mr. Farquharson Smith, manager of the Bank of British North America, who introduced the game at Quebec in 1873. A club, consisting of influential men, was formed for play over the "Cove fields." Mr. John Scott, now of St. Joseph street, Toronto, had just come to Quebec from Edinburgh, and he, being an old golfer, with his two sons, who were also adepts at the game, assisted in giving the game a great impulse in the community. For twenty years Mr Stevenson was a regular player of this game, now so fashionable. "He made it a daily duty in the season," says Mr. Scott, "to play a game before dinner; it improved his health, gave an appetite and improved his spirits. In the words of Mr Stevenson himself, expressed to the writer a year ago "the game of golf is specially suitable to those whose occupations are more or less sedentary. The healthful but not violent, exercise over breezy downs invigorates both mind and body, conserves the memory and preserves the faculty for sustained mental work to an advanced stage of life. That he preserved his physical and mental vigor to his eighty-second year, appears as a testimony to the value of this fine recreation.

There was something in the personality of Mr. Stevenson which attached men to him—especially young men, for whom he had a fondness. Not only was he entertaining as a result of culture and travel, but he showed at all times geniality of disposition and the faculty of making himself agreeable. In an official capacity, while firm in his business regulations, he was no stern martinet to his staff. In fact one secret of the loyalty and affection for him shown by various gentlemen who served under him was his frankness and courtesy towards them, where other persons in his position would have deemed it necessary to be distant and cold. Among those who are proud to recall their service under him in the Quebec Bank are Mr R H Bethune Mr D R. Wilkie and Mr H C. Hammond, each of whom has made his mark in our financial world.

LOAFERS OR PRODUCERS, WHICH

We are not, as yet, greatly troubled in Canada with the juvenile loafer. Our city streets, while they have some rather foxy-looking newsboys, do not show faces of the villainous, wolfish stripe that pervade larger cities in other countries. We have, however, a small and menacing vicious class whose surroundings are of the sort that breeds and trains thieves or burglars. Suppose a boy in our midst, miserably poor, without parents or guardian, shall we leave him to drift downward? Is it not better for the community that he should be looked after and trained? It is for such that the Ontario Industrial School is intended—to make of incipient thieves or beggars farmers or tradesmen.

The late William H. Howland had a warm heart for lads of the sort we are thinking of. He knew them well, and said on one occasion "If we in this community do our duty these lads will not become criminals, sadly though they were drifting towards it before we got hold of them. These children whose happy voices you hear (this was in the playground at Mimico) are not criminals; no boys of such tender years are criminal. Idleness, lack of parental control, evil associations, might lead them or let them drift into becoming law-breakers. But here in this country school we strive to lead them, by kind restraint, by loving inducements, to better things. They will become, they have already become, producers: by-and-bye they will be farmers or tradesmen."

It is a sight that never fails to please the visitor, to see the lads of this Industrial Home at work on its fields, in the dairy, in the workshops, or still more with their band, or in their cosy reading room. Here they may be seen at drill, or making shoes or milking cows, where previously they starved by day and shivered by night, smoked stumps of cigars at the corners of the streets, "prigged wipes" or sneaked fruit from the market stalls. In the coming Christmas time the generosity that aims to make somebody happy may find a fitting avenue in a cheque for the purposes of the Ontario Industrial Association; in books, pictures or toys for the inmates of the school. Many a one who would like to honor the memory of Willie Howland will, we feel sure, need only this suggestion towards the encouragement of a design which for years was one which he best loved and worked for.

CURRENCY REFORM IN THE STATES

In view of the endorsement given to the Baltimore plan of currency reform by the Bankers' Association of the United States, and of the advocacy for several years by Mr. Cornwell, of Buffalo, of the approximation of the United States banking system to that of Canada, some extracts from the circular sent by that gentleman to the members of the New York State Bankers Association of which he is president may be of interest. He desires the members to attend the group meetings and take part in the discussions of currency reform which will be the prominent topic brought forward. "The importance of this question to every bank large and small cannot be over estimated. Rates of discount and exchange, amount of business, extent of profit, temporary earnings these are small matters compared with the question of sound health or disease at the very source. The prosperity of every customer you have and the consequent success of your own institution is based on soundness of the currency. I therefore take the liberty of earnestly requesting you to give this subject your careful attention and investigation, and to go to the meeting prepared to aid by your presence

and your vote, and if possible by your remarks, in the determination of this grave problem." The circular adds: "I do not desire to do more than call your attention to the general necessity for action by the bankers of the New York State Bankers' Association—action which I am sure will have much influence on the sentiment of the business men here and in other States and upon Congress."

GOODS FROM THE RAMIE FIBRE.

Samples of goods such as yarns, fringes and cloth made from the ramie plant are soon to be placed upon the market, and that by an American concern. When this is done an important step will have been taken in the direction of permanently placing ramie along with cotton, hemp, silk, wool, hair and like staple materials of industrial use. A correspondent has forwarded to the Philadelphia *Record* a sample of ramie fibre which has been freed from all resinous or refractory substance by a process so cheap as to make it certain that it must be largely used as a raw material. The ramie is stripped and degummed in a few minutes after having been submitted to heat and chemical action, and is afterward, says our contemporary, bleached to a beautiful white color without the aid of chlorine or other bleaching substances which destroy the strength and gloss of the prepared fibre.

We are further informed that a plant has been built, and is now ready for operation, in Albany, N.Y., which will consume ten tons per week of the raw material ; and samples of not only yarns and fringes, but of cloths and gloves, will soon be upon the market. The strength of the fibre, which it seems is greater than that of either flax or silk, will make the ramie invaluable for admixture with other animal or vegetable fibres for fire hose, rope, car wheels and thousands of other purposes where strength and durability are desirable qualities. Experiments have been going on for a long time in different countries aiming to treat this fibre so cheaply as to bring it into the market for textile purposes generally It promises now to prove a valuable addition to the textile fibres.

MANITOULIN ISLAND.

The large and fertile island of Manitoulin in the Georgian Bay continues to show gratifying progress. We have been furnished by an official, resident on the island, with some facts and figures illustrating this progress, which we shall presently quote. The season of navigation has just closed, and the inwards and outwards trade of the various harbors can be ascertained. The exports and imports of the principal ports at Manitoulin Island for the season just closed are as follows: At Little Current the exports consisted of 700 tons hay ; 10,500 bushels grain ; 900 head stock ; while the imports included 2,486 tons of various merchandise. Gore Bay exported 13,000 bushels grain ; 1,700 head stock ; 200 tons assorted merchandise ; 400 tons hay ; 10,000 bushels potatoes ; and imported 2,000 tons merchandise. The exports of Manitowaning were 227 tons merchandise ; 3,053 head live stock ; while there were imported 1,511 tons merchandise and 45 head thoroughbreds. Imports of merchandise to the island were thus in the neighborhood of 6,000 tons, and exports aggregated 23,500 bushels grain, 10,000 bushels potatoes, 1,100 tons hay, 427 tons various products, 5,653 head of animals. These figures, we are told, do not include some hundreds of thousands railway ties and a large quantity of lumber from each of the ports.

NEW YORK LIFE INS. CO.

The management of this very prominent company is determined that its affairs shall be investigated fully. Although it is but three years since they were examined by the New York Insurance Department, we have now before us the results of four months' investigation, entered upon at the request of the company in 1894, by the Insurance Commissioners of seven States, namely, those of Massachusetts, Illinois, Kansas, Kentucky, Missouri, Ohio and Texas. The search has been thorough and the report thereafter is very favorable.

It is certified by these experts that the company possesses assets satisfactory to them to the amount of $155,453,000, and that after deducting all its liabilities, including reserve for policies outstanding, at 4 per cent. interest, and deducting from the assets agents' balances, the company's net surplus for policy-holders at 30th June, 1894, was $17,329,064. It is in the highest degree satisfactory to have the strength and soundness of the company reaffirmed upon such competent authority. Much that is complimentary is said in the report about the management of the New York Life, And truly it must have been able management to have rolled up inside of fifty years receipts from policy-holders equal to $345,000,000, to have paid to policy-holders $192,000,000 and to have $155,000,000 on hand, seventeen millions of it surplus. Its expenses to-day, it appears, are met out of interest eceipts.

What we should like to see Mr. McCall do now would be to put a stop, so far as the influence and example of the New York Life can go, to the reprehensible practice indulged in by agents of the largest life companies of the United States, of rebating premiums. It is of vastly more importance to the real character and status, and to the future earning power of such great organizations, to have a clean record in this respect, than to have done "the biggest business in the world" or written "the most new business in a single year."

MICHIGAN CENTRAL RAILWAY.

Discussing railway and other matters in its "Topics of the Week,' the *United States Investor* of December 8th says that in certain quarters a good deal of dissatisfaction has arisen over the management of H. B. Ledyard, president and general manager of the Michigan Central. It goes so far as to say that the time is near at hand when a systematic attempt will be made to retire him from his position. "There is not the least doubt," comments the writer, "but that the policy which Mr. Ledyard has pursued in the management of Michigan Central affairs has made him many enemies in and out of Wall street. One very prominent banking house in particular is mentioned in this connection, the opinion being expressed that its head would like extremely well to see Mr. Ledyard removed from the presidency. This hostile feeling is said to have had its inception in the Detroit, Bay City, and Alpena deal, which road President Ledyard is reputed to have unloaded upon this house under conditions which have proven anything but profitable to it. The result has been, as is well known, that the road was sold under foreclosure on November 8th, 1894, for $1,000,000 to representatives of the bondholders. The road is so productive as to return a handsome deficit annually, and is simply a streak of rust running through an almost worthless country, from which the timber has been cleaned off, and which is of little or no value for farming purposes. As to whether the banking house alluded to is in any way interested in the removal of President Ledyard, I am unable to learn, but if it is true that some unpleasantness has arisen between its head and Mr. Cornelius Vanderbilt (and this is said to have existed ever since the former sold to the latter a large block of General Electric at around 90), then its reported position in relation to President Ledyard would appear particularly significant."

DOMESTIC REFINERS HARD PRESSED.

The sugar market has been a falling one for some considerable time. When prices were low in the early summer refiners' agents said, "Wait until the fruit season begins and the market will surely stiffen." The fruit season, however, altered the situation but little, and at the most but delayed for a short time a further decline. At present the outlook for domestic refiners is not of the brightest. German granulated sugars appear to be steadily gaining ground and have done much to depreciate the value of our domestic granulated. Sales of extra granulated from jobbers' hands are reported at $3.95 per 100 lbs. this week. We have been unable to obtain the figures at which these sugars were purchased from the refiner's agents, but have reason to believe that the price paid was a very low one. It is almost certain that we have not yet reached the bottom in regard to sugar values. The importation of foreign granulated sugars is as yet in its infancy, and will with time, it is reasonable to expect, be conducted with greater economy. Jobbers estimate that they will soon be able to sell the trade German granulated at 3⅝c. the pound, which is certainly a low price in consideration of a duty of 64c. per 100 lbs. These sugars are imported for the most part *via* New York.

As yet the markets of the United States have not received any very great quantity of German granulated sugars, thanks to the influence of the American Sugar Trust and an uncertainty as to the tariff. In referring to foreign granulated sugars, the *N.Y. Journal of Commerce and Commercial Bulletin* says: "Confectioners generally prefer the Dutch sugars, which are made from cane products, and the German, made from beet, goes into hands of the general trade. There is said to be quite a large quantity afloat for this country, but a rumor prevails that the Trust, through its European agent, has obtained an option on balance available for this country, with an idea of shutting off competition, while our markets for refined are in the present demoralized condition. Computations made on the latest qnotations received from Europe show that granulated could be laid down here at 3.56 to 3⅝c., and it is said that deliveries have been made in Chicago at 3¼c., but the latter is believed to have been from old stock imported before the duty. Domestic granulated is worth on present quotations 3.86 net cash "

—Doubtless, encouraged by the success which has attended the opening of branches in the city of Montreal by the Merchants' Bank of Halifax, and by the Bank of Nova Scotia, it has been decided by the People's Bank of Halifax to follow suit. This bank will therefore open for business in that city on the 1st of May next.

NUTS FOR THE HOLIDAYS

The movement of holiday supplies is now engrossing the attention of the grocery trade, and one of the most important items in the movement is that of nuts. Almonds, filberts and Brazil nuts are comparatively cheap this year, Prices of walnuts are also lower than they were a year ago, but in consideration of their inferior quality values are perhaps no lower. Toronto wholesale jobbers quote Tarragona almonds at 11 to 12½c. according to quality; Sicily filberts are worth from 8 to 9½c.; quotations place Marbot walnuts at 12½ to 14c and Grenoble at 15 to 16c the pound Stocks of walnuts show exceptionally poor quality and jobbers say they have not had so much trouble with these nuts in five years past. The favorite walnuts come from Grenoble, France. The crops of this section have been very light owing to unfavorable weather, and the *N. Y. Journal of Commerce and Commercial Bulletin* estimates the yield at between 5,000 and 6,000 bales, with 15,000 bales a fair average. "The crop of 'French,'" says the *Bulletin*, "was also short because of the weather, estimates of quantity gathered being placed to not exceed 50 per cent. of an average." This class of nut is not in favor here owing to its poor keeping quality, the meat usually becoming rancid as the goods are carried in stock and warm weather approaches." . . . "The crop of Naples this season also showed a heavy deficiency."

"This class of stock stands next to Grenoble in the estimation of our importers, as the goods are of uniform quality and can be carried for any reasonable time without fear of depreciation. The importations this season have aggregated 7,981 cases and 1,565 bbls., the greater portion of which quantity has already been marketed." . . . "Chili have met with a good sale this season, and prices in sympathy with other lines have shown a hardening tendency," . . . "The California crop the past season has been placed at about 250 cars, or a quantity say equivalent to 3,750,000 pounds."

FOR DRY GOODS RETAILERS.

Maroon and wood are two good shades on plain silks for winter in Paris.

In overcoatings black beavers have been most in request, with blues a good second.

Blue serge, which for so long held its own for every-day or walking wear, has been replaced in Paris this year by black cloth.

The value of the exports of manufactures of silk from France in the first ten months of 1894 has been 193,300,000 francs, against 194,054,000 francs in 1893.

The assets of the Royal Corset Company of Sherbrooke have been sold at 45½c. on the dollar to W. H. Griffith, and a new company is being formed to continue the business.

Soon the Christmas rush will be with us. Is it to your advantage to have a boy stationed at the door to open and close it, to answer questions, and tell where this and that may be found? He may perform services which otherwise would demand the time of a more valuable assistant.

The production of the new opera "Rob Roy" has instituted a craze for everything Scotch. Toronto dealers in men's furnishings, as well as the merchants of New York, are displaying tartan plaid neckwear. A window, when dressed with these goods, is very attractive But not every person can wear his particular plaid as a necktie and be conscious of the feeling that his dress is becoming

The cry everywhere, says the *D. G. Economist*, is for crêpons. Special favor is being extended to blacks. The styles which have had the largest sale so far have been the all-wool grounds on which are woven mohair Jacquard figures in small effects. Other designs which have met with fair approval have been furrow-like stripes, the furrow effect being constructed out of mohair yarn, thus giving the material the appearance of being silk and wool

A correspondent of the *Drapers' Record*, writing from Manchester, says: "A batch of Canadians have returned home recently, including Mr. La Rue (Messrs. Thibaudeau's) and Mr. Painchaud (Messrs. Garneau's), both of Quebec, and the following from Montreal: Messrs. J. Slessor, W. Radford, J. Brophy, A. B. Macpherson; from Toronto, Mr. J. W. Wood (Messrs. Gordon, Mackay & Co); Messrs. Bizzey, of Messrs. Knox, Morgan & Co., Hamilton, and Mr. Campbell, of Whitla's, Winnipeg, have also returned home."

Bearing out our remarks of a few issues ago the Manchester correspondent of the *Drapers' Record* writes to his journal: "There is an increasing tendency amongst Canadian retailers to come to this country direct. The practice is one which may be carried too far, as English houses selling goods to the Canadian trade may find to their cost if they are not careful. Houses in Canadian towns no bigger than Chelmsford or Derby send representatives over here as often as firms in great cities like St. Louis or New Orleans. London (Ontario) sends several buyers over but its population does not much exceed 30,000. The example of the larger Canadian towns is responsible for the formation of the retailers' syndicate many of whose members have their accounts sent to Messrs Heron, Jackson & Co. of Glasgow." It is impossible for Canadian wholesale houses to gauge accurately the financial status of every retailer throughout the country how much more difficult must it be for the English merchant to arrive at their true standing? The safest and most economical way to conduct an import trade is to have the goods pass through a few hands. He who makes large purchases is a strong buyer, while one who has at the best very limited requirements is correspondingly weak in the market. If the Canadian importing houses were demanding exorbitant profits there would be good excuse for the retailer to turn his attention to direct importation. But competition renders excessive gain impossible, and it is questionable policy for the retail merchant to divert his capital to direct importation However each case must be decided on its own merits

FOR GROCERS AND PROVISION DEALERS

London advices report a bull movement in cloves there

Sugar continues to sell for little, but jobbers are not alone shading prices; refiners' agents are quoting close figures on both granulated and yellows.

Ten carloads of tea arrived at the Smith's Falls station one day last week, for distribution to various points. It was part of the cargo of the "Empress of China," and consisted for the most part of Japan tea

J. K. Richardson, a Fergus egg packer, has gone to Glasgow. He took two carloads of eggs with him, and while in Scotland will see what can be done in the way of extending the shipment of Canadian eggs to that country

St. John merchants complain that the I.C.R. authorities discriminate against them in the matter of apple shipment. A barrel of Nova Scotia apples weighs 140 lbs., while those packed at Ontario weigh 165 lbs., yet they say the freight rate is the same

Values of hog products are easy and trade is reported slow. Packers are busy in their operations, and in consequence of a number of new factories coming into the market for the first time this season, the output of Canadian establishments will be materially larger than that of previous years.

By mail received from Yokohama, information comes that all the tea houses in Japan have signed a circular stating that in consequence of enhanced cost of labor and tea-packing material, they will find it necessary to increase firing charges 50c. per pecul, and should the war continue a still further increase may become necessary

An important deputation waited the other day upon Hon. Mr Beaubien, Commissioner of Agriculture, for the purpose of asking the necessary encouragement to successfully export butter to Europe. Amongst those taking part in the deputation were Messrs. V Chateauvert, M P P, Macdonald, M P P, Jos Girard, M P P, Baker M P P Bernatchez, M.PP., Tache, Chapais, Guay, etc. They desire a subsidy to encourage the export of butter from the Local Government, and will send a deputation to Ottawa to ask the Federal Government for aid to have cold storage on board outgoing steamships.—*Quebec Chronicle*

There has, however, been a little business consummated to-day, which serves to give an approximating idea of values, and we note sales in bond to Canada of 2,000 bags centrifugal, 2⅝c for 96 test, and 1,100 bags molasses sugars at 1½c for 89 test And a cargo of 800 tons Demerara centrifugal to come to a local outside refiner at 11s cost and freight. Live shipment this month, which is figured as equal to about 3½ to 3.27c., duty paid for 96 test. Previously there had been sales at Demerara to England of some 3,200 tons at 11s 1½d down to 11s 3d The stock of sugar in four ports of United Kingdom is 57,000 tons against 71,000 tons same time last year.—*N Y Bulletin and Journal of Commerce, 12th inst*

METAL AND HARDWARE TRADE NOTES

Shavings are coming into demand for bed and mattress filling, and the Wisconsin planing mills have struck a bonanza in packing them like hay and sending them all over the country

According to *The London Engineer* the Paris Lyons and Mediterranean Railway is now building sixty electric locomotives, each capable of drawing eight hundred tons at a speed of fifteen miles an hour, and also a number of motor cars

It is stated that Mr Thomas A Edison has already expended nearly $1,000,000 in his experiments to find a commercial method of reducing low grade ores by electricity Should he finally succeed it will be his greatest electrical invention

Letters patent have been issued incorporating Eugene Tougas

trader; Paul Chartrand, Adelard Hebert, Pierre Alexandre Lariviere, carriage manufacturers, all of Montreal, and Israel Charbonneau, of Saint Louis of Mile End, by the name of "La Compagnie de Carosserie de Montreal," with a capital stock of $100,000.

Asbestos is used in paints, roofing, and building materials as a non-conductor of heat, for steam-packing, for fireproof cements, for tubing, for shovels, fork-tines, cloth, rugs, cord, and sewing thread. In the household it is now made into hearth-blowers, stove-polishers, mats, sadiron rests, and for baking-paper. It will come in time, no doubt, to furnish fire-proof handles, aprons. carpets, and a dozen other things.

INSURANCE ITEMS.

The fire which consumed the Owen Sound Portland Cement Co.'s works at Shallow Lake has been investigated by Mr. Palmer, J.P., assisted by Mr. R. J. Doyle, J.P. Some of the officers of the company have been examined and interesting testimony given. One arrest has already been made, and it is quite possible others will be made at an early date.

At a meeting of the Huntingdon village council last week the fire engine committee reported they had attended tests of the Shand & Mason, Merryweather and Ronald engines. Their opinion was that taking into account price, efficiency, weight, etc., the choice was between the Waterous and Ronald engines. The secretary was instructed to ascertain the cost of a new Waterous engine, a size larger than the Magog engine. Furthermore, the secretary was asked to enquire from Mr. Ronald regarding the second-hand engine offered and also the cost of a new one.

The oldest annuitant of the Mutual Life of New York is dead. His name was Joshua Hobrough, and he died a few weeks ago at Sorel, aged one hundred and two years and six months. On December 4, 1865, Mr. Hobrough applied to the Mutual Life Insurance Company for an annuity. He was born in Yarmouth, England, March 28, 1792. At the age of 74 he applied, desiring to deposit with the company the sum of $500. In the following March he increased the amount to $700. The Actuary found that Mr. Hobrough had an expectancy of life of seven and one-third years, and it was agreed to pay the annuitant $65.50 semi-annually, or $131 a year. His account with the company has been balanced and it shows:

Paid to the Mutual Life of New York	$ 700 00
Received in annuities	3,739 20
Profit to annuitant on the transaction	$3,039 20

The actuary's mortality table assumes everybody to be dead at ninety-six. The combined actuaries' experience tables raise the limit of life to ninety-nine. Mr. Hobrough continued to draw his annuity with becoming regularity, and at the age of one hundred years receipted personally for the money at the office of the company. He receipted for the last payment on June 4, 1894, he then being one hundred and two years and two months of age.

BOOKS AND STATIONERY.

An ingenious piece of mechanism is Anderson & Blackhall's embossing machine and illuminator, driven by power. It is extremely rapid in its operations and does more satisfactory work than Johnston's or any other, according to the testimony of New York and Chicago stationers and printers who are using the machine. We understand that it has been patented in Germany, France and England, as well as in the United States.

Office managers and bookkeepers generally have hung in front of them indexes, calendars, memorandum pads and perhaps half a dozen little files. These things all have their own hooks, and as a rule occupy all available space. What appears to be a useful affair, attractively gotten up, is that invented by William Wedd, jr., to be a convenience for the person who has date-computing to do. It is a card about a foot square, on which is printed in large type a table, by means of which a person can tell at a glance the number of days from any date to any other date. A person who has much of this work to do will find this table convenient.

A very satisfactory fifty cents' worth is given in the Christmas number of *Saturday Night*, published by the Sheppard Company, limited, of Toronto. The leading story is by Robert Barr, better known as Luke Sharp, of the Detroit *Free Press*. The scene is laid in Canada, and the illustrations are capital. Other stories are: Why Johnnie Went Back, by Edmund E. Sheppard; Le Loup Garou, by Clifford Smith, of Montreal; and An Heroic Imbecile, by Joe Clark. There are illustrated poems by J. W. Bengough and others. Three pictures are given away with the number, and "Charmed by the Song Bird" is after a painting by George A. Reid, the Canadian artist.

BOOKS RECEIVED.

RAILWAYS AND OTHER WAYS: Being the Reminiscences of Canal and Railway Life during a period of sixty-five years, by Myles Pennington.—This book, to be issued this week by Williamson & Co., Toronto, so far as one may judge of it from the earlier pages, and from the preface and index, must prove of extreme interest to railway and commercial men, and to all readers, indeed, who take an interest in the rise and progress of Canadian railways. Its author was the first general freight agent of the Grand Trunk Railway, and he has given sketches —and portraits—of Tyler, Ross, Gzowski, Brydges, Muir, Broughton, Tiffin, Weatherston, Seargant, Stephenson, Callaway. and scores more who have been prominent in railway circles, the Grand Trunk especially. It is to be a handsome book of 400 pages, with good paper and good typography. The subscription price is $2.50 and $3.50 according to binding.

A special Canadian edition has been issued by the New York *Coal Trade Journal*. It contains statistics of the eastern coal output, a directory of the coal companies operating in Canada, which are thirty in number, with mines in Nova Scotia, the N.W. Territories and British Columbia. There are, besides, many illustrations of Canadian scenes and cities. The coal production of the entire Dominion in 1893 is given at 3,837,565 tons, of which 2,497,000 tons is credited to Nova Scotia, 1,095,000 tons to British Columbia. One expects accurate information from the *Coal Trade Journal*, and some of the statistics given here are of value. The number is a handsome one.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Dec. 13th, compared with those of the previous week:

CLEARINGS.	Dec. 13.	Dec. 6.
Montreal	$12,099,892	$11,861,838
Toronto	6,091,526	6,818,585
Halifax	1,242,679	1,240,622
Winnipeg	1,285,102	1,349,685
Hamilton	663,609	738,297
Total	$21,382,808	$22,009,027

Aggregate balances this week, $3,299,638; last week $3,177,604

—There are concerns in the United States—let us be careful that there are none in Canada—which swindle credulous folks, and sometimes even business men, in a way thus described: They profess to make loans on real estate at from three to three and one-half per cent. interest, but demand an advance payment, after which they fail to make the loan, and the victim is cheated of the amount of the premium paid. It was a simple game, and to all appearance worked very successfully until some one had courage enough to appeal to the courts. This being done, the manager, secretary and treasurer of a high-sounding swindle in Jersey City, the Mutual Building and Loan Syndicate, who has ruined business men and made sad the hearts of widows and orphans by his false representations, was sentenced by Judge Hudspeth to three years in State Prison. His name is Osmond W. Roper. The safe way is to do business with concerns of established character and honest methods.

—An official examination of the Metropolitan Life Insurance Company was concluded on November 20th by the New York Insurance Department. In his report the examiner, Michael Shannon, compliments the company on the thoroughness of its methods in supervising so vast a business as its industrial department has grown to be. The average amount of insurance on 3,480,000 policies now outstanding is $120, and the average weekly payment is ten cents. He states, we observe, that the proportion of infantile claims paid during the last year was but 4 3-10 per cent. of the total. The soundness of the company's position, and the ability and high character of its management, are emphasized by the examiner, who adds that the company has never made a loss on a collateral loan, and that he has not found it necessary to make any deduction from the value of the mortgage loans of the company, even after the depression of the last two years.

—Dividend for the half-year has been declared by the British Mortgage Loan Company at the annual rate of 7 per cent., and by the Manitoba and North-Western Loan Company at the yearly rate of 6 per cent., and by the Ontario Industrial at 6.

—The sixty-ninth half-yearly dividend of the Canada Permanent Loan & Savings Company has been declared. It is at the annual rate of 10 per cent.

The Investment Annuity Policy
OF THE
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 10 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

HOW ST. LOUIS PEOPLE ADVERTISED THEIR CITY

Editor MONETARY TIMES

SIR—An effort was made by the Citizens' Advertising Committee last summer to place the many attractions that Toronto possesses for tourists before the travelling people of the United States. A guide book illustrating "Toronto and adjacent summer resorts" was published under the auspices of the committee. An article in the August number of the *Review of Reviews*, and numerous other free notices, were given in the American papers as a result of the work of the committee.

We had a larger number of American tourists visit us last season than usual, and there is no doubt that if a well-devised plan of advertising the attractions of our city and summer resorts near by, or actually tributary to the city, was carried out early in each season, the results in the way of a large expenditure of new capital would soon be felt by our merchants and storekeepers.

When St. Louis in 1891 failed to get the World's Fair, and the plum was given to her rival, Chicago, the citizens of the former place did not sit down with folded hands, content only to take what crumbs might fall their way. By no means. They called a mass meeting in the month of May, organized an "Autumnal Festivities Association" for a term of three years, got up a million dollar subscription fund, one citizen starting it with $10,000, an ex-Toronto dry goods merchant giving $1,000 per annum. Out of this fund they gave a bonus of $100,000 to a company to promote the building of a million dollar hotel. This hotel was finished and opened for business in the fall of this year, on the site of the "Old Planters' House."

The committee arranged a most attractive programme for each of the three years, and advertised in the most liberal manner the great city and its attractions for visitors.

They used not only the city daily papers, but 1,700 weekly papers, sent out 100,000 folders each year, had an illustrated "write up" of the city published in *Harper's Weekly*, a 34-page illustrated article in the *New England Magazine*, and in fact kept St. Louis before the public of this continent in a way never before attempted by any American city.

They also established a permanent "Bureau of Information," where information about hotel and boarding-house accommodation, folders, guide books and other hints regarding the city could be had free of charge

By these means St. Louis has gained a large increase of new business, and has earned the title of being the "most aggressively enterprising city in the world."

It seems to me that with the attractions we can offer summer visitors, Torontonians might profit by the example of St. Louis.

For instance, if our various aquatic, athletic and other clubs were to arrange as early as possible in the season their programme of events, and have the particulars advertised in our own and American newspapers, it would have a good effect. We should dredge the long pond on the Island, so that it could be used as a rowing or canoe-racing course. We could then get up two or more professional races during the season, which would attract large crowds to the city; we would then have a first-class course for all of our amateur aquatic sports.

We ought to extend the period of holding our Industrial Exhibition to say four weeks instead of two; people would then come in and stay a week, where now they only remain a day.

Then as to advertising, it is no use to "hide our light under a bushel." If we have a good thing let the whole continent know it; use our own daily and weekly newspapers, and illustrated papers, and some of the leading American journals and magazines. If this idea of advertising our attractions is carried out faithfully I feel certain that the results will be found so beneficial to all classes of our merchants, real estate owners, and tradesmen generally, that the cost will be repaid ten times over by reason of the increase in the volume of visitors and of business year by year.

I am, yours truly,

PETER MCINTYRE.

Toronto, 12th Dec., 1894.

MONEY AND SHARES

In times of commercial stringency the public usually seek safe places for their money rather than investments ever so promising, which yet are tinged with uncertainty. As a consequence our bank deposits have during the last considerable time been increasing; bankers, on the other hand, have found their fields for investment gradually becoming more limited. The rate on call loans was reduced from 4½ to 4 per cent some weeks ago. The banks have found it impossible to employ profitably all the money deposited with them, and a number have reduced from 3½ to 3 per cent. the rate allowed to depositors A concerted effort is being made to have other banks follow in this action, and it is not improbable that 3 per cent. will before long become a uniform rate. The desire to avoid risk has also led the public to take up with eagerness any municipal debentures on the market, and these securities are bringing good rates and for some time have sold to highest advantage

During the last fortnight the share market has held fairly steady. The death of the Premier might reasonably have affected certain industrial securities, but such has not apparently been the case. It is evidently the general opinion that the policy of the country will not undergo any change at the hands of the new Premier, whoever he may be. Insurance stocks have been strong during the week; Western and British American have been most favorably regarded. Loan company securities, too, have shown no signs of weakness, but, on the contrary, have met with active demand. Bank stocks have been characterized by a firm and steady market. Cable is weak in the face of continued reports of decreased earnings. Bell Telephone remains steady. Montreal Street Railway is strong, but Toronto, as a result of recent developments in connection with the city council, is inclined to be weak

MONTREAL HARBOR TRAFFIC

The number and tonnage of sea-going vessels that arrived in port at Montreal from the opening of navigation up to December 1st in the following years, was as under:

Years.	Steamships	Tonnage	Sail	Tonnage	Total vessels
1891....	631	903,043	94	35,614	725
1892....	658	1,004,396	77	32,311	735
1893....	737	1,128,658	67	23,119	804
1894 ..	684	1,079,313	50	17,596	734

Adding the steam and sail tonnage together, it is found that the number of craft was this year 734, of 1,096,909 tons, as compared with 804 craft, of 1,151,777 tons, in the season of 1893, and 735 craft, of 1,036,707 tons, in 1892. The figures for 1894 reflect the usual dull condition of business all over the world. The sailing craft were mostly barques and schooners, but few ships and no brigs appeared in the list

The revenue of the port shows a decrease from the $294,735 of last year to $252,965 in the present season. The average depth of water, 27.3 feet, in the ship channel is a fraction less than in 1893. Lake and river traffic was less, too.

The number of inland vessels that arrived in port from the opening of navigation up to December 1st, in the following years:

Year.		Vessels.
1891	Arrived	5,267
1892	"	5,190
1893	"	5,244
1894	"	4,666

THE UNION LOAN & SAVINGS CO.

60TH HALF-YEARLY DIVIDEND.

Notice is hereby given that a dividend at the rate of 8 per cent. per annum has been declared by the directors of this company, for the half-year ending 31st instant, and that the same will be paid at the company's offices, 28 and 30 Toronto Street, on and after

Monday, the 7th Day of January Prox.

The transfer books will be closed from the 21st to the 31st instant, both inclusive.

By order,

W. MACLEAN,
Managing Director.

Toronto, Dec. 5th, 1894.

Executors' Sale

BY AUCTION.

NORRIS' ROLLER FLOUR MILL,

ST. CATHARINES, ONT., and the

Steamer "Persia."

Acting under instructions from the Executors of the Estate of the late James Norris, of St. Catharines, there will be offered for sale by

Public Auction

—ON—

Wednesday, December 19

NEXT, AT 2 P. M.

In the Rotunda of the Board of Trade, Toronto, the following valuable properties:

Mills A and B on the Welland Canal, water power never failing, winter and summer, at a cost of only $200 per annum; modern full roller process and in good running order. Capacity 700 barrels daily. Grain storage capacity, 60,000 bushels. Large flour and feed storage. Brick cooper's shop, with sheds for storage of cooperage stock. Also large stone warehouse and dock properties, used for the receiving and shipping of general merchandise by water. Entire premises electric lighted with modern incandescent plant, run by water wheels in mills.

ALSO THE STEAMER "PERSIA."

This favorite passenger and freight propeller is in excellent condition, and is a valuable auxiliary to the mills, enabling the delivery of flour at St. Lawrence River points and the seaboard at very low rates of freight.

AMENDED TERMS OF SALE

For Steamer Persia 20 per cent. on day of sale, 30 per cent. in addition within 30 days, and the balance on December 1st, 1895

For the Mill Property—10 per cent. on the day of sale, a further sum of 25 per cent. within thirty days thereafter. The balance may remain on mortgage on the property, to be reduced by annual instalments of at least five per cent. of the purchase money, until the end of five years, bearing interest in the meantime at 5 per cent. per annum, payable half-yearly.

For further particulars apply to the executors of the late James Norris, St. Catharines, Ont.

PETER RYAN, Auctioneer,

PROPOSALS FOR GAS WORKS.

The Council of the City of Winnipeg, Manitoba, Can., is prepared to receive proposals for the establishment and operation of works and plant for the supply of gas or gas and electric light for the lighting of buildings.

Proposals will be received up to 8 p.m., on TUESDAY, the 22nd JANUARY, 1895, addressed to the undersigned, care of J. A. Platt, Clerk of Committees, City Hall, and endorsed "Proposals for, &c."

The proposals are required to state:

(1) The price to be charged to consumers for each kind of light respectively.

(2) Length of exclusive franchise which will be required. (Any franchise granted, if granted, will be subject to the rights of the present existing company.)

(3) To what extent, if any, shall the city share in the revenue derived.

Full particulars can be obtained by communicating with the City Engineer.

All proposals to be accompanied by marked cheques made payable to the order of the City Treasurer, for one thousand ($1,000) dollars, which will be returned as soon as practicable if the proposals are not entertained. Such proposals as are reserved for consideration will be subject to a further deposit of four thousand ($4,000) dollars; such deposits will be returned to unsuccessful tenderers when final selection is made. The deposit of the successful proposer will be retained by the city until the completion and operation of the works, and will bear interest at the rate of five per cent. In case of failure to enter into a contract or to carry out the works as agreed upon, the deposit will be forfeited to the city and retained by the Mayor and Council as liquidated damages and not by way of penalty.

The right to reject any or all proposals is reserved.

D. W. BOLE.
Chairman Fire, Water & Light Committee.

AN ECONOMICAL STEAM ENGINE.

A few years ago an old beam engine built by James Watt, which had been doing regular daily work for 102 years, was taken down and replaced by a modern engine. The engine was originally a 35 horse power engine and was erected in 1785. In 1795 some alterations were made to enable it to work to 70 horse power. It had a 24-inch cylinder, a 6-foot stroke and sun and planet motion. It worked at 21½ revolutions, or 270 feet of piston speed per minute. In 1875 it was tested by Mr. M. Longbridge, when, with a steam pressure of five pounds per square inch, it indicated 48.72 horse power, with an expenditure of coal of 4.59 pounds per indicated horse power per hour. Only the best modern engines with the same condition of loading would work with two pounds of coal per indicated horse power per hour. One is in doubt whether to be surprised that after a century of endeavor to improve the economy of steam engine working, the progress is so small, or to be proud that so much has been achieved.—*Cassier's Magazine.*

—There is a new fad in town, says the New York *World*. It is to be found in the private stationery of certain college graduates. Instead of placing his family crest at the top of the page, the graduate has engraved a cut of his secret-society pin. This fashion is the outgrowth of the increase in this city of clubs like the Delta Psi, Delta Phi. Psi U., D. K. E., Alpha Delta Phi, &c., having their origin in college secret societies.

MONTREAL MARKETS.

MONTREAL, Dec. 12th, 1894.

ASHES.—The market has ruled very dull of late. Since the close of navigation the deliveries have been only 10 brls. and the receipts 25 brls. First quality pots are quoted at $4.10, second sorts about $3.70 to 3.75, and pearls nominal at $6.50 to 6.75 per cental.

DAIRY PRODUCTS.—The cheese market rules quiet, but on the whole values hold fairly steady, with 10¼c. per lb. about the outside figure for finest Ontario, under grades ranging down to 9c. The "Laurentian," from Portland, took out 5,680 boxes last week. The movement in butter is very moderate, only fine creamery for local trade being at all in active request. We quote finest fall creamery 21 to 22c.; earlier makes, 18 to 20c.; Townships dairy, 17 to 19c.; Western, 14 to 16c. per lb. Eggs are in demand, especially boiling stock, which brings 20c., fresh 16 to 17c., limed 14c. per doz.

FURS.—Raw furs are coming in more freely. The following prices are for prime skins, and are liable to reduction after the New Year. We quote: Beaver, $2.50 to 3.50; bear, large, $15 to 25.00; do., cub, $3 to 8.00; red fox, $1 to 1.50; marten, $1 to 1.40; fisher, $5 to 6.00; coon, 25c. to $1; otter, $7 to 11.00; skunk, 25c. to $1.25; fall rats, 8c.; kits, 3c.; mink, $1 to 1.50; lynx, $1.25 to 2.25.

MONTREAL GRAIN STOCKS IN STORE

Peas, "	24,816	28,267
Barley, "	7,412	8,636
Total grain	946,209	931,332

GROCERIES.—Sugars are again a point easier, and though granulated is quoted at 4c. per lb. at the refinery, and so sold for ordinary lots, fair orders are booked at a sixteenth under, and it is said a round lot has been done at 3⅞c. In yellows the range is from 3 1-16c. for darks to 3⅝c. for creams, though an extra dark lot or two have been sold at 3c. We have seen some samples of West India grocery raws, brought in from New York, which are being jobbed at 3½ to 3¾c., and seem good value. These goods come in bags, which is an objection with some buyers. Some further moderate orders for German beet granulated have been placed, calculated to cost about $3.40 per cental laid down. Molasses is firmer, if anything, and one or two holders of straight Barbadoes are declining offers till February, when they expect to get 30c. per gal. in quantity. Local trading in teas is quiet, but there are enquiries from Toronto, Hamilton and London, and some moderate shipments of medium grade Japans have been made to all these points. Further enquiry from Western U.S. points is anticipated after the turn of the year, but there will be little stock available. Fruits are as last quoted. We have seen a sample of a California Valencia raisin, said to be the first lot ever turned out, and bought by a Montreal house, which will be jobbed at 5½c. The experiment, however, has not proved satisfactory to the producer, and no further lots are likely to be offered. The fruit is away ahead of the European article, but at the small difference in cost for three or four crown Muscatels, the latter are the better value. Nuts are dull, with only a peddling sort of business being done.

HIDES.—The hide market continues to strengthen both here and in the United States, with further shipments reported to American points. Some dealers are declining orders for No. 1 light hides under 5½c. per lb., though 4½c. has not yet been exceeded as a buying price from butchers, etc. Heavy hides as last quoted Lambskins bring from 55 to 70c. each.

HOPS.—The local market is very dull and weak, and prices being realized must prove very disappointing to growers. For extra fine 9½c. is about the extreme figure to be got, while for

ordinary grades the range is from 6 to 8c per pound.

LEATHER.—The month so far shows some little improvement on the last half of November, and a few of the larger manufacturers have been buying moderate lots, apparently in anticipation of a possible stiffening in prices after the turn of the year. Hides keep firming up both here and in the United States, and tanners are claiming that they must get more for their stock, so that the setting in of a fair demand will, in all probability, develop some advance in price. Stocks are in moderate compass here, indeed are said to be lighter than they have been for several falls. The English market is reported firmer, and a further large sale of some 12,000 sides of sole is reported for Britain. We quote: Spanish sole, B A No. 1, 18 to 20c.; do. No. 2 to B A, 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet shoe; cut linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The general dullness complained of last week is, if anything, emphasized at the moment, and the volume of business passing is very light indeed. Some large manufacturing establishments are shut down, and some others are working on short time. In pig iron there is nothing new; prices remain as quoted, and quotations for Scotch are very steady, as there are only a few hundred tons of Scotch in stock here altogether. The Siemens furnace at Acadia mines, N.S., is being relined, and will probably go into blast about the middle of January. Tin and Canada plates are dull at former prices. Ingot tin is rather easier at 17 to 17½c. Lead firmer. We revise steel quotations. We quote: Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts; none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50. Siemens, pig, No. 1, $16.50 to $17.25; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $5.25. best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.00 to 2.05; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20. No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $3.75 to 4.00; do. I X, $4.75 to 5.00. Coke I.C., $2.75 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60. common tank iron, $1.65 to 1.75; tank steel, $1.80. heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 25c.; ingot copper, 9¾ to 11c; sheet zinc, $4.50 to 4.75. Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3½c., ⅞ in., and upwards

OILS, PAINTS AND GLASS.—There is practically nothing doing in these lines of business at the moment, nor will there likely be for a few weeks. Despite the dulness, however, there is no weakening in prices, and glass is likely to stiffen up with the advancing season. We quote:—Turpentine, 43c. per gallon for single barrels, two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾ to 6¾c.; tins, 7c. Nfld cod, 38 to 40c per gal. Gaspe oil, 38c per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00. No. 1, $4.50. No. 2, $4.25. No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c. No. 1 red lead 4c. putty 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50. window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

WOOL.—A wool salesman just returned from a Western tour reports that he found business very slack, millmen being indisposed to buy, and recent transactions have been few. We quote greasy Cape, 13½ to 16½c.; B.A. scoured, 26 to 32c.; British Columbia, 10 to 11c.; Canadian fleece, 17 to 20c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. the pound.

TORONTO MARKETS.

TORONTO, Dec. 13th, 1894.

DRUGS.—Although the trade movement is not active, its volume shows some little improvement over that of last week. The wholesale houses are now receiving orders for holiday supplies, and as usual everything is wanted by immediate shipment. A slight small-pox scare caused a ripple of excitement this week and brought out a demand for vaccine. Values remain much the same as reported in our last issue. Opium is stronger and at the time of writing rumor reports further advances in the primary market, naming 10s. 6d. as a quotation. However, this source of information is open to question, since open to speculative influences. Quinine remains steady. Caffeine is apparently a little weaker than it was a week ago. The *Reporter* lists opium, Brazil wax, No. 1, gumkino and ginger (Jamaica) as advancing. Caffeine, ginseng, menthol, Harlem oil and quicksilver are, on the other hand, reported lower in price.

GROCERIES.—The holiday trade alone sustains life in wholesale grocery circles, otherwise business would be dull, for many of the retail merchants are stock taking. Although no change has taken place in the local market quotations on coffee, holders of Rio are firm, especially with reference to fine stock, and believe that the statistical position in primary markets will warrant higher prices. Dried fruit of the fancy description, raisins, currants, figs, etc., are in good request, as are nuts and other Christmas supplies. Sugars are low in price, and jobbers are shading quotations in both granulated and yellows. London advices report cocoa firmer and say that improved assortments have been marketed this week. In teas there is but the usual season's movement; local prices remain unchanged. Canned goods are rather slow of movement, but there is so far as we can learn no general shading in price in any of the different lines.

HIDES AND SKINS.—Since our report of last week nothing has transpired to alter the distinctive features of the market. As is usual at this season of the year, hides are in fairly active request; the quality offering continues good, and the prices paid for green and cured remain unchanged. Sheepskins are easy at 60c. There appears to be plenty of stock throughout the country, while pullers are not anxious to make purchases. Calfskins find only nominal movement. Deacons at 30c. are moving quietly, with 20c. paid for culls. Tallow shows no change; dealers are paying 5 to 5½c., and offering at 5½ to 6c.

GRAIN.—In our issue of Nov. 9th we reported an advance in the wheat market; since that time we have recorded an advance each week of 1 to 2c. per bushel. The rise in price has been very gradual, which is certainly a much better thing for the market than any sudden bull movement which might have taken place. Notwithstanding Bradstreet's estimate of a decrease in the world's supply of 1,700,000 bushels, as compared with last week, the improvement this week has not been of a very material character. Peas are in moderate demand. Oats are steady at 30c. Barley is slightly easier, and purchasers are apparently pretty well supplied. Buckwheat is lower and slow of movement.

The stocks of grain in store at Port Arthur on Nov. 30th were 337,616 bushels. During the week there were received 124,394 bushels, and shipped 60,000 bushels, leaving in store on Dec. 6th, 402,010.

HARDWARE AND METALS.—The year is rapidly drawing to a close, and merchants, wholesale and retail, are taking stock. This naturally has had the effect of limiting transactions down to the supply of actual requirements. The amount of orders, however, receives additions from the movement in holiday supplies. Silver plate ware, fancy tinware and similar goods are in request. Cutlery in cases is also being called for. The various hardware associations are holding their quarterly meetings in Toronto this week. The wire nail men are now in session, while the wire association, barb wire and rivet men are expected here soon. The pressed tinware association has been placed on a new and better basis. Instead of having complaints investigated by members of the association, they will now be looked into by outside parties in the same way as the hardware associations. As a result of the change, the discount has been altered from 70 and 12½ per cent. on some lines and 70 and 25 per cent. on others, to a uniform discount of 80 per cent. This applies to the revised list which is now coming out.

LUMBER.—The season is over, stock taking is in progress and dealers are busy, microscope in hand, searching for profits. Until the new year opens there will be little to report in the way of business transactions. Values in the absence of any consumptive demand remain unchanged. Reports received of operations in the woods of the Georgian Bay district indicate favorable weather. There has been some snow in the woods, but as yet few logs have been drawn to the streams. Last week a delegation of Michigan lumbermen visited Ottawa in regard to the duty upon booms, and it is hoped that this question will soon be settled.

PROVISIONS.—Trade is light. Butter is in good supply; there is, however, but an indifferent demand, and values are easy; common qualities are offered down so low as 10c., rolls are selling at 15c., while choice tubs are quoted at 16 to 17c. The local cheese market is quiet, and shows no alteration. There is but little outward movement to trade in hog products, and quotations are easy. Porkers, however, are busy, and hogs are offering freely; dressed are worth $5.15. The Cincinnati *Price Current* of Dec. 6th says: "The receipts of hogs at packing points have been lessened in the aggregate, although continuing of liberal proportions. The Western packing for the week has been 470,000, compared with 570,000 the preceding week, 290,000 last year, and 350,000 two years ago. From November 1st the total is 2,355,000, against 1,310,000 a year ago. The quality of current marketings is averaging somewhat better than previously. Prices of hogs have been fairly steady most of the week, closing easier and moderately lower than a week ago on the average for prominent markets." Eggs are easy, but there is a good demand for strictly fresh; quotations unchanged. Dried apples are quiet, the principal movement being by way of export.

WOOL.—While the situation has not materially altered, there has been a little more life in the market this last two weeks. Canadian fleece wool may now be considered pretty well in the hands of the larger dealers, even the most sanguine holders having concluded that a free entrance into the wool market of the United States does not necessarily mean high prices. Some small lots of fleece continue to be offered, for which merchants are paying 18c. for select descriptions and 15c. for rejects. Last week some considerable shipments of fleece were made to the United States. Dealers are asking 19c. for combing fleece. In pulled wools we have reciprocity with the United States. Americans are sending fine pulled wools to this market, while, on the other hand, Canadians are selling coarse wools to the United States. A week ago a Toronto knitting mill received some 100,000 lbs. of American wool from Chicago, and similar shipments have been received by other mills throughout the country. The last series of the London wool sales for 1894 has closed, leaving the market in, we believe, a strengthening position.

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital ..... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE AMERICAN CURRENCY SITUATION.

Lyman J. Gage, president of the First National Bank of Chicago, delivered an address a few days ago before the Bankers' Club of Rockford, Ill. He spoke especially of the currency situation, and he evidently comes to the conclusion that the best way out of the present currency difficulties is likely to be pointed out by a Currency Commission composed of experts, who will carefully study the situation and devise needed legislation.

Some extracts from President Gage's address, which are given below, will well repay attention:

"Financial disorder has come to this country through certain defects in legislation.

"In speaking upon the subject of our money system, one must be aware that whatever he may say he will excite hostile criticism and draw forth bitter invective from some one or more of the bitter factions who are seeking to establish on new and experimental foundations our much disturbed financial structure.

"Through our heterogeneous system the public has seemingly lost the power to discriminate between real things and the shadows and signs of things. It is necessary that disguises be pulled aside and that real facts appear

"There is, in truth, only one real money, namely, metallic coin. It may be composed of gold or silver. It might be of something else, but it is not. Greenbacks, Treasury notes, and National bank notes are but promises to pay. In the nature of things they can be nothing more. They pass as money, they perform the functions of money, often more conveniently than money itself. Because of this, confusion comes, and we are led astray. Seeing that the greenback is uttered by the Government; that it has by the legal-tender quality imparted to it the power to pay debts, and that it circulates with all the power of money, discrimination ceases—we call it money—and the idea that Government can create money, by its sanction or fiat, becomes rooted in the mind. The distinctions pointed out are, however, fundamental. They should be taught in the schools. They are simple, easy to be understood, even by a child.

"We admit that on many occasions paper money, whether greenbacks, Treasury notes, or National bank notes, are more to be desired than gold. Yet, more to be desired than either, as proven by the daily conduct of men, is a credit balance in a solvent bank. For, to secure this better form of good, people voluntarily give to the banker these promises to pay—yea, even gold itself—for a credit to an equal sum upon his books. With an entry upon their pass-book as evidence of the transaction, they claim to have 'money in the bank.' In popular language the claim is well enough; but, correctly speaking, it is positively untrue. They have parted with their money, if money they had. It belongs to the banker—it is no longer theirs. The consideration they have received is an agreement from the banker to meet their requisitions upon him from time to time.

"It should be here noted that while our silver dollar is real money, its power to exchange for other things is more than doubled by another and artificial value imparted to it through the law, which gives it power equal to the dollar in gold to pay custom dues. Having equal value in this direction and the quantity being limited, it has equal value in all directions, but the difference between the metallic value of the silver dollar and this arbitrary value lies in the realm of credit.

"What I have so far said lies at the foundation of the subject and must be first understood.

"We have now current in the United States, available in the purchase and sale of commodities, and for the payment of labor services, the following agencies;

"First—gold coin, silver coin—real money.

"Next—greenbacks, Treasury notes, National bank notes, and bank cheques. The last four to be classified together as forms of credit. Their respective legal relations to real money, however, are not alike. The National bank note and the bank cheque may both be satisfied by the tender of greenbacks or Treasury notes, while the last two are redeemed only in coin, or in part payment of public dues.

"In passing, it may be well to note the relative use of these various agencies in the practical operations of commerce and trade. No better place to determine this can be found than the counter of a bank, and the following statement of the amount of each received by a bank in this city on a recent day will indicate their relative importance in that direction:

Gold coin	$ 9,885
Silver coin	15,826
Gold certificates	4,045
Silver certificates	98,129
Legal-tender notes and greenbacks	82,172
Treasury notes	25,496
National bank notes	34,263
Total cash	$ 269,816
Cheques, drafts, bills of exchange	$5,398,945

Percentage of cash to total credits, 5 per cent

"Having summarized the various forms of credit obligations operating as currency, let us look a little at the principle on which they are respectively based.

"The power to redeem the greenbacks, three hundred and forty-six millions in quantity, rests:

"1. Upon sixty millions of gold, or thereabouts, in the Treasury vaults.

"2. Upon the ability and readiness of the Government to borrow money as the occasion may require.

"3. Upon the power of the Government to collect money by taxation

"The Treasury notes rest, first, upon the promise of the Government, supported by a quantity of silver, part coined, part bullion, purchased since 1890, in payment for which these notes were issued. It is to be noted that the market value of the silver so bought is some fifty millions less than the purchase cost, and for this difference the power of the Government to borrow or to tax must be relied upon.

"The National bank note rests:

"1. Upon the financial responsibility of the bank issuing it

"2. Upon the security of the United States bonds with the Treasury Department, 10 per cent. in excess of the face of all notes issued

"3. Upon the Government guaranty.

"This is to the relative merit of each in point of responsibility.

"Next, let us look at the plan, method, and reason of putting these various forms of credit into circulation.

"The greenback was issued to pay debts, not to acquire value, or if value was received, such value was consumed or converted into forms of value not available in the market. The greenback paid soldiers and Government employes, it bought powder and munitions of war. The existence of the greenback is the evidence of a debt not paid. It is a lien upon the future.

"A National bank note, on the contrary, is the evidence of some existing value which lies somewhere as collateral for its redemption. To transfer such values is the only ordinary and proper occasion which calls for their issue. The volume in which they will appear marks the rise in prices or an increasing quantity of existing things. Like the bank cheque, they will be in active service when trade and commerce are active. Thus they enjoy the principle of elasticity wholly lacking in any possible form of direct government issue. The method of their retirement is wholly different, and subjects the trade and commerce of the country to less dangerous strain.

"Until now I have not referred to silver certificates, which form nearly one-fifth of the circulating medium of the United States, nor is it necessary to say much. By their use, a dangerous form of inferior money has found an abnormal use. They are the most perplexing feature in that much involved problem of our National finances.

"There is no reason why the Government should act as warehouseman for either gold or silver. Such a function is outside its proper limit of action. But we are faced by the condition, and it is the *bete noir* of the Treasury. The enormous amount of five hundred millions of silver, represented by 338 millions in silver certificates, added to the 150 millions purchased by the Government under the Sherman Act, constitutes a standing menace to every business interest.

"Our whole monetary system is the resultant of make-shift legislation and unscientific compromises. It is time that reform began. I do not presume to offer here final remedies. In my own opinion the greenbacks should be permanently retired. The silver purchased under the Sherman Act should be gradually sold and the Treasury notes redeemed and cancelled. Some well-guarded system of bank note circulation, broader and more elastic than the present National Bank Act provides, should be inaugurated. Such bank notes should be redeemable at a central place, and be redeemable in gold only

"To sum up: The defects of our present currency system are:—

"First, a confusing heterogeneity, which needs simplification

"Second, the greenback controverts the principle of paper money, viz., that every note injected into the commercial system should represent an existing commercial value.

"Third, the Treasury note is a standing evidence of a foolish operation, the creation of a debt for the purchase on a falling market of a commodity for which the purchaser had no use. It lies open to the just charge of being both idiotic and immoral.

"Fourth, the National bank note nearly conforms to the true principle of paper money; but the unreasonable requirement for security paralyzes its efficiency and operates to destroy its elasticity.

"Fifth, the silver certificate encourages the use of a silver to a larger extent than consists with the safe preservation of that metal on a parity with gold

"Would a national commission help to promote reform? There is reason to hope that it would be of great service in that direction Such a commission, if rightly selected, would throw a flood of light upon these involved questions. The information it might gather would be of immense value to all our people, and would guide us to wise legislation."—*The Rand McNally Bankers' Monthly.*

A GRIM VIEW OF IT.

The death of an ossified man in Tennessee is reported. He died hard.—*Chicago Tribune.* This is as bad as the man who swallowed a thermometer and died by degrees; it suggests also the case of the consumptive undertaker who died of a coffin.—*Medical Record.* These remind us of a man who choked while eating an apple, and died of appleplexy. — *National Medical Review.* It was in a St. Louis hotel that a Pike county farmer blew out the gas and died from gastritis.—*Meyer Brothers' Druggist.* Not any worse than the man struck by an engine. Verdict, died from locomotor attacksia.—*Montreal Pharm. Jour.* Still worse the csse of that pie-eating dyspeptic of Tiflis, for he died of piemia, superinduced by typolitis.—*Gaillard's Med. Jour.* The other day a negro in South Georgia ate six watermelons. He died of meloncholia.—*Atlanta Med. and Surg. Jour.*

THE HAPPENING OF THE UNEXPECTED.

Amicus, whose experiences in underwriting are sometimes amusing, writes as follows from "Hayville" to the *Weekly Statement:*

DEAR SIR—I had just finished writing a very able letter on "The Dangers of Delay," when a sleek and enticing gentleman representing an accident insurance company came into my office and asked me to renew a policy in his company.

Said I: "What good is it to me? I have been paying premiums for four years and nothing happens."

"But something may happen; and just think of it," he said, "you get $50 a week in case of injury, $5,000 if you lose an eye, and $10,000 if you get killed!"

I paid the premium just to get rid of him, and that very evening I failed to connect with the top stair and came near leaving a kneepan on a sharp corner of a rail. Here was a lesson which came right home to me.

After the second day in bed I bethought me of the accident policy, and said I to myself, "Here's my chance! Here's where I get even! Am I ill enough? How do I get it? Where is the policy?"

Like many another man, I had thought so little of the policy that I had no recollection of where I had put it. It's somewhere, however. Inquiry of a man familiar with the accident insurance business revealed the fact that I must be "disabled" and do no work in order to get the $50 a week.

When I told Mrs. Amicus that it would be necessary for me to stay in bed to get the money, she said: "Well, I should think that was a cinch. If you can make $50 a week by just keeping quiet, for gracious sakes do it!"

Two days settled it. I got too much vitality in bed, and I lost my grip on the $50 by hobbling down to the office.

TORONTO AGENT, GEORGE J. PYKE, Canada Life Building.

General Agent for Canada, ROBERT HAMPSON, MONTREAL.

Sun Life Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

"THE SEVEN STATES' EXAMINATION COMMITTEE'S CERTIFICATE."

New York Life Insurance Company

346 and 348 Broadway, New York City.

JOHN A. McCALL, - - - - - - President.

COMMISSIONERS' CERTIFICATE

NEW YORK CITY, November 28th, 1894.

WE, the Insurance Commissioners and Superintendents of the States of Massachusetts, Illinois, Kansas, Kentucky, Missouri, Ohio and Texas, pursuant to the invitation of the President of the Company, dated June 1, 1894, do hereby certify that we have been for the past four months engaged in a thorough and searching official investigation into the affairs of the New York Life Insurance Company of the City of New York.

We further certify that each Stock and Bond owned, each Collateral Loan, each Bond and Mortgage Loan made, the Cash and each Bank Certificate of Deposit, was carefully examined, checked, and verified; that the Policy Loans and Premium Notes were examined and checked with the Reserve on each Policy; that Interest and Rents due and accrued, unreported and deferred Premiums, were also verified; that the values of Stocks and Bonds owned, and Real Estate owned, were individually and closely scrutinized and conservatively made; that the title to each piece of property secured, and Bond and Mortgage Loan made since the 1891 New York State Insurance Department Investigation, was examined and found satisfactory. That the Policy Reserve was checked and verified by the Actuaries of our several State Insurance Departments, and that every Policy and its Reserve, on the books of the Company, was checked individually with the Valuation Policy Registers of the Massachusetts Department; that all sundry Liabilities were also verified; that each debit and credit entry in the Company's books was checked from the date of the said New York State Investigation; and that as a result, on the most conservative basis of valuation, we found the Company possessed of **ASSETS** satisfactory to us, amounting to

$155,453,428.73

And that, after providing for all possible Liabilities, including $135,058,291.00 for outstanding Policy Reserve, as per the "Combined Experienced Table of Mortality," with 4% interest, the total of the same amounted to $138,124,363.81.

We further certify that, by the severest test, the **NET SURPLUS** to policy-holders, after providing for every Liability, and deducting Agents' Balances, was on June 30, 1894,

$17,329,064.92

In Witness Whereof, we have hereunto subscribed our respective names, in the City of New York, the day and year above written.

G. S. MERRILL, Insurance Commissioner, State of Massachusetts, **Chairman.**

SEAL

BRADFORD K. DURFEE, Superintendent of Insurance, State of Illinois.

S. H. SNIDER, Superintendent of Insurance, State of Kansas.

HENRY F. DUNCAN, Commissioner of Insurance, State of Kentucky.

JAS. R. WADDILL, Superintendent of Insurance, State of Missouri.

W. M. HAHN, Superintendent of Insurance, State of Ohio.

JNO. E. HOLLINGSWORTH, Insurance Commissioner, State of Texas.

DECISIONS IN COMMERCIAL LAW.

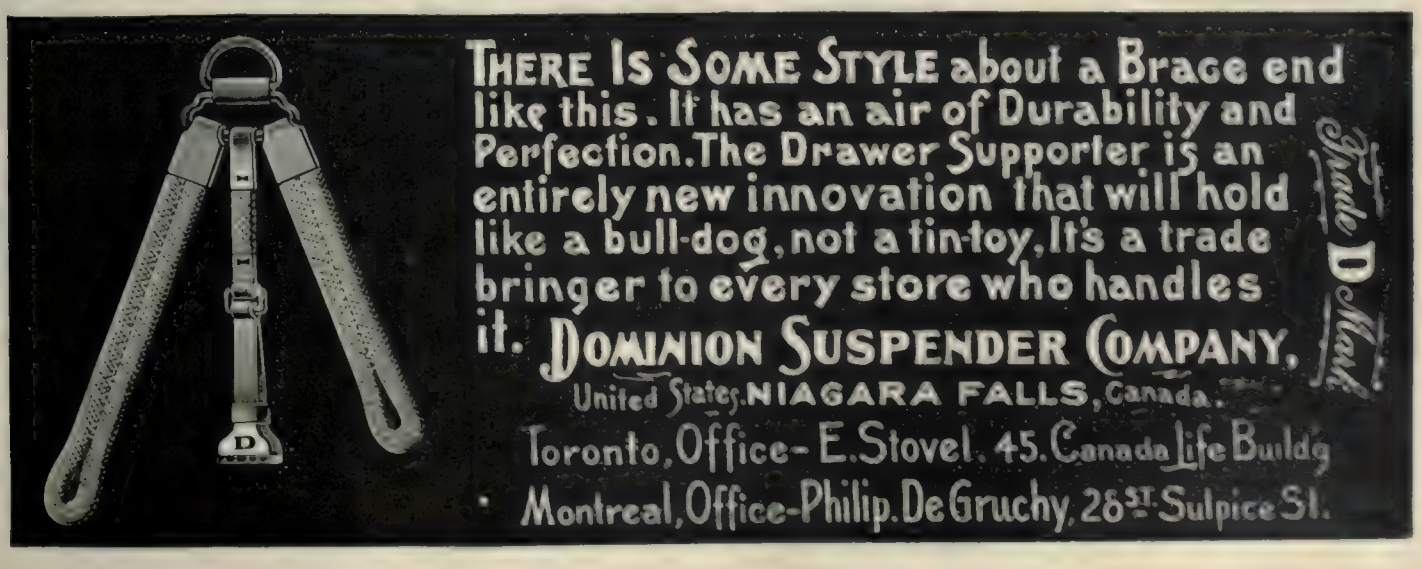
ROUSE V. BRADFORD BANKING CO.—It was held by the House of Lords that where a banking company agree with a customer, to whom they already allow an overdraft, that he shall for a specified period be permitted to overdraw his account to a larger amount, the agreement may be terminated before the specified period upon notice given by the bank to the debtor. It is not, therefore, such a binding agreement to give time to the principal debtor as to discharge a surety who has become liable to the bank upon a guarantee for a part of the sum due from the customer. When two or more persons who are bound as full debtors arrange, either at the time when the debt is contracted or subsequently, that *inter se*, one of them shall only be liable as a surety, the creditor, after receiving notice of the arrangement, must do nothing to prejudice the interest of the surety in any question with his co-debtors. Where a bank has agreed to give a customer an overdraft, it seems to be doubted that they can refuse to honor cheques drawn upon such overdraft until after a reasonable notice to the customer.

HELBY V. MATTHEWS.—It was decided in the English Court of Appeal that the Factors Act applies to the case of an agreement between tne "owners" and the "hirer" of goods whereby the "hirer" agrees to pay monthly instalments, to preserve the goods from injury and keep them in his own custody, provided that if he fails to perform the agreement the owner may re-take possession, the goods to continue the sole property of the owner, unless and until the full sum be paid, and the "hirer" to have the option of terminating the agreement at any time by delivering up the goods. Where, therefore, a "hirer" has entered into possession of goods under such an agreement, and has subsequently pledged them with a third party, who has taken them in good faith and without notice of the circumstances, the "hirer" is a person who has "agreed to buy" the goods, and the "owner" cannot obtain them from the third party without paying off the amount for which they are held.

THE "ENGLISHMAN" AND THE "AUSTRALIA."—During a fog a tug with a ship in tow struck and injured a third ship, the ship in tow not touching her. All three vessels were found to blame for proceeding at an improper speed. Held by Jeune, J., that the owners of the tug and of the tow were jointly and severally liable to the owners of the third vessel for one-half of the damage that vessel had sustained, less one-half of the tug's damage; also, that the total liability of tug and tow was not limited to the statutory amount on the tonnage of the tug.

THORNELOE V. HILL.—In 1871, John Forrest, who had carried on in London the business of a watchmaker, and had marked his watches "John Forrest, London," died, and a firm of watchmakers in London purchased the goodwill of the business, but did not continue his business, except that until 1874 they put "John Forrest, London," on some of their watches. In that year they granted an exclusive right to a firm in Liverpool to use for seven years the name "John Forrest, London," on their watches, but after the license had expired they did not use the name themselves save only in a very few cases. In 1890 they assigned their assets to a trustee for their creditors, and he, in 1891, sold their business and the goodwill and lease of the premises, and on the same day he sold to the plaintiff, a watchmaker in Coventry, the name, title and goodwill of the business of John Forrest, London. Romer, J., decided that the plaintiff, being a mere assignee in gross of the right to the name of John Forrest, was not entitled to an injunction to restrain the use of such name on watches made by the defendant, who was also a watchmaker in Coventry.

AITKEN, LILBURN & CO. V. ERNESTHAUSEN & CO.—A charter-party provided that the charterers should load a full cargo at £1 17s. 6d. per ton, fire being excepted, and that bills of lading were to be signed at any rate of freight without prejudice to the charter-party, but so that the bills of lading freight in the aggregate should amount to the total freight due under the charter-party. A fire occurred when part of the cargo had been shipped, and a large amount was burned. On the charterers refusing to load any more cargo, it was held by the English Court of Appeal that the freight on the bales that had been burned must be taken at the actual bill of lading rate, and that the remainder of the cargo which the defendants had failed to ship must, for the purpose of assessing the damages, be taken at a higher rate than the charter-party rate by the amount necessary to make the bill of lading freight in the aggregate equal the total charter-party freight. Also, that the charterers were not entitled to credit for the freight on any bales which had been shipped by the ship-owners in the place of the burnt cargo, but only for freight on the bales which had been shipped to make good the charterers' breach of contract.



THERE IS SOME STYLE about a Brace end like this. It has an air of Durability and Perfection. The Drawer Supporter is an entirely new innovation that will hold like a bull-dog, not a tin-toy. It's a trade bringer to every store who handles it. DOMINION SUSPENDER COMPANY,

Mercantile Summary.

THE sales of the Granby Rubber Company for the month of October last were the largest in the history of that concern.

AT Woodstock, N.B., a week ago, the new and handsome bridge over the River St. John was opened with appropriate ceremonies.

THE Petrolea *Advertiser* is a serviceable and welcome weekly journal. We are glad to see that it issues a Christmas number with a profusion of good photo-illustrations.

THE International Waterworks of Stanstead have recently been sold for $33,000. Few places of Canada have a better supply of pure sparkling spring water than Stanstead. The reservoir, fed by powerful springs, affords a strong pressure for the hydrants and houses.

IT is reported that H. R. Lowell, furniture dealer at Victoria, B.C., left that city suddenly, carrying off the cash he could raise with him. A meeting of his creditors has been called to consider the situation.——In the same place we learn that the sheriff has sold the assets of K. F. Mackie, photographer.——Fred. Schwartz, who rented the Colonial Hotel, at New Westminster, at $300, has assigned, and from what we remember about the size of the house it need not be a surprise.——Wm. Johnston, trader, Port Essington, B.C., also puts his affairs into an assignee's hands.

Mercantile Summary.

FOR the benefit of American readers who speak or write of Canada as a wilderness, it may be well to note that since January 1st last, $850 has been paid for bounty on bears killed in St. Lawrence and Franklin counties, New York State. Of this amount $590 was paid on bears killed in St. Lawrence county, and represents the scalps of 59 bears.

MR. JOHN ELLIOTT, of Dungannon, is one of the farmers who has fully tried the feeding of wheat and other grains to his stock, says the Seaforth *Expositor*, and he finds it quite profitable. A lot of hogs, sold the other day, realized him at the rate of 80 cents a bushel for his wheat, which is a much higher price than the grain itself is likely to bring.

THE creditors of D. Falardeau & Co., jobbing grocers and cigar manufacturers, of Quebec city and Sillery Cove, have been asked to meet. Mr. Falardeau failed last spring, with liabilities of $16,000, the estate being closed out, and subsequently resumed business in his wife's name, but has already become again embarrassed.——L. Allard, of Ottawa, is a shoemaker by trade. About three years ago he decided to try his fortune in the grocery line, but has not met with the success anticipated. He is now proposing to pay his creditors 25 cents on the dollar, owing $4,400, and showing apparent assets of $2,800. Here is loss for somebody.

Mercantile Summary.

MESSRS. SLOAN & CROWTHER, of this city, finding that the profits in the wholesale grocery business are entirely out of proportion to the annoyances and worries incident to the trade in these critical times, have decided to liquidate after the end of the year. It is possible, we are told, that Mr. Sloan may enter into business of another kind on his own account after the present firm's business is closed up.

MAYOR STEWART has had a copy of an instrument, registered on May 11th last, between the Hamilton Iron and Steel Company and the Atlantic Trust Company, prepared and laid on his table for inspection by the Aldermen. It provides for the mortgaging of everything on the smelting works site as soon as placed there. The whole extent of the obligation of the company is limited to $250,000.—*Hamilton Times.*

FOR many years I. H. Allen had a general store at Black Creek, Ont., and did a nice trade. During the last few years this has been managed by his son-in-law. In May of the present year the son-in-law became the purchaser, and Mr. Allen continued a lumber business at International Bridge. During the two years last past he has locked up considerable capital in real estate, and this has brought about his assignment.

Special Notice to Large Consumers of Paper Boxes

TRADE MARK

DOMINION PAPER BOX COMPANY

Before making any contract for the coming year we would like to give you quotations.

If you use **knock-down or folding Boxes** we are headquarters for this line, and can make these boxes to suit all requirements. We are inventors and patentees of seven different styles of folding boxes, and make a specialty of designing to suit all trades. All goods manufactured by us bear our trade mark, which is a sufficient guarantee of their quality.

Mercantile Summary.

RED and silver are the startling colors of a pamphlet containing the prize-list of the first annual exhibition of poultry and farm produce to be held at Toronto Junction to-day. The officers are R. C. Jennings, branch manager of the Bank of Commerce, president; H. T. Law, secretary; R. L. McCormack, treasurer

FOR Christmas decorations, nothing seems so appropriate, nothing is more pretty, than holly and mistletoe. These are to be had in profusion at the King street store of the Steele, Briggs, Marcon Company, opposite the St. Lawrence Hall. And other holiday decorations, too, such as smilax, moss, etc.

FOR a town of three thousand inhabitants, Richmond, Que., has a full share of electrical appliances. It has two electric light systems, two telephone exchanges, two telegraph offices and a burglar alarm protective line. In that town last week was held the first meeting of the Richmond Water Power and Manufacturing Company.

THE firm that has succeeded to the merchant tailoring business of the late Chas. E. Robertson, at Charlottetown, is G. A. Dixon & Co. We have noted the removal of Mr. Dixon from New Glasgow to P. E. Island, where he is known from having previously been connected with the woolen manufacturing company now known as the Mackay Woolen Co.

MR. ROBERT S. MUNN, head of the firm of Messrs. John Munn & Co., of Harbor Grace, Nfld., the largest house on the island in the Labrador fishing trade, is dead. He was a director of the Union Bank, and the excitement of the financial troubles perhaps occasioned his death. His brother and son are of the firm of Messrs. Stewart, Munn & Co., Montreal.

THE Rising Sun Canning and Pickling Co., of Hamilton, was succeeded five years ago by Mrs. Mary Linden, whose husband managed the business. Since then she has been very often in financial difficulty. Chattel mortgages and judgments have been obtained against her, and now the bailiff advertises the business for sale.——Last August, J. B. Graham, dry goods dealer at Trenton, assigned and settled with creditors at 65 per cent. About a month ago he was succeeded by Graham & Co., supposed to be his wife. Being largely in the hands of a wholesale house, the concern has assigned to them.——The sheriff has advertised the effects of Thomas Wright, florist, Toronto, for sale next week.

THE Perth car shops are working on hal time.

W. C. GIBSON, jeweller in St. John, N.B., recently reported in trouble, is now said to have arranged a compromise at 35 cents, in liabilities of $5,300.

WM. MCQUILLAN, for 35 years or more a hard working, respectable custom shoemaker at Dickinson's Landing, Ont., has at last fallen upon evil times, and has had to assign to the sheriff.

ABOUT three years ago A. P. Fontaine, formerly a clerk at St. Cesaire, Que., started storekeeping at Rougemont, recently established as a new parish. His venture has not succeeded, and he has now assigned, owing $3,700

THE Carleton Place *Herald* says that E. A. Cole of that town has sold his hardware business to Wm. Muirhead, the transfer to take place 1st of January, and that Mr. Cole has the offer of a position as traveller for a wholesale house.

AN exchange says that while boring for water on the farm of George Sissons, Manvers, County of Hastings, Ont., a bed of chalk white clay, such as is found in Cornwall, Eng., and used in the manufacture of chinaware, was discovered. Mr. Sissons has refused $3,000 for ten acres of the land.

A WELL-REGULATED type-writer is as necessary as a sewing machine in every well-regulated family, says the Binghampton *Republican*. Children should not grow up without becoming expert in its use. The art of using a typewriter is easily and quickly acquired, much easier and quicker than learning to write with a pen.

IT is said that Mr. W. W. Ogilvie will not be a candidate for a second term of the presidency of the Montreal Board of Trade. The opinion is expressed that Mr. James A. Cantlie, first vice-president, will succeed Mr. Ogilvie. Mr. Cantlie has some claims to the position, for he is a merchant of long experience, he stands well in the community and he has done loyal work for the board.

THE Central Lodging House Association, of Toronto, limited, Rev. H. C. Dixon, president, J. M. Treble, treasurer, has leased The Victor House, the new mission building put up by H. A. Massey. Beds are provided for the homeless or poor at 10 and 15c. per night, and meals, too, at from 5 to 10c. Those who wish to help a man or boy, without giving money, can do so by buying tickets for Victor House. Telephone 2,401.

ON Wednesday next the general stock of J. J. McIndoo, of Dunnville, will be sold by auction. On the same day Alfred Sleep's general stock, at Seagrave, will also be sold at Suckling & Co.'s.

FEDERAL BANK bills are in circulation about Stratford. Two were recently presented at one of the city banks and refused. People should be on their guard against them. The time for their redemption has passed.

PREVIOUSLY a peddler, Donald McDonald, of Baddeck, N.S., has been doing a small grocery and dry goods business, on very trifling capital, for the last two or three years. He is reported to have assigned.

W. H. SCHNEIDER, of Mildmay, sold his sawmill and flour mill property last week to Mr. Fred. Glebe, of Shelburne, Ont., for the sum of $12,500. The buyer takes possession on the 10th January, 1895. W. H. S. reserved the sawmill on the premises for two years, and intends to devote some of his time to working it.

THE creditors of E. Denis, general storekeeper at Rigaud, Que., whose failure we noted a fortnight ago, had a meeting on the 17th inst., at which Denis made an offer of 50 cents. Creditors were not favorable to the proposition, and think he should pay 75 cents.

THE *Statist* offers the substantial sum of one thousand guineas for the best plan of a customs union between Great Britain and her colonies. The competition is open to all, and the conditions will be announced early in February. Lord Rosebery and Lord Salisbury have consented to appoint each a judge to act for them in the competition.

STATISTICS compiled in Buffalo up to the middle of the present month say that the shipments of coal by lake during the season of navigation just closed aggregated 2,485,255 tons, which is 220,000 less than last year and 367,000 tons less than two years ago. Of this year's total 16,030 tons went to Canada, which is a falling off of 11,320 tons as compared with the preceding year and 16,500 tons as compared with 1892.

AT Granby, Que., the annual meeting of the Miner Carriage Mfg. Co was recently held. The report of the year's business was the best the company had ever made. Twelve per cent. on the capital was earned, but not that much was declared. The former board of directors were re-elected and at a subsequent meeting S. H. C. Miner was again chosen president, J. H. McCanna vice-president, and J. A. Tomkins secretary.

AMONG the Christmas displays in the windows of Toronto stores this week, that of Rice Lewis & Son, in holiday hardware, is striking and attractive; those of the Golden Lion are worthy of New York, and Murray's delight the female eye.

THE Montreal Quarry Company, Ltd., is being organized, and an application for a Provincial charter is being made on behalf of Messrs. P. Lyall, P. A. Peterson, D. A. McCaskill, W. G. Reid, and George McDougall The capital stock will be $200,000, and the intention is to buy up and control the working of a number of the best quarries about Montreal

MR. G. GILBERT, the well known contractor, and Mr. Lockwood, of Stratford, have purchased the old flour mill of J. G. Snetsinger, at Moulinette, and have removed it from the old site to the place formerly known as Harrison's woodyard. Here it is being erected on a substantial foundation and will be fitted up with first-class machinery. Messrs. Gilbert & Lockwood also contemplate the erection of a sawmill at this point.—*Cornwall Standard*.

THE annual meeting of the Hamilton Steamboat Company has been held, and a satisfactory statement of finances was presented. The directors elected were: Messrs. Geo. E Tuckett, M. Leggat, F. W. Fearman, Seneca Jones, J. B. Griffith, Geo. T. Tuckett and Murray A. Kerr. At a subsequent meeting of the directors Mr. Geo. E. Tuckett was elected president, Mr. M. Leggatt, vice-president, and Mr. Seneca Jones, secretary-treasurer. Mr. Ferg. Armstrong was again appointed manager.

A CABLE from London, dated December 20th, gives the following changes in the figures of the Bank of England, compared with the previous account: Total reserve, decreased £529,000; circulation, increased £148,000; bullion, decreased £381,057; other securities, increased £259,000; other deposits, decreased £807,000; public deposits, decreased £261,000; notes reserve, decreased £479,000; Government securities, decreased £800,000. The proportion of the Bank of England's reserve to liability, which was 63.28 per cent., is now 63.67 per cent.

AN extension of time is asked by Thomas Oddson, general storekeeper, at Selkirk. Six months ago he claimed a surplus of $5,600.—— Since 1881 Wright Bros. have been in the dry goods business in Winnipeg. About 1888 one of the brothers retired, and Archibald became the sole owner. He has been doing a large trade, and apparently fairly successful. Last

month his premises were burned, and the stock, valued at $40,000 to $50,000, was a total loss. His insurance was nearly $30,000. Still his margin was small. In consequence of this fire he has been obliged to compromise at 60 per cent.

THE twenty miles of the Ottawa and Parry Sound Railway built last summer and the section purchased from the Colonization Company, were inspected last week by Dominion and Ontario Government officials. Only eight miles more need to be built to reach the Sound. There remains a gap of but 60 miles, between Long Lake and Erdsdale, yet to be constructed to finish the line through from Ottawa to the waters of Georgian Bay.

AN assignment has been made by Joseph Murphy, for some few years past doing a small grocery business at Arnprior, Ont. He had been sued several times lately by Montreal houses. ——J. D. Warren, druggist, Pembroke, has also made his estate over to the assignee. He is a young man, who opened shop only about a year ago, but as his made the fourth establishment in the line in that small town, his success was very much questioned from the start.

A STORY is told by the St. Andrew's *Beacon*, and substantially the same thing is repeated by the St. John *Globe*, that some New Brunswick stock speculators up river have been badly bitten lately. One plunger is said to have dropped $30,000. The St. John story is that some St. Stephen men have been speculating in whiskey trust stock, that one gentleman got out with a loss of $8,000, that one or two others lost heavily, and that one is "holding on in the face of a very large loss."

FOUR years ago, Wilson Bros. succeeded Willis Bros, as tobacconists at Woodstock, paying them $2,000 cash for the business. At first the Wilsons did very well, and a few months ago one of the firm retired. Since then the other has been trying to raise money on a chattel mortgage: failing in this, he has assigned. ——It is evident that T. A. Huston & Co., stave manufacturers at Dresden, are financially in bad shape. They have been sued by one of the banks for $9,000, and a bailiff has taken possession. The stock is advertised for sale to-morrow.

IN Montreal the following are the business mishaps among traders for the week: William Johnston, a hardware dealer in the St. Lawrence suburbs, who lately figured as the defendant in a breach of promise case, has left the city, and a meeting of his creditors is called for the 27th inst ——J. A. St. Amour, dealer in coal and wood, has assigned with an indebtedness of $7,064. —— F. R. Cole & Co., long established in the lamp trade, have had to assign. Mr. Cole failed before in the year 1891. Liabilities in the present failure are $5,400.——N. Gauthier & Co., contractors, lately noted as insolvent, have settled at 25c.——Jules Nadon, for some time in the retail shoe trade, and at one time esteemed a very fair mark for credit, claims to have made recent losses in speculations as well as at law, and is seeking a settlement at 40 per cent., cash.—— J. L. Carle, butcher, has assigned, owing about $7,000.——A. T. Smith, dry goods retailer in a small way, reported last month as seeking an extension, has now assigned. He owes only some $2,000.

NEARLY two years ago J. C. Elliott gave up blacksmithing at Baltimore and opened an undertaker's shop in Cobourg. Being anxious to do a large business, he extended beyond his means, and already we hear of his assignment. Some years ago McCosh Bros., general storekeepers, left Lucan and went to Mitchell, but in March, 1887, they opened business in the former place. Their real position does not appear to have been known by anyone outside of their banker. Now they are endeavoring to compromise at 50 per cent. If this arrangement is carried out their banker will advance 40 per cent. of their liabilities.——Last June, Dunsmore & Carslake, tinsmiths at Stratford, dissolved partnership. The former continued, but without success. An assignment has been made.——R. W. Runciman, grocer, Goderich, also assigns.——A fortnight ago we stated that Wilson & Co., grocers, Woodstock, had assigned. Now we hear that they are offering creditors 50 per cent. This will probably be accepted.

GORDON v. WALMSLEY. "THE KATE." Jeune, J., decides that where by a charter-party a specified number of running days are provided as lay days, the days mentioned, unless controlled by the context, are calendar days, and not periods of twenty-four hours; and the first of them begins at the commencement of the day following that upon which the ship arrives.

MAILING CASES

We beg to notify the trade that we have been appointed sole agents in Canada for the United States Mailing Case Co. and the Boston Mailing Case Co. These two companies control all the mailing case patents. By the use of these cases you can send samples of liquids through the mail. Circulars giving full particulars sent on application.

TORONTO, FRIDAY, DECEMBER 21, 1894.

THE SITUATION.

In the bare fact that five of the directors of the insolvent Commercial Bank of Newfoundland are debtors to the concern to the amount of $1,800,000, there may be wrapped up a scandal of the first magnitude. Presumably the five directors would form a majority of the board, and they could by mutual understanding bleed the bank to death. How much of the funds of the bank was left to outsiders? A searching enquiry into the management which brought on the disaster would be in order. The history of banking in the United States is full of examples of this kind, not in this form merely, but in every other conceivable form. The chief interest in the present failure centres in the borrowing by directors of the funds entrusted to them to administer. The evil is not a new one; it has in the past cropped up in all imaginable forms, and the remedies proposed or applied have been numerous. A general resolution has at last been come to, to limit the borrowing of directors. Sometimes proposals have been made that directors should not borrow any of the funds which they are entrusted to administer. If the law permitted what the directors of the insolvent Commercial Bank have done, it was seriously at fault; if the law has been overstepped, the case is still more serious. It is a tendency of human nature that directors should incline to be too indulgent to themselves. The Western Bank of Scotland furnished a flagrant case of the abuse, which sometimes flows from this source. An opportunity will be lost if the world is not permitted to learn all the details of causes of the failure of the Commercial Bank. A disposition to hush up scandals of this kind is, in no point of view, in the public interest.

Belgium has followed the example of England and prohibited the importation of Canadian cattle into that country. The alleged ground on which this resolution is taken is the discovery of pleuro-pneumonia in Canadian cattle landed at Antwerp on the 6th inst. A similar course had previously been taken with regard to American cattle. On the supposition that this step with regard to our cattle is taken in good faith, the mystery of the alleged disease deepens instead of clearing up. How comes it that a malady which is highly contagious does not spread in Canada, and that its presence here is unknown? It is simply impossible that we should be shipping infected animals and preserve free from contagion those which remain behind. If the disease had had a footing in Canada for more than a year, it must have become general before now. But it is not to be found at all here. The only explanation seems to be that which has already been given by the experts who acted on behalf of Canada, that the disease detected in Canadian cattle in Europe is not pleuro-pneumonia, but is the result of confinement on the voyage. If pleuro-pneumonia was making ravages among cattle in this country, it would be only natural that it should be found among some that were shipped across the Atlantic. The British and the Belgian authorities have the matter in their own hands, and if they are bent on excluding our cattle, nothing that we can do will prevent them carrying out their wishes. Canadian farmers can only take note of the fact and substitute something else for the surplus cattle which they have been accustomed to export to Europe.

As a result of the trial for the part he bore in connection with the great railway strike in Chicago, Debs is sentenced to six months' imprisonment. The charge was of conspiring to stop the wheels of commerce between the States. An injunction was got out against Debs and the leaders in the strike, and it is for disobeying the order of the court that he is found guilty and sentenced. Debs says that if the law has been correctly administered in his case, the labor societies may as well all dissolve. He is perhaps not far wrong in saying that when a strike takes place, it is next to impossible to prevent outrages. Nevertheless society must protect itself against outrages whenever and wherever they occur, whether at a charivari or on the occasion of a strike. If any one man, by virtue of position at the head of a labor organization, can bring the whole railways of the country to a stand, the welfare of society might be sacrificed to the caprice of an individual. The use of the injunction in this case shows that the courts are not powerless in the premises. But when the strike was supplemented by force, it had to be put down by superior force exercised by the Government. The strike, as a remedy for labor grievances, is a two-edged sword, that injures those who resort to it quite as much as those at whom it is aimed. It is a hopeful sign that in labor circles this means of redress is falling into disfavor. We may all pray that a calamity similar to the late railway strike will never again vex either labor or capital.

Some remedies proposed by the bank crisis in Newfoundland are wild and extravagant in character. There is a talk of legalizing the notes of the defunct banks. If this means to make them a legal tender, nothing could be more unjustifiable. The circulation of these banks is put at $1,200,000. Mr. Harvey, leader of the Government in the Legislative Council, is credited with a proposal that the Government should guarantee a certain unnamed percentage of these notes, which would not be redeemed for some years. The note-holders are innocent sufferers, it is true, and it was the duty of the Government to see that only notes likely to be paid in specie on demand were permitted to circulate. But that it is bound to help the holders of these notes, now that the banks have stopped payment, is not so clear. If it did, the amount paid would be a gift by the public either to the holders of the notes or the shareholders of the banks: to the former, if the latter will not be ultimately able to pay; to the latter, if it be able. The banks are entitled to no such consideration. There is a question whether some one connected with one of them should not be prosecuted. There are said to be heavy overdrafts, authorized and unauthorized; in all, it is said, to the amount of over $1,900,000. All overdrafts are

not to be absolutely condemned, but when they become excessive, the want of security constitutes the danger. If, as alleged, there have been false entries to cover overdrafts, these entries afford proof of fraud. Against fraud there can never be absolute security, and it is not so great a danger as some things done under the form of legality; such, for instance, as one director hopelessly insolvent gobbling up the whole capital of a bank. Some people talk as if the mere want of currency was the principal thing to be met; that can, in fact, easily be supplied, but the worst way of doing it would be to try to give forced currency to bank notes for which specie cannot be obtained. If Mr. Harvey's plan, which the Government is reported to favor, were carried out, these notes would fall below par.

Sir Wm. Whiteway is credited with the proposal to engage the services of two English chartered accountants to investigate the affairs of these Newfoundland banks. The suggestion is a good one as far as it goes, but the state of the banks is one in which the public has an interest as well as the shareholders, and the public ought to be represented by an officer specially appointed for that purpose; but the selection would be difficult, as the Premier's firm is involved with the Commercial Bank. The worst thing that can happen, when a bank fails, is that the real facts should be smothered up, and no lesson for the future drawn from the event. Especially important is this when the directors have helped themselves from the funds of the bank to so great and it would seem so unjustifiable an extent. The directors have taken to themselves not only the whole capital of the bank, but several times as much more. Overdrafts of the bank on its London agent had been secured by bonds, the property of the bank, to the amount of $341,000. There are threats to prosecute the directors, as might be expected. Whether and what ground for prosecution exists will best be judged after a proper examination has been made.

Mr. Bowell, the new Canadian Premier, has completed the re-arrangement of the Cabinet consequent on the death of Sir John Thompson. Sir C. Hibbert Tupper becomes Minister of Justice, and Mr. R. Dickey, Secretary of State. In the other changes brought about by the *replâtrage*, Mr. Ives takes the Department of Trade and Commerce, the Premier being President of the Council without portfolio. Dr. Montague obtains a seat in the Cabinet, making the third Minister without portfolio, the others being, it seems, Sir Frank Smith, and Mr. Donald Ferguson. It is not probable that any change of policy will result from the new shuffle; whether there will be any change of tactics in regard to the time of bringing on the elections remains to be seen. When they do take place, the issue between parties will be mainly on the tariff. There is, so far as can be seen, nothing in the ministerial changes to alter the attitude of Mr. McCarthy towards the Government. It does not follow from the fact that Mr. Bowell is now at the head of the Government that he will occupy that position when the appeal to the country is made.

CHRISTMAS DAY.

A story is told of a little girl who, having lost the use of her sight through illness, was happy enough to have her sight restored by an oculist. During her years of darkness she had dreamed of the great world, how it must look, how the daylight felt. From hearing so much of rejoicing in connection with Christmas Day, she grew to associate exceptional beauty of sight and sound with Christmas. To her mind it took the form of *the* beautiful day. The doctor had predicted the return of the little girl's eyesight, and it was arranged that on Christmas morning, from a window in the doctor's surgery, her eyes, no longer blind, should look out upon a glad landscape. The day was bright, the heavens blue, the clouds fleecy. As the little creature gazed with delight from tree to sky, and the beauties of color, the marvels of motion, thrilled her through, she asked, fearing that she might never see such another sight, "But the other days—the other days, what are they like?"

It has been very beautifully said by a Canadian writer that just as the marvel of the world's beauty is a feast for seeing eyes not one day but all days, so the Christmas spirit properly understood is the spirit for all other days as well. "The warm feelings and the high aspirations, the kindly thoughts and expressed good will, the household gatherings, the gifts prized for the giver's sake, the cessation of strife and oblivion of gain, the sympathy with the poor and distressed"—these are the true expression of the Christian spirit, for the Founder of Christmas said to His disciples on the Galilean mountain, "Lo, I am with you all the days, even unto the end of the world." Benevolence is appropriately associated with this particular day, but those who confine their deeds or words of kindness to the 25th of December alone, deprive themselves of a deal of pleasure and miss the broadest meaning of the maker of Christmas Day.

REVIEW OF THE DRY GOODS TRADE IN ONTARIO DURING 1894.

The year began with a doubtful and ill-defined outlook —not bad, but not bright,—the more conservative observers feeling that there were breakers ahead, without being able to make specific statements as to the causes of them or to say exactly where they would develop. Early in the year business was poor. The mild winter and spring, the drain upon resources caused by visits to the World's Fair, sympathy with the stagnation in the States, our own tariff tinkering, which increased duties on the lines imported, and the early departure of snow, were all blamed for restricted sales. Still many merchants hoped against hope that the summer demand would pick up—only to be disappointed. Then the prudence of the wholesale importers in preparing for the future was shown in the reduction in Customs returns from month to month, indicating reduced imports.

The retailers, finding it harder than usual to market their early purchases, not only let the sorting up trade go, but set their faces against the giving of orders of the usual size for fall goods, causing a reduction in the volume of trade of from 20 to 30 per cent. for the year. The farm crops for 1894 have been average, but values of all classes of agricultural products are so low that farmers have found it hard to meet the interest on their mortgages.

The trouble which began in the trade ten years ago, resulting from the competition then inaugurated and which increased the working expenses of all the firms, became more acute as lower values of goods and the cost of collecting small orders increased the percentage. It has compelled most houses to revise the salary list of their travellers.

The cotton combine, in the opinion of many, has not helped the wholesale men to get the same profits as formerly. Indeed its authorities have permitted their goods to be placed with the Heron Dickson Syndicate at inadequate profits through one or two channels, to the impairment of the trade of older houses. Manufacture no doubt has cheapened, but it is the buying agents and sales agents who have benefited, not the wholesale distributing houses; as domestic production is ample now, and everything points to the combine going direct to the larger

retail trade in 1895, the sooner the result is developed the sooner will matters adjust themselves to their new basis.

Canadian woolens have not proved satisfactory goods to handle, either, which is largely caused by the styles in ready-made suits and overcoats being superior to those turned out by the country tailors. Imports are rapidly adjusting themselves to the conditions, and little overstock of desirable lines will be picked up at the close of the season.

Looking back a decade, quite a few have gone out of the ranks during that time, but their places have been taken by ambitious houses whose ideas have been volume and a large business. It is now apparent that in this limited and small market the concern which is economically operated, which takes smaller risks on shorter credits with no datings forward, makes the best returns on its capital invested.

Shall the wholesale warehouse man continue in the Canadian trade? has been recently asked and answered by a novice apparently trying to cater for the ambitious retail country importer, who wants to sell his people by flattering their vanity. Most merchants know that the retail importer buys from a Manchester or a London or a Glasgow house, either through representatives sent here or in the warehouse when he goes over. The one has to pay duties on the British warehouseman's profits; the other must add the expenses of the trip when he is costing the goods, besides the duty on profits, not to speak of the loss to any retail business by the absence of the managing man.

Quick travel, Atlantic greyhounds and cable codes have done much to help on this trade lately, but some shrewd buyers have experienced that they can make as good bargains and more money at home and save the annoyance of overstock.

There are evils still existing in the trade, some of which are referred to by a correspondent in to-day's issue. Too much and too long credit—dating forward—overstocking and too early stocking—encouraging people with no knowledge of business to buy on credit and to sell at random and at inadequate profit. The evil of accepting compromises is a canker sore, constantly eating into the fabric of the trade These must be lessened if not done away with before this important branch of business can become healthy. While the prospects are not bright as yet, we feel assured that there are enough pillars in the business to guide it, if not to the land flowing with milk and honey, still to reasonably solid ground.

Obligations should be reduced in proportion to the price of goods, and working expenses will be further lowered and economies in working practiced for 1895. Conservative houses in dry goods may still get as good returns as any other business in Ontario in proportion to the capital and skill displayed.

STOREKEEPERS' REBATES.

It is just as natural a custom for some people to beat down a merchant's price as it is an impossible thing for certain other people to do it. Some are natural chafferers —some (but not many) have a constitutional aversion to beating a person down. But average human nature dearly loves a good bargain, especially is it anxious to get something for nothing. Long ago, when some of us were young, it was a usual thing for the shopkeeper who sold a calico dress to "throw in" a spool of thread and a dozen hooks and eyes. That could be afforded in those days when 8 to 4 cents a yard was a common profit on print. It cannot be done now when profits are merely fractional. Happily, so far as we know, the custom has not survived. But there are queer trade customs here and there yet. For example, the Charlottetown *Guardian* of last week says: "The 'something off' is one of the peculiarities of trade in Charlottetown. We do not know of a city of any importance—*save our own*—that continues this antiquated method of doing business. We hope the time is drawing near when the customers and merchants shall unite in doing away with this vestige of petticoat laws and the Bowery." There is a precedent for this, however, in the alleged conduct of the folk of Aberdeen, who, in dealing with drapers, having decided to buy a particular article and ascertained its price, always ask for "something off." So confirmed has the habit grown that a lady went to the booking-office at a railway station in the North and asked for a ticket to a certain place. When the price was mentioned, the habit of a life-time asserted itself, and she instinctively asked for "something off," and only realized the absurdity of the request when the clerk laughed at her through the wicket. It is, as we have said, the "something for nothing," or apparently for nothing, that tickles the average person who goes shopping, and has made many pay big prices for tea that they may get "a prize" of a 10-cent book or a piece of glassware.

OCEAN STEAMER TRAFFIC.

The changing conditions of ocean carriage, the economical development of the steam engine, the increasing size and speed of steamers, the excessive competition for freight and passenger traffic—all these things tell severely upon ocean carriers. We have seen, within a few weeks, one of our lines between Montreal and Liverpool, the Beaver Steamship Company, go into liquidation and its shareholders stand to lose hundreds of thousands of dollars, not from any bad management, but from the pressure of competition, from which there appears no escape. And within the week news comes from Liverpool of a meeting of shareholders of another Canadian transatlantic line, the Dominion Steamship Company, at which an offer was accepted from the Richards Company to purchase the concern, at a rate which means a heavy loss.

From Hamburg came intelligence last week of the consolidation of two ocean steamer lines, the Hamburg-American and the Thingvalla, the latter of Copenhagen, in respect of all traffic between Scandinavia and New York. The Hamburg-American line owns, we are told, ninety-nine ships, of which fifty-eight are sea-going vessels, and the Thingvalla owns six or eight steamers. There are already, it would seem, too many ocean carriers for the people or the merchandise to be carried. And yet the perfecting of processes for the production of steel and the improvement in the economy and power of steam engines keeps on. As the president of the Scottish Engineers' Association said last month, the inventor in these directions has outrun the merchant.

BUSINESS MEN'S LETTERS.

Horace Greeley once said that "the success of a journal depends largely, very largely, upon the friendliness and co-operation of its constituency." That is to say, the aims and efforts of a sound and serviceable paper are immensely helped by the suggestions, the friendly criticisms, even the warning communications of its readers. And just in proportion as, by means of such intercourse with its readers, a journal is able to reflect the healthy public opinion of the constituency it serves, its influence and success will grow. THE MONETARY TIMES has much reason to be grateful to its subscribers for their interest and confidence shown in many valued contributions of the kind spread over many

years. And it is hoped that these relations will continu to exist. The experiences and opinions of observant men of the present day, whether in business or out of it, supplement the labors of the reader and the student in an important degree. The man of books alone cannot so well instruct a community without the views of the practical man of affairs who has learned how often theory may be modified by practice.

ROYAL TEMPLARS.

SECOND ARTICLE.

The following gives a record, at intervals during the past eight years, of the membership of the Dominion Branch, Royal Templars of Temperance, the monthly collections, and the surplus of cash on hand. The latter amounts, at the present time, to scarcely $12 per member, and could therefore be easily wiped out by a single year's heavy mortality:

Date.	Insured Members.	Monthly Collection.	Surplus Fund.
Aug., 1886	2,500	$2,564	$ 3,272
Dec., 1886	2,482	3,246	3,088
May, 1887	2,526	2,654	10,760
Dec., 1889	3,401	3,565	19,655
" 1890	3,879	4,117	30,658
Aug., 1891	3,918	4,582	27,500
Oct., 1892	4,346	4,574	42,226
April, 1893	4,406	3,875	50,798
Nov., 1893	4,742	4,447	64,455
June, 1894	4,930	4,588	62,896
Aug., 1894	5,257	5,472	72,533
Oct., 1894	5,231	4,965	68,498
Dec., 1894	5,334	5,412	60,517

From the above figures it will be seen that for the 18 months from Nov., 1893, to December, 1894, about $5,000 per month, or $65,000, was collected. In the earlier years a large addition was made to the accumulating fund out of the income. But during the 18 months just past, the whole of the above large sum was needed to meet the claims against the branch by death. And even that amount was not sufficient. The poor little accumulated fund was drawn upon to the extent of $3,938, reducing it from $64,455 in Nov., 1893, to $60,517 in Dec., 1894. If each member is carrying a $2,000 certificate, on the average, then this protective fund amounts to less than $6 per $1,000 of risk carried. How easy it would be for death claims to accumulate in a short time sufficient to throw such a weak society into insolvency, may be judged from the fate of the Mutual Benefit Life Association of America. It was only one short year ago that the officers of that body reported, on oath, to the N. Y. Superintendent of Insurance, that it had 5,775 members, carrying certificates of $11,679,100, and a surplus fund of $453,519, or nearly $40 per $1,000 of certificates in force. Its age was ten years, the same as the Royal Templars, who closed their first decade with quite a celebration, only a short time since. We now learn that the Mutual Benefit's unpaid death claims last December would have required an extra assessment of $27.10 per member to meet them, and that such a call would have been impossible of collection, as almost every young and healthy member would refuse to pay. In consequence of failure to pay the calls made on the members, it is now rapidly dissolving. It has some funds left, however, and is endeavoring to get its remains taken over by another similar assessment concern, about as weak as itself—the Home Benefit Society, of New York.

Remembering the fate of those other three societies which so recently disappeared from our midst in a similar manner to the above—the Canadian Mutual Aid of Toronto, the Canadian Mutual Relief Society of Yarmouth, N.S., and the boastful Western Mutual Union, of Detroit—we should not be at all surprised to see the Royal Templars' Select Degree insurance fund business also disappear from existence. The dissolution of the London, Ont., Masonic Mutual (though it had a large fund on hand when it suspended), owing to terribly heavy assessments being needed, and the winding up of that excresence on the A.O.U.W., which was started into life about ten years ago to give additional insurance to United Workmen especially—the Canadian Relief Society of Toronto—leads to the conviction that there is danger just ahead along that line, just here in Ontario.

There are far too many of these weak concerns competing with each other in wonderful future advantages. Some of them go so far as to undertake that at expectancy, or at 70 years of age, the certificates will be paid in full, though where the money is to come from it is impossible to see, unless present assessments are to be more than quadrupled in a very short time. The safe and sensible thing for a man to do is to put no money into any such foolish enterprises, no matter what name they assume, or what temptation they present. They cannot make $1,000 out of $200 or $300 paid in during life expectancy, any more than the Iron Hall could do it in seven years, or the defunct Sextennial League in six years. If these proved to be arrant swindles, what are we to say of assessment societies that pretend to furnish endowment insurance of $1,000, payable at death or expectancy, for $10 or $12 a year. It cannot be done, and it is neither intelligent nor honest in any concern to attempt it. At age 30 the expectancy of life is 35 years, and no company having capital to lose would undertake to pay $1,000 at death, or in 35 years, for less than about $22 to $24 per annum. The level guaranteed rate is $22.52 in reliable companies. The company would receive, at the outside, $788.20, and would have to earn the balance from interest upon what was left over each year above the cost of carrying the risk.

THE ALGOMA DISTRICT.

Appropriately following what appeared in our columns last week about the products of Manitoulin Island, we have pleasure in noticing a pamphlet descriptive of Algoma, which has been sent us by Fred. Rogers, D.C.L., of Sault Ste. Marie. It gives the testimony of a great number of actual settlers as to the fertility of what many are accustomed to consider a bleak and rocky tract. The Algoma District of Ontario, we may tell our Old Country readers, is that part of the province lying along the Georgian Bay and Lake Superior, extending west from Lake Nipissing towards Manitoba. The evidences of prosperity given by scores of settlers is most satisfactory. The book is compiled with discretion, too. Mr. Rogers does not paint sparrows as birds of paradise. He tells the young settler that he must not expect to commence where his father, the old pioneer in older Ontario or Quebec, left off. He must not expect to find brick houses—a windmill on every barn or a piano in every house—he must remember he is coming to a new country. "But the settler coming to Algoma will not have to undergo the hardships which our forefathers in older Canada had to undergo. He will find churches of all denominations, schools, stores, fair roads." Another extract we make which is worthy of attention by the sheep grower: "The enquirer has found also that Algoma is the best watered country in the world. Everyone who comes here admits that; and this fact, along with the fact that the clover is natural to the soil and grows everywhere, proves conclusively that to those who wish to go into cattle, sheep or hog raising, Algoma offers the greatest possible inducements."

Holiday Reading.

A TRAVELLING YARN.

At a town on the Ottawa route in Eastern Ontario a group of travellers were gathered one Saturday afternoon. An accident had occurred to the train that was to take them away, and in consequence the half dozen were forced to stay at a hotel that night and possibly over Sunday. It was raw November weather, mud abundant, and the surrounding country looked its worst. For those of the party who were fond of outdoors there was precious little attraction either in the town or out of it. The fellow who complained of November as a succession of "Noes" would have found a confirmation of his view at that small place, for there was "no sky—no earthly view—no distance looking blue—no road, no street, no t'other side the way," and the thoughts of the group seemed to be as dismal as the weather. Ontario country roads at that time of year are rarely inviting to either pedestrian or rider, and those who at their homes might have gathered round the piano, or in the city might have gone to their clubs, were lonesome and bored enough at the prospect of a dreary thirty-six hours' imprisonment in a stuffy little tavern.

But there was one cheery man in the lot—a round-faced fellow, with bright eyes, and hair cut *a la* Pompadour, who seemed a compound of hotel clerk, law student and railroad man. He it was who rose superior to the weather, and called out, "Here's a backgammon board, who's for a game?" Nobody volunteered. "Well," he went on, "there's an old bagatelle board in the room behind the bar, who'll have a go at it?" Still no response. Then, with perfect good humor, he proposed a game of cards. Strange to say, the proposal fell flat. One sallow-faced senior—who afterwards turned out to be a wholesale merchant—declared that on principle he never played cards. Another languidly said he cared for no game but picquet, which made the round-faced man look at him, as much as to say: "Hello! what sort of a swell are you?" A third said he would play cribbage, two or four handed, but there was no cribbage board, and that ruled him out. Next came a remark from a high-shouldered hay-seed in the corner of the room. "I'd like all-fired well fur to play, but I haint never learned no game 'ceptin' High, Low Jack, an' I spose you gents don't play that game." Finally a response, as welcome as it was unexpected, came from a young fellow who had been reading near the window, and he said he knew euchre, but hoped they didn't play the game that required the 'joker,' since he preferred the old-fashioned, plain euchre. But the bright-eyed proposer wanted a round game, and vowed that if he couldn't get a four-hand game of euchre, or pedro or hearts, he wouldn't play at all,

With this he threw his hat upon the table, put on a silk cap, which he drew from his pocket, and then proceeded to fill his pipe, saying, as he looked round the room: "You folks ain't very well fixed for rainy Saturdays. You can't be out doors all the time, you know. It appears like you don't care for dice or bagatelle, and you won't play cards, or else you don't know how. And yet you ain't a reading crowd, either—only one feller amongst you has got a book. What do you calculate to do all day? By the great smoke!" he exclaimed, as he put his heels on the stove and struck a match on the leg of his trowsers, "I'm goin' to see if some of you won't talk."

"Or say, young fellow," he added, turning his chin half over his shoulder as he looked towards the young man near the window, "suppose you read to us out of your book."

The reader, a well-mannered chap, as it turned out, looked laughingly towards the centre of the group, and replied:

"Well, sir, I should be happy to read to you and the other gentlemen, if they are agreeable and you think you would be satisfied. But I want to tell you that this book is 'Wilson's Chemistry'; I'm cramming up, and I don't think it will do much to entertain you."

Everybody laughed, except the hay-seed, who probably did not know what chemistry was or had no sense of humor, and perhaps the solemn merchant, who disapproved of frivolity.

"You ain't readin' for fun, then," Bright Eyes went on, "for I judge there ain't much fun to be got out of that line of readin'. One sure enough thing is I can't go you on chemistry. But I'm going to start this meeting, somehow."

"Give us a talk, yourself," suggested a domestic-looking man who had thus far said nothing.

"Good enough; now you look like a man of peace, what do you think of the Chinese war?" The reply being that he hadn't thought much about it, the D.M. next was asked about woman suffrage—the iron furnaces—the American tariff—the P P A. -without definite result But when asked how he was on the Trent Canal, he seemed within his depth, and asserted himself on that subject, as well as on electric light for the village, which last he felt quite sure was a dangerous extravagance.

Having pumped this man dry and made him sulky, Bright Eyes, who was no respecter of persons, turned to the solemn member of the party, whose dress was as sombre as his manner, and asked, "Are you holding forth here to-morrow, sir?"

"What do you mean by holding forth?"

"Well, I should judge you are a preacher, and I reckoned you've maybe been studying up your sermon, you've been so all-fired quiet."

"No, sir, I am not a preacher."

"What are you, then?"

"I am a merchant."

"What line?"

"Dry goods, if you must know."

"Why, certainly; wholesale or retail?"

"Bless my heart, man, did it ever occur to you that such curiosity might be unwelcome. What right have you to catechize a stranger in this manner?"

"Perfect right to ask questions—you needn't answer unless you want to. No call to get mad about it, anyhow. I'm here for the day; so are we all; don't make strangers of us. You don't belong around here, do you?"

"My name is A. Z. Blank, of the firm of Blank, Blessed & Company, Montreal, wholesale importers of dry goods, small wares, fancy goods. I live at the foot of the mountain; am married and have two children; have come from the north this morning; have had breakfast and dinner at this hotel and hope to get away some time to-morrow Is there anything else?"

"Bully for you, Mr. Blank, I guess we'll get along now, thanks. Seem to have got a start, anyhow. Now you can tell me, may be, something I've been wanting to know for quite a while. I'm on the road, myself. I travel for a Hamilton house, not in your line. Here's my card."

"Very well, Mr. Bright Eyes, I might have known you were a commercial traveller. What is it you wish to know?"

"Simply this, how long are you dry goods folks going to keep up this everlasting farce of eight and nine months' credit to storekeepers, and when are you going to stop taking compromise settlements?"

"Why, my dear sir, the question opens up quite a large subject. I may say that personally I have always endeavored to shorten the terms of credit, which are unquestionably too long. Also that I have striven, in my humble way, to prevent the acceptance of compromises, except, of course, where the exigencies of business de——"

"'Exigencies of business is good," broke in Bright Eyes, with a snort; "exigencies of your grandmother's pig! You mean the exigency or convenience of Blank, Blessed & Co., who would take a compromise quick enough if they were the big toads in the estate. I know the wholesale fellows, and a d—d job lot some of them are."

"No profanity, sir, if you please; I object to profanity on principle. As for your personal reference or insinuation, I dismiss it—it passes by me like the idle wind. Our firm stand too high to be sneered at in such a manner. We have never, it is true, become attached to any association of importers who agreed by hard and fast lines to sell only on certain terms. We consider it better to—ah—deal with each case on its individual merits, and to be governed by the circumstances of place, time and person, subject to the general—ah—principles we have laid down."

"Oh, so you have 'general principles' to work on (with some exceptions, of course) when a man asks you to compromise, or date forward, or renew notes. How is it when you are making sales, is it a go-as-you-please, then? Do you sell to Tom, Dick and Harry in every town?"

"Certainly not, by no means. Our instructions are very distinct on that point. Our men are told to use their best judgment not only as to character and responsibility of the men they sell to, but as to locality, the probable consumptive demands of a district, and so on; not to overload one customer or give another the advantage of him, and so forth We are very particular in these matters of rule and principle. You see, the interests of one's customers should have some safeguard."

"Yes, I shouldn't wonder. Your instructions are so-and-so. Well, what do you do with a fellow that don't obey orders?"

"We dispense with his services."

"You wouldn't be too hard on a poor cuss for a first offence, would you, Mr. Blank?"

"Sir, it would be injurious, nay, I may say fatal to the success or permanency of any business to allow the maxims and rules adopted for its guidance to be transgressed by its employes. The man who deliberately transgresses instructions has, you must admit, no one to blame but himself if he is dismissed from service."

"Then something's busted, I guess."

"What do you mean?"

"Why, it's mighty plain something's out of kilter. These regulation principles of yours have got tangled up in the hitching somehow. The tail seems to be wagging the dog in this outfit."

"Your language, Mr. Bright Eyes, is a puzzle to me. Have you any reason to doubt what I have just been stating?"

"You bet your socks I have. You Toronto and Montreal dry goods fellows will go and give a stock of goods two-thirds on credit to some chuckle-headed farmer who was never in a warehouse in his life, who doesn't know simple reduction, and who can't tell a cotton chemise from a silk dress."

"Ah, I am afraid that is too often true. I have heard of Toronto houses doing some very silly things of that sort."

"Heard of it, in Toronto; why, Great Scott! did you never hear of it and practice it in Montreal?"

"As I have told——"

"Hold up, now, Mr. Blank. Isn't Jim Slipsole one of your travellers?"

"Yes, Mr. Slipsole is one of our most trusted men."

"I suppose he knows your rules."

"Perfectly. And shows great discretion in applying them."

"That's a fair-to-middling good word of yours, 'discretion.' I happen to know that Jim sold a bill of $1,800 a year ago to that man McSwattle, out here across the Madawaska, who raised $800 on his farm and paid it to your firm. What did that blathering hog-raiser know about dry goods? He knew just enough to scatter them round the county of Renfrew on tick, or if he sold any for cash, he didn't get profit enough to pay for carting them out to his cross-road store. And, mind you, he undersells such storekeepers as Rumplefull in ——, and Toots in ——, who are customers of yours, too. Now, do you call that a fair shake for customers who know their business? How is it you let such a deal go through? How about your rules?"

"Why, Mr. Bright Eyes, you surprise me."

"Well, may be I do, but I ain't apologizing for it any. It's the Lord's truth I'm giving you. How was it you didn't get Jim Slipsole into the sweat-box for a lecture, and: hen shunt him, 'cordin' to regulation principles, for not obeyin' orders?"

"This must have taken place while I was in England. I must make enquiries——"

"Yes, just you ask Jim. Maybe he'll say he was using 'discretion,' as you call it. But see here, I'll give you another. There's an awful smart dry goods feller up in Toronto; he's a bully lecturer, great on 'upholding the standard'; he's long on rules of virtue, but short on practice, as I tell his men. Well, he did the very same thing—gave a stock of goods to a fool of a schoolmaster who had some dibs saved up, and started him *in the same town* as a customer who had been established ten years. But Mr. Ten-year-old customer wasn't no slouch. He quit buying from Smarty, of Toronto; paid him off inside six months, and then wrote him that if he or his traveller ever came to sell him goods again he'd kick them clean across the street. And he is just the kind of hair-pin to do it."

Just here a lanky man, with pallid features and thread-bare clothes, but a sweet smile and apologetic manner, came into the room, rubbing his hands gently, and beamed towards the slangy speaker, who jumped up, and, clasping the hand of the newcomer, said:

"Hello! old Beeswax, come in. Blame my cats, but I'm glad to see you. We've just been talking about a schoolmaster who was an ass, but that wasn't you. Let me make you acquainted with Mr. Blank, of Montreal, a man of high principle, as you are yourself. And excuse me, folks, for a while; I see my man across the street, and I'm onto him."

The cheery and outspoken champion of the country storekeeper being gone, the rest of the group were rather overawed by the presence of the rich merchant, who on his part was by no means disposed to conversation with the teacher of the young idea who had just come in. But if the dignity of "His Nibs," as the bar-keeper christened him, would not allow of his chatting on even terms with one of whom it could be said:

> Chill penury repressed his noble rage,
> And froze the genial current of his soul,

it was not so with the manly-spirited young fellow with the chemistry grind. He came forward very civilly and gave the shabby man his chair, saying, as he did so: "Sit down, Mr. Wayleigh, you look chilled and I'm afraid you're feet are damp. Don't go away until Mr. Bright Eyes comes back, he cheers us all up." Then the domestic-looking member of the company handed the schoolmaster a cigar and the hay-seed bustled forward to provide him with a match. The conversation fell upon local and personal topics, and the merchant was rather out of it as the group sat in the waning light looking for the talkative man to come back.

STAGE COACHING, TELEGRAPHING, AND NEGRO MINSTRELSY IN THE EARLY FIFTIES.

INTERESTING REMINISCENCES.

In the early fifties, before the Grand Trunk Railway was constructed between Toronto and Montreal, the principal, though not the only, mode of commercial intercourse and travel between these two cities, in the summer season, was by steamer. Prior to 1849-50 the steamers employed were mostly of the propeller or polly-wog description, and as these antiquated, stubby, rolly-polly specimens of marine architecture pitched and tossed fearfully, upon the slightest provocation of wind or wave, they were not highly popular as passenger-carrying craft. In the winter season the only available public carrier was the stage-coach. Of course stages covered the route between Toronto and Montreal all the year round, winter and summer, but this mode of conveyance had exclusive control of the traffic during five months of the year while navigation was suspended. At this somewhat remote period certain sections of Western Canada, or Upper Canada, as it was then called, depended in a great measure upon Montreal for their supplies of merchandise; and for convenience, expedition, economy, and other obvious reasons, Western retail merchants chose the summer season in which to visit Montreal to purchase goods. On these occasions they generally bought in quantities sufficiently large to carry them over to the following season. It is true there were at that time quite a number of wholesale houses in Toronto which imported direct from the Old Country, the most important being Ross, Mitchell & Co., Bryce & McMurrich, Shaw & Turnbull, Gilmor & Coulson, John Robertson (father of John Ross Robertson, proprietor of the *Toronto Evening Telegram*), John Ewart, jr., & Co.; P. J. O'Neill, etc. These firms were in the wholesale dry goods business, while F. & G. Perkins; Whittemore, Rutherford & Co.; A. V. Brown; Moffatt, Murray & Co., and one or two other houses represented the wholesale grocery trade. All these establishments carried on quite a large business and imported goods direct, but at the time referred to Montreal was more of a business centre for all Canada than it is to-day, and many Western retail merchants doing an extensive business traded exclusively with houses in that city.

A trip to Montreal on the old-fashioned and poorly-equipped steamers of those days was a much more tedious and far less comfortable journey than is a run to Montreal on the fast-sailing steamers of the Ontario & Richelieu Navigation Company now-a-days. In the winter season the through travel on the stage between Toronto and Montreal was restricted to those persons whose business was of the most urgent nature, socially or commercially, but the intermediate travel was at all seasons very considerable. A ride in the stage coach early in the fall, or even in midwinter—under, of course, favorable meteorological conditions—was an undertaking that had only to be tried to be appreciated. Nothing could be more delightful than a thirty or forty-mile dash in the clear, bracing autumn weather, and when properly clad and prepared for the journey a midwinter spin on the stage, which was placed on runners when the state of the roads made it desirable to do so, was exhilarating and enjoyable. The single fare from Toronto to Montreal per stage was, at that date, eighty shillings, Halifax currency, or sixteen dollars, and the fare from Toronto to Kingston was forty-five shillings, or nine dollars; from Toronto to Oshawa the fare was six shillings and three pence, or one dollar and twenty-five cents.

In October, 1851, the writer of these lines took passage at Toronto for Oshawa on the Royal Mail Stage Coach Line, of which Mr. W. Weller of Cobourg was proprietor. The stage office was in the corner of the old Coffin Block, Church street, at the intersection of Front and Wellington streets, the present site of Messrs. Gooderham & Worts, large building in which are their head offices. The stage for Montreal started from in front of the stage office door about noon daily. At that time Mr. Thomas Scott was the agent for Weller's "Royal Mail Stage Coach Line," but later on John Bowman, afterwards express messenger between Toronto and Hamilton, and well and favorably known to all Torontonians for his long and honorable connection with both the railway and express companies, acted as agent, with Harry McDonald as his assistant. Harry McDonald, by the way, was subsequently employed as chief clerk in the American Express Company's office here under the late M. H. Irish, and one afternoon, thirty odd years ago, a clerk from one of the local banks handed McDonald across the counter of the express office a package containing over $6,000, to be forwarded to one of the bank's agencies. That night McDonald disappeared, and, needless to say, the money never reached its destination

McDonald's sudden withdrawal from the scene gave quite a shock to his many friends, he being looked upon as one of the most exemplary and promising young men in the city. It was said that he sought by a circuitous route the "glorious climate of Californy," but no trustworthy intelligence was ever afterwards obtained concerning him. At that time telegraphic communication had not been established between this country and California. Detective bureaus were unknown, and the machinery for running down those who quitted the country to escape punishment for their crimes was not so far-reaching and efficient as it is to-day. Allan Pinkerton, principal of the Pinkerton Detective Bureau, was then working as a cooper in a small town out from Chicago. Our own chief of police, Sam Sherwood, a tall and handsome military-looking man, who never appeared on the streets without a highly-bred white bull terrier dog at his heels, was entirely non-plussed when a case like McDonald's cropped up. Popular ideas as to the proper observance of "the proprieties" by guardians of the law were not so rigid as they are to-day, and Sam was allowed to indulge his propensity for a fighting dog without exciting ill-natured comment on the part of the citizens or reproof from those in authority. It would scarcely be considered the correct caper now-a-days for Col. Grasett, the present chief of police, to perambulate the streets with a dead-game fighting dog "seeking whom he might devour" of the canine race, trotting by his side. On the quiet streets where a scrap with another quadruped, of the genus dog, could be had without attracting too large a crowd, Sam, who, before his appointment to the position of chief of police, was "one of the boys," never objected to allowing his pugnacious thoroughbred to have a "go," and he must needs be a downright good one who would face Sam's rat-tailed English importation, with its long, powerful, punishing jaws and terrific fighting abilities.

Before boarding the stage I had ingratiated myself into the good graces of the driver by praising his horses and showing him some little personal kindnesses, and this procured for me permission to sit with him on the box He was a little, sturdy, bow-legged, oldish man, with pocked-marked face, who wore rings in his ears. His hands, wrists, and neck were tattooed with Indian ink, and altogether he had more the appearance of an ancient mariner than a knight of the whip. In his personal appearance he resembled in no respect Dickens' Tony Weller, of stage-coach fame, but it was quite evident that he had received something tantamount to an Ontario Jockey Club training as a Jehu, and was abundantly capable of controlling the four spirited horses attached to the stage. Neither is it at all probable that there was any connection between Dickens' Weller and our Mr. W. Weller. "Tony," immortal though he be, was simply a stage-driver, while our Weller was sole proprietor of several extensive lines of stages—for he not only owned those which ran between Toronto and Montreal, but his coaches covered several routes west of Toronto as well, and he employed a whole army of stage-drivers. In fact, our Weller, who was both opulent and corpulent, was well known throughout the biggest part of Canada as an industrious, energetic, and thoroughly enterprising man of business. He had a sumptuous residence at Cobourg, and lived as a gentleman of taste and means should live; moreover, he was of as much consequence, commercially and politically, and wielded as great an influence in his day and generation, relatively speaking, as do Sir W. C. Van Horne or Mr. L. J. Seargeant at the present time. Mr. Weller later on became interested in a telegraph line which was built in opposition to the old Montreal Telegraph Co., and in this ill-advised venture was the bulk of his large fortune dissipated.

The stage, as I have intimated, was drawn by four strong, but active horses, and these were changed every ten miles for fresh ones, regular posts for this purpose having been established throughout the entire distance between Toronto and Montreal. The driver, on nearing these posts, blew an original home-made *reveille*, with a thrilling military twirl in it, on his tin horn, to warn the attendants and those in the neighborhood of his approach. The stage in the winter season carried the mail, and the best possible time was made compatible with the condition of the roads and the weight of the load behind the horses. The stages were wider and longer than those in use at the present time, and could accommodate 6 or 8 passengers inside, besides a number outside. They also had a spacious "annex," or what was called the basket or cradle, hitched on behind, in which was carried the travellers' baggage trunks, parcels, etc., and these were sometimes quite a load of themselves.

On reaching Oshawa the stage stopped at the Ontario Hotel, kept by J. McElroy, and at this hotel I took up my temporary quarters. The object of my journey to Oshawa was to relieve Dr. Irwin of his telegraphic duties for a week or two. Dr. Irwin, besides being agent for the Montreal Telegraph Company, was also a medical practitioner and dentist. He belonged to Dunkirk, N.Y., and wishing to visit that place, Mr. Dwight, manager of the Toronto office, detailed me to proceed to Oshawa to take charge of the telegraph office during the Doctor's absence.

Before leaving Toronto I had been loaded up with instructions from Mr. Dwight regarding the management of the office in general and the careful handling of the instruments and wires in particular I was impressively enjoined to see, when cutting the instruments out of the circuit at night, that they were made secure from lightning, and the wires so arranged as to allow of the line working through. I was taken to the battery-room, given an elementary lesson in chemistry, and initiated into the process of scientifically compounding the material employed in the production of a local battery of the Grove pattern. I was also instructed as to the utility of the ground wire, and it was drilled into me that before opening the key to call an office I was to be very watchful and wary to see that no other office was using the line. I was further cautioned as to the correct reading of the thermometer, and coached as to the preparation of a weather bulletin which Oshawa, with all other offices on the line, was expected to transmit by telegraph to Montreal, the head office, every morning, with the "receipts"—that is, a statement of the previous day's business. The telegraph instruments at Oshawa were of the most primitive description, and I have often thought of the odd contrivance the Doctor had for securing the main wires over night. This was a little orifice cut in the table between the two main posts of the relay. Into this tiny hole a thimble filled with quicksilver had been inserted, and with the greatest solemnity and care the ends of the main wires were removed from the relay posts and placed into this cute little receptacle every night before closing the office. Although I could send and receive messages fairly well, I was not yet familiar with the subtle mysteries of the telegraph. I had a profound, though hazy and undefined, notion that there was something very uncanny about it. Indeed, I fear I was timorously apprehensive that unless all these minute details were faithfully carried out at night, the building in which the office was situated might be found blown into smithereens next morning. A weekly paper was published at Oshawa—the *Oshawa Reformer*—and the editor, Mr. Oliphant, came to the telegraph office on the day of publication and received a very brief outline of the latest news and a few market quotations. He copied these attenuated reports as I read them off the tape, and cheered me on by complimenting me on the satisfactory manner in which I fulfilled my duties. The Toronto *Globe* at this time was only published as a tri-weekly and weekly newspaper.

I stopped but one night at McElroy's, Ontario Hotel. Dr. Irwin, who was then unmarried, lived at the house of one of the principal families in the place—Mrs. Skae's—and I found that it had been arranged that I was to stay at the house of that lady until he returned. On the day after my arrival, therefore, I made the house of Mrs. Skae my home. Oshawa was then a very small village, and at that time the Messrs. Cowan, to whose wisely-directed energy and keen business sagacity the place is indebted for much of its prosperity in recent years, were then engaged in the dry goods business in Toronto. The telegraph was patronized by but few, and the receipts of the office were consequently very light. Among Mrs. Skae's interesting family was a young son, John, or, as we familiarly called him, "Johnnie." He was about my own age, a trifle younger, perhaps, and he and I were a good deal together. Whitby at that time, although almost as large a town as Oshawa, was not considered of sufficient importance to entitle it to the honor of having a telegraph office. I walked out to that place several times with messages which had been received *via* Oshawa for residents of the neat little village, and was paid one-and-three-pence, or twenty-five cents, on each occasion for my trouble. Most of these messages were for Scripture's Hotel. Scripture was the name of the man who kept the hotel, and it struck me, as a little chap, that it was a peculiar name for a publican. But the beneficent and alluring qualities of his Biblical cognomen were not required to advertise the house, for the proprietor was a born Boniface, and it is as true as scripture that his was one of the best-kept hostelries between Toronto and Montreal. The distance from Oshawa to Whitby and return is between nine and ten miles. Perhaps a quarter dollar for footing it that distance was not a too generous remuneration, but quarters were scarce in those days, and I thought myself well paid for the service, and "passing rich" when possessed of that amount. Johnny Skae accompanied me on these trips, and of course we divided the amount received for the delivery of the messages.

At this time I am writing. the only telegraph offices between Toronto and Montreal, beginning at this end, were: Toronto, Oshawa, Port Hope, Cobourg, Belleville, Kingston, Brockville, Prescott, Cornwall, Montreal. These were all, and there were no side lines or branch offices. The rates of tolls for messages were then reckoned according to distance. The price for ten words for any distance under 100 miles was one shilling and three pence; over 100 miles and under 200, one shilling and eight pence; over 200 miles and under 400, two shillings and six pence; over 400 miles, three shillings and nine pence. The latter price was the rate from Toronto to Quebec, and the charge for each extra word was fourpence halfpenny, or say about eight cents. But right here I would ask permission to speak further of Johnny Skae. He was a quick-witted little fellow, sharp as a needle, and possessed of more than ordinary intelligence

Dr. Irwin taught him to telegraph, and about 1853 he moved up to still further Western Canada. Mr. Dwight, who, through this long connection with the telegraph business in a managerial capacity, has probably provided more young men with situations than any other man in Canada, first gave him employment as an operator at Chatham, and subsequently sent him to the Clifton house, Niagara Falls, where he filled a similar position. While here, Cyrus W. Field, on one of his visits to the Falls, met young Skae and took quite an interest in the bright, natty little chap. As telegraphy had just about that time been introduced into California, there was a good opening for operators, and Mr. Field advised his young *protege* to emigrate to that country. After looking the matter over Skae set out for the Golden State, going there by steamer from New York *via* Aspinwall and Panama. On arriving at San Francisco, Skae at once obtained a situation as operator, but before long he resigned his position and gave his time up entirely to mining and mining matters, buying claims and operating in mining stocks, etc. In these ventures he was phenomenally successful, and while John W. Mackay was yet a poor man Johnny Skae had amassed a fortune. The fact that Mark Twain devotes an entire chapter to Johnny Skae in his tale of the "Jumping Frog"—written in 1861-62—in which he in a friendly way pokes fun at some of Skae's personal peculiarities, particularly his disjointed and involved phraseology, would seem to indicate that he was a well-known character and occupied a prominent position in certain circles in California at that time. Skae went on increasing in wealth until he was rated as being worth anywhere from ten to fifteen million dollars. He was a big-hearted fellow, and although not ostentatiously extravagant, spent his money freely, if not lavishly. He entertained like a prince, but was temperate in his habits, and avoided dissipation of all sorts. He built a summer residence of great architectural beauty on one of the mountains in that region. This secluded and salubrious retreat was capacious, inviting, quaint, and picturesque. The straggling trees and underbrush were removed, the hill sides terraced, and the grounds laid out with exquisite taste. Here were cool, limpid, diminutive artificial lakes fed by pure spring water from the mountains. These lakes abounded with mountain brook trout, and here Skae's friends from the East, literary men, professional men, and capitalists, visited him and partook of his hospitality, and with the deceptive fly beguiled the wary trout from the cool recesses of the ponds. The richest viands and most expensive wines and liqueurs that money could purchase were the order of the day, and with Skae "everything was lovely, and the goose hung high," or rather, we should say, *honked* high. But it was with Skae as with others before him. He was soon to experience the storms of adversity. His riches were already taking unto themselves wings with which to flee away. Tribulation and trials were at hand. Reverses, terrible in their effects, finally overtook him, and the crash came. The mines and mining stocks in which he was interested became unpopular and unproductive, and took a sudden and sullen drop. Other financial speculations in which he was engaged ended disastrously. In Skae's case a deplorable exemplification was had of the maxim that misfortunes never come singly. Everything, in a word, seemed to go wrong with him; his once colossal fortune melted away like mist before the morning sun, and presently Skae was forced to face the rude, stern fact that he was penniless. He was "good grit," however, and fought hard to retrieve his fortune; but the times had changed, and although he had no lack of friends, able and willing to assist him, the same facilities for making money rapidly which prevailed when he arrived in California did not now exist, and after vainly striving to recover his position, his health gave way and he died in San Francisco ten or twelve years ago. While he was in flourishing circumstances he settled a large sum of money on his wife. This was never touched in his subsequent business engagements, and at his death the widow was left very well provided for. Skae performed many generous acts when in the hey-day of his prosperity. Unlike many poor men who have become snddenly and abnormally rich, he never went back on his old friends, and more than one hapless Canadian seeking his fortune in distant California has good reason to remember his open-handed generosity.

Dr. Irwin, at the expiration of two weeks, returned to Oshawa, and after spending a day with him I came back to Toronto. - The Doctor, who had a happy disposition, and was one of the most courteous and genial gentlemen I ever met, died many years ago. J. D. Irwin, the well-known and deservedly popular manager of the Canadian Express Co. in this city, himself a retired telegrapher, and one of the best of his time, is his brother, and C. W. Irwin, the hustling Custom House broker, Yonge street, is a son of the Doctor's.

The stage on which I returned to Toronto left Oshawa quite early in the morning, and I found to my delight on getting on board that we had a negro minstrel troupe for fellow-passengers. The troupe had been giving entertainments at the small towns between Toronto and Kingston, and were returning to Toronto. I was personally acquainted with one or two members of the band, and this procured for me a sort of "hail-fellow-well-met" reception from the crowd. Amongst them were one Fisher, an itinerant telegraph operator, with an unconquerable love for the burnt cork business. He was a capital singer, and played the guitar with the skill of a troubadour; Johnny Munro, son of Geo. Munro, at one time Mayor of Toronto, and brother of Geo. Munro, now of Her Majesty's Customs, Toronto, and Johnny Craig, whose father was the leading house and sign painter in this city—these, with their companions, were well up in their separate parts. All the way between Oshawa and the Rouge we had a perfect feast of fun and flow of song. The banjo, guitar, tambourine, and fiddle were all manipulated by artists, and "Brudder Bones" was simply inimitable. Such a revel and riot of wit and humor, jokes and conundrums, had never before been heard anywhere on the Kingston road. It was a genuine display of fizzing and glittering intellectual pyrotechnics. Even a stoic must have relaxed his gravity at fun so pungent, polished, and pithy. The histrionic art may have made great advances during the past fifty-five years—though there are those who will not admit that this is the case, except in the matter of scenic embellishments, elaborate stage settings, and ingenious mechanical appliances—but it is more than doubtful whether the negro minstrels of to-day are as able or amusing, or capable of portraying negro life as truthfully and pleasingly as did "Brudder Bones" and his colored colleagues half a century ago. Negro minstrels are too highfalutin and operatic now-a-days; there is too much tinsel, too much blaring brass band and street show, too much swallow-tail coat, satin pants, silk vest, immaculate shirt front, and ball-room get-up generally, and too little real honest and natural delineation of negro life as it was before and after "de wah." When Johnny Craig's full rich tenor voice rang out on that calm, crisp autumn morning with "Way down upon de Swanee Ribber," and the others picked up their parts and joined in, the effect was magical, and the listeners were pleased beyond measure. After this a number of melodies as sung by negro minstrels of those days were given with infinite taste and skill. The tunes of some of these we seldom now hear, but most of them were exceedingly pretty and catchy. They sang "Buffalo Gals," a very popular darkey song forty years ago, one verse of which ran thus:

I danced all night, and my heel kep' a-rockin',
My heel kep' a rockin', my heel kep' a rockin';
I balanced wid a gal wid a hole in her stockin',
She was de prettiest gal in de room.
CHORUS.—Buffalo gals, ain't you coming out to-night?
Ain't you coming out to-night? ain t you coming out to-night?
Buffalo gals, ain't you coming out to-night,
Fo' to dance by de light of de moon?

Then we had—

Strike, boys; strike with all your might,
And make de fiddle ring;
We'll please de white folks here to-night,
And sound de tambourine.
We are from a place we doan know whar,
Ten miles from sea or land.
We've trabbled o'er dis continent
Wid dis our darky band.
Strike, boys, strike, etc.

They sang "Nancy Till," "Massa's in de cold, cold ground," "Swashay, hands across; Sally, go down de Middle," "Emma Snow." One verse of the latter ran:—

'Way down in Alabama, not bery long ago,
I knew a yellow charmer, and her name was Emma Snow.
Her eyes were bright as diamonds, her teeth were pearly white,
Dey glistened in de darkness, and de stars shine bright at night.

Of course we had "Do da, do da."—

I went down town with my hat stove in—do da, do da,
I came back home with my pocket full of tin—do da, do da, day.

Then came "They stole my child away," a high class negro melody with some really good music in it. I wonder it is not sung in these modern times. We also had that rollicking genuine negro ditty—

I'se bound for de shuckin'! I'm gwine to de shuckin',
I'se off for de shuckin' of de corn, sure's you born.
I'm gwine to de shuckin' of de corn.

"The old folks at home," "Old Dan Tucker," and others followed in rapid succession. By and by we arrived at the Rouge, where mine host stood at the open door of the inn, the regular stopping place of the stage, to receive us and extend a hearty welcome as he gleefully rubbed his hands together, "washing them in imperceptible water and with invisible soap." Here we had an excellent breakfast of hot coffee and toast, beefsteak and potatoes. The minstrels, as may well be imagined, were somewhat thirsty after their long drive and vocal exercises. Liquid refreshments were cheaper then than at the present time being two pence per drink, or four drinks for a yorker (12½ cents), and after one or two rounds our Ethiopian jesters were hilarious and happy. The Gooderhams made whiskey even away back in those early days, down at the old windmill, but I do not suppose it was of so excellent a quality as they now manufacture. The bottles in those raw and rough times were not sealed with fancy tinfoil; neither were they emblazoned with gold medals, nor with statements to the effect that the Government guaranteed the "age, strength, and quantity" of the tipple. Certain it is that at that time it had not acquired a reputation in or out of

Toronto. Flamboro' West whiskey and Morton's proof, of Kingston, appeared to be the popular brands. Johnny Craig, who was a gay and handsome young chap of a sentimental turn of mind, besides being something of a dramatist, made love to the pretty barmaid, and although the stage only stopped long enough to allow of a hurried breakfast, he managed to sing her a song, the refrain of which was—

I warn all ye darkies not to lub her,
If you do she will cause you to blubber;
Den get out of de way, and remember what I say,
For I'se gwine to marry her myself some very fine day.

Some of the troupe wigged Craig for being spooney on Annie, but Craig, who was a match for the crowd, struck an attitude that would make Henry Irving turn green with envy, and grandiloquently extolled Annie's beauty of face, of mind and of character, and wound up by declaring that the words of the song might yet come true, and the time arrive when he would lead her to "de sanctuary whar noble Canucks of African extraction am fused and consolidated and jined in de happy bonds of wedlock"; for, said he, changing his tone and assuming a serious demeanor, "She's such that, were I well assured she came of gentle, kind, and noble stock, I would wish no better choice, and think me rarely wed." This apt quotation was delivered with much mock gravity and stage effect, and took well. After some further playful and pleasant banter, we got aboard the stage, some of the minstrels getting into the basket or cradle, there being no baggage or trunks aboard, and these talented delineators of negro manners, sayings, and doings sang songs and cracked jokes all the way to Toronto. If the singing was good before breakfast, it was better than good now, and those who heard it allowed that the very acme of "Way down Souf" music had been reached. Before arriving at Toronto "Christy's Minstrels' Song Book" had been well nigh exhausted. We had:

Oh boys, carry me long, carry me long till I die;
Carry me down to de burying ground. Ole massa, don't you cry.
Farewell to de hills, de meadows all covered with green,
De ole grey hoss and brindle boss all beaten, broken, and lean;
Farewell to de dog dat used to follow me round;
Poor Sancho'l wail and droop his tail when I am under de ground.
Oh boys, etc.

After such a good start came "Jim crack corn, I don't care"; "Stop dat knocking at my door"; "Lucy Long"; "Can't stay in de wilderness"; "Ole Uncle Ned"; "O, dearest May"; "Nelly Bly"; "Old Joe kicking up behind and before, and Sally kicking up behind old Joe"; "Night am coming an' darkies will have fun."

I lub my lub in de morning, I lub my lub at night,
I lub my lub de whole day long, for she am a beauty bright.

which reads like a paraphrase of Charles Mackay's ballad, "I love my love in spring time."

Hurrah, hurrah, for de day has come,
And Dinah's to be married,
Glad are we, and dat's a fac',
For very long she's tarried,
Fotch along de wine and de hoe cake, too,
De gumbo and de cream, and don't forget de weddin' cake
On which we niggers dream.

And many other old-time negro ditties. We reached Toronto on time after an enjoyable and long-to-be-remembered ride. Mark Twain, who had travelled all over America and Europe in the best-managed and best-equipped railways, gives it as his opinion that railway travelling, compared with the old style of stage coaching, is flat, stale and unprofitable. He says:—

"It is hard to make railroading pleasant in any country. It is too tedious. Stage coaching is infinitely more delightful. Once I covered the plains, and deserts, and mountains of the West in a stage coach from the Missouri to California, and since then all my pleasure trips must be measured to that rare holiday frolic. Two thousand miles of ceaseless rush, and rattle, and clatter by night and by day, and never a weary moment, never a lapse of interest. In cool mornings before the sun was fairly up, it was worth a life time of city toiling and moiling to perch in the foretop with the driver and see the six mustangs scamper under the sharp snapping of a whip that never touched them; to see blue distances of a world that knew no lords but us; to cleave the wind with uncovered head and feel the sluggish pulses rousing to the spirit of a speed that pretended to the resistless rush of a typhoon."

Thus eloquently and enthusiastically does Mr. Clemens discourse on his ride across the continent in a stage coach, and he had no negro minstrel troupe along. Had a troupe been present, one of the old-fashioned sort, I should just like to hear what "Mark" would have to say *then*.

About this time—1850-51—T. P. Bernard was the lessee of the Royal Lyceum, an old-fashioned little theatre which stood on the site afterwards occupied by the Royal Opera House—just off King street, south side, midway between Bay and York streets. Mr. Nickinson succeeded Mr. Bernard in the management of this play house. The telegraph company in those days (they do not do so now) "dead-headed" for the theatre and every peripatetic show, good, bad or indifferent, that came along All that we youngsters had to do was to present to the doorkeeper of the theatre one of the Montreal Telegraph Co.'s envelopes, or a piece of copper wire, or produce simple evidence of any description that we belonged to the telegraph fraternity, and we were admitted, not only without question but with marked civility, to any part of the house. I had frequently seen the minstrels perform in this theatre, but never before enjoyed their singing and mirth-provoking antics as I did on the stage-coach. Johnny Munro was a neat, trim-built young fellow and an exceedingly graceful dancer. To have seen him on the stage when he assumed the character of Lucy Long, and danced to that tune, was to obtain a revelation in aristocratic and genteel Ethiopian terpsichorean exercises. His performance was a happy combination of the graceful minuet with the heel-and-toe hoe-down of the plantation. He had all the easy elegance of the finished dancer, with just enough reckless abandon in undulating pirouetting and posturing to give the performance piquancy and zest. As Lucy, modestly and becomingly dressed, glided nimbly over the stage with her parasol coquettishly tilted to one side, Johnny Craig sang,

I took Miss Lucy walking, I didn't mind expense,
I bought her dat 'ere parasol, it cost me eighteen pence.

Full Chorus—

Take your time, Miss Lucy;
Take your time, Miss Lucy;
Rock the cradle, Lucy,
Charming Lucy Long.

Then came a little by-play—all in the piece. One enthusiastic and gallant minstrel, carried away by Lucy's charms, yelled out, "Oh, she's de gal," and moving forward on the stage, went on to describe in idiomatic lingo peculiar to the African, with wonderful volubility, gesticulation, and exaggeration, Lucy's charms, virtues, and attractiveness, and his admiration for her. Others followed in paying their *devoirs* to Lucy, each one more amusing than the other; while Lucy, saucy wench, was excelling herself in airily flitting over the stage, executing with sylph-like grace some of the most intricate movements of the dance. The effect of all this was very fine, and if it was not ennobling or elevating, it was artistic as it was innocent and amusing. Mind you, these boys were only amateurs; but in my estimation they easily outranked the so-called professionals of to-day in the simple and natural representation of negro character and negro home life, and in all the best features of negro minstrelsy.

So great a man as the Hon. Edward Blake, Canadian Liberal, Irish Nationalist, and member for South Longford in the British House of Commons, was not above patronizing the Old Royal Lyceum. A neat little piece of realistic work, not on the programme, occurred in that place of amusement 35 or 40 years ago, in which Mr. Blake was the hero. The ground floor, or that part of the building which corresponds with the parquet in modern theaters, was called the pit. The seats in this place were merely wooden benches with backs to them. In a free-and-easy crowd the boys as often sat on the backs of the seats as on the seats themselves. One night Edward Blake, then a law student, with countenance "sicklied o'er with the pale cast of thought," but a stalwart young man of manly proportions with a brawny arm stowed away under his coat sleeve, was sitting on the back of one of the benches. He then wore an eye-glass, instead of spectacles as now, to assist his sight. A rough bully sat behind him and he sought to cause a laugh at Mr. Blake's expense by fashioning a piece of wire after the shape of an eye-glass, and, putting a string through it, placed it in his eye in imitation of Mr. Blake. The ill-timed and annoying cachinations of those sitting in the neighborhood soon made it plain to Mr. Blake that his personal appearance was being ridiculed, and that this was the cause of the ill-mannered merriment. He was instantly alert. He stopped not to remonstrate with the rude bully, but, quick as a flash, he dealt him a complicated heavy-weight sockdologer between the eyes, such as must have caused him not only to see stars, but a starry firmament of large dimensions. The fellow tumbled in a heap as if struck by a battering ram, while Mr. Blake coolly waited to see whether he had strength enough or grit enough to return to the attack, or whether any of those who thought it all so funny a little while ago, and for whose amusement the burly bully undertook to insult Mr. Blake, would come to the rescue; but no, the burly bully had had enough, and none of his quondam friends cared to try conclusions with the demure-looking man with the black clothes. The b. b. reckoned not on the muscular arm hidden under that broadcloth, nor on the ability of the owner of that arm to use it with such dexterous and dire precision and effect. All respectable and right-thinking people present sympathized with Mr. Blake, and the discomfited and badly used-up b. b. slunk off, or was got out of the way by the police, without causing further trouble. Mr Blake has since that time vanquished many a formidable opponent in the political arena, in the legislative hall, in the courts of justice, but it is doubtful whether he ever did any of his antagonists up with the same celerity and skill, with the same neatness and despatch, as he did this one. The honorable member for South Longford has been praised for his matchless oratorical powers, for his political acumen, his erudition

as a lawyer, his well-stored mind and ripe scholarship, but this brainy man, in addition to all these gifts and accomplishments—and he gave on that occasion ocular demonstration of the fact—is "handy with his fists," is a brave man when it costs something to be brave; a good man and true, one whom no man dare insult with impunity. The "aisy, iligant, and nate" off-hand manner in which Mr. Blake "reached" for the burly bully proves him to be a capable and adroit exponent of the "manly art," one from whom Peter Jackson and Corbett could with profit secure pointers.

Speaking of the distinguished Liberal tribune, reminds me that in the winter of 1851-52, I left the employment of the Montreal Telegraph Company for a short season, to accept a place in the office of Ross, Mitchell & Co., the largest wholesale dry goods establishment in Upper Canada, whose warehouse stood where the *Globe* building now stands. At that time S H. Blake, then quite a youth, was a clerk in the same establishment. Mr. Blake had charge of the cottons department. One day a lady came to purchase a line of goods in Mr. Blake's department, and the late John Fisken, who was Ross, Mitchell & Co.'s manager, requested me to run up stairs and tell Mr. Blake quietly to watch her closely and see that she did not break the eighth commandment. The woman reached Mr. Blake's flat ahead of me, and as I had no fitting opportunity to deliver my message, I loitered around at a respectful distance, keeping the woman in sight all the time to see that she did not unlawfully appropriate goods belonging to the firm. On explaining my enforced detective duties to Mr. Blake later on, he said he had a sort of intuitive knowledge that the woman required watching, and that he had her under close surveillance all the time. I presume it was Mr. Blake's intention at one time to follow a mercantile life. It would require a pretty severe stretch of the imagination to think of Hon. S. H. Blake as a dry goods merchant. To associate the great chancery lawyer and ex-judge with the occupation of whosesale dealer in Irish linens, Scotch tweeds, English broadcloth, and miscellaneous haberdashery, would seem to be an absurdly incongruous classification, an irrational *mesalliance*, an eccentric perversion of the law regulating the eternal fitness of things. What the mercantile community have lost by Mr. Blake's change of programme in early life no one can tell; but his pre-eminence as a jurist and his brilliant achievements at the bar disclose to us the serious loss the legal profession would have sustained had not this eloquent advocate, this expert and acute cross-examiner, who causes recalcitrant witnesses to shiver in their boots, and evil-doers generally when they fall into his hands to wish they had never been born, directed his master mind to the study of the science of law and followed in the footsteps of his illustrious father.

Mr. Blake and the writer were the two youngest of Ross Mitchell & Co.'s employes. The whirligig of time has reeled off nearly four and a half decades since that time, and, so far as the writer knows, Mr. Blake and himself are the only two persons alive to-day out of the large staff of employes who were in the service of Ross, Mitchell & Co. in 1851-52.

Harry Piper's host of friends in this city are probably not aware that the urbane, popular, and energetic ex-alderman of St. John's ward commenced his career as a telegrapher. This is a fact, nevertheless. Having entered the employment of the Montreal Telegraph Co. in the early fifties, he gave gratifying and unmistakable evidence of becoming, in time, a skilful member of the craft, but he resigned his position before graduating as a full-fledged operator. Harry, who early in life developed political aspirations, soon discovered that a telegraph office did not allow of sufficient scope for his peculiar qualifications and talents, and very wisely retired from the business while he was yet a young man. About 1862—some years after he abandoned telegraphy—he, like many other enterprising young Canadians, set out for California, where, between the cities of San Francisco, California, and Victoria and Vancouver, British Columbia, he spent a number of years, returning to Canada about 1866, with a pretty big heap of gold dust or its equivalent, as the result of his labors and savings.

Johnny Munro, referred to above, left Canada to seek his fortune in California about 1852. He was successful in accumulating a comfortable competency, and returned to Canada many years ago. He spent the last days of his life at the Queen's Hotel in this city, living a quiet, retired life, and died only about two years ago. Johnny Craig, the accomplished negro minstrel, drifted off to the States about forty years ago, where, after knocking about for a time, he died, and in the words of one of his songs, has gone, I hope, "to de place whar good niggers go." Johnny Skae, telegrapher and millionaire, after a most remarkable career, replete with excitement and change, with success and failure, died, as we have seen, in San Francisco ten or twelve years ago. So ended the days of the three Johnnies, and the world wags along the same as if they had never been. Other Johnnies have come and gone, other Johnnies will come and go, and so will it be to the end of time.

When you and I are dead and gone,
This busy world will get along;
Will laugh and sing, and be as hearty
As if we still were of the party.

R. F. Easson.

Toronto, December, 1894.

CHRISTMAS AT THE DORKINS' FACTORY.

"Won't you come home early to-night, dear? I am afraid you confine yourself too closely to the office. You really look tired."

Mr. Dorkins helped himself to another piece of toast—for the Dorkins family were at breakfast—and then replied: "Business just now requires my very closest attention, dearest. However, I will do my best to get away in good time to-night. I believe I have been working a little too hard of late. Night work doesn't agree with me."

"Christmas a week from Tuesday, father. Another cup of coffee, mother, please. What are you going to give me in the way of presents?" And Bob looked with a face of interrogation across the table at his father.

"Kissmiss is toming," lispedthebaby. "Santy'll fill my stotings, un't he, Bob? I's been dood."

"Father, I need a new pair of skates," continued the Dorkins' heir apparent, by way of suggestion. "Charlie Watson's father is getting him some hockey boots, too. I want *The Boys' Own*, of course, and don't forget a season ticket for the rink. You gave me one last year, you know."

"Babe, take that spoon out of your mouth. Mother, he'll swallow it if you don't take it from him," called out Jennie, a pretty little maid of fifteen.

"Well, Jeannette, you haven't told me what you want. Come, what shall it be? That part of the earth that Robert has no use for, I suppose."

"Beggars musn't be choosers; I'll leave my presents to you and mother."

"Well! I declare! It lacks but a quarter of eight," said Mr. Dorkins, glancing at the clock on the mantel piece.

"Father," remarked Mrs. Dorkins, as she helped him on with his ulster in the hallway, "Jennie would like to give a small party on Christmas eve. Can you spare twenty-five dollars? She's a good girl, you know."

"I'll really have to think it over. Let you know to-night. That's a lot of money these days. There's my car. Good bye."

Mr. Dorkins was a kind-hearted, generous man, with a cheerful word and a pleasant nod for every one with whom he came in contact. But of late a cloud appeared to have come into his life, and as he sat in the car that morning, several persons who travelled to and from the city with him every day, mentally remarked that his features were careworn and gave evidence of a burdened mind. If the truth were known, the business affairs of John Dorkins & Co., manufacturers of clothing, were in a precarious state. Some of the firm's recent ventures had turned out badly, while orders for present business were coming in very slowly. The soul of honor himself, Mr. Dorkins placed great confidence in his fellow-men, but occasionally his good opinion of human nature received a rude shock. A few months ago a Japanese gentleman, whose every appearance bespoke honesty, requested credit from the firm for a large stock of goods, with which he intended to start up business in the far West of Canada. Mr. Dorkins was much taken with the foreigner's appearance, lunched him at his club, showing him every attention, and, contrary to business principles—for he knew next to nothing of him—entrusted him with a bill of goods. Some weeks later the ingenious gentleman from Japan disappeared as if by magic. The stock had been sold, and Mr. Dorkins lost heavily on the transaction

The year was almost closed and the books showed a loss of nearly twenty thousand dollars. What was to be done? One thing was certain—expenses must be cut down, the business outlook must improve, or—bankruptcy. Already he saw the fair name of Dorkins heralded throughout the country as a bankrupt. He bit his lips and resolved upon a general reduction in wages and a wholesale dismissal of employes, at the same time longing for the absent Jap, that he might choke him to death.

Arrived at the factory, Mr. Dorkins went at once to his private office, there to await his confidential clerk, Mr. Simpkins, and discuss with him as usual the morning's mail.

"Good morning, Mr. Simpkins," said Mr. Dorkins, as a thin, nervous little man made his appearance. "How is Mrs. Simpkins and the children"—there were nine little Simpkinses—"any more measles?"

"Worse than measles," mournfully responded the clerk. "Johnnie has broken his leg playing football. The baby is cutting teeth, and to cap it all, my mother-in-law came last night and says she will spend the winter with us."

Mr. Dorkins resolved that come what would no reduction should be made in the salary of his confidential clerk.

"Well! Well! That is hard luck certainly. But what did the postman bring us this morning?"

"Not much that's good, I'm sorry to say. Here is a fairly good order from Peterborough, another from Chatham, but beyond these there is nothing of any importance." Mr. Simpkins placed the mail on his principal's desk and continued: "I see by Dun & Co.'s sheet this morning that Rixton, of Wyford, has failed. He owes us five hundred dollars. Whyland, of Montreal, is seeking a compromise; he owes us another five hundred."

"Mr. Simpkins," and Mr. Dorkins' voice was harsh and stern, "don't you think we have too many people around the establishment?"

"Yes, sir. At present there are 112 men and girls in the factory. That's too many. But most of them are on piece work, and then only working half time."

"We must economise somewhere, and I have concluded to make a general reduction in wages of twenty-five per cent. Of course, Mr. Simpkins, that will not apply to yourself."

"I regret very much that you consider this necessary, sir. It will be a sorry Christmas for some of those poor girls upstairs. From their thin clothes and pinched cheeks I fancy they are scarcely making enough to keep body and soul together now."

"God knows, Simpkins, I wouldn't do it if I could help myself. But this firm is too old a one and bears too honorable a name to be tarnished by an assignment. And if such a thing should happen the poor things would find themselves on the street. Yes, Simpkins," and Mr. Dorkins pounded the table until the ink bottles jumped and a pen fell on the floor, "yes, Simpkins, it must be done. Give them notice to-day. That will do."

The morning passed tediously away; Mr. Dorkins was restless and uncomfortable. Once he thought he could hear the girls sobbing upstairs and felt sure the notice had been given. He locked his door. But somehow the mind usually so bright and clear would not settle itself upon the papers before him. He put on his coat to take a walk around the block. A little, half clad boy shivering on the corner begged of him something to eat. Mr. Dorkins blew his nose vigorously, and as he fumbled in his pocket for some change, there was a slight suspicion of tears in his eyes. He dropped a piece of money in the boy's hand and hurried on.

The noon hour came, but the door of the private office was locked. The principal of the firm was engaged. He did not go to lunch although he knew that Braintree and Diggs were waiting for him. The afternoon slowly wore away. At five the eastern mail arrived.

Someone rapped at the door of the private office. Mr. Dorkins unlocked it and admitted his chief clerk. "Here, sir, is a strange looking parcel from abroad. Although addressed to the firm, I fancy it is of a private nature," and Mr. Simpkins withdrew.

The packet was covered in an awe-inspiring manner with official-looking seals, and bore signs of travel. Mr. Dorkins turned it over in his hands several times, wondering what it could possibly contain. Finally it occurred to him that the quickest way to find out would be to break the seal and open the packet. The first thing that greeted his eyes was the following letter:

Department of War. Tokio, Japan, Nov. 3rd, 1894.

DEAR SIR,—I owe you many apologies for the trouble my strange actions must have caused. An explanation will, however, I hope, mitigate somewhat the heinousness of my crime. A year ago I was exiled, on political grounds, from Japan by order of the Mikado. Educated in the United States, I proceeded to that country, but not finding an opening there I went to Canada. My estates had been confiscated with my title, and but slender means were left with which to start in a business career. I made application to you, and like the good Samaritan your Bible tells of, you relieved my distress. When war was declared between my country and China I was forgiven and summoned home.. Secret in nature, the order could not be communicated. Had I merely told my creditors that I was about to leave the country, I certainly would have been detained. The order was imperative, and, like a thief in the night, I stole away. I wish now to make amends. Enclosed you will find a cheque upon Harvey & Smith, bankers, New York, covering the amount of my indebtedness to you. Further, as Minister of Militia Supplies, I enclose an order for 50,000 uniforms for the Japanese army. Enclosed you will find specifications, while a special Government agent will call upon you in reference to the matter, I leave the matter of price entirely in your hands, knowing well that he who has been so kind to me will not now take advantage of his position.

Sincerely yours,

J. DORKINS, Esq. KOMO.

"Bless my soul! That's a surprise. Well! well! Who would have thought it? Yet somehow I did not think I was deceived in that Jap. He had an honest look. Well! well! Simpkins," called Mr. Dorkins at the top of his voice. "Hello! Simpkins! Are you never coming? Oh, here you are. Have you given notice of that cut in wages?"

"Not yet, Mr. Dorkins—but I will attend to it at once."

"Never mind. You needn't do it. Bless my heart! Read that, Simpkins, read that." And he handed the astonished clerk the welcome letter. The Christmas of the Dorkins employés was the brighter for it, and assuredly the heart of Dorkins himself was the lighter for it. Jennie got her party, we may be sure. W. H. M.

HORACE CANADIANIZING.

The writings of Dr. Scadding are always expected to be interesting and scholarly. Fond of retrospection as the Doctor is—and what entertaining reminiscences he has often afforded to Ontarians, especially those of Toronto!—few of his recentproductions, we venture to say, will be found more delightfully suggestive than the pamphlet entitled "Horace Canadianizing," just issued by the Copp, Clark Company (Ltd.), Toronto. In a dozen pages he has here drawn a most ingenious parallel between descriptions of scenery and natural surroundings given by the Latin poet from his Sabine farm near Tivoli, nineteen hundred years ago, and the scenes and experiences of early settlers in the backwoods of Canada during the present century.

When a youth in a primitive Canadian homestead, Dr. Scadding tells us, he made acquaintance with the writings of Horace, "and to this day the language of the poet, when he narrates the well-known incidents of his childhood, instantly receives color and interpretation from one's boyish recollections." In the broad valley of the river Don were gigantic elms, basswood trees (the linden), buttonwood (the plane-tree), butternut, and in swampy places hemlock, spruce and cedar trees, rugged and grey with age. In winter the river was a frozen stream—in the spring it became a swirling tide, bearing on its bosom uprooted trees, wrecks of fences, carcases of drowned farm cattle. Wild animals were near, bears or wild deer were seen, and wolves heard. In times of storm great trees were levelled, the lofty pines were often splintered by lightning stroke, and during this warring of the elements the thunders of Lake Ontario added their deep bass. Wild grapes and wild cherries abounded in this forest home, game was plentiful, and the wild flowers bloomed undisturbed.

How much better, from the midst of surroundings such as these, suggests the Doctor, could a Canadian schoolboy realize the word-painting of Horace than the schoolboy of Eton or Harrow. How vivid the description of a succession of natural scenes by this charming pagan poet, this "little, round, dark-eyed man, prematurely grey-haired and inclined to corpulence, who with an eye and a heart for the noble and striking in history and in life, exhibits such a delicacy of insight, such love of out-door nature, such a sense of the dignity and prudence of moderation, such firmness and fineness of touch, as characterized but few writers in the whole history of art." His valley farm among the Apulian hills, a sounding river near by, the Adriatic Sea beyond, afforded him impressions which touched the philosophic and poetic depths of his nature, and gave to us such gems as Dr. Scadding quotes:

"'You see how stands Soracte with its depth of snow, and the groaning woods can no longer support their load, and the rivers are fast set with nipping frost.' Or 'Diana's delight in streams and the foliage of the groves, whatever the leafage be that stands forth, either on cool Algidus, or on the dark forests of Erymanth, or on Cragus green.' Again, 'Hebrus and Thrace all white with snow, and Rhodope traversed by barbarian foot.' And when he spoke of the perils encountered in the navigation of the Mediterranean waters, of 'the wintry blast that crushed against the barrier of pumice stone the might of the Etruscan sea,' 'the breaking billows of the hoarse Adriatic,' who could fail to think of our own vast inland sea, Lake Superior, and the perils reported to have been undergone there by traders and trappers, when coasting along its cavernous shores and overhanging cliffs. Was there not even an almost identity in the names Thunder Cape, and Acroceraunia, the 'lightning scathed promontory,' which the poet names as being of such ill-repute among the sailors of the Adriatic.

"Quite in keeping with an early settler's life was Horace's reference to his narrow escape from death through the falling of a tree in the woods; the incident is more than once mentioned by him with devout expressions of thankfulness to the gods. He even seems to have commemorated the event by an annual festival. 'When almost done to death by the blow of a falling tree, I vowed a pleasant feast as each year came round, and the offering of a white kid.'

"A more detailed picture of the hardy rural life to which Horace in his boyhood was accustomed is the following; it is included in the description which he gives of the hardy training requisite for the production of a brave militia, such as our own Canada has on more than one occasion shown itself capable of sending to the front. Such soldiers," he says, "were the manly offspring of rustic warriors, trained to turn up the clods with Sabine hoes and to carry in logs hewn according to the will of an austere mother, when the sun was changing the shadows of the hills, and taking off the yoke from the weary oxen, as he brought with parting car the welcome hour."

One more familiar sketch may be added—a graphic vernal scene: "Keen winter is melting away beneath the welcome change to spring and the western breeze, and the herd no more delights in its stall or the ploughman in his fire, and with hoar frosts the meadows are no longer white, and disused sailing craft are once again hauled down from the shore to the water."

"Furthermore, the maxims and views of life set forth in the de-

tails of Horace's young days agree well with ideas widely entertained among our forefathers during the primitive period of our history; for example, where he says, 'the more that each man denies himself, the more he shall receive from Heaven; I seek the camps of those who covet nothing, and as a deserter rejoice to quit the side of the wealthy; a more illustrious possessor of a contemptible fortune than if I could be said to treasure up in my granaries all that the toiling Apulian cultivates, poor amidst abundance of wealth.'

"From other points of view besides that of a settler in the forest, sayings of Horace scattered here and there have a peculiar force for the inhabitants of this western world. Like the prophets of old, Horace occasionally gave utterance to expressions which in their comprehensiveness surpassed even his own conception. To this day we have no more fitting words to describe the fearless audacity of a Columbus or a Cabot than those of the poet when he says: 'Surely heart of oak and triple brass lay around the breast of him who first to the savage sea entrusted a frail bark, nor was afraid of the imperious Africus contending with the northern storms, nor the tearful Hyades, or the fury of Notus. What form of death could they fear who beheld with unflinching gaze the monsters of the deep?'"

"Once more the modern very expressive term, 'ocean greyhound,' applied to our swiftest means of transit over the Atlantic, was virtually forestalled by Horace when he spoke of ships bounding across oceans which seemed intended to sever nations, rather than to knit them together. 'In vain' (so he imagined) 'did the wise God part land from sea by the estranging ocean, if nevertheless barks bound across' (literally leap across with a sort of greyhound motion) 'waters that should not have been touched.'"

"'Coelum non animum mutant qui trans mare currunt.' "'Tis the sky and not the mind they change who speed across the main.' (Line 27, Epistle 11, Book I., of Horace's Epistles.) It may not be irrelevant to narrate when and how these words of Horace's first met eye of Canadians, at least it must have been so with many of them. Years ago an admirable weekly paper was published in New York, entitled *The Albion;* its matter was selected with a view to satisfy readers still retaining Old Country tastes and ideas. Dr. Bartlett was its editor, assisted for a time by Dr. Charlton Fisher, well known in Quebec, and writer of the very graceful Latin inscription to be seen on the joint monument in honor of Wolfe and Montcalm in that city. At the head of the paper appeared its title, *The Albion*, enclosed to the right and left between two branchlets of oak leaves and acorns, with the Rose, Thistle and Shamrock intermingled below (the Maple Leaf was not at the time so generally recognized as now as an emblem of Canada). Beneath this appropriate device appeared in clear capitals the Latin words, 'Coelum non animum mutant qui trans mare currunt,' without any indication of their source.

"The present brochure has for its heading, 'Horace Canadianizing,' that is to say, Horace discoursing in terms especially intelligible to old-fashioned primitive Canadians. To proceed further than this is quite beyond our present scope; however, it should be said that the other writings of Horace harmonize with the passages just cited. He inculcates simplicity of life, contentment with little, and avoidance of false glitter; he praises temperance and moderation, but is no advocate of asceticism. He is proud of his country, and he would have its citizens independent in spirit, and brave, at peace among themselves, and true to their legitimate guides and rulers. When he indulges in good-humored raillery and other pleasantries his words are, of course, not everywhere to be interpreted to the letter.

"Finally, in the poetical fragment commonly spoken of as 'The Art of Poetry,' Horace has furnished all literary men, writers of prose as well as writers of verse, with a stock of hints and rules of the greatest practical use to them in their treatment of the innumerable problems daily coming before them for solution."

THE INVALID AND THE CIRCUS.

The improvidence of the negro, as well as his in born craze foranything in the shape of a show, may be illustrated by the following, which concerns an Essex county darkey whose name I forget. One bright summer day of 1865 or 1870, a crowd of people thronged Dalhousie street in old Amherstburg. They were for the most part country folk, waiting for the coming of the boat bound for Detroit, in which city Barnum's circus was to perform. Up from the wharf where several lake propellers were taking on cordwood came my friend Gus Kevill, on his way to the custom house with one of the steamer captains. As they stopped to shake hands with me I noticed the old darkey, coatless, his tattered straw hat in his hand, his shirt snowy white, but his shoes and trousers dusty from walking, making demonstrations toward us. He stood for a while at a respectful distance, smiling and bowing, but uttered no word. The captain addressed him with rough good nature.

"Hello, Old Roots, what's up that you got on a biled shirt to day?"

"Well, Boss," answered the old man, "I'se jist a waitin' fur ta hav a word er two wif Mistah Kibben."

"What's the matter, uncle?" asked Gus; "how's the old woman—you got a camp-meeting on hand to-day?"

"No sah, no sah. I des come in ter see ef I cud git that ar little balance 's mornin.' The ole woman's right porely, sah, right porely."

"You mean that forty cents I owe you for piling wood, eh, uncle. Well, go down to the office and get it. Here's an order." And Kevill leaned up against a store awning to pencil a line to his cashier. But he suddenly desisted, seeing the old darkey's eyes bent up the river where the Detroit boat was in sight.

"See here, you old rascal, you don't want that forty cents for the old woman. I'll bet you're going to the circus. Haven't you any more sense than to spend money in such a way? It costs fifty cents to get to Detroit and fifty more to get into Barnum's. And you haven't got a coat to your back, and may be there's nothing in your stomach this minute. What a blamed old fool you are. I won't pay you that forty cents for any such purpose."

"Oh! look a heah now, Mr. Gus, don't be so hard. I kin work ma passage up in de fire hole, wif Hi Kirtley, an' I reckon dese heah gemmen 'll give a ole man ten er fifteen cents fur teh kin' o' help along. I dun had a good brekfus', and the ole woman kin shin along till I git back." And he grinned and bowed, and shuffled his dusty feet until the good-hearted captain burst out:—

"Blame my cats if I don't give the old nigger a quarter to help him see the show. D—n these folks—you can't pound sense into shiners with a handspike; but a quarter a piece won't hurt, and I want to see the old coon laugh. Barnum's clown will do him more good than a hash dinner. Shell out, boys."

And so the happy darkey got his "leetle balance" and a quarter from each of us besides, to be squandered, as like as not, on Detroit candy and fruit, *plus* the circus. As the Kentucky jockey said on one occasion: "Thah's no use reasonin' with that hoss, his eyes are sot." The darkey was bound to see the circus, even if he had to steal in under the foot of the tent.

J. H.

AMERICAN PAPER CURRENCY.

Ones, twos, fives, and tens constitute ninety per cent. in number of the bank and other paper currency of the United States, being 133,667,000 in number and $3,265,585,000 in amount out of a total of $1,167,405,133 currency, represented by 147,646,380 pieces of currency paper or bank bills. The five dollar bill is the most numerous among the instruments. According to the Chicago *Record*, the paper currency of the United States, including all kinds of notes and certificates, amounts to $1,167,405,133 in value, and is represented by 147,646,380 pieces of paper, as follows:

	Number.
$1 bills	39,988,823
$1,000 bills	86,905
$2 bills	14,433,262
$5,000 bills	2,467
$5 bills	49,832,822
$10,000 bills	787
$10 bills	29,505,663
$20 bills	11,827,471
$50 bills	815,842
$100 bills	824,374
$500 bills	327,960

ONTARIO MINING INSTITUTE.

A quarterly meeting of the Ontario Mining Institute will be held in the John Carruthers Science Hall, at Kingston, on Thursday and Friday, Jan. 3rd and 4th. The programme of proceedings for Thursday includes a discussion on Mr. J. Bawden's paper, "The Naturalization of the Mineral Domain of Ontario," and one in the afternoon upon "Nature's Concentration Works," by Prof. W. L. Goodwin, D.Sc., F.R.S.C.; also "Examples of Nature's Concentration of Valuable Minerals," by T. Walker, M.A. Subjects for the evening session: "Gold in Ontario, and its Associated Rocks and Minerals," Dr. A.P. Coleman, of Toronto; "Boron, its Detection in Minerals and Uses," by Prof Wm Nicol, M.A.; "Typical Ontario Rocks" (illustrated by lantern microscopic views), by Mr. W.G. Millar, B.A.

A somewhat different programme is arranged for Friday. On the morning of that day members of the institute and their friends are invited to visit the laboratories and other features of the School of Mining. In the afternoon visitors are expected to listen to "Notes on the Glendower Iron Deposits," by Mr. W.G. Millar, M.A., Kingston. and to a Paper by Mr. Peter McKellar, F.G.S.A., Fort William, Ont,

GRAND TRUNK RAILWAY.

An arrangement for the placing of debentures to enable the payment of interest at due date on its leased line bonds and debenture stock, has been made by the Grand Trunk Railway. The London *Economist* says: "It has for months past been evident that the net revenue of the Grand Trunk Railway Company for the current year would be insufficient to meet its fixed charges, and latterly the probable deficiency has been estimated at about £150,000. Owing to the complications of the capital account and the doubt that exists as to the order in which, if it came to be a question of precedence, the various securities would rank, this prospect has been viewed with a good deal of anxiety, the fear being that costly litigation might ensue. It is satisfactory, therefore, to learn that the company has concluded an arrangement for the placing of debentures by means of which the interest on all the leased line bonds and debenture stocks during the ensuing year will be paid at the due dates. This, of course, is a mere temporizing expedient, and effects no real improvement in the position of the company, but it will tide over the immediate financial difficulties."

BANK OF OTTAWA.

This bank, having passed its twentieth year, its business having become extensive, its branches ten in number, its capital being all paid up, and its reserve amounting to 60 per cent. of the capital, the occasion of the annual meeting was one on which the directors might appropriately take stock of their position and contrast it with that of former years. This is what was done, and the review shows a steady growth year by year to creditable proportions. The capital of the bank is now $1,500,000, fully paid; the Rest $925,000; deposits amount to $4,805,000, four-fifths of them at interest.

Nearly three-quarters of a million deposits rolled in during the year closed with November, all at interest, and they could not all be utilized, for we see that the loans have decreased $364,949. There is an increase in call loans and in government and other debentures, and the proportion of quick assets is nearly 43 per cent. of the total public liabilities. While the prevailing depression is thus to some extent reflected, the bank is in good shape for acquiring desirable business which may be offered.

The Bank of Ottawa does a good deal of business with lumbermen, and may be supposed to be well informed about that branch of industry. A year ago the president's address stated that the prospects for lumber were good. These prospects, he now tells us, were borne out, for "the results of the year's business have been generally satisfactory. The outlook for the present year in that industry is very encouraging, the whole of next year's cut of deals being sold at slightly increased prices."

Owing to the death of Mr. Robert Blackburn, one of the original members of the board of directors, and of late its vice-president, Mr. Denis Murphy was elected to the board and Mr. George Hay appointed vice-president. Reference is made in the report to the new premises of the bank in Winnipeg, also to the branches recently opened in Rat Portage, Kemptville and Ottawa city.

Besides the officers' guarantee fund it has been deemed advisable that the bank should have a pension fund for employes. This very proper proposal was agreed to by the shareholders, who voted the nucleus of such a fund. The general manager returned thanks to the meeting for their action in this regard. "That it will benefit the bank itself," he said, "there can be little doubt, by binding the officials more closely to the institution, and by letting them feel that, should they be incapacitated for work, from old age or other cause, there is something between them and poverty."

DOMINION COMMERCIAL TRAVELLERS' ASSOCIATION.

On Saturday last, in the Fraser Institute building, Montreal, the annual meeting of the Dominion Commercial Travellers' Association took place. The gathering was large, and there was unusual harmony. On the results of the voting for officers being announced it was found that Mr. Fred. Massey had received 1,086 votes for the presidency, while his opponent, Mr. J. H. Morin, had received 632, there having been 1,718 votes cast. In the previous year the successful candidate, Mr. David Watson, had received 1,085 votes. Mr. Alfred Elliot was chosen vice-president, getting 525 votes, while Max Murdock got 464, John Rogers 350, and John Taylor 331. The directors are as follows, in order of the number of votes received: James Armstrong, C. A. Prevost, W. D. McLaren, jr., N. Tucker and J. T. McBride.

The treasurer's statement showed the total income of the year to have been $32,196.34, besides which $16,000 had been received in repayment of loans and mortgages. The expenses for the year were $28,162.43, leaving $4,033.91 to be added to the capital account, which now stands at $134,032.93. The sum of $25,000 has been invested in first mortgage real estate, bearing 5 and 5½ per cent. There was a reduction in the working expenses of the year of $500

The retiring president, Mr Watson, delivered a reminiscent address, declaring that he had been supported in the most loyal way by the other officers. Economy had been the order of the day, and he was able to point to some savings effected. He urged more members to join the Mutual Benefit Association, and instanced the fact that of the 22 who had died, 17 were not members of it. He also pressed earnestly upon the meeting the project of establishing a fund for disabled or worn-out members of the Dominion Commercial Travellers' Association. "The members owed it to their own honor and to their fellow-men that the present state of things should exist no longer." (Cheers.)

Mr. J. A. Cantlie then delivered a telling speech in support of a fund for widows and orphans, and strongly urged that a benevolent fund be set apart and controlled by a committee that would see that no loafer or lazy person drew any benefits therefrom. Messrs. E. H. Copeland and S. Woods also made a few remarks, and the report, which had previously been received and laid on the table, was adopted unanimously.

The new president, Lieut.-Col. Massey, who by this time had taken the chair, supported the scheme referred to by Mr. Watson and Mr. Cantlie, and intimated that the new board would endeavor to carry out the wishes of the members. Mr. Morin made a brief address, which was greeted with cheers. He then advanced and shook hands with the president-elect, while the "boys" yelled with delight.

Messrs. Geo. Sumner and C. E. Copeland respectively moved a vote of thanks to the retiring president, vice-president, treasurer and directors, which, being carried, brought replies from a number. It appeared from the report of the educational committee that there was a balance on hand of $138.49. Only one application for the scholarship had been made during 1894, but in this case the child was under age, so that there are now six vacancies at the disposal of the board.

MARITIME COMMERCIAL TRAVELLERS.

The annual meeting of the Maritime Commercial Travellers' Association was held in the office of the Board of Trade in Halifax, on Wednesday evening, 12th December. The annual report announced that the association had a prosperous year. The treasurer's statement showed an increase of $1,869.80 in the funds for the year, and its total resources now amount to $10,423.17, of which $3,500 are invested in mortgage and the remainder is in bank deposit receipts

Upon the election of officers for 1895 being proceeded with, the following gentlemen were found to be chosen officers and directors:—

President—James P. Wallace.

Vice-presidents for Nova Scotia—F. C. Simson, G. A. Woodill, B. Quinan, W. A. Emmerson.

Vice-presidents for New Brunswick—G. F. A. Anderson, F. W. G Brock, A. R. Melrose, Wm. J. Robertson.

Directors—W. J. Stewart, T. A. Cossmann, W. L. Kane, E. Y. Rowland, E. A. England, F. J. Ward.

Treasurer—Wm. Robertson.

A resolution expressing the loss the Dominion and Nova Scotia has sustained by the death of Sir John Thompson was proposed by Mr. R. Allen, seconded by J. R. Gregg, and carried.

The meeting decided to hold a ball between Christmas and New Year, and the same committee which managed the last one is expected to arrange this one. A board of three trustees are also to be appointed later on to look after and invest the funds of the association.

A COLUMN FOR AND ABOUT THE TRAVELLING MAN

A Maritime province exchange informs us that Mr. A. B. Sheraton, of St. John, has secured a lease of the "Queen's Hotel" until May 1st, 1896, and that it is his intention to expend several thousand dollars in house furnishings during the winter.

At a meeting of members of the Commercial Travellers' Association, held in the Hamilton Board of Trade rooms on Saturday night last, all arrangements were completed for the dinner to be held at the Royal Hotel a week from to-night

A correspondent at Sutton, in the Eastern Townships of Quebec, states that Mr R. Booth, the genial dry goods traveller, has severed his connection with Robert Linton & Co., of Montreal, and engaged with James Johnston & Co., of the same city

Jas P Fairbanks has returned from Cape Breton, where he has been on a fall trip He tells the Halifax *Grocer* that John Le Brun, of Arichat, has fitted up two very convenient sample rooms about the centre of the town, much to the appreciation of the commercial fraternity.

Mr. Black, who travels for Messrs. Burrow, Stewart & Milne, of Hamilton, recently met with a painful accident, which will lay him up for some weeks. When at Sarnia this week he slipped on a stairway and sprained his ankle, and is now under the doctor's care. He hopes to be able to get to the Travellers' dinner.

It was a proper and a touching tribute that was paid to the memory of the deceased members of the Dominion Commercial Travellers' Association when, at the annual meeting in Montreal, all the members arose and bowed their heads while the secretary slowly read the past year's death roll as follows: Geo. Knowlton, Ed. Heuser, M. Mackeand, P. J. G. Labbe, W. E. D. Sutherland, Samuel Mills, Frank Burch, M. P. Lynch, John Ross, H. W. Downey, Alex. Drew, J. M. Humphrey, W. Finlay, H. J. Farmer, J. H. Hill, John Martin, Alf. Francois, George Forbes, T. P. Pearce, A. J. Ackhurst, John Stewart, S. A. Brazier (accidental), J. M. Ingersoll, J. M. Leonard, Chas. Cooper, Hy. Laws.

"I wrote my name on the table cloth of one in a leading town and I expect to see it there when I go back next trip." This is pretty strong language, and it comes from a man who is not likely to exaggerate. So we are informed by the *Maritime Grocer*, which gives the rest of the man's letter as under: "I wish you would put in a plea for a better hotel service on the Western shore. It seems to me that an all around kick on the part of the commercial travelling fraternity would result in the correction of so poor a service. Of course there are one or two hotels that are well appointed and give good attention, but the majority of them are rank." This being the case our contemporary is right in calling it to the attention of Mr. Simson, chairman of the M.C.T.A., whose hotel committee did some good work in improving travellers' accommodations.

Let two salesmen solicit business in the same field, each having the same equipment so far as facilities and the goods offered are concerned, one will get orders and the other will fail to get them. The secret of the success of the one and failure of the other probably is that one has the knack of begetting confidence and making business, and the other, who may be the hardest worker, the most persistent plodder, and possibly with better business training, lacks that element which enables a man to interest and capture another. In a political speaker it is called animal magnetism, a something that commands attention, arouses enthusiasm, leads to action and secures results. This kind of address, while it is largely a gift, may be made vastly more effective by training and practice. But some canvassers never can be taught that there are times when it is wise to let a customer alone.

It is a thing commonly heard that the commercial traveller is another word for cheek. But it is not universally true. While many travelling salesmen—as well as retail store salesmen, confound them—have cheek enough to teach grandmothers to bring up children, and foolishness enough to talk people out of all patience, still the most accomplished and successful travellers are not offensively cheeky, and have got beyond the loudly talkative stage. They have outgrown such bad habits of youth if they ever had them, and are become gentle, patient, considerate. But let it not be imagined that they have lost their snap. Quiet though they seem, such men will hang on (in a gentlemanly way) to a customer all day or all night, if necessary to get him. Nor will they offend the sense of the experienced storekeeper like the loud, rampant, boasting youngster who, feeling his oats when he gets away from home, makes a dead set at the village retailer, and in the words of an old play:

> Then he will talk—good gods! how he will talk!
> Vow with such passion, swear with so much grace,
> That 'tis a kind of Heaven to be deluded by him.

SHOP VISITS.

A steel hull for a steamboat for the Ottawa River Navigation Co. is under construction by W. C. White of Montreal. The boiler shop of Mr. White was burned a few weeks ago, but it is now in running order again.

The Novelty Works of R. Gardner & Son in Montreal are fairly busy with a number of their specialties. They have orders for quite a quantity of machinery for the old country, and are in receipt of commands from their regular Canadian customers besides.

A visit to the Toronto Radiator Manufacturing Company's works at Parkdale gives one an idea of an active and extensive business. The past season, we are told, has been the most successful one the company ever had. Their foreign trade is large and growing, in addition to which they have their hands full of Dominion orders. The works are now engaged on an extensive order for the legislative buildings of British Columbia at Victoria. These will take perhaps two months to complete. Many friends will regret to hear of the illness of the manager, Mr. John M. Taylor, whose case is still considered serious. While he is slowly mending, he cannot be said to be out of danger.

The Kingsley Boiler Company, of St. John, N.B., makes claim to be "up to date" in the matter of economical combustion. Here is what is said of the Kingsley boiler by so important a journal as *Industries and Iron* of London: "The claims made for this boiler, which is of the drop tube type, are many. It is said to occupy one-third less space per horse-power, make dry steam, and consume 20 per cent. less fuel than any other boiler on the market." The company has filled several contracts in Montreal for its patent drop water tube boiler, which shows, we are told, great economy.

The work of the Waterous Engine Works Company at the present time is mostly sawmill work, mills getting ready for next season's cut They are building several of the "New Allis" band mills under contract, those put in last year having given excellent satisfaction. One of these mills, with 40 ft. carriage, was shipped recently to Mr. J. R. Booth, Ottawa; also one to Wm. Train, Burk's Falls. The St. Anthony Lumber Co., of Minneapolis, are putting in, in Canada, three of the Allis mills. The Waterous people are this week starting a large dry press brick machine in the Beamsville yard.

One of the busiest factories in Canada is that of the Bell Organ and Piano Co. in Guelph. Here are hundreds of hands engaged in making organs and pianos. For six weeks this concern has been working fourteen hours a day; this week they have added another hour to their working day and the hands in the establishment at present are making fifteen hours each day. A year ago, in the same month, the factory time was but eight hours in the twenty-four. The number of hands employed has been increased by one hundred and thirty during the past three months. This increased activity speaks well for Mr. W. J. Bell, who our readers will remember assumed the management of this prominent industry in August last.

One of the new and powerful cross-compound engines, to furnish power for the street railway in this city, has been placed in position, and its massive fly-wheel is whirling with the steadiness of a "sleeping" top while we write. It was built by the Montreal firm of A. Laurie & Co. Another of similar dimensions, for the same purpose, from the shops of the Bertram Engine Works, Toronto, is being set up. It has an "Allis" frame of great strength, and the fly-wheel will weigh something like 44 tons. The cylinders—some twenty feet apart, with an enormous multipolar dynamo on the shaft between them—are respectively 26 and 48 by 48 inches, aud their capacity is nominally 1,500 horses, but can be worked up to much more. Most of the massive girder work in the boiler room has been done by the Bertram Engine Co., as well as the housing of the economizer, the smoke flue being set up by the Polson Company.

To any one who can obtaim permission to see them, the battery of six boilers built at the Polson Works for the Toronto Street Railway Company, and now set up in their power house at the foot of Frederick street, will afford the pleasure which a big job, well done, affords to the practical observer. These are return tubular boilers, fitted with Galloway tubes; the length is 14 feet, and the diameter 9 feet 9 inches. Their grate surface is 40 square feet, and their heating surface 1,600 square feet each; capacity, 7,500 pounds of water evaporated per hour. These figures, multiplied by six, will give the aggregate power of the set, but it is not probable that they will all be in use at one time. The working pressure is 160 pounds to the square inch. The designs for these modern boilers were drawn by John Galt and A. P. Rankin, mechanical engineers, of Toronto, and the opinion of experts who have seen them is that the Polson Company has done itself great credit by their intelligent construction.

The Hard Times Christmas Dinner of the Gutta Percha and Rubber Manufacturing Co. on Monday night last, was not so hard an affair on teeth and the digestion as the menu might lead one to suppose. "Macintosh oysters," for instance, and "Pure Para Rubber" soup might be expected to be tough, or hard, respectively. But there is nothing hard about "Gutta Perch," with oil dressing. The roast and boiled items awaken tender memories and smiles, and it is the inspiration of a born humorist to call macaroni "Corrugated Spaghetti Tubing." Under the head of game, we have a joke on Charles, or may be Joseph, about "Duck (32 oz.)," but what is meant under the same head by "Poker, with Hard Rubber Chips," we are at a loss to understand." The vegetables consisted of "Jim Dandy garden truck, a full line. Among the "relishes" are appropriately placed "Discounts," and there is, may be, a pleasantry for those who can find it in the item of "Celery (every week sharp)." It will please the good people, who object to wine, to hear that the only drinks were "Tea, callendered leaves"; "Dull Finished Lemonade"; "Coffee (reclaimed, a la boarding house)," and "Toronto water," well filtered.

—It was ordered by the court, on Wednesday last, that the shareholders of the Commercial Bank of Manitoba shall pay fifty per cent. of their double liability.

THE TEA TRADE AND THE WAR.

While it is a dangerous thing to speculate upon the results likely to be effected by war—and especially in regard to commercial relations—it is probably safe to say that the prices of both China and Japan teas will be advanced by the existing belligerent conditions in the Far East. To withdraw so many men from Japan is to raise the market value of labor. Already cultivators of the tea plantations have been compelled to raise wages and in consequence increase the cost of production. In China the situation points even more strongly to higher prices. A war indemnity is, if not a certainty, at least a very likely event of the near future. To raise the sum which the Japanese may demand, or a council of arbitration may grant, the Chinese Government will doubtless increase the export tax upon teas. This will mean higher prices for teas grown in China. What the indirect result will be is not difficult to see. China teas hold their position in the market now simply by reason of their low values. Indian and Ceylon teas are constantly receiving more favor from the tea-consuming public. England has during the last few years been taking larger quantities of colonial teas. India and Ceylon tea planters, we understand, are soon to send representatives to America to further the introduction of their teas in this country; they may find their greatest ally in an idiotic Chinese Government.

THE ORANGE TRADE.

Although the weather has not been of the character essential to secure an active movement in holiday supplies, Toronto merchants report activity in the orange trade. The open weather, however, has favored shipments. Florida oranges are in good supply. There has been some scarcity in the small sizes, and merchants have in several instances been unable to fill orders for these descriptions. An abundance of the large sizes, however, brings the market into normal condition. The quality of receipts is good. At the commencement of the season a quantity of green picked fruit arrived, and has proved a source of annoyance to the trade. With this exception, however, few complaints have been received. A number of Valencias are selling at $4.50, and this trade has hardly opened up yet. In the Valencia district the crop has been delayed and injured by excessive rains. Shipments to London, Eng., from Spain to date are at least 100,000 cases short of those made during the same period in 1893.

FOR GROCERS AND PROVISION DEALERS.

A large brewery is talked of for Sherbrooke, Que.

A large addition is being built to Kuntz's brewery, Waterloo.

The Newfoundland financial crisis has not as yet affected the fish market.

J. M. Goff, of Inwood, has sold his bakery, and intends moving to Buffalo.

Mr. Fred. Tichborne will go into the grocery and provision business at Osborne, Ont.

A Petrolea man has leased the Oil City grist mill, and will have it in operation shortly.

W.W. Ogilvie, Montreal, has given orders for the erection of six new elevators in Manitoba.

Not only are Toronto jobbers cutting prices in sugars, but there are miniature sugar wars all over the country.

The Neepawa *News* says: "390,969 bushels of wheat have been shipped from Neepawa during the past three months."

The story goes that a Campbellford miller recently fell out with the bakers of that place, built an oven and now is selling bread.

Miss Yearsy—"That was a beautiful little refrain that Miss Lungly sang." Old Crusty—"Yes; I wish she would always refrain."

Last week ten cars of cheese were shipped from Listowel station, making 5,483 boxes, for which over $41,000 in cash has been paid to the farmers of that vicinity.

The Ottawa grocers' early closing scheme may fall through. When the petition was presented to the council it was found to contain fifteen names less than the requisite number.

From the Lacolle correspondence of the St. John's *News* we gather that G. G. Corbiere is going to open a grocery store on the corner of Main and St. Bernard streets in that village.

The Ross Packing Co.'s saltery at Stevenson, B.C., has been destroyed by fire. The saltery was the property of New Westminster people, who valued it at $6,000, with $1,000 insurance.

A country grocer in this State received lately this encouraging reply from an old lady whose bill had long remained unpaid: "Don't worry about my bill, Mr. ——, I'll owe you forever before I'll cheat you out of it." —*New England Grocer.*

A correspondent writes from Almonte that during the dairy season closing on Dec. 14th, 1,000,000 lbs. of cheese was shipped from the C.P.R. depot there. More than $82,000 has been paid to the patrons of the six factories in the vicinity of Almonte this year.

The Canadian Pacific Railway authorities estimate that there are 3,00,000 bushels of wheat remaining in the hands of the farmers of Manitoba and the Northwest. What portion of this is sold will be stored in the interior, and only the overflow from elevators will be shipped to Fort William.

Cable advices have been received from Porto Rico by James Elsenhauer & Co., Lunenburg, N.S., advising suspension of shipments of fish to that market, which is now more than supplied, and prices only $6.50 for codfish, shippers to govern themselves accordingly These prices will not pay any profit, taking the high rate of exchange now ruling.

Our Montreal correspondent writes, on Wednesday: "There has been some little ripple of excitement in the trade over the condemnation of a lot of Pakling Congou tea by the Government inspector. This tea has sold at 18 to 20c., and the seizure has been much criticized by experienced tea-tasters, who pronounce the article sound, and who say that much inferior leaf has readily passed."

Under date of Leghorn, 1st inst., Charles Malenchini writes: Candied citron completely neglected. The new crop of fruit has proved a rather abundant one and sold pretty cheap, but notwithstanding this, and though favored by a sensible decline in the cost of sugar, manufacturers cannot afford to sell below the parity of 26s. 6d. per cwt. f. o. b Candied orange and lemon peels are comparatively scarce and firm at the quotations.—*N. Y. Journal and Bulletin of Commerce.*

RETAILING BOOTS AND SHOES.

Sussex, N.B., may have a new shoe factory, at least rumor says that St. John parties are looking over the ground.

White canvas shoes, from every indication, will be much worn next summer. Shades other than white may also receive prominence

An extended narrow square toe is the "Emerson." From the ball the shoe draws in abruptly to a narrow width, giving a toe something over an inch wide.

Heavy patent leather shoes are being worn for street purposes by ultra fashionable men. In the United States enameled leather shoes, with double cork-lined soles, are also worn on the streets by dressy men.

Military shoes in the thirteenth century were tipped with steel pike, which the knights used as an offensive weapon. More than one man was killed by a kick from these iron-clad boots. To the "best young man" of those days life was not all a bed of roses.—*Review.*

Here is a straight up-and-down announcement from a retail house that is not afraid to take a bold stand. We find it in the Belleville *Intelligencer:* "Business at the new store will be conducted by Haines & Lockett on the strictly cash system. Those taking goods out on approbation will be expected to pay for the pair likely to fit, and the money will be refunded if none of them suit."

It is a wondrous thing, the human foot, says Du Maurier, after describing the beautiful feet of Trilby, the model of the Quartier Latin; "it is seldom a thing of beauty in civilized adults who go about in leather boots or shoes. It can sometimes be very ugly, indeed—the ugliest thing there is, even in the fairest and highest of her sex, and then it is of an ugliness to chill romance and scatter love's young dream. And all for the sake of a high heel and a ridiculously pointed toe—mean things at the best."

The heels of elegant shoes for dressy dinner, evening or ball toilets, says the *Review*, are not much higher, but generally in the Louis Quinze shape. The heels are of white or colored unglazed kid, the shoes of silk or satin matching the dress. If the color is an unusual one, and you wish it to be matched exactly, the best way is to have them made out of a piece of the same material. Stockings should also be a perfect match, and some ladies have white silk stockings dyed for the purpose of exactly matching the shade of their dress.

A dull month is coming in the person of January. The season's wants supplied and the holiday trade over, there will be but feeble request for footwear. When progress is slow a higher pressure of steam must be put on. In times of dullness a merchant shows his capacity or uncapacity, as the case may be. Don't sit in the store bemoaning your hard lot or stand idly on the door steps. If your store were ours, we would organize a series of special sales, particular lines, on particular days. You may have to reduce prices. It is better to do so in January and sell your stock, than to find yourself next spring with a lot of last season's goods on your hands and no room for the season's novelties

STATIONERY ITEMS.

A Parisian claims to have invented a paper which is incombustible.

Crinkle paper is much used for Christmas decoration, dolls' dresses, lamp shades and other purposes. Gold and silver paper is at hand for decorating churches.

The craze for English stationery is not so great in America as it used to be, but there is nevertheless a demand for British productions, especially for fancy papers and envelopes.

A cabinet and inkstand combined, with racks for stationery, the frame of wood covered with leather, is a new production of the Brown Bros. Company. Date-racks are to be seen of similar materials, also home-made.

Writing on the subject of style in stationery, an exchange says: Don't use highly tinted note paper or envelopes. White and cream laid is always the best taste, and the only ornamentation admissible in polite society is the monogram, and even that must be small and plain.

Penholders of pearl, of smoked ivory, of agate-plated sockets and real gold, by Edward Todd, New York, offer themselves to young ladies who wish to make a holiday present. Vulcanized, rubber-propelling and repelling pencils of vulcanized rubber are shown, ivory and aluminum, too.

Brown Bros. Company show wallets and purses of real seal skin, Russia leather, etc., calf lined, with carved silver and oxidized silver locks in black and colors. This handsome line of goods is made on the premises of the company. There are some very pretty samples of them, with solid silver rims.

According to the *Effective Advertiser*, of London, the new postal regulation which permits the sending of private cards at postal card rates through the post, is having an excellent effect on the stationery trade, and there is much competition in regard to preparing suitable and artistic designs for such cards. The Americans are going to ask similar concessions from their Government.

INSURANCE ITEMS.

Mr. C. H. Gwilt, resident in Montreal, has been appointed general agent for the London Guarantee & Accident Co. for the Province of Quebec, with the exception of Quebec city, which remains as heretofore, under the care of Mr. D. Smith.

The writing portfolio sent out by the Atlas Assurance Company is a convenience. It contains a goodly supply of very satisfactoy blotting paper. We also acknowledge calendars for 1895 from the Economical Mutual, of Berlin, and the Agricultural, of Watertown.

In noticing the fire alarm system in use at Sarnia, the chief of the fire brigade of that town—which seems to have a very satisfactory system of fire protection—said there had been 64 fire alarms during the year ended with September, 1894, but excluding false alarms and test alarms, only 41. Nine of these fires were caused by chimneys and flues; 4 were incendiary; 4 were from defective stoves or stovepipes; hot ashes and sparks occasioned 4; hot ashes 2; and children playing with matches 2.

It is a good sign to see the prominent people of a town taking direct personal interest in its fire appliances. Recognizing the fact that since the closing of the bridge across the St. Croix river, St. Stephen has not as full a measure of fire protection as usual, Councillor Whitlock has organized a volunteer fire company, which in case of emergency will have charge of and work the steamer. The company consists of the fire committee of the council, Messrs. Whitlock, Regan and Mitchell, and a number of gentlemen, among them:—E. G. Vroom, foreman; J. D. Chipman, J. E. Ganong, C. N. Vroom, C. A. Lindow' Edgar Boyd, C. W. DeWolfe, R. W. Grimmer.

—The Temperance & General Life Assurance Company, following the lines of some life companies in the old country, divides its policyholders into two sections, those who are abstainers from alcoholic drinks and those who are not. Initiatory proceedings were taken the other day by a policy-holder named W. H. Graham to compel the company to keep the earnings and profits of the temperance and non-temperance or general sections separate. This, the company states, it has always done, and so far as the management knows, nothing has been done in violation of its charter. Apparently there is no real basis for action, and present indications are, we are told, that the proceedings will be dropped.

Contractors especially will be interested in the town of Sudbury just now. That place is going to have its streets torn up and sewers placed in them. Tenders will be received from contractors up to Jan. 5th next for the work.

BOOKS RECEIVED.

POOR'S DIRECTORY OF RAILWAY OFFICIALS.—This is the ninth annual issue, and contains lists of officers of railways in America, North and South; master mechanics, purchasing agents, chief engineers, master car builders and painters, as well as general managers and superintendents. Particulars of street car lines, electric and other, are also given.

HORACE CANADIANIZING.—This twenty-page pamphlet, by the Rev. Dr. Scadding, is published by the Copp, Clark Company (Ltd.), Toronto. As may be gathered from the extracts we have given elsewhere in this issue, it sketches "Pioneer life in Canada, as recalled by sayings of the Latin poet Horace, being the Log Shanty Book Shelf Pamphlet for 1894," and containing a list of the books in the pioneers' cabin at the Industrial Exhibition.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Dec. 20th, compared with those of the previous week:

CLEARINGS.	Dec. 20.	Dec. 13.
Montreal	$11,873,088	$12,099,892
Toronto	6,336.185	6,091,526
Halifax	1,133,942	1,242,679
Winnipeg	1,184,329	1,285,102
Hamilton	644,261	663,609
Total	$21,171,805	$21,382,808

Aggregate balances this week, $3,352,477; last week $3,299,638.

Willett & Gray remark as follows: "The fact is there is too much sugar in the world for the good of anybody in the trade. Even the consumer receives little benefit from present prices, for the reason that his retail grocer has overloaded at higher prices, and will not come down. There are towns in New England, and probably elsewhere, where consumers are paying 6c. per pound for granulated sugar, and within thirty miles of the refiners' distributing market. There's a screw loose somewhere in the sugar business of this country. . . . It has been expected that grinding on some estates in Cuba would begin on the 15th, but our cable advices to-day report that harvesting is delayed. Other West India crops are reported favorable, but requiring rather more rain."

An Amherstburg letter of Monday last says—and it will apply to a good stretch of that part of West Ontario—that the weather is most extraordinary. "It is as mild as May, and the coal stove is a superfluity. Mud is king, in town, and we are praying for a change before Christmas, for the sake of health, business, and pleasure, too. The merchants are being so continually disappointed, here and elsewhere. When they get a big stock of furs there is no cold weather, and when an extra supply of muslins, it keeps cold until July—and *then* people think it is not worth while to buy them unless there is a 'Quarter-off sale.'"

—The record of dividends paid by the textile mills at Fall River, Massachusetts, during the quarter ended September 30th shows how severe the depression has been in that centre of industry. Of thirty-seven corporations having a total capital of $21,168,000 only twenty-three paid dividends, aggregating $215,900, equal to only 1.01 per cent. on the total capital. Even of those who paid dividends there were several which had to borrow the money or draw upon their surplus.

—It having been arranged that the people of Canada shall be afforded an opportunity of testifying their sense of the services rendered to the country by the late Premier, Sir John Thompson, by contributing to a fund for the benefit of his widow and children, the Bank of Montreal and the Canadian Bank of Commerce will receive subscriptions towards this fund and transmit them to Ottawa free of charge.

—At the monthly meeting of the Institute of Chartered Accountants for Ontario, to be held in Association Hall, a paper on the Australian financial crisis was read by Mr. Wilton C. Eddis, late Australian Bank Inspector.

—Mr. H. E. Nelles having resigned the position of manager of the Dominion Savings and Investment Society, in London, Mr. N. Mills has been appointed to the position.

—The by-law to provide waterworks for Winnipeg at a cost of $225,000 has been voted on, and is defeated by a large majority.

Correspondence.

FIRES IN TOWN AND COUNTRY.

Editor MONETARY TIMES:

SIR,—You have written often and well about fires on the farm and fires in country places, how it is needful to take care against them. And you have shown how much carelessness there is about things that cause fires. Some how or another most folks do not keep their own places clean and tidy, and do not look after the things that bring fires; but they are very ready to find fault with other people when fires happen on their places.

I have never lived in a city, but I have lived in the country, and it is easy to see almost anywhere how the general carelessness in leaving things at loose ends about a farm or even about a country store gives what you might call a regular invitation to fire to lay waste property. Would you not think that the terrible losses we see and hear of so often would drive men for their own sakes to be careful about fire?

In the daily papers you read plenty times how the councillors in villages and towns and even cities are finding fault with the insurance people who ask them to take some trouble to have things right about their fire engines or their ladders and buckets and such like. I believe in more mutual insurance and I do not like combines. But when there are incendiaries in so many places and so many fires are happening all the time, I think the people should not treat the insurance companies altogether as enemies when they keep telling people to provide the necessary things to fight the fires with when they come. We are too careless.

FIREMAN.

Waterloo, Ont., Dec. 15th.

THE DRY GOODS TRADE.

Editor MONETARY TIMES:

SIR,—I puzzle myself, sometimes, over considerations such as I am going to submit to you. I don't pretend to "know it all," as some wise folks do, but certain of the things I see in the trade seem to me folly.

For example: What benefit can be derived in a falling market by buying muslins in November, getting delivery of them in February or March, and keeping them in the shelves till June or July? Why buy mantles in March or April for fall use, when the fashions and colorings must be mere guess work?

Then another thing. Some Canadian retail importers with lofty ideas of commerce, would think they had a business grievance against a wholesale importer who should open up a retail department, such as the Glasgow houses have done, who come here and offer their goods by travellers. These houses pay no taxes, and besides they pirate the information given to the mercantile agencies by the dry goods, clothing, grocery, and boot and shoe manufacturers here. Do not the provincial houses in the larger cities and State centres in America, conduct wholesale and retail departments?

The skill, capital and knowledge possessed by most wholesale houses of to-day should enable them to capture enough trade to crush out many city retailers of moderate standing whose trade is of little value at present, and clip the wings of an army of manufacturers' agents, so called, and men who humbug the people to buy for import. Yours,

OBSERVER.

December 18th.

THE SEALING QUESTION.

Editor MONETARY TIMES:

SIR,—One of the most important industries in British Columbia is sealing. I beg to inclose an article that appeared in *Vancouver World* of 23rd inst., and to add a few notes, which I trust you will not find too long, but it is impossible to write much less so as to explain matters properly.

The exact amount of the sealers' claims is not yet definitely known, but the basis which they have taken is a very simple one. For the years 1888, 1889 and 1890, the three years immediately preceding their forcible expulsion from Behring Sea, the average take per boat of all that entered the sea was 222½, and of all canoes 105 2-9 skins per canoe.

This year (1894), the first during which canoes have been permttted in the sea in terms of the award—boats being virtually excluded by the prohibition of firearms—the average take per canoe, of all vessels that entered the sea, has been rather more than 101¼ seals per canoe, and that notwithstanding that they were prohibited from killing seals in July, one of the best months in the year, by the Behring Sea Award.

The rights of the sealers having been declared lawful by the international award, they have been deprived, by the combined action of their own and of the United States Governments, of those legal rights, and they claim that what they have lost is what they have been forcibly prevented from gaining, calculated upon the average of the three immediately preceding years. Surely this is a fair and reasonable claim. If it is not, it seems to be incumbent by law upon the British Government to point out a more fair and reasonable method of ascertaining these losses, and to pay them "promptly," as stipulated in the convention, which set forth the terms on which alone Lord Salisbury consented to renew the modus vivendi.

Thanking you in advance for inserting this,

Yours, truly,

H. G. Ross.

Victoria, B.C., 29th Nov., 1894.

Meetings.

BANK OF OTTAWA.

Proceedings of the twentieth annual meeting of the shareholders of the Bank of Ottawa, held on Wednesday, the 12th day of December, 1894.

Among those present were: Messrs. Magee, Hay, Murphy, Hon. Geo. Bryson, John Bryson, M.P. (Coulonge), Fraser, Sweetland, Mather, Kenny (Arnproir), A. Masson, Geo. Edwards (Thurso), Wm. Scott, Alexander Maclaren, Albert Maclaren (Buckingham), T. C. Keefer, J. G. Whyte, Jas. Ballantyne and John Christie.

On motion of Mr. Hay, seconded by Mr. Mather, the president took the chair and the general manager acted as secretary.

The chairman then called upon the general manager to read the following report of the directors:

REPORT.

The directors have pleasure in submitting for the information of the shareholders the twentieth annual report.

The balance at the credit of Profit and Loss account on 30th November, 1893, was		$33,737 19
Net profit for the year ending 30th November, 1894, after deducting expenses of management, reduction in bank premises, and making necessary provision for interest due to depositors, unearned interest on current discounts, and for all bad and doubtful debts		188,096 02
		$221,833 21
Appropriated as follows:		
Dividend No. 86, paid 1st June, 1894	$59,530 50	
Dividend No. 87, payable 1st Dec., 1894	59,644 45	
Carried to Rest account	72,500 00	
		191,674 95
Leaving a balance to be carried forward at the credit of Profit and Loss account of		30,158 26
The balance at credit of Rest account on 30th November, 1893, was		$843,536 75
To which has been added premium on new stock paid in since last statement		8,963 25
Amount transferred as above		72,500 00
		$925,000 00

The directors greatly regret to have to record the death, during the year, of Mr. Robert Blackburn, a member of the board since the establishment of the bank, and latterly its vice-president. He took a warm interest at all times in the welfare of the bank, and his ripe business experience and sound judgment were always at its service. Mr Denis Murphy was elected a director for the remainder of the year, to fill the vacancy caused by the death of Mr Blackburn, and Mr. George Hay was appointed vice-president.

Branches of the bank have been established during the past year at Rat Portage, Kemptville, and on Bank street in this city, with good prospects for business.

The premises at Winnipeg, alluded to in the last annual report, were completed during the year, and the business of the bank at that point has been carried on for some months in the new office.

Your directors have had under consideration the desirability of establishing under the authority given in the Bank Act, an employes' pension fund, and they hope that by the time of the next annual meeting they will be able to submit a fully matured scheme for its management. A resolution bearing on this subject will be submitted for your consideration

The usual inspections of the offices of the bank have been made, and the duties assigned to the various officers have been zealously and diligently performed.

All of which is respectfully submitted.

CHARLES MAGEE,
President.

GENERAL STATEMENT—LIABILITIES AND ASSETS AS ON 30TH NOV., 1894

Liabilities			
Notes in circulation			$1,127,920 00

Mortgages on real estate sold by the bank			100 00
Bank premises			133,500 00
			$8,505,376 14

GEO. BURN,
General Manager.

After some remarks from the president and others, the following resolutions were put to the meeting and carried unanimously:

Moved by the president, seconded by the vice-president, "That the report of the directors and statement now read be adopted and printed for the information of the shareholders."

If was then moved by Mr T. C. Keefer, seconded by Mr John Bryson, M.P., "That the thanks of the shareholders are due, and are hereby tendered to the president, vice president and the directors, for their careful attention to the interests of the bank during the past year."

Moved by Mr Jas Ballantyne, seconded by Mr. J. G. Whyte, "That the thanks of the

shareholders be tendered to the general manager and other officers of the bank for the efficient manner in which they have discharged their respective duties."

Moved by Sheriff Sweetland, seconded by Alexander Maclaren, "That the shareholders present at this annual meeting are of the opinion that it is expedient to form a pension fund for the employes of the Bank of Ottawa, and they hereby authorize the board of directors of the said bank to establish the said pension fund so soon as in their discretion they may deem it advisable, and to contribute thereto from time to time out of the funds of the bank during the next four years, a sum or sums not exceeding in all twenty thonsand dollars."

Moved by Mr. T. W. Kenny, seconded by Mr. A. Masson, "That the ballot-box be now opened, and remain open until five o'clock, for the election of seven directors for the ensuing year, and that Messrs. Wm. Scott and Albert Maclaren be appointed scrutineers; the polls to be closed whenever five minutes shall have elapsed without a vote being tendered."

The scrutineers, Wm. Scott and Albert Maclaren, presented the following report:—

Ottawa, December 12, 1894.

To George Burn, Esq., General Manager:

SIR,—We, the undersigned scrutineers, appointed at the general meeting of the shareholders of the Bank of Ottawa, held this day, hereby declare the following gentlemen duly elected directors for the ensuing year: Hon. George Bryson, Messrs. Alexander Fraser, Geo. Hay, Charles Magee, John Mather, David Maclaren, Denis Murphy.

At a meeting of the newly elected board held immediately after the meeting of shareholders, Mr. Charles Magee was re-elected president, and Mr. Geo. Hay, vice-president.

PENNY WISE AND POUND FOOLISH.

There are a lot of merchants (?) in this country who have a wrong notion regarding their relations to their creditors.

To judge from what such men say and do, one would infer that the seller of merchandise has no right to know anything about the financial standing of the party to whom he sends his merchandise, and must trust to luck or the good will of the debtor to pay for it. The merchandise or its equivalent belongs to the seller until he is paid, and he naturally desires to know whether the buyer can and will meet his obligations.

It very often happens, when certain merchants are requested to furnish such information as is necessary to satisfy the credit department regarding their standing, that the request is treated as an offence and receives a discourteous reply, which is apt to be something like this:

Banking Office in Newmarket.

Banking office in Newmarket—the late stand, with vault and fittings complete, of the **Federal Bank**; previously occupied by Consolidated Bank, and formerly by the Royal Canadian Bank. Apply to

QUALITY and PRICE

"If you are not satisfied to ship my order on the information you have, you may cancel it."

Of course the "credit man" knows this already; what he doesn't know is what every merchant should be proud to tell him provided his condition is favorable. If it is not he has no occasion to criticise the dealer if he refuses to trust him. If it is favorable, he is doing himself a great injustice if he refuses to let it be known, and is closing the doors to himself of the best sources of merchandise.

The inference always is that a man who won't make a statement of his standing to the right parties, can't make a good one, and therefore is not deserving of credit.

The basis of credit is confidence, and every dealer owes it to himself to establish the strongest confidence possible among *all* his creditors. The large houses know this and are exceedingly particular about it.—*Henry N. Palmer in the Haberdasher.*

HOW TO SELECT ORANGES.

Big oranges are not good. They are all skin and fibre. If you want "yellow cup of wine," buy small fruit; that is, fruit that runs 175 to 200 to the box. Weigh it in the hand; take the heaviest. Sweet, sound oranges are full of wine and sugar and are very heavy. A thin, smooth skin is a good sign. Wide, deep-pored skins are unmistakable signs of a coarse, spongy article. Bright yellow oranges usually cost more than

russet, because they are prettier. When the commission merchant buys in a hurry, he saves time by taking an orange between his hands and squeezing it to death. If it runs a cup of wine he takes as much of the cargo as he needs. If it runs dry, he cuts the price or refuses to trade. There is no surer way to tell the value of an orange.—*Boston Transcript*

Commercial.

MONTREAL MARKETS.

MONTREAL, Dec. 19th, 1894.

ASHES.—There has been some outside demand since our last report, resulting in a shipment of 50 brls. of potash to France and a car load to New York, so that values are firmer. First quality pots are quoted at $4.10 stiff, though some lots were bought rather under this figure a few days ago; seconds $3.75; pearls are nominally $6.40 to 6.50. Receipts for December so far are 55 brls., and stocks in store are reduced to 62 brls.

BOOTS AND SHOES.—Orders are reported to be coming in a little better than when travellers first went out with spring samples, but they cannot yet be called liberal. Most of the factories are doing some cutting of leather, but matters in this line cannot be expected to be very brisk until after the close of the New Year's festivities among the factory hands, which are *de rigueur* in this community. "Jour de l'an" must be celebrated, come what may, work or no work, wages or no wages.

DAIRY PRODUCTS.—In cheese there is but a dragging market to report this week, but values rule fairly steady at 10¼ to 10⅜c. per lb. for fine Ontario, Townships 9⅞ to 10c., and Eastern 9⅛ to 9⅜c. For the better grades of butter there is steady local demand; we quote late-made creamery 20 to 22c, Townships dairy 17 to 19c., Western 15 to 16c. per lb. Boiling eggs readily bring 19 to 20c.; ordinary stock 13 to 14c. the dozen.

GROCERIES.—Considering the unseasonable weather, and the general lack of snow in the country, it is considered there is no great ground for complaint at the amount of business doing, which some houses report as fair. There has been further decline in sugars, and the query is general as to how much lower values can go. The established figure for granulated at the refinery is now 3½c., with yellows ranging from 3 to 3⅝c. Molasses is very steady at 30c. for Barbadoes for the single puncheon, and holders of lots are said to be not anxious sellers. There is still some American enquiry for teas; some lots of Japans in transit have been diverted to far Western America, and some small lots of greens have also been sold to Chicago. A New York tea man, now in the city, states that he has never seen the American market so thoroughly cleaned up. Canned goods are quiet. The California valencia raisins mentioned in last report are to hand, and are meeting with favor at 5½c. in a jobbing way. Muscatels firm at figures ranging up to 7½c. There is a scarcity of the lower grades of currants, and cable orders have been despatched to London. Coffees rule firm; we quote Rio 19½ to 21c.; Maracaibo 20½ to 22c.; Java, 26 to 30c.; Mocha, 28 to 31c. per lb.

HIDES.—The recently noted firmness in hides is well maintained, and sales of No. 1 light hides to tanners are declined under 5½c., dealers buying from butchers at 4½c. Heavy hides are not so much in request, but are steady at former quotations. The market has been virtually cleared of light hides by Americans, and it is estimated that 100,000 hides have gone hence to the United States this fall, a very unusual thing. Lambskins are quoted at 60 to 65c. each.

LEATHER.—The scarcity of hides and the increasing firmness in that market, has caused a decided stiffness in leather, and in the better grades of pebble, buff and splits it may be fairly said there is some advance established; glove grain is also firmer. In sole there is no change of price as yet, but an advance would not be surprising. There is no general buying thus far, but the little improvement noted last week is fairly held. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 10 to 12c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Last week's remarks will fit the situation of the moment. The local foundries, etc., are doing little, and neither in iron or other lines of heavy metals is there any notable movement. Warrants are cabled lower at 41s. 11d., but in general quotations there are no changes of any kind. There was a meeting of rolling mill and nail men held last week, but it only resulted in a sort of preliminary consultation, and nothing definite will be done until a later meeting to be held in January. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.50 to $17.25; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $5.25; best refined, $2.40; Low Moor, $5.10; Ca-

OILS, PAINTS AND GLASS General dullness characterizes these lines of business. In linseed oil, turpentine and other staples there is absolutely no change. It has been thought that fish oils might possibly be affected by the Newfoundland troubles, but stocks on spot are comparatively small, and quotations are yet unchanged. We quote:—Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4 50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

TORONTO MARKETS.

TORONTO, Dec. 20th, 1894.

DRUGS.—There is little or no business being done in drugs outside of the small lots moving to supply present needs. When the new year has dawned, and the accounts of 1894 are straightened out, we may look for an increased trade. The consumptive demand of drugs throughout the country is small, but of course, just at present, sundries and holiday supplies are very active. Reports from Smyrna and Constantinople are bullish, but are apparently under speculative control. "The weather in the sowing districts is favorable and unfavorable, and vice versa, but thoroughly reliable reports indicate that there is at present nothing to warrant a belief in any material shortage of the crop now under way. What the conditions will be before the crop is finally gathered next summer cannot be foretold, but, generally

The New-York Times

IS an uncommonly interesting newspaper. Its sixteen pages are brimful of news. It is handsomely printed, accurate, clean, fresh and vigorous. Its Financial Page is a capital manual for investors, for bankers, and the officers of savings banks, trust and insurance companies, railway earnings, stock and bond quotations, interest and dividend notices, the organization of new companies, and ALL financial news reports are promptly and accurately printed. Its commercial reports, including wool, cotton, breadstuffs, milk, butter, eggs and farm produce, recently much enlarged, are of unequalled fulness and value.

The TIMES will do its full share of earnest work for sound financial legislation, to repel the assaults of private greed upon the law-making power, to establish Democratic principles of equality in taxation and economy in expenditure, and to retrieve the defeat brought upon the Democratic Party by errors and betrayals.

speaking, higher prices are not looked for, provided the laws of supply and demand are allowed full play. Quinine is steady and without change. Cream tartar is easier. Beeswax is scarce and firm. The *Reporter* lists advanced Brazil wax, menthol, rose leaves; and as declined, citric acid, caffeine, Japan wax, oil anise, gum chicle, ginseng, ipecac.

FURS.—Fair supplies of raw furs are coming in, but a good many skins are offering which are in poor condition, and bring much lower figures than quotations below, which, it must be remembered, are for prime pelts. We quote: Beaver, $2.50 to 3.50; bear, large, $15 to 25; do., cub, $3 to 8.00; red fox, $1.00 to 1.50; marten, $1 to 1.40; fisher, $5.00 to 6.00; coon, 25c. to $1.00; otter, $7.00 to 11.00; skunk, 25c. to $1.25; fall rats, 8c.; kits, 8c; mink, $1.00 to 1.50; lynx, $1.25 to 2.25.

GRAIN.—The week closes without wheat having made any advance; quotations stand unaltered; the feeling, if anything, may be considered easier. This is the result of a weakening both in the English and American markets. *Bradstreet's* estimate, giving a material increase in the visible supply, has been partially accountable for the weakness. The stocks of the United States and Canada are placed at 128,302,000 bushels, or 1,915,000 in excess of last week's figures. Barley has ruled quiet. Oats stand firm. Rye is nominal, and buckwheat dull.

The stocks of grain in store at Port Arthur on Dec. 8th were 402,010 bushels. During the week there were received 55,178 bushels, and shipped 1,353 bushels, leaving in store on Dec. 15th, 455,865.

GROCERIES.—The present week has been very similar to the week reported in our last issue. The holiday trade is beginning to slacken up, retailers having pretty well obtained their supplies. Fancy table fruits are well cleared out now, and the market is considered in good condition as compared with previous years. Jobbers did not this year stock up very heavily with this description of goods, knowing well that after New Year's day had passed a depreciation of $1 to $2 per box would take place. In the cheaper grades, however, some little 1894 stock will have to be carried forward to the next year. Quotations for Valencia raisins stand as follows: o.s., 3⅞ to 4c.; f.o.s., 4¼ to 4½c.; selected, 5¼c.; layers, 6¼c. The local coffee market is quiet and without important feature. The *N.Y. Bulletin and Journal of Commerce* says: "On the contract market there was less animation, but a somewhat firmer tone, without any apparent outside influence to act as a stimulus. Europe, on the whole, was inclined to be somewhat easier, and the Brazilian accounts afforded no special encouragement, the receipts at Rio running up again, and in a quiet way firm offers keeping in fair quantity, with terms easy. Elsewhere we refer to teas. The market appears strong, the strength coming from primary sources, rather than from any increase in consumptive demand. Sugars remain in the same position as reported a week ago, nothing having occurred to stiffen values and add strength to the market. As is usual at this season of the year, canned goods are quiet. Canned salmon is rather slow; the best qualities selling at $1.35 and the cheapest at $1.10.

HARDWARE AND METALS.—Trade in general has fallen off during the period under review.

These prices are wholesale by the car-load.

Except in specialties and holiday goods there has been but very limited movement, and in these lines trade this year is not up to the average of that a year ago. Skates, with the increasing popularity of hockey, are in good demand. Sleigh-bells have been quiet, and they could not be otherwise with the present lack of snow and wintry weather. Shipments of heavy hardware are light, and we note few changes in price. Cut nails have been held firm at a basis of $1.75 f.o.b., Toronto. Very few car-load orders are being booked for cut nails, and little improvement can be looked for until the new year has been partially spent. The hardware associations are still in session; however nothing is reported as to changes in values. The metal trade shows lighter movement, and about the only metals showing signs of activity are galvanized and black iron. Import orders are being freely booked for galvanized iron, tin plate and window glass.

HIDES AND SKINS.—The local market is firm, although the advancing season is bringing about an increased slaughter of cattle and larger take-off of hides. The strength comes from Chicago. The *Review* in its market edition on Saturday says: "The advanced prices noted in our last have been established by transactions. There is no escaping from the logic of events, and tanners may as well realize that the market has, for the time being, gotten entirely away from them. There are times when all signs fail and this is one of them. Many of the shrewdest observers have hoped against hope that the entry of cattle would become larger as the winter advanced, but for some reason the animals don't come. This week the total receipts will be only a little more than 60,000 and the slaughter a good deal less than that." The local demand is picking up a little; tanners at last, apparently, have come to the conclusion that prices of leather must be advanced or the tanneries closed up. In the middle of the month an advance of 5c. was made in the price of sheepskins, and they now stand at 65c. Although this is a low price—last year's quotation on a similar date was 75c., and was then considered very low—under present market conditions they are worth no more. There is some accumulation of stock reported throughout the country. Calfskins are quiet with little or nothing doing. Tallow is weak, merchants paying 5½c. and selling at 6c.; the supply has increased during the last week.

LEATHER.—There is more confidence in the market and dealers are talking of nothing but higher prices. But there is more than talk in the market. We learn of a tanner who has had the courage to decline a large transaction on the basis of former prices. Such actions as this are alone sufficient to raise the market from the low level to which it has sunk. So soon as the demand for spring cutting sets in with any degree of activity, we may confidently look for higher values. Some shipments of sole are being prepared for export.

PROVISIONS.—The outward movement of trade is slow and inactive. The dullness continues in butter; rolls are selling at 15c. and choice tubs at 16c., while medium and low grade qualities are neglected, with prices nominal. An easier feeling exists in the local cheese market, the consumptive demand being weak. Quotations of hog products are nominal. Chicago is reported dull and easy. Dressed hogs are selling at $5.00 to 5.20. A quiet trade is doing in eggs; pickled are quoted at 12½c.; held and cold storage, 14 to 15c., and fresh at 18c. Strictly new laid eggs are difficult to obtain and bring high prices. Poultry is, of course, receiving good attention, and offerings are large. Quotations are: Turkeys, 8 to 8½c.; chickens, 35 to 40c.; geese, 6½c.; ducks, 40 to 45c.

SEEDS.—Trade is more active; alsike is being delivered freely, and the market, in consequence, shows easier tendencies, although no change has been made in values. Merchants, however, predict that prices must decline if the export demand does not increase. Prices of red clover continue steady with deliveries moderately large. In timothy there is nothing of special interest to note.

J. FRANK LANG, - - - - Secretary.

The Union Mutual Life Insurance Company has had a business experience of forty-four years. Its policies are generally conceded to be of the most liberal character. It is the ONLY company issuing policies under the Maine Non-Forfeiture Law. It has 36 millions of dollars of insurance in force upon its books. It has an annual income of one and a quarter million dollars. It has already paid to its policyholders 27 millions of dollars.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital ..... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE WAIL OF THE OVER-INSURED MAN.

A correspondent has appealed to us to know how to protect himself from the pertinacious agents for all kinds of insurance. We think he worries himself too much; perhaps he might save 10 per cent. of his premiums by setting up as an insurance broker to do his own business only, and then tell every caller he is a broker. We hardly like to tell him this, but really the way some offices let the public have the commission on their own business makes us think our complaining friend might end some of his troubles thus. Not only the agents and brokers, but the more conservative of the insurance company managers, would be glad to see some definite rule on this subject laid down and adhered to for universal guidance. But let our friend have the pleasure of seeing his grumble in print. He writes as follows:—

"Insurance is a grand principle, it sheds its benign light all round me. When I rise from my bed where I have slept the sleep of the just, knowing that I am insured against burglary, larceny, and theft, as well as against the demon fire, I look out on the pitiless rain and fear a wetting, with attendant rheumatism, on my way to the morning train. I am soon, however, consoled by the wife of my bosom, who reminds me that I have recently effected an insurance against sickness, etc. As I drive to the railway station in my humble dogcart and meet the rich son of Jehu (I know he is the son of that gentleman because he drives furiously), I gently murmur to myself my cart is insured against accidents. Safely seated in the railway train, I scan my morning newspaper, and find banks have stopped, or a big firm's bills have been returned last night; again I am insured. A little later on I notice floods in Little Slocum; my friend's house on which I hold a mortgage is flooded. Never mind! though now after the flood the value has gone, I am comfortable—my mortgage is insured. I don't look at the sporting news, because I never bet. The cow dropped a dead calf last night, but Jones has laid me fifty to one against that, so I do not mind much. I never bet. Jones calls that insurance, and as he is a member of Lloyd's he ought to know. But the train has stopped in a long tunnel, and all ask what is the matter; the express is timed to be just behind us; the sight of the large accident insurance policy with its numberless conditions floats before my eyes, and I clutch closer my *Pick-Me-Up* (with insurance coupon).

"Arriving at my office I find the plate glass window broken, but it will be all right in a few days—the plate glass insurance company look to that. My goods at sea are all covered by marine insurance, so the wind does not trouble me so much as it might, and I try to get my work done, but no one will insure that I catch that early train. I feel I have had a lucky day; no one from the *Grand Paladium* Life Assurance Company has called to-day, and so I get home to hear that the pipes have burst; insured against that, it troubles me not at all. But what is that I hear; a ring at the front door just as I am getting off for my post-prandial forty winks. 'Please, sir, a gentleman to see you.' I rise, to hear the dulcet tones of the agent of the *New* Insurance Company, which charges no premiums and asks you to dinner once a year out of the profits. My night's rest is gone. I so clearly ought to insure my life for a larger sum, the agent said so, and now half my income or more goes in insurance premiums. I think I will drop all kinds, but no! Sea, fire and life insurance have, I know, stood some friends in good stead; I will stay by them, but which of the others to drop I do not know, but I feel that I am over-insured, but who will protect me from the next agent?—that is the insurance I want most."—*Ins. Spectator, London.*

BURIED BANK BILLS.

Under this heading, a late issue of the *Daily Witness* of Montreal tells an interesting story about a farmer from the vicinity of Three Rivers. He did not believe in banks, but thought it safer to carry his money about with him. In the spring of last year, while plowing his field, he had a pocketbook fastened around his waist, containing about $400. After plowing the field and sowing it with grain, he returned home to find that his pocketbook was missing. In the morning he searched every inch of the field for the book, but in vain. He now concluded that he must have plowed the pocketbook into the earth, and that there would be no finding it till the fall, when the field would be plowed again. When the crop was gathered, he went to work without delay to plow the field; but, although he went over it again and again, failed to find his money.

When the snow and ice of winter came he made up his mind he would never see it again, but, strange to say, while plowing the field again this spring he turned up the pocketbook, containing a lot of bluish-looking pulp, which is now in the hands of the public analyst, who is seeking to discover the numbers and denominations of the bills, and the banks from which they were issued, in the hope that the farmer may not lose the whole amount.

No wonder that the farmer was somewhat fearful of letting his money out of his hands, in view of the many institutions which have proved themselves unreliable, but his fear took too wide a range and resulted in his great injury. A New York journal shows that properly invested, this money, like the grain sown in his field, would have grown while he slept. His bank bills unused, as in the first place, and then misplaced, moulded and depreciated in value, when, if they had been wisely invested or deposited in secure monetary institutions, they would have grown and become an increasing source of comfort to him.

There are many people in the land who are hoarding in stockings and hiding-places their little possessions, fearful all the time of losing them, leading a sort of nightmare life, and afraid to trust their money to the keeping of others. Bank bills may be buried to rot, or they may be deposited to grow. There are institutions whose honorable history, prudent management and ample assets entitle them to the fullest confidence of all reasonable men. To them the whole dependence of men the only support of widows and orphans may be intrusted with the most perfect confidence.

HOT SCOTCH.

Here are some items from the menu of the banquet recently given to Lord Aberdeen at Vancouver:—

Cocky Leekie.
Morning Mist frae Lochnagar.
Saumon grippit far awa' fra the Dee.
A Runlet o' Sack.
THE HAGGIS.
"Great chieftain o' the pudding race."
Saut Beef an' Curly Kail frae Aberdeen.
The Hin' Leg o' Jock Tamson's Soo.
A Hair o' the Dog that Bit ye
A Cup o' Tea wi' a Cinder in't.
Sneeshin'.

BILL NYE AND HIS PHYSIQUE.

I was examined three years ago at the general office of the Mutual Endowment Widows and Orphans' Dream of Wealth Insurance Association, in New York, and quite a number of extremely personal questions were asked by a handsomely dressed physician, who only partly concealed his scorn when he noticed that at the elbow of my red medicated flannels a September twilight on the French Broad River had been worked with lemon-colored Germantown wool.

He asked if ever pimples had shown themselves on my grandfather's side. I said no, which was true, although I was careful not to say that he had a rising once at the base of the clavicle. I considered that fair, as I was there to answer questions and not to volunteer information.

Drawing me out still further, he chatted on about hay fever, asthma, rose fever, roseola, dandelion fever, golden-rod asthma, shortness of breath during the haying season and nausea in the harvest-field, with a feeling of revulsion at the thought of work. I passed, with some difficulty, on these questions.

I remember that he smiled a cold, hard, tutti-frutti ice-cream smile and asked me to remove the rest of my clothing, as it would be necessary to percuss my chest.

He also gave me a little auscultation to see if the swallows had been nesting in my broncho tubes, as I understood him. He asked me some more things about my parents. They would have enjoyed it, if they had known what an interest New York people took in them. Perhaps we will take a week off some time and drive in. We never thought that people in New York felt that way towards us.

Then the man betrayed some anxiety regarding insanity, calculus, suicide, shingles, ringing in the ears, acidity of the stomach, thrush, St. Vitus's dance and other social features in our home life. I told him that there had not been any maniacs in our family lately, but cranks had married into the family from time to time in spite of all we could do

TIPS OR VAILS.

The question of "tips" or "vails" as gratuities to servants, is a grievous one in certain parts of the States as well as Europe. It will be remembered that in the days of the great Lord Chesterfield, vails in London had reached such a pitch that it cost a man of position five or ten guineas to dine out. As he left the house he had to run the gauntlet of the butler and underbutler and half-a-dozen footmen. One handed him his cane, one his hat, another his gloves, a fourth his coat, and so on, and so on, each expecting a crown in acknowledgment of his services. Lord Chesterfield, says the *National Review*, saw that social intercourse was being ruined, called a meeting of the chief people of the world of fashion, and got them to agree to give nothing to the servants when they dined out. It is true he was nearly lynched by a mob of irate footmen, but he carried his point.

It is said that at the present moment there is a tendency to revive the odious custom thus put down by Lord Chesterfield, and that the masher has begun to tip the men who put him into his great coat after dinner. If that is so, a clear case exists for a common agreement not to allow the infection to spread. Dining out would become a more intolerable burden than it is already if it also were complicated by the question, "What is the least I can give without looking mean?"

VANDERBILT AS A PAWNBROKER.

The Provident Loan Society, which was started last spring on contributions by Cornelius Vanderbilt, C. C. Beaman, J. Kennedy Todd, J. Pierpont Morgan, Oswald Ottendorfer, Solomon Loeb, J. B. Crimmins, and others, to do a pawnbroker's business on a basis of 1 per cent. a month interest on loans, has been very successful, as shown by its first annual report just made this month. From May 1st to Nov. 30th, $195,040.50 has been loaned on 12,286 pledges. The loans were made from the minimum amount of $1 to the maximum of $100. The loans were made for a year, with the privilege of repayment at any time, and instalments of not less than $1.

For the last three months the loans have increased $1,000 a month. Thousands of poor people in New York availed themselves of the low interest rates of the society. Without any appreciable increase in its operating expenses, the society can lend in the next six months, the report says, $100,000, and with that can more advantageously carry on its philanthropic work and earn six per cent. on its capital, the maximum permissible under its constitution.

—An exchange suggests that if more men would open the day with prayer, instead of a cocktail, the business of the country would not suffer much.

—Clerk—"Well, if you don't like any of the pinks, here are some nice goods in green I would be pleased to show you."

Aunt Abigail (curtly)—"No, yeou don't, young feller; I read the paper, an' I know all about you green goods fellers."—*Boston Courier.*

—The sentencing last week of Eugene V. Debs to six months' imprisonment for delaying the U. S. mails was, considering the magnitude of his offence, a very light one. Six of his colleagues are to be imprisoned three months each. The crime of conspiring against the interest of the entire community is a serious one and deserved greater punishment than it received. In order to punish the Pullman Car Company the American Railway Union was needlessly dragged into the dispute. Possibly Debs thought this union omnipotent, and that it would refuse to allow the Pullman sleepers to be hauled, and thus force a settlement with the Pullman strikers. Instead of this all traffic was for a time suspended, Neither mails nor passengers were allowed to be moved, and the railway front of the city of Chicago was largely in the hands of the mob for some days. This conspiracy against the law led to the destruction of property to a large amount, and what was worse, to the loss of human lives. Light as his punishment is, it is to be hoped that it may be sufficient to deter violent or unreasoning men from imitating this man's folly.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

The Company acts as **Executor, Administrator, Receiver, Committee, Guardian, Trustee, Assignee,** and in other fiduciary capacities, under direct or substitutionary appointment.

The Company also acts as **Agent for Executors and Trustees,** and for the transaction of all financial business; invests money, at best rates, in first mortgage and other securities; issues and countersigns bonds and debentures; collects rents, interest dividends, &c. It obviates the need of security for Administrations, and relieves individuals from responsibility as well as from onerous duties.

The services of Solicitors who bring estates or business to the Company are retained. All business entrusted to the Company will be economically and promptly attended to.

DECISIONS IN COMMERCIAL LAW

ECKERSLEY V. MERSEY DOCKS AND HARBOR BOARD.—In the case of an agreement to refer to a named arbitrator, even though he be a servant of one of the parties to the agreement, in order to disqualify the arbitrator from acting, it is necessary to show at least a probability that he will be biased in favor of one party. The mere fact that in a particular contract he will be required to arbitrate on questions involving his own professional skill, is not enough to disqualify him, according to the English Court of Appeal

In re WEST LONDON AND GENERAL PERMANENT BUILDING SOCIETY; ALSOP'S CASE.—Advanced members of a building society having a right to redeem their securities on payment of all subscriptions, fines and other sums of money payable according to the rules of the society, are not thereby relieved from their liability to contribute as members on a winding-up to the payment of outside debts of the society. Advanced and unadvanced members are equally liable in respect of such outside debts, and says Wright, J., neither advanced nor unadvanced members can be held personally liable for moneys borrowed by the society from depositors beyond the amounts payable on their shares under a society's rules and tables, even though such borrowing is under a limited power, and for the purposes of the society. It is *ultra vires* for such a society to do more than bind the assets for borrowed moneys.

NASSAU STEAM PRESS V. TYLER AND OTHERS.—When a bill of exchange is accepted on behalf of a limited company by persons authorized so to do, the name of the company must be stated accurately, otherwise the persons accepting it, if the company do not pay, will be personally liable under the Companies Act.

NATIONAL DWELLINGS SOCIETY V. SYKES.—When a meeting is called for a particular purpose, the chairman cannot, after the business is opened, dissolve the meeting at his pleasure. If he wrongfully leaves the chair, those present can appoint a new chairman and continue the business of the meeting, according to Judges Mathew and Cane.

HOLLINRAKE V. TRUSWELL.—It was decided by the English Court of Appeal that a sleeve chart, which consists of a piece of cardboard in the shape of a sleeve with certain curved lines and figures printed upon it, is not the subject of a copyright.

CADOGAN V. LYRIC THEATRE.—Although a judgment creditor is entitled to have a receiver appointed, by way of equitable execution, of land in which the judgment debtor has only an equitable interest, the English Court of Appeal finds that he is not entitled to take, through such receiver, the earnings of a business carried on by the judgment debtor upon the land.

IND, COOPER & CO (LTD.) V. KIDD.—A receiver appointed under an order made by way of equitable execution, directing that moneys received by him shall be paid to the judgment creditor, must make his payments to the judgment creditor direct. The solicitor in the action has no authority as such to receive the payments on behalf of his client. If payment is made to the solicitor, and the money is misappropriated, Judges Mathew and Day hold that the receiver cannot credit himself with the amount in his accounts.

HAMILTON V. VAUGHAN-SHERRIN ELECTRICAL ENGINEERING COMPANY (LIMITED).—Shares in a company were, on the application of an infant, and payment in respect thereof, allotted to her, and her name was placed on the register of members. She received no dividend or any other benefit from the company. She afterwards repudiated the contract and her name was removed from the register. Sterling, J., decided that the mere fact that the shares had been allotted to the infant, and that her name had stood for a certain time on the company's register of members, was not a sufficient advantage to the infant to constitute valuable consideration for the money paid by her for the shares, that there was a total failure of consideration, and that the infant was therefore entitled to the repayment of the money.

—"Any way," said the defeated candidate, "I've got one satisfaction. I can now wear patent leather shoes and part my hair in the middle without losing 300 or 400 votes on account of it."

—For half a century the quantity of China tea imported to this country has not been so small as this season, the decrease on last year being 13,400,000 lbs., or nearly one-third. The deficiency has been more than made up by heavy consignments from India and Ceylon, especially the former. The United States continue to increase their imports of tea from China; this season they have taken 11,000,000 lbs. more than last. For the first time, too, Germany this year imported tea from China in her own bottoms to the extent of 60,000 chests; hitherto British steamers have brought their tea to Bremen and Hamburg.

There's Style about this fastener for the back of a Brace. It is Small Neat Durable. Can't Break Away. And unlike the multitude of big tin Clasps that are objectionable to the wearer who don't want his back covered with metal. It's a seller every time.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

NEW engines are being put into the steamer "Lady of the Lake," plying on Lake Memphremagog.

THE propeller "Persia" has been sold to Mr. James Carruthers, grain merchant, of Toronto, for $9,700. The flouring mills brought $34,800.

A TELEGRAM from Fredericton to the St. John *Sun* says that the Bank of Nova Scotia is sending W. E. Stavert, manager of the Fredericton branch, to St. Johns, Nfld.

THE Chatham *Banner* hears that a good flow of oil was struck last week in the new well now being drilled by Chas. Simmons, on his property south of the C.P.R. station. The drill is 400 feet down.

A KINDLY form of Christmas present and advertisement combined is that resorted to by the Macfarlane Milling Company, of Sherbrooke, which gave away to each Christmas caller a sample loaf of bread made from their particular brand of flour.

THE People's Mills at Guelph have shut down a while this week, after running week night and week day for months. Mr. Goldie says they turned out 39,000 barrels in September, October and November last, and by the end of the year will have made probably 50,000 barrels.

Mercantile Summary.

THE insolvent estate of Wm. Jamieson, of the Eastman Kindling Wood Company, at Magog, Que., is being settled, the creditors having accepted 30c. on the dollar.

WHEN, with his persuasive smile, Mr. Thomas Kerr stops you on the street, in the holiday season, and puts his hand in his pocket, you may expect that he is about to give you one of those neat little diaries issued by the Standard Life Assurance Company annually for a number of years.

MR. GEO. A. STIMSON, debenture broker of this city, has just purchased the $15,000 County of Elgin bonds. These debentures were bearing 5 per cent. interest and repayable in ten annual instalments, and were issued to defray the cost of building a bridge. We understand the premium paid was a large one.

AT Sherbrooke, on Thursday of last week, a meeting of the creditors, shareholders and contributors of the Royal Pulp and Paper Company was held at the Court House, before the Hon. Mr. Justice Brooks. It was decided to wind up the affairs of the company, and F. P. Buck was appointed liquidator, with all the powers conferred upon that officer by the Act. The Sherbrooke *Gazette* understands that the operations of the works will not be suspended, however, in the least; orders are taken and the manufacture will go on as usual.

Mercantile Summary.

THE Economical Mutual Fire Insurance Company, of Berlin, sends out a distinctly printed calendar for 1895. A handy publication to have beside one is the Philadelphia *Record* Almanac

THE Massey-Harris Company's Christmas card represents Young Canada, with his feet on Hudson's Bay, looking over the North Pole at Christmas time, to see what the people are doing on the other side of the world. Reversing the card one perceives what Y. C. discovered, namely, that the Australians are gathering their grain by means of the Massey-Harris harvesters.

THE inhabitants of Tilbury Centre, situated on the Canada Southern Railway, not far from Essex Centre station, have been making additions and improvements to their village lately. The new buildings include two business blocks with several private residences. The James Stewart Block, erected by James Stewart, banker, one of the pioneers of the village, contains his new banking offices, with plate glass window and handsomely finished offices, with a strong safe. Also the Anderson & Kay block of new stores. W. C. Crawford, for many years a leading merchant and manufacturer there, contemplates adding additions to his store and manufacturing premises at an early date. His residence is a fine one. The new Roman Catholic Church in this village cost $30,000.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

WITH an offer of 60 cents in the dollar Laughlin McLean, a tailor at Montague Bridge, P.E.I., has approached his creditors. He proposes to make payments spread over a year. His liabilities are $2,807, a fair proportion being to Montreal houses.

BROWN, WAITE & Co., general storekeepers who moved from Port Perry to Smith's Falls in 1893, are reported to have assigned. They obtained an extension last May, when their liabilities were put at about $15,000, with an apparent surplus of about $5,000.

A JOINT stock boot and shoe manufacturing company is being organized in Levis, Que., under the style of "The Standard Boot Company." The proposed capital is $25,000, and the charter members are W. A. Marsh, Amos Campbell, James Brodie, Robert Brodie and J. Fresque.

—IT is proposed to organize a joint stock company to take over the piano manufacturing business of T. F. G. Foisy, Montreal. The style of the company will be the "T. F. G. Foisy Piano Mfg. Co.," with a capital stock of $300,000. The applicants for charter are Messrs. T. F. G. Foisy, T. Nadeau, C. Desmarteau, J. J. Beauchamp and C. P. Bennett.

A DEMAND of assignment has been made upon the Canada Plating Company, Montreal, whose embarrassment we noted several weeks ago. Mr. Babson, one of the partners, is away, and Mr. Gray, the second partner, has made assignment of his interest. The business will be wound up.——Pierre Etienne, a tailor in the same city, has also been asked to assign. He has been only a brief period in business, and the liabilities are small.——A. P. Bald, an east end grain dealer, is reported in bad shape, having liabilities of about $2,000, and few assets to provide for the same.

A. P. FONTAINE, the Rougemont, Que., storekeeper, reported failed last week, is offering his creditors 40 cents on the dollar, cash, the liabilities being $6,762.——M. Desrochers, a confectioner at Sherbrooke, Que., makes a similar proposition. In his case the liabilities are small.——E. H. René, of St. Hyacinthe, formerly a clerk, and who began business about May last, is already offering 40 per cent. cash, on liabilities of about $3,000.——Boilly & Claveau, general merchants at Chicoutimi, whose estate went into the assignee's hands several weeks ago, are now trying to arrange a compromise. They owe $11,600.

Up to 9th January next the clerk of the town of Simcoe will receive tenders for the purchase of $4,560 worth of the local improvement debentures of that town.

An Ottawa shoe retailer, C. S. Spratt, has assigned. He was formerly of the firm of Spratt & Erskine, which business was closed up last spring, as Mr. Erskine, the capitalist, did not find it profitable. Mr. Spratt then opened up on his own account, but has made short running of it.

Incorporation is being sought for La Compagnie de Prets Mobiliers, of Montreal, with a capital stock of $100,000. The applicants for charter are Messrs. J. M. Fortier, cigar manufacturer; G. DeSerres, accountant; Joseph Martineau, farmer; J. M. Wilson, merchant, and P. C. Martineau, advocate.

Messrs. J. & T. Bell, wholesale manufacturers of fine footwear in Montreal, in accordance with their usual custom, on Christmas eve distributed about 100 turkeys to their factory hands, each married man receiving one, whilst the unmarried men and girls in the factory and the wareroom, and the office clerks, received other appropriate presents.

A demand having been served upon C. J. McIntyre & Co., wholesale small wares, etc., Montreal, they have fyled consent to assign. Mr. McIntyre had been some 25 years with the old established house of Hodgson, Sumner & Co., latterly as buyer, and only started business on his own account last May. The liabilities, direct and indirect, are stated at about $30,000.

The Canning Woolen Mills Co., owned by Wilcox & McCosh, at Canning, Ont., are in difficulties. Their principal manufacture is blankets, and their output of these became too large for their market, consequently they shut down a short time ago. The firm was estimated to be worth $10,000, and they owe considerably more than this sum, principally due Hamilton firms.

The Dudswell correspondent of the Sherbrooke *Gazette*, after enumerating last week a lot of things that every one thereabout knows, suddenly bursts out: "What we don't know and what we want to know is—when are we going to have snow? Business is almost at a standstill. Railroad ties are getting seasoned and cracked; my hemlock bark is becoming warped in the sun; we shall refuse to believe in the sanity of the old weather prophet; we shall doubt the existence of the Canadian winter."

Tenders are being sought by the Canada Paper Co. looking towards a new dam at their works at Windsor Mills, Que. The new dam is to give a motive force of between 3,000 and 4,000 horse power. Not only this, but we learn from the *American Paper Trade* that this power is to be utilized to establish an electric plant, from which electricity will be supplied to the town of Windsor Mills, and to the works of the company. The outlay involved by the improvements contemplated by the Canada Paper Co. will be in the vicinity of $200,000 in all.

According to a St. John despatch of Christmas eve, the Provincial Government have divided the offices of registrar of deeds and probates for that city and county and given the registry of deeds to the son of the late incumbent, J. Vernon McLellan, and the probates to John McMillan, of the well-known book and stationery firm of J. McMillan & Co. An ex. M.P., Mr. C. N. Skinner, has been appointed recorder of St. John, vice J. Allen Jack, resigned on account of illness. Trueman, the reporter of the Supreme Court, becomes Judge of Probate.

About two years ago Capt. Wm. Hall & Son, vessel owners and dealers in lumber, Toronto, became involved through supplying builders, and were obliged to take over a number of properties to protect, as they supposed, their interests. Now they have placed their estate in the hands of E. R. C. Clarkson. The same gentleman has charge of the affairs of Teetzel & Smith, tailors here. In June, 1893, they succeeded B. E. Teetzel & Co., and at that time they had $1,000 cash. Their statement to-day shows liabilities of $3,400, and nominal assets of a similar amount.

The mortgagees are in possession of George Hamilton's hardware store at Deloraine, Man. ——An offer of compromise is made by A. W. Bleasdell, druggist at Fort McLeod. During the past year his creditors gave him an extension of time. Failing in this arrangement, creditors are now asked to accept 50 per cent. of their claims.——In June, 1893, the wholesale crockery firm of Porter & Roland, in Winnipeg, was dissolved. The latter retired with $5,000 and opened a store at St. Boniface, just across the river. His business habits being somewhat inattentive, he steadily went behind in his pay ments, and now assigns.

A despatch from far eastern Quebec states that the outlook for the winter on the North Shore beyond Tadousac is especially gloomy. The Gibson mills have temporarily stopped, and those of the Messrs. Price, at Sault au Cochon, have been finally closed with no prospect of their reopening. "Two villages have been to tally abandoned by their inhabitants, and generally the winter food supply is reported scarce, in some instances barely more than a stock of potatoes, owing in part to the poor hunting season."

One of those infrequent events that startle a community was the finding, on Friday afternoon last, the lifeless body of James S. Bullick, manufacturer's agent, in his office, Mechanics' Institute building, Montreal, killed by a pistol shot, the pistol still in his dead hand. That he destroyed himself intentionally is scarce to be believed by those who knew his cheery disposition. Indeed, among the very last things he had planned to do was to raise a Christmas subscription for the janitor of the building. The jury found that his death was caused by an accidental discharge of the pistol. The burial took place on Sunday.

A little more than twelve months since, A. J. Durocher quitted the farm, opened a general store, and continued buying grain at Belle River. Knowing but little, if anything, about business, and lacking prudence in grain buying, it will not be a surprise to learn that the $5,000 he was supposed to be worth has disappeared, and that he has assigned.——An extension of time is asked from the creditors of Mrs. C. A. Himman, milliner in Hamilton. She owes about $5,000, and her stock is nominally worth nearly $8,000 ——William Mitchell, carriage maker at Palmerston, assigns.——An assignment is also made by J. F. Bullard, blacksmith, Winthrop.

The prices of commodities, according to the Index Number of the London *Economist*, continue to fall. That is, the average market value of a number of articles whose price at certain dates is being recorded by the journal named, and is expressed by an aggregate or "Index Number," shows a further fall this quarter. What the movement has been since October last year is shown in the following statement:—

	Index Number
1894, December 1	1921
" October 1	1952
" July 1	1974
" April 1	2021
" January 1	2082
1893, October 1	2133

Of the twenty-two staple commodities the combined fluctuations of which are represented by the Index Number, eleven have fallen in price since the beginning of October, seven have

risen, and four show no change. The decline is most marked in cotton, sugar, tin, indigo, and wool, while a rise is recorded in timber, wheat, and butchers' meat.

TWELVE years ago Martin Somers, a British Army pensioner, opened a hotel in Sullivan. From there he went to Chatsworth, thence to Eugenia. At present he is located at Flesherton, where he and his wife make an assignment ——Foster & Bro., for a number of years dealers in hats, caps, etc., in St. Catharines, are in trouble. They probably knew more about horseflesh (one of the brothers keeps a livery) than they did about hats, and their assignment in both concerns is the less surprising.——The bailiff is in possession of the hotel premises of Edwin Gordon, in Hamilton, and he is reported to have left a number of creditors in the lurch. ——A bailiff has also seized the boot and shoe stock of D. Lowry, and his precise location is not now known.——No less than seven farmers have assigned during the week in this province.

THE AUSTRALIAN FINANCIAL CRISIS.

One uses no exaggerated language in saying that the address delivered last week before the Ontario Institute of Accountants by Mr. Wilton C. Eddis, late district inspector of the Australian Joint Stock Bank, Sydney, was a rare treat to such as wished to be informed in a concise manner of the causes of the Australian financial crisis of 1893. It was quickly made known on the evening in question that the speaker had something worth while to say, and he said it in a way that was not only instructive but entertaining. Mushroom growth, a land boom and overgrown land companies, lending on lands by banks, absentee landlords, excessive rates for money, in fact lavish borrowing, lavish lending or overtrading, with the evils that follow in their train—these brought about the Australian troubles. Overborrowing was, in fact, in the opinion of the speaker, at the root of the disasters of that island continent. But in the midst of it all, said he, some persons wondered if the feverish activity could last, "if, in the new lands of the Antipodes, the old traditions could be reversed, and that there could be any real solidity without hard work in this wonderful growth." After an introductory word of admiration for the banking system of Canada and for the manner in which her banks have been conducted, Mr. Eddis went on to describe the crisis of 1893. the extracts we have made from this instructive address will be found on page 947.

ANSWERS TO CORRESPONDENTS.

BANK CLERK, Winnipeg.—There is a movement in the United States to abolish days of grace on notes. Several States, notably Wisconsin and Vermont, have abolished them already. In New York State they are to be done away with after 1st January next

S.S., St. Thomas.—We do not answer such questions in this column. Apply to a Montreal notary or broker.

J.S.B., Stratford.—(1) Write to the advertising department. (2) Yours is not an exceptional case. It is the same everywhere. People should spend less money because they are making less. You will not improve your position by going away.

H. McL.—It is probably true that we do not think enough about our own economies and individual responsibilities in times of financial distress. In Charles Dudley Warner's latest story, "The Golden House," in its commercial aspects his best, the general financial condition is made sponsor for the laxity or speculative folly of many a man. "Some attributed it [the general financial condition] to want of confidence, others to the tariff, others to the action of this or that political party, others to overproduction, others to silver, others to English capitalists withdrawing their investments. It could all be accounted for without referring to the fact that most of the individual sufferers, like Jack Delancey, *owed more than they could pay*," Again, with respect to the monetary solidarity of the city, "No one flies a kite in Wall street that some one in Rivington street does not in consequence have to go without his dinner."

—She held herself so still to catch what he was muttering in his dreams that she hardly breathed. "Mary——" "That's me," she thought to herself, as there was no occasion for her to think of anyone else. "Mary must have that new wrap, even though I do have to take it out of the bookkeeper's salary. It is too bad, too. He is the only support of a widowed mother." All was still again. She lay there and thought some more. "He's just as mean as he can be," she murmured. "I don't believe he was asleep at all."—*Indianapolis Journal*

THE SITUATION.

Newfoundland's condition proves to be even more deplorable than was conveyed by the bare announcement of the failure of the only two banks in the island. The collapse is complete, and for the moment the inhabitants are reduced to a state of barter. A parallel to this condition of things might be found at one period in the history of Buffalo, when the city was left without any bank facilities, as a consequence of too great expansion of bank paper. But there is a great difference between the misfortune of a single city and that of a whole province. The difficulty of recuperation of the latter is much the greater. It is only too evident that in Newfoundland some commercial houses which have failed had for some time been insolvent. They dragged the banks down with them, and, though the latter failed first, the order would have been reversed if the banks had not propped up the insolvent houses to their own ruin. The fact is the insolvent traders had the banks by the throat; they controlled the direction, and helped themselves so long as there was anything to be got. The Island Government had yielded to the temptation to spend inordinate sums on public improvements, which bring no adequate return. The temptation is one to which new countries too frequently yield, and when they do so they cannot escape the economic penalty. The Newfoundland fishery, the chief reliance of the people, has been partially neglected. The population is composed of heterogeneous elements, always at war with one another. The politicians take color from the population, and appear to the outside world as unreasonably contentious. When a full survey of the whole situation is made, Canadians cannot regret that the efforts to unite the island with this country were not successful. Every year there is wide-spread poverty in remote parts of the island; this year the suffering will be unusually intensified, and the claims of humanity may make themselves heard outside of the island.

One lesson is taught by Tammany exposures in New York, and the recent municipal exposures in Toronto: corruption chiefly fastens on contracting corporations which have dealings with the city. If $30,000 was squeezed out of the Street Railway Company, when it made its contract with the city, no such plunder could have been got out of the railway if it had remained in control of the corporation. The same is true of lighting, in which, besides, foul play has been sworn to. In this particular, the advantages are in favor of municipal control. But it does not follow that a city can advantageously undertake its own lighting, in competition with existing plant in the hands of companies. Experience, on the whole, is against such competition. Lighting is best as a monopoly, and it is best of all when the monopoly is municipal. But it is not always easy or possible to make the change when a beginning has been made by a contract with a company. All that can be said in such a case is that no fair opportunity to get lighting and water services under control of a municipality should be lost. Municipal control does not put an end to all opportunities of corruption. There would still be contracts for plant and supplies with outside parties, but they would be on a diminished scale; so much so, that Tammany knows its best opportunity is with great outside corporations rendering extensive services to the city. There is something more important than the comparative absence of opportunity to do wrong, and that is to select men for aldermen who can be relied upon to do right.

By what authority is not stated, but the Newfoundland suspended banks refuse to take their own notes in payment of debts due to them. The opposite of this is the line of conduct generally followed in such cases; it has, we believe, always been followed in Canada. It is true that when a bank cannot pay all its debts, full payment of notes presented is a discrimination between different classes of creditors, in favor of note-holders and against depositors. When the notes are not made a first lien on the assets, as they may properly be, it may be a question whether note-holders should be paid in full when their creditors cannot be, and would perhaps in that case get nothing. It is thought that the legislature will compel the banks to take the notes for debts due to them. Under the circumstances, this course would be highly objectionable. Some of the directors of one of these banks may be open to the charge of wrecking the bank; and, having effected its ruin, they should not now be authorized to profit by the depreciation of the notes which they have themselves produced. It is, at the same time, hard on innocent creditors that they cannot pay their debts due to the bank in its own notes.

A substitute for the bank bill originally promoted by Secretary Carlisle, at Washington, has come from the same source. The changes comprise: The deposit of currency certificates, as a basis of circulation, as well as Treasury notes; permission to the State banks to deposit legal tender notes, in the same way as the National banks; substitutes a one-fourth of a cent. tax for each half-year, as a means of replenishing the safety fund when it becomes impaired; the comptroller to designate places for the redemption of the National bank notes, other places besides the office of the bank; acceptance of the new plan of circulation to be optional instead of compulsory on the National banks; the notes of failed banks to bear interest after presentation for payment. Under these changes State banks would have the same right to issue notes as the National banks. It must at least be doubtful whether Congress can confer any such power on the State banks. The capital of the State banks is about $275,000,000. Permission to them to issue notes to the amount of 75 per cent. of their capital would produce an enormous expansion of currency. For the last 30 years, only one-third of one per cent. of the capital of the National banks has been involved in failures. The appointment of additional places for the redemption of bank notes is intended to facilitate conversion. The existing redemption agency of the National banks is held by Mr,

Dodsworth, by whom the committee was addressed, to have been a "lamentable failure." His estimate is that only about one-fifth of the circulation is presented for redemption each year; whereas, under the Suffolk Bank system of redemption, 37 years ago, in New England alone, $40,000,000 were redeemed in a year. He might have added that, in 1850, all the notes of the country banks in New England were redeemed once every five or six weeks. But the different circumstances go far to account for the difference. The Suffolk Bank of Boston used to redeem for about 300 country banks, whose notes were largely used as bills of exchange. Fear of the security of these banks used to quicken redemption, a fear which scarcely has any place where the notes are absolutely secured as far as public stocks of the United States can secure them.

BANKING REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of November, which bears date Ottawa, 21st December. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c. We published last week the full statement.

Canadian Bank Statement.

Average amount of specie held during the month	7,748,339	7,830,330
Average Dominion notes held during the month	15,164,916	15,508,194
Greatest amount notes in circulation during month	35,640,491	35,546,324
Loans to directors or their firms	7,978,669	8,045,951

Though the bank statement presented this week is not the last for this year, it may be well, as this will be the last opportunity for reviewing the course of events during the year, to take a glance at some of them.

The first thing to be remarked is, the comparative evenness and quietude which has marked the operations of the banks during the whole of the year. Yet this, after all, is no new thing. For though Canada occupies a portion of the same continent with our neighbors of the United States, and many of the conditions of business must perforce be the same, there is yet a most remarkable contrast between the financial conditions of the two countries.

In the one, there are violent alternations between extreme pressure and extreme plentifulness, between exceptionally high rates for money, and rates so low as to be hardly worth taking at all; also between exceptionally low rates at financial centres, and exceptionally high ones in remote districts of the interior. Indeed, during the last eighteen months there have been seen even more violent contrasts than the above, viz., between a time at which money could not be had at any price—no matter what rate was offered—and another, occurring within a few months, when no one seemed to want money at all, no matter at how low the rate at which it was offered.

From all these embarrassments Canada has been remarkably free for a long series of years; and the contrast has been particularly noticeable during the last year. No solvent man of business in Canada has been subjected to embarrassment by reason of stoppage of discounts. No higher rates have been charged for such as were given.

The demand for money for legitimate purposes has, on the whole, gone steadily on; and although the amount of discounts at present in the aggregate is somewhat less than last year, the reduction is a mere trifle, only about one-fiftieth part of the total.

Deposits, instead of fluctuating violently, have exhibited a most steady and continuous movement upward from year to year. This we have frequently pointed out. The increase during the year has been from $250,000,000 to $266,000,000—a very considerable part of the increase belonging to the people of the country in their private and trading capacity and exhibiting a steady increase in the savings of the community.

It is perfectly well known that the rate of discount in remote districts differs by only one or two per cent. from that current in financial centres. For this remarkable contrast three sufficient reasons are given:—

The first: That our system of bank branches, permeating as it does all parts of the Dominion, even the remotest, tends to equalize the value of borrowed money.

Second: Our thoroughly digested and well-considered banking law, the fruit of forty years continuous experience and periodical emendation.

And third: Our system of bank circulation, which is at once elastic and safe.

A few words with regard to the last may well be noted at present. It is sometimes said that time brings about most unexpected changes; and certainly one of the most extraordinary changes of the time is that which has taken place with regard to Canadian bank circulation. It is little more than twenty-five years since the National Bank system of circulation of the United States was supposed to be the very acme of perfection; and a determined effort was made by the Canadian Government of the day to assimilate the system of Canada to it.

It is well known that that attempt met with a resistance equally determined on the part of some of the banks. These, though small individually, were able, when combined, to wield such an amount of influence as compelled the strong Government of the time to withdraw the obnoxious measure, although they had the strenuous support of the largest banks in the country.

The stand that was taken by some of these smaller banks was ridiculed at the time, but it is a most remarkable vindication of their wisdom and foresight that the American system, then so extolled, has been the occasion of such embarrassment during the last few years that it is universally felt that a remedy must be sought. And the remedy, strange to say, has been seen in the practical adoption of the Canadian system in its main and essential features.

There probably never was a more remarkable justification of a course of action, which, misunderstood as it was at the time, has vindicated itself by the logic of events.

This, however, is not the only vindication which the system of Canada has received. It is but a few years since a prominent Australian banker, after visiting Canada, took occasion to ridicule our slow methods, and what seemed to him to be the crudities of our Banking Act. At that time the Australian banks were at the very height of a long season of apparent prosperity, all of them paying dividends of twelve to twenty per cent., and laying themselves out for increase of capital and business.

But, since then, a perfect whirlwind of financial disaster has swept over Australia. And although most energetic measures were taken to avert further disaster by converting large amounts of deposits into preference stock, it now appears that business has dwindled to such proportions that it is in some cases hardly possible to earn the amount required to pay the interest. It is not for us, by any means, to be glad at our neighbor's misfortunes; but it is for us to note carefully the causes leading up to such disasters, and to profit by the lesson they afford us. And one of the things most undoubtedly to be noted is that the Australian colonies have never had, as Canada has, the advantage of a good, well-considered general banking law. It is not too much to say that had such a law as that of Canada been in force during the last few years, such a revulsion as has overtaken that country would never have happened.

But the same lesson may be applied nearer home. The Australian experience has been repeated in our neighboring colony of Newfoundland. A tremendous financial cataclysm developed suddenly a few weeks ago, a "thunderbolt out of a clear sky." The only two banks in the colony failed, many merchants failed too. The only currency in the Island became worthless, all business came to a standstill, and almost all employment was stopped. From this condition Newfoundland is only just lifting up her head by the assistance of some of the banks of Canada. And again it is not too much to say that if these banks had been subject to the restrictions of our banking law and their circulation had been emitted in accordance with its provisions, there never would have been a banking crisis at all. Mercantile houses now prostrate would have been standing. The circulating notes of the colony would have been circulating still, and numbers now out of employment would have been going on with their avocations as usual.

In writing this we of course have no reference to politics whatever. Whether or not it is desirable for Newfoundland to join the Confederation is a matter we don't discuss, but what we do say is that had the banking of the colony been under the Canadian banking law, recent disasters would in all probability never have darkened their financial horizon.

Canada is just about entering on a New Year. Let us do it with all hopefulness; wisely using the present, learning from the past and trusting in the future; so shall our path be one of solid and satisfactory advancement.

Comparative figures are appended as usual:

ABSTRACT OF BANK RETURNS

30th November, 1893 (In thousands.)

Description	Banks in Quebec	Banks in Ontario	Banks in other Prov's	Total

THE MUNICIPAL INVESTIGATION.

Practically the inquiry into municipal corruption, in Toronto, was concluded on Wednesday, when the counsel who acted for the city asked Judge Macdougall to find against nine different persons, aldermen, ex-aldermen, contractors with the city, and go-betweens. The Judge will report on the case, as far as it has gone, without returning his authority to the city, and, if no more evidence be offered, he will, in a short time, close the case. Mr. Nesbitt and his colleague, Mr. Grier, have no more evidence to offer. It is probable that some prosecutions will follow. The evidence has disclosed as a fact what before existed as a surmise; and Toronto must confess with shame that her municipal council is not free from corruption. The evil extends beyond the limits of the council and affects certain corporations which have dealings with the city. But it is satisfactory to know that the corruption is not general; that there are corporations which tendered for contracts who refused to yield to solicitations openly made by aldermen for bribes. This is the bright spot on dark ground. The law under which the examination was made is new and exceptional in character, and though the proceedings were highly inquisitory, it does not appear that any one was obliged to inculpate himself on oath. The proceedings were nominally public, but some names of inculpated persons were secretly handed to the Judge. This may be justifiable, but the ground of justification ought to be clearly stated. It is difficult to believe that some of the sums paid were not in part redistributed, and the investigation must be regarded as not having got at the bottom of the matter. Side lights were thrown on what probably was corrupt tampering with the

press, but as this did not come within the scope of the enquiry, names and amounts have to be surmised. The enquiry will be of little use if the exposure does not tend to prevent a repetition of the offence, which the best citizens deeply deplore.

THE FRUGAL AND THE LAVISH FARMER.

How is it, that selecting two men of like stations in life, with similar incomes, practically the same families, the one will save money year by year, while the other will be perpetually hard up, and as like as not in debt? It is a matter of management, most people will say, and so it is, but not of mere financial management alone. There are varieties of taste and differences of view as to what things are or are not necessaries of life. One man of plain tastes and no social aspirations gets on without parties, without dress clothes, almost without books, but keeps his life insured and has money in the bank. Another, living alongside of the first, calls him a clod, refuses to imitate his frugal habits, declaring that money was intended to be spent—not hoarded. And so the second of these men spends his income fully, and gets out of it what seems to satisfy him. Both are honest, according to their lights, but if both live to reach old age the one is likely to endure penury while the other will be increasingly comfortable—as far as money can make him so.

A writer in the *Maritime Grocer* describes two townships in Eastern Ontario that run alongside two which are very stony and difficult to cultivate. A gentleman who knows every family in those parts says that in one section most of the farms are under mortgage, while in the other very few are incumbered, and the money advanced to the farmers in the former section has nearly all been supplied from their neighbors. The natural supposition would be that the mortgages are held by the farmers of the fertile section, but such is not the case. The farmers owning the good lands owe the money, while those on the rocky ground are the creditors.

What is the explanation of this condition of things, which we may say exists, in the experience of mortgage lenders, in more localities than the one in question? The Eastern writer explains it thus: The farmers who are in debt live near to a city; they and their families are ambitious of keeping up a style of living and of dressing after city fashions; their houses are large, substantially built and expensively furnished; they have domestic servants; they have a stylish carriage with a good team; they give entertainments, and compete with each other in making a display on their tables of silverware and costly services. On the other hand, the farmers on the poor land have to work very hard, and to utilize every member of the family as a worker. They are not tempted to copy city style, as they have no time for anything but work; they live in houses by their own labor; hence they set their whole minds on making and saving money, which they do so successfully that they have put their stylish neighbors under obligations to them for borrowed money. The debt-burthened drive to church in a costly buggy, behind a fast team, while their creditors come in the farm wagon.

Now while we do not consider it a desirable thing to "set one's whole mind on making and saving money;" while it is, in the words of the late Sir John Thompson, not an ideal life for a man to become "a fellow who is beastly rich," there is a certain proportion of expenditure to income to be observed by all who would attain material comfort in later years. In the case of the farmer there must be added to the intelligent industry which makes money the prudent economy which saves money. Neither a farmer nor a man in other employments can expect to prosper if he spends on pianos, dancing lessons, jewellery, or fast horses, the money that should by good husbandry go to pay for his land or his dwelling.

ADDITIONAL MEANS OF FIRE PROTECTION.

The fire insurance outlook is giving the British insurance companies some anxiety. Not only have they found the results of the last year or two in America untoward, but the hopes they had built upon the comparative immunity from fires which the Old Country had enjoyed for a month or two towards the end of this year, have been rudely shattered. There has been quite recently a series of what are termed mercantile fires of a disastrous character in manufacturing districts—the lace market fire in Nottingham, a large fire at Bermondsey, and a still more disastrous one in the Minories, London. These were all in districts where the spread of fire is most to be dreaded, because of the expensive (to an underwriter) character of the surroundings.

An alarming feature of all these fires is stated in the London *Review* to have been that "they all seem to have got beyond control of the fire brigades and to have spread to contiguous property almost without let or hindrance." At Nottingham, we are told, the fire brigade attacked the flames with promptitude and vigor, and the great destruction there was no fault of theirs. But the efforts of the London fire brigade in the other fires mentioned were lamentably inefficient, and "their failure in these recent instances is responsible for the increasing dissatisfaction with which they are being regarded in insurance circles. The fire managers are beginning to lose confidence in them."

There is talk of appealing to the London County Council for such reform in the administration of the Metropolitan Fire Brigade as will afford proper protection to property. But the council is accused of having shown hostility to the fire underwriters, and so not much hope is held out in that quarter. What, then, shall the underwriters do to minimize the risk of extensive conflagrations in London, since they cannot depend upon engines or firemen? There is, says the *Review*, one appliance in the market deserving of attention as a preserver of buildings from the fire risk of adjacent property. This is the application of what are termed fire-drenchers to the exterior of buildings. Fire sprinklers for the interior of factories have got beyond the experimental stage; and, in the opinion of some insurance people, fire-drenchers may develop into an important means of exterior protection.

At the premises of the Sanitary Woolen Company, in Milton street, E.C., a novel system has been adopted. What is known as the *water-curtain*, which consists of a single range of pipes running along the cornice or eaves of a building with open sprinkler heads fixed at intervals, is familiar in some parts of England and the States. Saw mills in Canada have been fitted with them. But at the warehouse in question something more elaborate has been applied, namely, window and roof drenchers. Instead of a stream of water pouring down from the cornice, there is a drencher outside every window opening on each floor, so that in case of a fire attacking from an opposite building the water spray is concentrated on the most vulnerable points. Besides the window and door protection, the roof and skylights are covered by drenchers, lines of pipe being laid along the slope and flat of the roof. Different lines are controlled by stop-valves, so that the water may be turned on only the side of the building attacked. The whole is supplied by a distinct four-inch connection from the water

main. The system may well be commended to the attention of insurance men.

BENEFIT SOCIETIES IN QUEBEC.

We have already printed the testimony of one of the managers of an Ontario benefit society to the effect that through the inexperience or sanguine folly of its earliest administrators, the society in question had begun paying to its beneficiaries sums by way of funeral or other benefits entirely out of proportion to its resources. Later, the rates of these had been reduced, but still the organization could not carry out even its modified promises, and the best thing which could be done was done—its winding up was resolved upon. The action of the Province of Ontario in taking steps during late years to supervise by officers of the Government societies of the kind, has doubtless led members of the Legislature of the sister Province of Quebec to give attention to the disappointment and waste of money that arise through launching schemes of the kind on an insufficient basis.

A few days ago the necessity of regulating more efficiently the mutual benefit and insurance societies in Quebec was brought to the notice of the Government by Dr. Cartier, the member for St. Hyacinthe. In this petition the Government is requested to exact annual reports from the mutual benefit societies, and the observance of certain restrictions, which would prevent too ambitious organizations from offering advantages which must result in bankruptcy or heavy assessments upon the members after a few years of existence. It is also suggested that special legislation is needed to regulate the associations having their headquarters outside of the Province. Several bills are before the present sitting of the Quebec House asking for incorporation of societies whose object—a praiseworthy one enough—is to pay a benefit to members in misfortune and unable to work, and to aid them to defray funeral expenses on the death of their wives, and also to insure members in a Canadian company against death by accident, with compensation for loss of sight, of a limb, or any other wounds, to an amount of $150 per member and for one year. This is a business which cannot long be carried on by rule of thumb; and the Government will properly take steps to protect the members of such bodies against the unskilful efforts of their would-be protectors, the ignorant projectors.

NEW YEAR RESOLUTIONS.

"No, Charlie, thanks, I've sworn off for thirty days," is what a young fellow was overheard saying on Monday last in a western town, when invited to have a drink. "Oh, you are ahead of time," replied the other, "why didn't you wait till New Year's?" Perhaps the first speaker was wise in his generation. It is noticeable, however, that people who are strangers to such self-denial at other times in the year will make good resolutions on New Year's Day. In this connection, the following paragraph from *Scribner's Magazine*, written for Christmas Day, will be found to have some appropriateness for New Year's Day: "Come to terms with yourself, brother, betimes, and whatever the situation is get on top of it before Christmas. If it is not a fiscal difficulty, but something else; if your conscience pricks you for laziness, or for wasting your time, or for neglecting your family, or for flirting, or for reading too many newspapers, or for gossiping, or for drinking too many cocktails, or for whatever species of misbehavior you may last have fallen into, attend to its admonitions and stop its noise. Gain your Christmas peace of mind, even if you have to seek it with some resolution."

PROGRESS IN MANITOBA.

It chanced that in looking over, the other day, some memorials of a delightful trip to Winnipeg and the Pacific coast in the autumn of 1888, a copy of the Winnipeg *Commercial* was among them. In that issue, after recounting the progress of Manitoba during six past years, the editor goes on to forecast the future after this fashion:

"Those who will see the progress of the coming six years will witness some great changes. The Northwest has only entered upon its period of genuine progress, and the development of many undertakings formerly looked upon as madness will be accomplished during a comparatively few years of our near future. Railways and waterways undreamt of ten years ago will be existing facts, and Northern seas which were once an ice-bound region of terrors to the mariner will be ocean highways between this great new land and the thickly populated lands of the old world."

Evidently the *Commercial* refers, by the phrase "Northern Seas," to the Hudson's Bay, and the traffic with the old world which must come by that vast water route and the expected Hudson's Bay railway. That railway has not come, but other railways have been built in Manitoba, which were unexpected in 1878, or indeed in 1888, and at least one waterway, the new Canadian Sault Ste. Marie Canal. So that Mr. Steen was not altogether out of his reckoning. He was only a little too previous in his prediction.

RULES FOR TRUSTEES

S. V. White, the well-known Wall street operator, in speaking recently in the Northern Reformed Church, Brooklyn, gave some very good advice to those who handle the money of others. Recent heavy bank defalcations in New York city, says *Rhodes' Journal of Banking*, give especial force to his observations. Said Deacon White:

"I would have him make the most careful distinction between meum and tuum, and if he is trustee or executor or acting in any fiduciary capacity where he handles money not his own, I would impress upon him the necessity of keeping separate accounts.

"Here are three golden rules in one; or, rather, it is one golden rule in three divisions: Cash no cheques, lend no money, and do no favors for others with money not your own

"The ideal position for a business man is that which he holds when he can say after the crash comes: 'All mine is gone, but here is thine.'"

NATIONAL BANK OF SCOTLAND, LIMITED.

The report to be submitted at the annual meeting of this bank in Edinburgh on Friday, 21st instant, represents the condition of its affairs as at 1st November last, the close of the financial year. Although it is remarked that by reason of restricted demand and low rates for money, the earnings of the bank are smaller than for a number of years past, they amount to the very comfortable figure of 15¾ per cent. on the capital, making with the balance brought from last year 17¾ per cent. net, available for distribution, of which 15 per cent. was divided But the wonder is lessened that the bank can show such earnings when we observe the extent of its transactions and the proportion borne by its deposits to its capital. With £1,000,000 capital the National Bank of Scotland has deposits of £13,869,000. The gross profits were £292,172 after providing for bad and doubtful debts, unpaid interest, rebate on current bills, &c., and the working expenses £135,344. The note circulation of the bank amounted at the date mentioned to £799,954; its reserve fund is £785,000; the total of its assets approaches seventeen millions sterling (£16,793,733).

MONTREAL BOARD OF TRADE.

The Council of the Montreal Board of Trade has protested, before the Private Bills Committee at Quebec, on Saturday last, against the city's obtaining further borrowing powers. The words of the protest are as under:

"To the repeal of sec. 13 of Act 57 Vic., chap. 56, herein proposed, the Council most earnestly and most strenuously protests. In common with other organizations and citizens generally the Council exerted itself during the last session of the Legislature to obtain the enactment of that amendment to the city charter, deeming then, as now, that it is vitally necessary in the city's interest that the borrowing powers of the corporation be thus limited; and there is no good reason why such limit as is provided by the amendment procured last session should be removed, as now proposed. The Council is of opinion that if that limit to the corporation's borrowing powers be not maintained, the city's credit will be detrimentally affected, and great uneasiness created in the minds of all financially interested in city property."

ST. JOHNS BOARD OF TRADE.

A meeting of the chartered members of the newly-organized Board of Trade of St. Johns, Que., was held on Monday, the 17th instant Officers were elected as under:—

President—J. E. Molleur
Vice-president—Alex. Macdonald
Secretary—H G Perchard
Members of the Council—Arcade Decelles, W. C. Trotter, H St

Mars, E. H. Heward, Ed. Arpin, Geo. H. Wilkinson, Alp. F. Gervais, D. Godin.

Members of the Board of Arbitration—D. Macdonald, C. R. Cousins, William McNulty, M. Guillet, J. A. Lomme, James O'Cain, F. Payette, Joseph Lavoie, C. Meunier, J. W. Racicot, N. J. Gregoire, O. Normandin.

These gentlemen were necessarily selected from the chartered members under the Act respecting the formation of Boards of Trade, and will remain in office till the first annual meeting to be held in March next.

TRUST AND LOAN COMPANY OF CANADA.

An extraordinary general meeting of shareholders of this company was held in London on November 29th, for the purpose of declaring a dividend, the president, Mr. Charles Morrison, in the chair. The statement of the chairman was to the effect that the company declared a dividend at the usual rate of 6 per cent., after doing which the sum of £7,392 was carried forward, an increase of £250. In accordance with the charter, certain sums were credited to the reserve fund, which now amounts to £182,581 10s. 4d., whereas at the beginning of the half-year it was only £179,332 18s. 11. Much stress was laid by the chairman upon what he called the desperate price of wheat, and its effect upon Manitoba borrowers from the company. In that province, he told them, the farmers are realizing that they cannot with profit grow wheat alone, and they are growing barley, and have also gone in for dairying —indeed, for what is called the mixed style of farming—a statement which evoked "hear, hears" from his auditory. He moved that the report and accounts be read and adopted. In answer to Mr. Dawson, who said he had noticed in the report a considerable sum (£20,000) set down as overdue interest, and wished to know whether they had sufficient explanations for that interest being overdue, the chairman declined to express any opinion as to how much of that sum of £20,000 might be lost "It depends on the price of wheat." Resolutions were carried adopting the report and declaring a dividend of 6 per cent.

FOR GENERAL DEALERS.

The man with a past is not in it with the man with a present.

A writing portfolio of black morocco, with lining of buff calf, with compartments for photographs, calling cards, envelopes, paper, is an attractive Christmas present for a person who travels much.

Ladies' travelling bags are more than ever necessary now-a-days, when ladies place their pockets in such awkward parts of their clothing. Pretty silk satchels or shopping bags are fitted with portmonnaies, scent-bottles, mirrors and such necessaries of life, so that a lady may be comfortable.

"Oh, Weather-man!" said Santa Claus,
"I never saw the like;
I think I'll sell my deer and sleigh
And buy myself a 'bike.'"

—*Philadelphia Record.*

Simplicity of life is a virtue, but when it is carried out generally it affects store trade in a variety of ways. When the richer people curtail their spending hundreds and thousands of the poorer feel it at once. The Canadian farmer who does not attend church can economize and get through a whole summer with a suit of cotton overalls, if he be content to live on his farm. Dame Fashion has helped the farmer's wife and daughter also to economize in some respects, because it was cheap and easy to get a cotton waist and wear out the old skirts and underclothes. Something has to be done when eggs only fetch 8 cents or 10 cents, and when wheat and barley are so low.

HARDWARE AND METAL TRADE NOTES.

Sir Frederick Abel, chemical director of the British Government works at Woolwich, recently pointed out that nickel steel offers to the engineer the means of nearly doubling boiler pressure without increasing weight and dimensions.

The leading men of Oshawa are moving in an effort to have the malleable iron works which were burned recently re-established.

The Rathbuns propose building an electric railway from Oshawa to the lake shore at a cost of $100,000.

The Canada Screw Works, Hamilton, closed on Saturday for the annual stock-taking. About half the staff was laid off, and the rest of the men are engaged on the stock. The works will probably be opened again by the new year.

The Gould Coupler Company, whose works at Depew, N.Y., are among the largest of the kind in the world, may establish a branch factory on the Canadian side of the river near Buffalo, to accommodate the Canadian trade.

James Watson & Co., Glasgow, write under date of 7th inst.: "We have to report an active market in Scotch pig iron warrants this week and a large business done. Quotations for shipping brands are rather easier in most cases than they were a week ago."

During the eleven months ending November 30th, over 1,110,000 tons of coal were exported from Cape Breton. Of this total 891,000 were the output of the mines of the Whitney syndicate and 220,000 from the General Mining Association. This was an increase of 77,000 tons for the Whitney syndicate and 30,000 tons for the General Mining Association over the corresponding period last year.

The effects of dear coal on the gas stove industry have been remarkable, and the appliances for cooking and heating by gas are being improved upon and diversified from week to week. All the works in Birmingham and the Midlands engaged upon these classes of produce are in full operation, and now that gas stoves are brought within reach of almost the humblest householder, the demand is likely to be large and expanding for a long time to come.—*Hardware Trade Journal, London, Eng.*

FOR GROCERS AND PROVISION DEALERS.

Warm weather has caused severe depression in the oyster trade

Stocks of Jordan almonds in London, Eng., are reported heavy.

Irish farmers have been experimenting in their potato fields with Canadian imported tubers and report excellent results.

Berlin butchers claim that the council of that town should not increase competition in the meat trade by building more stalls in the market building.

Of the 14,000 boxes Sultana prunes arriving in New York per "Belgravia" last week, about two-thirds of the total quantity was destined to Canadian markets.

Mr. Wm. Rand, of Canning, N.S., who represents the fruit house of Frank Rand, London, England, is in the city arranging for a shipment of apples to the other side. Mr. Rand says the apple crop this year amounted to between 250,000 and 300,000 barrels, and that about 100,000 still remain for shipment from the fertile valley.—*Halifax Echo*

Advices received from Aden to December 22nd report stock of Mocha coffee on hand at 185 bales. The market was reported active, with arrivals light. Quality of new crop very satisfactory so far and active competition looked for during season. Quoted at equal to 25½c ex wharf here for good current grades and 25¾ to 26½c. for superior *N.Y. Journal and Bulletin of Commerce.*

A large baking firm in Halifax who for some time have supplied the army and navy at that port with bread, lost the contract this year. In order to keep their machinery going—for the lost contract called for nearly 1,000 loaves per day—prices have been reduced in order if possible to increase the output. Bread is offered to dealers at 15 cents per dozen loaves less than the former price, or for 3½ cents per loaf of two pounds.

On Friday last a meeting of lobster packers and others interested in the lobster industry was held in Moncton, N.B. Mr. R. A. Chapman, local inspector, was appointed chairman, and Hon. O. J. LeBlanc, of Buctouche, secretary. The lobster regulations were fully discussed by Prof. Prince, Commissioner of Fisheries, Ottawa, Henry O'Leary of Richibucto, W. S. Loggie of Chatham, Tanner of Pictou, Sproul of Digby, O. M. Melanson of Shediac, and others. It is to be hoped that the result of the meeting will be greater unison between the packers and the Departmental authorities.

Some time ago Messrs. Merritt Bros. & Co., says a St. John exchange, sent out to Dominica thirty-three crates for the purpose of packing bananas in. This idea was not carried out, and instead the crates were filled with oranges. The fruit came by the "Taymouth Castle," and this morning, when discharged from the steamer, it was found to be in splendid condition. The crates are a little larger than the ordinary orange box, and are made by means of two ends and slats. This allows the air to freely circulate among the fruit and keeps it sound. The above is the first shipment of oranges in crates to St. John

MUNICIPAL MEMORANDA.

Petrolea is to be lighted by electricity early in January.

Taxable property in London has been increased by $250,700.

The corporation of Montreal has succeeded in renewing the old loan of $1,000,000 for six months at 3½ per cent. net. It was negotiated by the Banque du Peuple.

Mr. J. B. Laing has been appointed to investigate the affairs of Arthur village and report upon them. There appears reason to conclude that the accounts of the municipality are in a state of confusion, a number of the ratepayers having petitioned the Government to have this investigation made.

Some $80,000, it is stated, is due the Brockville authorities for back taxes due since 1886. Lax methods of collection are charged. Mr. Joseph Blakeley has been investigating the town's accounts.

It is stated that the people of Windsor Mills, Que., will, when they have their waterworks completed and when they get their streets lighted by electricity from the Canada Paper Mills dam, apply for incorporation as a town. Let us hope they will at the same time change the name of the place. There are three or four Windsors in the Dominion already, besides Windsor Bridge, Windsor Forks, Windsor Junction, and Windsor Mills.

SHIPPING TONNAGE OF CANADA.

According to the report of the Dominion Minister of Marine, the number and tonnage of steam and sail craft of the various provinces on the 31st December, 1893, was as in the subjoined table. The number of craft of all kinds was 7,113, and their tonnage 912,539 tons. The steamers numbered 1,538, whose burden was 241,172 tons:

	Steam and Sail.		Steam Only.	
	No. of craft.	Net Tonnage.	No. of steamers.	Gross tonnage.
Nova Scotia	2,715	396,263	126	20,689
New Brunswick	1,010	156,086	103	8,805
Quebec.....	1,426	161,121	282	76,089
Ontario	1,370	146,665	762	97,785
P.E. Island	188	20,970	24	6,056
British Columbia ..	315	24,900	183	25,552
Manitoba.....	89	6,534	58	6,196
Total.....	7,113	912,539	1,538	241,172

It may be well to give particulars of the tonnage of some ports. St. John, New Brunswick, leads, with Windsor, Nova Scotia, next, the former possessing 522 craft of 131,909 tons (62 of them steamers), the other 181 with 118,005 tons. Yarmouth, long celebrated for the extent of her shipping, shows a list of 281 ships, schooners, barques, steamers, &c., whose aggregate tonnage is 68,754. Halifax shows 46,659 tons; Parrsboro, 31,399; Lunenburg and Maitland about 29,000 each; Pictou, 15,000; Digby, 11,403; all these in Nova Scotia. Chatham, New Brunswick, 9,757 tons. Montreal has greater tonnage than Quebec has, in the proportion of 82,352 tons to 74,885, and the most of it is steamboat and barge tonnage. Kingston leads in upper lake shipowning, registering 28,799 tons in 194 craft, where the next Ontario port, Ottawa, shows 23,217 tons in 171 craft (91 steamers). St. Catharines boasts 121 craft, with tonnage 19,091; Toronto's share is 17,173 tons, almost all steam. Port Hope, Hamilton, Collingwood, are next in order.

BOOKS RECEIVED.

THE LAWYER AND CREDIT MAN. Nov., 1894. Vol. 3, No. VIII. This, as its title page imports, is a modern journal for business men and lawyers, published at Kansas City, Mo. A "credit man" in the States is the man in a manufacturing or jobbing house who determines what credit its customers shall have, and a very responsible post he has. A proper man for this post is invaluable, and it is appropriate that the first article in this journal should be devoted to defining what manner of person he should be. Some of its correspondents speak out in meeting, a sfor example, Mr. Littlejohn of New York says: "Every upstart in business with a few thousand dollars' capital to begin on comes to conclude that he can buy from a dozen different houses all the goods he wants, and that his credit is 'unlimited.' Now, if this be true, who is to blame for such 'laxness in credit giving?'" Mr. Littlejohn says: "I do certainly blame the creditors and not the young firm. What right had these dozen houses to inveigle those young men beyond their depth, for they were only doing what every enterprising young fellow will do, viz., 'run the thing for all it's worth.'" Then Mr. Ritter of Nauvoo says: "I do hold the older houses to blame, and the whole system of credits is to blame, the indiscriminate, haphazard, devil-may-care style of loading down a man with more than he ought to carry because he seems a good, straightforward, decent fellow, instead of giving him some good sound advice and a fair line according to his means, and acting as all credit men of big houses should act, as a balance wheel to steady him."

PATENT RECORD.

The following list of United States patents granted to Canadian inventors, November 27th and December 4th, 1894, is reported by James Sangster, patent attorney, Buffalo, N.Y.:—

William Chandler, North Bend, scissors-holder and point-guard.

Daniel Conboy, Toronto, carriage-top spring.

Percy Deacon, Toronto, bicycle.

Theophile Girourard, St. Catharines, exterior finish for frame structures.

George Harvey, Winnipeg, rule and ruling device.

Thomas A Hodgson, Ottawa, knee attachment

Frederick Lepper and W. Wighten, Toronto, trolley-wheel

Thomas Parker, assignor of three-fourths to J B Wright, M F Stuart, and A. R. Colquhoun, Toronto, pulveriser.

Thomas W. Paterson, Victoria, track-laying machine.

Thomas Leeming & Co., Montreal, soap and certain recited toilet preparations. (Trade-mark.)

Charles Boeckh, jr., Toronto, handle for paint brushes

Robert Bustin, Boston, Mass., assignor of two-thirds to J. R. McConnell and J. A. Van Wert, St. Mary's, Fredericton, hot-water bandage for treating horses.

Romaine Callender, Brantford, telephone-exchange system.

Romaine Callender, Brantford, telephone-switch.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Dec. 27th, compared with those of the previous week:

CLEARINGS.	Dec. 27.	Dec 20
Montreal	$8,158,847	$11,873,088
Toronto	4,667,866	6,336,185
Halifax	936,347	1,133,942
Winnipeg	961,594	1,184,329
Hamilton.....	588,163	644,261
Total.....	$15,312,817	$21,171,805

Aggregate balances this week, $2,344,724; last week $3,352,477

—The new Minister of Marine and Fisheries may appropriately take an early moment to deal with a matter which his predecessor has chosen to leave severely alone. This is the seizure, nearly eight months ago, of the tugs and fishing boats of J. & C. Noble, of Killarney, Ont., for a technical violation of the fishery laws. It appears to us, after a careful reading of the circumstances of the case, that the Department, for the sake of upholding one of its officials who made the seizure, does grave injustice to the Nobles, who have sworn that their loss by the seizure is not less than $25,000, while that of the fishermen dependent on them, some of whose boats were also seized, is grievous. A fishery overseer named Elliott, who made the seizure, is shown to have been guilty of bad faith and malice in his dealings with these people, and it has been sworn by several witnesses that he vowed to ruin the Nobles. Indeed, he laid a trap for them to effect the seizure. The reasons given for seizing the boats and the virtually ruining for this whole season an important business are entirely inadequate, and the Government should see that justice is done in this case. No government can afford to give grounds for a suspicion of political persecution.

—The annual meeting of the Marine Underwriters' Association was held on the 20th instant in Montreal, too late for a report in our last issue. Officers were elected as under: President, John Popham; vice-president, Archibald Nicoll; treasurer, Edward L. Bond. Executive committee—J. H. Routh (chairman), W. B. Evans and William Cunningham. Committee on classification and inspection of loading vessels—E. L. Bond (chairman), J. E. Riley and Wm. Cunningham Adjustment and arbitration committee—C. E. Gault (chairman), W B. Evans and J. E. Riley. Salvage committee—J. H. Routh (chairman), E. L. Bond, Arch. Nicoll, C. E. Gault and W. B. Evans. Committee on forms of policies and clauses—W. B. Evans (chairman), Wm. Cunningham and J. H. Routh. Committee on St. Lawrence navigation and pilotage—Arch. Nicoll (chairman), E. L. Bond and J. E. Riley.

—On Friday last was held in Montreal the annual meeting of the Wholesale Grocers' Association in connection with the Board of Trade. The president submitted his annual *resume* of the business of the association, which was adopted and ordered to be printed in the forthcoming annual report of the Board of Trade. The following were elected officers: President, Mr. George Childs; vice-president, Mr. Charles Chaput; treasurer, Mr. Alf. Hebert; directors, Messrs. J. E. Quintal, H. Laporte and H. F. F. Hughes; committee of arbitration, Messrs. G. E. Forbes, W. Kinloch, S. J. Carter, A. Birks and D. C. Brossean.

—Messrs. Macdonell & Scott, as solicitors for Mr. W. H. Graham in his action against the Temperance & General Life Assurance Company, inform us that the statement made in our last issue, that this action would likely be dropped, is incorrect. The suit is to compel the company to keep separate the earnings of the General and Temperance sections, and furnish an account of the losses and expenses paid out of the earnings of the Temperance section, and which should have been paid from the General section.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th November, 1894.

INSURANTS' DUTIES IN CASE OF FIRE

Editor MONETARY TIMES

SIR,—At several annual meetings of the Fire Underwriters' Association that have been held in this city, the desirability of securing some amendments to the statutory conditions of the policy has been suggested to the legislative committee of that body. There is one in particular to which I would ask their attention, one which, whilst not inflicting any injustice upon the assured, is of paramount interest to the companies generally. In all the old policies was a condition to this effect: "In case of fire, or loss or damage thereby, the assured shall use their best endeavors to save and preserve the property, and whenever merchandise or other personal property is partially damaged, the assured shall forthwith cause it to be put in as good order as the nature of the case will admit, and shall make an inventory thereof showing the quantity and cost of each article."

The impression that property must remain for the inspection of the underwriter after a fire, just as the flames and water leave it without, making any effort to prevent further damage, is a mistaken, though very current, notion with the assured. They should proceed in caring for the property as if no insurance thereon existed During the past two or three years serious additional loss has been sustained by insurance companies through the ignorance or wilful neglect of the assured in failing to exercise the very reasonable precautions for the protection and preservation of their property. I would desire to emphasize and urge upon the companies at their approaching convention the necessity of action in this matter. It appears to me to be so very reasonable a request that the Inspector of Insurance, as well as the framers of the statutory conditions, would without hesitation at once concede so reasonable a demand.

I note upon referring to several policies of different companies in my possession, that the clause referred to is introduced in the conditions as a variation. Its enforcement is, of course, entirely dependent upon the view which judges may entertain as to its reasonableness.

Very truly yours,

INSURER.

Toronto, 21st Dec., 1894

WHAT THE RECORD PROVES ABOUT ASSESSMENT.

INCREASED DEATH COST IN ASSESSMENT ASSOCIATIONS.

The statistician of the Mutual Life, Mr. J. W. Guiteau, has prepared elaborate tables showing "the inevitable increase in the annual cost of insurance and the ultimate loss of membership sure to come with the increasing age of assessment associations." Mr. Guiteau says:

As it is not possible to prevent the natural increase in the death-rate corresponding with the ages of the lives insured, so it is impossible, by the introduction of new lives, to keep the "average death rate" of any co-operative assessment association or order *from ultimately increasing with its age*.

As the number of deaths per annum increases, the number of assessments required in the year to pay death claims due will also increase. This will correspondingly increase the cost of insurance per $1,000, and when that begins to be marked and continues for a few years at a decided advance, the membership will gradually drop out. The best lives will leave first—the uninsurable will remain—and among the impaired lives continuing their insurance the death-rate will more rapidly increase each year, until it finally doubles and quadruples the rate of the earlier years of the society.

With any society, order, association or company the proportion of aged members must increase with the years of its existence. The average vitality and health of the insured must also decrease as they advance towards and into old age. The introduction of new members, in large or small numbers, only temporarily retards the natural increase in the rate of mortality, and therefore the rate of cost for life insurance must annually increase under the assessment plan, where the number of assessments in the year depends upon the number of deaths that occur.

This truth is demonstrable from the actual records of the societies, which have for many years been required by law to report under oath the record of their experience.

From such records a table has been compiled as to ten of the leading and best known assessment associations of this country. These statistics show an increase of the death ratio, and therefore of the cost of insurance, in every society of from 45 per cent. in the Royal Arcanum, in eleven years, to 378 per cent. in the United Brethren in nineteen years.

In most of the associations there has been a corresponding loss of membership. But in three there has been a marked increase in membership in the last twelve or thirteen years, viz.: 477 per cent., 1,250 per cent., and 5,040 per cent.; and yet, notwithstanding this phenomenal increase in membership, their death ratio has increased 45 per cent., 181 per cent., and 294 per cent. repectively—still being kept comparatively low by the infusion of a large proportion of new lives. In the Royal Arcanum the membership has doubled in seven years, and in the Mutual Reserve Fund in six, while in the latter the death rate is 33 per cent. higher than in the former. In both there is a steady increase in the death ratio, which will necessarily become intensified more and more every year, as the proportion of the old membership increases and the rate of annual additions by new members decreases.

Since 1874 the death rate cost of insurance in the United Brethren has increased from $9.10 per $1,000 to $43.50, and its membership has fallen from 14,237 in 1877 to 4,609 in 1893.

In the Southern Tier Masonic Relief of Elmira, New York, the cost has increased from $17 per $1,000 in 1881 to $53.40 in 1893, and the membership has fallen from 5,085 to 927.

In the Bank Clerks' Mutual Benefit of New York city, with a steady membership of about twelve hundred, the rate has increased from $13.20 in 1881 to $25.30 in 1893.

In the Royal Arcanum, with a steadily increasing membership, now being nearly one hundred and fifty thousand (148,426), and having doubled in seven years, the death-rate has increased 45 per cent. since 1882.

A similar experience is shown by the record of the American Legion of Honor, the Massachusetts Benefit of Boston and the Mutual Reserve Fund of New York, in which a steady and rapid increase of membership has not prevented the inevitable increase in the death rate cost per annum, which in 1893 was $16.60, $16 and $12.20 per $1,000 respectively.

SUMMARY OF THE MEMBERSHIP RECORD AND THE INCREASE OF DEATH RATIO IN CO-OPERATIVES.

Name of Association.	Policies. Decrease (−) Increase (+)	Policies. No. of Years.	Death Ratio. Increase (+)	Death Ratio. No. of Years.	Age of Society.
United Brethren of Pa.	— 68 % in	16 yrs.	+ 378 % in	19 yrs.	24 yrs.
Mutual Reserve of N.Y.	+ 5,040 % in	12 "	+ 294 % in	11 "	13 "
So. Tier Masonic Relief.	— 82 % in	13 "	+ 284 % in	4 "	35 "
Massachusetts Benefit.	+ 1,250 % in	13 "	+ 181 % in	12 "	14 "
Amer. Legion of Honor.	4 % in	3 "	+ 177 % in	11 "	14 "
Bank Clerks of N. Y.	2 % in	4 "	+ 153 % in	6 "	24 "
United Workmen	1 % in	2 "	+ 113 % in	12 "	19 "
N. W. Masonic Aid	92 % in	2 "	+ 100 % in	10 "	19 "
Knights of Honor	9 % in	3 "	+ 72 % in	11 "	19 "
Royal Arcanum	+ 477 % in	13 "	+ 45 % in	11 "	16 "

This record is an irrefutable demonstration that it is impossible to keep permanently down the average annual death ratio in any co-operative or other life insurance association by the introduction of a large volume of new members every year. The claim, or pretence, of the advocates of the "assessment plan" is thus proven to be fallacious and deceptive.

Why do they write it X-mas? Why,
Because it is the season
It takes an extra "X" to buy
A present—that's the reason.
—*Detroit Free Press.*

THE AUSTRALIAN FINANCIAL CRISIS OF 1893

Extracts from Mr. Wilton C. Eddis' Paper.

Although history will record this as the crisis of 1893, it must not be forgotten that it only culminated in this year. My endeavors will be to show as far as lies in my power that this national illness had been coming on for some years.

Let us look backward to the early fifties and see what was the state of the Australian colonies then. They had been originally started by the British Government in 1788 as convict settlements, and had afterwards attracted a good population of emigrants, who had turned their attention mainly to grazing and agriculture—industries for which the vast stretches of country are eminently suited. However at the time I refer to, men were beginning to feel a great difficulty in finding a market for their produce. Their local market was limited and they were situated so far from the crowded centres of population, business was dull everywhere. Magnificent stations or ranches, as they are here called, were in many cases actually given away, and the cattle sold for next to nothing, as the wealthy squatters would not work them at a loss and had almost lost faith in their adopted home. We who live in the colonies now hardly realize, I think, how much we owe to the hardy British pioneers of years gone by, who actually "subdued the earth" and converted unknown wilds into civilized and habitable colonies—now the homes of millions of the English speaking race, the greatest colonists of this world of ours. But what changed all this depression to which I was referring—nothing less than the discovery of gold.

As can be well understood, with the influx of population in 1851, and following years, and the amount of free gold discovered, the farmers and grazers found a ready market for their produce and live stock, and many a poor farmer suddenly found himself affluent.

The various governments built railways, telegraphs, harbors and bridges, public schools, etc., and then, a few years afterwards, things gradually shook down into a steady state; business, if quiet, was sound; the wool industry was firmly established, etc. But somehow or other—perhaps the gold fever was still in the veins of the Australians—men seemed impatient of that growth, which, to be enduring, must always be slow.

The argument was freely used and circulated, afterwards to be looked upon as gospel, that to make Australia the great nation she was destined to become, the Greater Britain, so men said, and mind you firmly believed, it was necessary to borrow capital—capital which was to be wisely invested in opening up the country—to be used to bring within reach of markets the products of her virgin soils. There was little difficulty in finding this capital. England readily poured forth her millions into Australia, and this, so to speak, marks a second epoch, though extending over many years, in the history of those colonies.

The land boom, however, took a great hold on Australia. Its effects were seen in every town and hamlet, and towns were marked out and sold at fabulous prices in the bush, never to be built upon—but the boom culminated in Melbourne. Tremondous preparations had been made there for the Centennial Exhibition of 1888. Everybody almost was seized with this land hunger—men of all classes—land in Melbourne was actually sold at London (Eng.) prices. Simultaneously land and investment companies were organized for the purpose of buying up land, subdividing and selling on building societies' terms.

Fortunes were rapidly made and lost. Men bought small lots, sold and then bought larger. But, no doubt, here you experienced something of the same sort, but not with the disastrous results that followed in Melbourne.

"Put your money in land, and it must increase—investments which bear low rates of interest are out of date—the colonies must grow, and there will always be a steady demand for land." These were the doctines spread.

A business, apparently perfectly solvent, yet carried on "on credit," falls to the ground in bad times, when credit is at a discount. So it was with the Australian land societies, who in most cases styled themselves banks. And a terrible thorn they proved to the banks of issue themselves.

To show the large sums of money involved, let me quote a few lines from the *Melbourne Argus* of 10th October, 1894, nearly eighteen months afterwards. Referring to the British capital owing by the Victorian banks, it says:—

"So far as we can trace, however, the portion of this money employed in Victoria is between 14 and 15 millions sterling, which being added to the 23¾ millions of Victorian fixed deposits, gives a total of over 38 millions sterling, upon which interest has to be paid by the banks, involving an annual distribution to depositors of nearly 1¾ millions sterling—this sum has to be obtained from Victorian industry and trade."

Reducing this to Canadian currency, we find the fixed deposits of the Victorian banks alone amount to about $184,680,000, and the annual interest to $8,505,000—to say nothing of New South Wales, with about 105 million dollars of fixed deposits, or the other colonies.

The Australian banks will, I consider they must, largely contract their business; in doing this, probably the weaker ones will either amalgamate, as is now even being done, or be absorbed by their stronger competitors.

In a few words, the position of the reconstructed banks is this: that they have simply gained time in which to realize their assets, and thus finally repay their creditors. If these assets had been all forced into the market at once, it is evident that terrible loss must have ensued; whereas now, while admitting that the task ahead of these banks is no easy one, let us hope with restored confidence that success will attend their efforts.

However, it is not my business here to attempt to lay down what the real remedies should be, as it has been my privilege this evening to attempt to portray to you some of the causes of the Australian crisis and the effects of overborrowing.

Mr. Micawber, who afterwards by the way emigrated to Australia, said: "Annual income £20, annual expenditure £19 19s. 6d., result *happiness*. Annual income £20, annual expenditure £20 0s. 6d., result *misery*."

Perhaps, if Charles Dickens had lived in these times, Mr Micawber might have put it thus:

Borrow, boom, bust.

—Old issues of Canadian stamps fetch high prices, says the London *Canadian Gazette*. At a London sale recently the following prices were realized: Canada, 6d. dark gray perforated, £7; New Brunswick, the "Connell," £20; Nova Scotia, 1s. violet, £11.

THE LATE SIR JOHN THOMPSON

At the dinner of the Dominion Commercial Travellers' Association, held in the Windsor Hotel, Montreal, on Saturday night last, 22nd December, the Governor-General was present, and in response to the toast of his health delivered a somewhat lengthy address. Referring to the tragic death, at Windsor Castle, of the Premier of Canada, Sir John Sparrow David Thompson, Lord Aberdeen said:

"Some of us, I am sure, have come here not sorry to have an early opportunity of joining in those expressions which are everywhere being called forth regarding what I have already described as a national bereavement. Surely we may term it national in a most real and also in a most comprehensive sense, in our two-fold character of Canadians and citizens of the great British Empire. The loss is national in the sense that it is recognized by the entire community, and even in the midst of our sorrow we may at least avail ourselves of this opportunity, which has, indeed, been fully taken advantage of, for demonstrating that the people of this country are Canadians first and politicians afterwards.

"This general concord is apparent both in the public expressions of regret and regard from individuals and societies, and also in the determination to display in a practical and permanent manner the sincerity of these feelings, and especially of our sympathy with the bereaved widow and her children. Of the late Sir John Thompson I would like to say that while any person who has been called upon during a considerable period of years to occupy positions of public life and to meet public men in different parts of the world, will assuredly come into contact with men possessed of high gifts and striking qualities, yet I question whether such a person could have come in contact with many in whom were more eminently combined the qualities which go to make up the able administrator, the Christian statesman, the true friend. Such at any rate is my own testimony, and among the characteristics of greatness there was eminently in him that of modesty. It has often been remarked that he was an unassuming man. His was the modesty of true greatness; while at the same time ever ready to take his position with perfect dignity and composure on all official and state occasions, he never posed for effect, and he was so unselfish that he could ever afford to think of others In this unassuming disposition and manner he strongly resembled another, the oldest and the greatest of living British statesmen

"In the report of the meeting of Montreal citizens held yesterday, I noticed, amongst many other eloquent testimonials, some apt and feeling remarks by Mr. Justice Davidson, including a quotation from the expressions of appreciation used by Sir John Thompson with reference to a certain demonstration of kindness and regard. Now, I do not suggest or admit that Sir John was over sensitive about what might be said of him in the way of, I will not say criticism, for that, of course, every public man must expect, but of attacks of

THE BRITISH CANADIAN Loan & Investment Company, Ltd.

DIVIDEND NO. 34.

Notice is hereby given that a dividend at the rate of seven per cent. per annum on the paid-up capital of the company for the half year ending 31st December, 1894, has this day been declared, and that the same will be payable on the

Second Day of January Next.

The transfer books will be closed from the 22nd to the 31st proximo, both days inclusive.

By order of the Directors.

an indirect sort. I do not say, however, that I think Judge Davidson was unjustified when he remarked that we may, perhaps, need some lesson as regards the treatment of our public men in such matters. I do not refer, of course, to the cut and thrust of parliamentary debate—that is a matter of give and take—and if a complaint is made it can be answered, but I refer to that sort of attack or representation which, owing to the anonymous manner in which it is put forward, cannot be replied to. Especially what are known as personalities are objectionable and unworthy. I cannot help speculating sometimes upon the effect which would be produced upon the people who make this kind of attack if they could suddenly be subjected by name to the same process. I am afraid they would almost go into a fit from indignation and wrath.

"But I will not dwell upon such a theme now. Reverting to the personal characteristics of the late Premier, probably those who only knew Sir John Thompson in public would hardly have guessed that his nature was so exceedingly kindly and charitable. Though so effective in argument, he was ever free from any habit of depreciation or disparagement of anyone in private, but such reminiscences are, after all, only a reference in detail to what was the real source of his influence and the real cause of the honor which is now being paid to his memory. It was character—that which is recognized sooner or later unconsciously and as if by instinct by the community, and which leaves behind it an enduring influence even after the personality is removed, and surely we may say of Sir John Thompson that "he being dead, yet speaketh," and "his works do follow him." The very circumstances, tragic and impressive, in which he passed away, have undoubtedly contributed largely and lastingly to that work which he had so much at heart, and which I am sure we all desire to promote—the work of cementing the bonds of kindly understanding and practical co-operation between the people of this great Dominion and those of the mother country. From that mother country his remains have been sent forth with every symbol of honor, regard and esteem that could have been devised by Her Majesty the Queen and by the statesmen who surround her throne. And even more perhaps than by the pomp and ceremony with which the memory of the dead has thus been commemorated, has the nation's heart been touched by the queenly and still more the motherly sympathy which Her Majesty has evinced. The thought is well brought out in some words written by some person unknown to me, but which were inserted in the correspondence of an Ottawa newspaper one day last week, "The laurel wreath which Queen Victoria placed on the bier of departed greatness cemented the bond of a common sympathy; the kiss which Her Majesty imprinted on the cheek of a grief-stricken Canadian girl touched the finer chords of our nature. It sent a gleam of golden light through the gloom of a darkened Canadian sky." And so Sir John Thompson is gone from us, but he has left for all of us an inspiring memory and a noble example, and we may say, quoting the words of Lord Rosebery in reference to another eminent Canadian: "Let us then, to-day, at the shrine of this signal statesman, once more remember our responsibility and renew the resolution that, come what may, we will not flinch or fail under it."

LUMBER NOTES.

There is every appearance that the 1894 cut in the Ottawa district will be neither greater nor less than last year's output. The *Citizen* of the 20th inst. says, in brief review of the situation: The largest quantity is being made by Klock Bros., above Lake Temiscamingue. It will be in the neighborhood of 250,000 feet. Then, the estate of the late David Moore is operating extensively in the same section of country. On the Amable du Fond, William Mackay, of this city, is making about 150,000 feet, and on Cat Lake, on the line of the C.P.R., Messrs. Booth & Shannon expect to turn out some 125,000. The Cat Lake district was overrun by fire some years ago, but notwithstanding this, some good timber has been taken from that section since then. Barnett & Mackay are making 80,000 feet, and A. Barnett 150,000 on South River. Besides these, Cox & Logue are taking out a considerable quantity in the Upper Gatineau district.

New Brunswick lumbermen are asking the clerk of the weather for snow. In many places there has been about eight inches of snow for some time past, just enough for yarding, but insufficient for hauling.

—The Prince of Wales has received a curious present in the form of a log of mahogany 40 feet long and 42 inches in diameter. The sender is Prince Kucku Edukuma of west Africa, who has never met Albert Edward, but has heard of his fame as a soldier, statesman and what not. The log is an unwieldy sort of a gift, but it is understood that the Prince of Wales proposes to turn it into furniture.

—The prospects of the lumber trade are not by any means brilliant. There is a limited demand, but at closely cut prices which leave very little margin for the merchant. The mill owners, however, with commendable public spirit, are carrying on their mills on terms that are not certainly satisfactory to themselves, that they may give employment and a means of living to as many of their employees as possible.—*Vancouver, B .C..News Advertiser.*

—From Leadville, Colorado, comes the following: The statements of the smelters for 1894 show that the bullion produced from Leadville ores during 1894, amounts to $8,160,074. The gold output for the year is $1,934,040, an increase in gold over 1893 of $131,040. The tonnage of this camp for the year is 362,907 tons of ore, an increase over last year of 22,000 tons.

—The piling business is very much depressed in New York at present. There is a good supply there and building operations are at a standstill. The prospect is therefore rather discouraging. The operators up the bay are getting out a large quantity of piling this winter. *St. John Sun.*

MONTREAL MARKETS.

MONTREAL, Dec. 26th, 1894.

ASHES.—Very little has been done in this line of product since last report, and values are unchanged at $4.10 for first quality potash; seconds, $3.75. Of pearl ashes there is not even one barrel in store, and any quotation would be merely a nominal one.

CEMENTS AND FIREBRICKS.—Little or nothing is now being done in cements, and quotations are more or less nominal at the following figures: $2.05 to 2.10 for English, and $1.95 to $2 for Belgian. There is some enquiry for firebricks, the repair season being now at hand.

The New-York Times

IS an uncommonly interesting newspaper. Its sixteen pages are brimful of news. It is handsomely printed, accurate, clean, fresh and vigorous. Its Financial Page is a capital manual for investors, for bankers, and the officers of savings banks, trust and insurance companies, railway earnings, stock and bond quotations, interest and dividend notices, the organization of new companies, and ALL financial news reports are promptly and accurately printed. Its commercial reports, including wool, cotton, breadstuffs, milk, butter, eggs and farm produce, recently much enlarged, are of unequalled fulness and value.

The TIMES will do its full share of earnest work for sound financial legislation, to repel the assaults of private greed upon the law-making power, to establish Democratic principles of equality in taxation and economy in expenditure, and to retrieve the defeat brought upon the Democratic Party by errors and betrayals.

THE NEW-YORK TIMES,
Printing House Square.
New York City, N.Y.

For regular brands the quotation is $18 to $20, with special brands at $22 to $25

DAIRY PRODUCTS.—For cheese we can report nothing more than a dull holiday market, and there is really no recent variation in values. We quote choice colored Western at 10¼ to 10⅜c.; Townships, 9⅞ to 10c.; Quebec, 9½c. per lb. The cable quotation remains at 50s. 6d. Butter is quiet, except for choice grades, which are in good demand. Choice creamery is quoted at 20 to 22c.; Townships dairy, 17½ to 19c., or even a little better for a very choice lot; Western, 15 to 16c. per lb. Choice boiling eggs bring 22c. and upwards; packed, 12 to 14c. per dozen.

FURS.—Some fair lots of skins are offering, but it is reported that a good many are going to New York from interior points. It is questioned, however, if the net results will be found very satisfactory to shippers. We quote: Beaver, $2.50 to 3.50; bear, large, $15 to 25.00; do. cub, $3 to 8.00; red fox, $1 to 1.50; marten, $1 to 1.40; fisher, $5 to 6.00; coon, 25c. to $1; otter, $7 to 11.00; skunk, 25c. to $1.25; fall rats, 8c.; kits, 3c.; mink, $1 to 1.50; lynx, $1.25 to 2.25.

GROCERIES.—A good many of the commercial travellers are home for the Christmas holidays, and business with the country can hardly be expected to be brisk, but we hear of a few extra good orders for shanty supplies being received. Teas are quiet at the moment, but renewed active enquiry is looked for after the New Year, and all prices are firmly held. Rice steady at the prices for some time prevailing. Canned goods still comparatively neglected, and likely to be until the setting-in of Lent. There is no recovery in sugars, but on the contrary, granulated is again off a point, the refinery price being now 3¾c.; yellows remain at last quoted prices, and few of the lower grades are now available. The refiners are about shutting down for the usual yearly overhauling. Syrups are firm, and it is said that neither of the local refineries have any stock on hand. The "Belgravia," for some time overdue, is reported in New York, with supplies of Bosnian prunes for this market; Atlas D's are quoted at 4½ to 4⅝c., higher grades 5½ to 6½c. per lb. Currants still scarce; quotations range from 5½ to 6½c. for fine Vostizzas; Sultanas, 5½ to 6½c. A quantity of Valencia raisins was offered the other day at 3½c per lb., but the quality is described as veritable trash. California loose muscatels are still in good demand at 5 to 7½c as to quality

HIDES AND TALLOW.—There is a continued good demand for light hides. The local market is well cleaned up, and the Quebec demand cannot be altogether filled with such supplies as are available. Dealers are buying No. 1 green at 4½ to 5c., and selling tanners at 5½c. stiff. Heavy hides are not in such lively request as light; last sales to tanners were made at 6½c. No calfskins offering; lambskins, 60 to 65c. Tallow is very dull and easy at 5½ to 6c., with sales hard to make; rough, 3½c

LEATHER.—Business is very quiet, and no demand of any note can be expected for the next fortnight. English letters lately received ask for consignments, as American shipments have been light; but with the firmer ideas existing with regard to prices, there is little inducement to ship from this market. Splits are really scarce here, and buff and glove grain. The other lines asked for can be sold at fully as good prices as could be realized in Britain. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—We do not hear a noteworthy feature to report. A few moderate sales of Siemens No. 1 iron have been made to eastern points at $16.75 to $17.00, which is the established quotation. In Scotch pig iron matters are very dull. Warrants are cabled at 41s. 11d. Bars and plates are without any change. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00. bar iron, Canadian, $1.60; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.00 to 2.05; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50, charcoal I C, $3.50, P D Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5½ to 6c. tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60, common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead; per 100 lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 25c.; ingot copper, 9⅜ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25, American do., $4 to 4.25 Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs., annealed do., $2.70, galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3⅞ to 4c., ⅝ in., ¾c., ⅞ in., 3½c., ⅝ in., and upwards

OILS, PAINTS AND GLASS.—The week since last writing has been almost barren of business, and nothing has transpired in the outside markets to call for any revision of quotations. We quote: Turpentine, 43c. per gallon for single barrels two to four barrels, 42c. Linseed oil, raw,

HYDRAULIC PRESSES FOR ALL PURPOSES

57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

WOOL.—A marked lack of activity is still to be noted in the local demand, but dealers are hoping for some improved enquiry with the opening of the New Year. There is no disposition towards lowering prices. We quote Cape 13½ to 16½c.; B.A. scoured, 27 to 32c.; domestic fleece 17 to 20c.; pulled supers, 20 to 21½c.; British Columbia, 10 to 11c. per pound.

TORONTO MARKETS.

TORONTO, Dec. 27th, 1894.

DRY GOODS.—With the movement in holiday novelties completed, trade, so far as seasonable goods are concerned, is being conducted in a desultory way. Some of the houses, however, are already beginning to ship goods for the spring trade, while many warehouses are busy receiving goods for summer distribution. As an example of the manner in which trade is conducted, it may be stated that orders have been placed during the week for woolen goods for the trade of 1895.

GRAIN.—Wheat is firm, but quotations have remained unchanged during the past two weeks. It is said that two large buyers are attempting a "corner" on Manitoba wheat, and from present appearances are likely to succeed in their design. Mr. W. W. Ogilvie and Mr. W. A. Hastings, of Montreal, returning from Manitoba, have given to the press a very bullish report in regard to the outlook for the wheat held in that province. The position should be all the stronger because of the lack of spring wheat in Ontario. A Toronto firm, who operate along the Midland Railway, assert that, whereas last year they purchased 100,000 bush of spring wheat, this year they have bought scarcely any spring wheat in that district. There is little strength in the export demand for wheat at present, but local millers are taking red and white winter wheat quite freely. Oats are firm and higher. Offerings are not very free, while the demand is good especially from the eastern provinces, and considerable shipments are going to Quebec. Barley is quiet and is likely to remain so for a few weeks yet. When the weather becomes colder American brewers may be expected to turn more to Canadian barley, and the export trade will then pick up. Peas are in good demand for export.

The stocks of grain in store at Port Arthur on Dec. 15th were 455,865 bushels. During the week there were received 55,322 bushels, and shipped *nil* bushels, leaving in store on Dec. 22nd, 511,187.

GROCERIES.—No one feels the reaction which necessarily follows the holiday season more than the wholesale grocer. As a consequence, trade is not brisk in the wholesale grocery warehouses. Values remain without important changes, although prices are being shaded in some lines of holiday goods. The better grades of Valencia raisins are in small compass, but of the poorer descriptions there remains a good supply on the market. Some shading is being done in the prices of currants; we quote: Provincial, 3½c.; Filiatras, 4½c.; Patras, 4¾c.; Vostizza, 6 to 7c. Syrup and molasses are finding but moderate demand in the local market. Sugars remain easy, and 4c. is quoted on domestic granulated. Canadian refiners have apparently determined to meet the competition of German refiners and are making some very low quotations. Recent arrivals of German granulated sugars have, we understand, been disposed of on satisfactory terms. There is nothing to report in coffees; Rios are ruling between 21 and 25c. The distribution of teas is just a little slow at present. There is little demand for canned fruits and vegetables, and not till January has well spent itself can this demand be expected to show any material development. Canned salmon is selling rather slowly, but as stocks are not large, in comparison with previous years, better things are evidently in store for this trade later in the season.

HIDES AND SKINS.—Seldom has the market remained so long in an unchanged state. The situation on the local market is to-day in almost the same position it was two months ago. At the moment trade is not brisk. The butchers are in the habit of making large displays for Christmas time, and in consequence many hides have been offered recently. But for the next few weeks the kill will be comparatively light, and the hide trade may be expected to remain quiet. Reports from Chicago indicate strength there. The quality of offerings continues good. Values are without alteration. Sheepskins are plentiful, and buyers do not appear keen to take stock; prices remain unchanged, with a quotation of 65c. The sale of wooled sheepskins in London, Dec. 20th, showed 3,700 bales of fair quality, and brought a moderate attendance. The competition was dull at a farthing to a half-penny decline for crossbreds, and a farthing decline for short wools and lambs. A lot of good parcels were withdrawn. The large kill for the holiday season has had the effect of weakening the tallow market; dealers are paying 5½c. and are asking 6c. for stock.

LEATHER.—Although some manufacturers are enquiring for stock, trade generally is quiet, and must remain so until the middle of January, at which date manufacturers usually begin in earnest to cut for spring trade. The jobbing trade is slow, sluggish, in fact, and presents but few bright features. Spanish sole leather is moving actively by way of export, and it is expected that at least five cars will go forward destined for England before the New Year opens; slaughter sole is quiet and in abundant supply.

LUMBER.—At present there is nothing doing, and this condition of affairs, in the natural course of events, will continue for the next few weeks. Reports received from the Georgian Bay district indicate that this season's cut will probably be somewhat in excess of the cut last winter. The season has been, and continues, favorable to operations in the woods. Early in the season the swamps were filled with snow, while the ground is now covered with snow.

PROVISIONS.—Business is of a holiday character, and the outward movement of provisions very light. Receipts of butter continue free, with rolls selling at 14 to 16c., and choice tubs at 15 to 16c. Cheese, locally, is jobbing in a quiet way with values remaining unaltered. Only a nominal trade is doing in hog products, and in the absence of business prices do not fluctuate. Packers are fairly busy. Dressed hogs are quoted at $5 to 5.15. The Cincinnati Price Current of December 22nd says: "The marketing of hogs has been decidedly reduced the past week. Packing returns show a total of 385,000 for the west, compared with 535,000 the preceding week, 325,000 last year, and 355,000 two years ago—making a total of 3,275,000 since November 1, against 2,000,000 a year ago." The egg market is quiet. We quote: Pickled, 12½ to 13c.; held fresh, 14c., and strictly fresh, 17 to 18c.

WOOL.—The movement to Canadian mills is slow and devoid of anything like activity. Some of the largest woolen mills in Canada are not working full time, and we hear many reports of severe depression. This applies particularly to the blanket trade, and two failures of blanket mills are reported recently. This has involved several wool merchants in considerable losses. Some small lots of fleece have been moving to the United States, while several shipments of pulled wools are also going forward to the same market. We have not learned recently of any American wools arriving here. The situation in the United States is not quite so favorable as was predicted early in the fall.

THE BRITISH TEA TRADE.

From the last monthly report of the British Board of Trade some interesting facts regarding importation and consumption of teas in Great Britain may be collected. The most prominent among these is data showing the extent of increase in consumption of East India and Ceylon sorts and the falling off in the consumption of China teas in that country. It is shown that 107,588,679 pounds of tea from British East Indies were entered for home consumption during the eleven months ending November 30, 1894, an increase of 8,925,876 pounds over similar entries during the corresponding period last year. The importation of Ceylon teas this year foots up 67,119,464 pounds, or 7,489,194 pounds more than 1893. On the other hand, the entries of teas from China for home consumption have this year been only a little over 21 million pounds, against an average of over 30 million pounds during the preceding two years.

As stated in the Board of Trade report, the English consumption of India growths has exceeded the importation by nearly 4,000,000 pounds, thus making considerable inroads upon the stock in bonded warehouse. It would appear also that all but about 4,800,000 pounds of the 67,119,000 pounds of Ceylon tea imported was retained for English consumption, whereas last year 8,500,000 pounds more were imported than taken by the home trade. Of the 39,000,000 pounds of China teas imported this year only 21,000,000 pounds, according to the records, were entered for consumption in the United Kingdom. The returns indicate that not only the consumption there but the distribution from English points to other countries has fallen off this year to the extent of nearly 4,000,000 pounds. Interesting in connection with these data is the statement showing the stock of all teas in bonded warehouses at the close of last month to have been 95,860,000 pounds, against 100,000,000 pounds at the corresponding period in 1893, and 92,970,000 pounds in 1894.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital ..... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A FINANCIAL PROPOSITION.

Under date December 22nd, Henry Clews addresses the following proposition to Hon. Wm. M. Springer, chairman Banking and Currency Committee, Washington, D.C.: Dear Sir,—Let Congress pass an Act to authorize the issue of $497,660,000 3 per cent. gold bonds (not coin bonds), the interest not to exceed 3 per cent., $346,681,000 to be issued at the discretion of the Secretary of the Treasury, with the consent of the President, to provide for absolute needs of the Treasury from time to time, in connection with and for the protection of the outstanding greenbacks which are for that amount, and to be issued only by popular subscription. The remaining $150,979,000 of these bonds to be pledged and held in the U.S. Treasury against the outstanding $150,979,000 Sherman Law Treasury notes, to be redeemed at the rate of $2,000,000 a month from the avails of the sale of the bonds, the sale of bonds and redemption of these notes to be made simultaneously each month, commencing July 1st, 1895. These bonds could be sold in all probability at a premium, making them equivalent to 2½ per cent. interest bonds. The object in postponing the date to July 1st for the commencement of the liquidation of the Sherman notes is to give ample time meanwhile to formulate a more liberal National bank note system, which will admit of the issue of such notes to take the place of the notes redeemed. This will prevent a contraction of the currency. The Sherman notes being provided for as above set forth, will leave all the bar silver stored in the U.S. Treasury to protect the Bland silver notes. The holders of these notes should be given the option, after January 1st, 1896, to send them in for redemption in blocks of $5,000 or $10,000 in exchange for bar silver at the market price, not, however, to exceed in amount $2,000,000 in any one month, all redeemed notes to be cancelled.

The present National bank currency is certainly the best ever issued in this or any other country, and the system should be retained, but remodeled on a more liberal basis, so as to admit of more profit to the banks and thereby increase the issue. All classes of U. S. bonds should be taken at par as security for bank notes. The right should be given to any bank —State or National—to issue bank notes to the full amount of their capital on the deposit of U. S. bonds with the Comptroller of the Currency, and issue notes equal to the par value of said bonds. All the 4 per cent. and 5 per cent. issues of U. S. bonds should be taken up by the substitution of 3 per cent. gold bonds, the exchange to be made at a premium, to be paid on the 4s and 5s, equivalent to a 3 per cent. basis. This would make only one grade of U.S. bonds outstanding, with the exception of the currency bonds, which now have but a short time before maturity, when they of course will be paid off. The U. S. bonds being then all of one grade, would be recognized as U. S. consols all over the world, and would be marketable at all the world's money centres. They would really be regarded as full equivalent for gold, and would have the quality of an international currency bearing interest. U. S. bonds would have this international character, for the reason that they being coupon bonds, are transferable like money, the interest calculated up to date of transfer, whereas the purchase and sale of English consols is mainly confined to within the boundaries of Great Britain, owing to the fact that when they are bought by an investor, they are simply transferred each time they change hands on the books of record in London, without any other evidence of ownership being given.

If the above suggestions are adopted for National legislation, it will not only stop the outflow of gold, but will reverse the current and speedily bring it this way. HENRY CLEWS.

N.B.—If the above treatment were applied to the greenbacks and the "Sherman" Law Treasury notes, they would be placed permanently on a gold basis, as the U.S. gold bonds backing them would bring their face value in gold in our market and the markets of Europe at any time. The same also applies to the $337,629,504 outstanding "Bland" silver notes, as the transfer of the $150,000,000 additional bar silver from the Sherman notes to the Bland notes would make the security behind them in silver bullion, even at the present depressed market value for the white metal, largely in excess of those obligations. This would be equivalent to putting them on a gold basis also. The gold reserve in the Treasury might easily then get down to $25,000,000, or even less, without creating any alarm whatsoever.

H. C.

CROPS IN MANITOBA.

Something more than guesses can now be obtained as to the field products of Manitoba for 1894. The final Government crop bulletin of the year was issued last week. It puts the total yield of wheat at 17,172,883 bushels, an average of 17 bushels per acre. This is just a trifle below the estimate of grain men, who said it would run eighteen millions with an additional two million from the North-West Territories. The Government estimates 5,564,179 bushels, now in farmers' hands, while grain dealers believe 6,500,000 bushels of wheat is still available for export. The oat crop amounted to 12,000,000 bushels and barley to 3,000,000. Flax has been a paying crop this year at $1 per bushel. Potatoes turned out over 2,000,000 bushels and roots almost that quantity. Live stock exports estimated at 11,000 cattle, and hogs exported, 8,000. The bulletin also shows gratifying increase in poultry raising, the figures being: Turkeys, 46,183; geese, 16,334; chickens, 200,000, all of which feathered product was consumed in the provinces. Butter shows well, the product being 2,516,200 pounds, at an average price to farmers of over 15c. per pound.

REAL ESTATE ETHICS.

The medical profession has a code of ethics the aim of which is to elevate the tone of its practice and eliminate from it all dishonorable and dishonest actions, and to make the profession a benefit to the public and a credit to the practitioners.

Why should not the real estate dealers have a code of ethics, with the same object and for the same purpose? To accomplish this, the reputable real estate dealers of each city should organize themselves into a local real estate dealers' association, and adopt a code of ethics that will make the name of real estate agent synonymous with integrity and fair dealing. These local associations could join in a national association for the benefit of the entire country. In the first place they should insist upon the payment by the seller of a fair commission, and never consent to saddle the commission upon the buyers to please the sellers. The signs, or placards, "for sale," and "to let," should never be allowed in sight on the streets of the city, as they disfigure it and give to strangers a very bad impression, as if the whole city was for sale or to let. No property should be advertised as "a bargain sale," or "to rent for the winter, cheap," as such practices not only injure the property, but instead of gaining a customer, more frequently make him suspicious that something he cannot see is wrong with the property, and he is really frightened away from it. Landlords who employ real estate agents should be protected from bad tenants by the circulation of a dead-beat list among the associated real estate agents, so that such tenants cannot rent through these agents. No deception should be allowed in the office; all should be open and above board. If this is well done, it will come to pass that the sign "Associated Real Estate Agent" will fill the office with clients who will feel safe to depend upon the agent's word in every instance.

Thousands of dollars of well-earned commissions are lost yearly by real estate agents because of dishonorable clients, who, after having received the benefits of the agent's labor in his behalf, refuse, upon some flimsy pretext, or upon no pretext at all, to pay commission due. These dishonorable clients will deny that they employed the agent, or they will deny that he was instrumental in making the deal, and if sued they will persuade the buyer to testify that he was not influenced to buy by the agent. Sometimes a dishonorable client will "stand in" with the buyer, and take his property out of a real estate agent's hands after a deal has been nearly worked up, then turn around and make the sale himself to the party furnished by the agent. Sometimes the buyer will send a dummy around to the real estate office to see what property is for sale, and then will go to the owner and offer to buy it, if the owner will give him the commission he would have had to pay to the agent. To correct these evils, real estate agents should join hands all over the country to procure the passage of a proper real estate law calculated to protect their interests; and they should require all persons placing property in their hands for sale to sign a contract in which the terms of sale and rate of commission are plainly indicated, and which no honest client will refuse to sign.

The practice of real estate owners placing their property in the hands of a dozen agents in the same city is a pernicious one, and is a boomerang which injures both agent and owner. It belittles property (and depreciates values) in the eyes of the buyer to see it upon the books of agent after agent as he makes the rounds. He thinks at once that it is a hard seller, and that "if all the doctors in the land cannot make Humpty Dumpty stand," he doesn't propose to shoulder the burden at any price; and the consequence is that property remains upon the books, a monument of the folly of the greedy owner, who tries to pick up too many apples in one hand and doesn't pick up any. Now the wise owner will look carefully over his property just as though it was his neighbor's and appraise it at its real value; and then, selecting the real estate agent he thinks will be the most likely to sell it, he will place it upon his books for thirty, sixty, or ninety days, giving him exclusive handling of it for this time at the lowest price he will take from anybody. The agent then has an incentive to go at it with a will and get a purchaser for the property.—*U.S. Investor.*

WHO ARE AMERICANS?

Every once in a while we hear the boast, particularly among politicians and in newspapers addicted to what is called Americanism, that Philadelphia is the most American of American cities. The census shows that 56.58 per cent. of the population of Philadelphia is of foreign parentage. The city may be very much disposed to "Nativeism" as a sentiment, but it is in no condition to show its hand when the natives whose parents were natives before them are separated from the persons of foreign parentage.

In order to find communities that are really of native stock one must go South. In the city of Richmond, Virginia, only 11.47 per cent. of the population are of foreign parentage; in Atlanta, Georgia, only 7.25 per cent.; in North Carolina but seven-tenths of 1 per cent. are of foreign parentage; in South Carolina, 1.53 per cent.; in Georgia, 1.78 per cent.; in Virginia, Mississippi and Alabama, less than 3 per cent. —*Record.*

BANK LOSSES THROUGH DEFAULTERS.

A list is published by the Boston *Herald* showing the losses that have been sustained by the banks in the Clearing House Association of New York city during the past two years, due to the dishonesty of their officers or employes:

Ninth National Bank, president	$450,000
Shoe and Leather National Bank, bookkeeper	354,000
Park National Bank, assist. cashier	95,000
Continental National Bank, corresponding clerk	58,000
United States National Bank, bookkeeper	43,000
American Exchange National Bank, bookkeeper	33,000
Harlem River Bank, bookkeeper	24,000
Tradesmen's National Bank, discount clerk	17,000
Chemical National Bank, paying teller	16,000
National Bank of the Republic, clerk	11,000
National Bank of the Republic, coupon clerk	5,200
Total	$1,106,200

It is a rather formidable array of figures, and seems to show that a screw is loose somewhere in banking supervision.

—A gang of five burglars has been arrested in Montreal, who are suspected of having committed a number of safe-robberies in that city of late. The account of their capture is exciting reading. Having got word secretly that a certain shop in Griffintown was to be attacked by the burglars, four officers hid themselves in the place one night and awaited developments. The gang came and tried the door with a "jimmy," but were disturbed by a passer-by. Him they robbed and flung upon the road. Just then two policemen came along and a fight ensued, revolvers being used, but the robbers were caught, one wounded. One of them, Stock, *alias* Stoney, led a regular Dr. Jekyll and Mr. Hyde life, and during the day was to be found either in the Young Men's Christian Association rooms or around other prominent religious resorts.

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

DECISIONS IN COMMERCIAL LAW.

THE "MAIN"—The plaintiffs, owners of a steamship, effected an insurance on freight valued at £5,500 in the vessel from New Orleans to Liverpool, £1,500 of which amount the defendants underwrote. The insurance was to attach on the freight from the loading of the goods on board the vessel. When the policy was taken out the vessel was sailing outwards from Hamburg to New Orleans, and the valuation of £5,500 was a reasonable and proper one of the freight expected on a full cargo, having regard to the rates of freights then current at New Orleans. On the outward voyage the vessel met with an accident, in consequence of which she was delayed at New Orleans, and did not sail in due course. She eventually sailed for Liverpool with a full cargo, which was shipped at lower rates of freight than those current when the policy was effected, the total actual freight being only £3,250 7s. In the course of the voyage the vessel was lost. Gorrell Barnes, J., held that the policy covered the risk on the voyage in question, and that the valuation of £5,500 was binding upon the defendants with regard to what actually so came at the risk under the policy.

KEITH, PROWSE & CO. v. NATIONAL TELEPHONE COMPANY.—The relations of landlord and tenant of chattels may be established. The demand and acceptance of rent due subsequent to a notice to determine the tenancy of chattels is a waiver of the notice. An injunction granted to restrain the cutting off of communication in breach of an agreement "to erect and maintain in working order" certain telephone wires and apparatus. Held by Kekewich, J., where a term in chattles has expired and rent has been subsequently accepted, a tenancy from year to year is created, and the tenant is entitled to six months' notice to determine the tenancy, whatever may have been the length of notice required ruling the continuance of the original tenancy.

NEUWITH v. OVER DARWEN INDUSTRIAL SOCIETY.—The defendants' hall was hired for the purpose of an evening concert at which the plaintiff was to take part as one of the orchestra. There was no agreement between the hirer of the hall and the defendants as to the use of the hall for a rehearsal, but a rehearsal in which the plaintiff took part was held, without objection, in the afternoon of the day fixed for the concert. The plaintiff, after the rehearsal, placed the instrument he had been playing in an ante-room in a secure position, but without any notice to the defendants or their hall-keeper. In the evening the hall-keeper, in the course of his duty, went to the ante-room to turn on the gas at the meter and had to move the instrument, which he then placed in another part of the room as carefully as he could. The instrument fell and was damaged. Held by Mathew and Collins, J.J., that there was no bailment between the parties, that it was not within the scope of the hall-keeper's employment to take care of the instrument, and that there was no evidence of negligence on the part of the hall-keeper.

JEFFREY v. ST PANCRAS VESTRY.—It was decided by Charles and Collins, J.J., that where a steam-roller, though lawfully on the highway, constitutes a nuisance, the owners are liable for damage caused thereby, though they have not been guilty of any negligence. It is a question for the jury in each case whether a steam-roller was or was not a nuisance on the occasion complained of.

BRAZIER v. CAMPBELL AND ANOTHER.—It was decided by the English Court of Appeal that where, under the terms of a will, one of two trustees carries on a business as "agent for the trustees," and employs the co-trustee to purchase goods for the business, and to pay for them by cheques signed by both, the "agent for the trustees" is liable for the price of the goods obtained on credit by the co-trustee from a person who had in previous transactions been paid by these cheques.

THE "KNARWATER"—A sailing vessel in tow of a tug and a steamship were approaching one another in a fog. The captain of the steamship heard a whistle five points on his starboard bow, and two minutes later he heard a second whistle which he considered to be broader on his starboard bow and still a considerable distance off. He kept on, and after that heard another whistle more ahead, whereupon he stopped and reversed his engines, and gave three blasts. He then saw the other vessel about a hundred yards off and a collision took place, and the sailing vessel sank. Jeune, P., decided that the sailing vessel alone was to blame. Held by the Court of Appeal, applying the rule laid down by the House of Lords in "The Ceto," that the captain of the steamship ought to have stopped on hearing the second whistle inasmuch as he had failed to prove (the burden of proof being on him) that there are no indications of such a kind as would lead a seaman of reasonable care and skill to the conclusion that the vessels would pass well clear of one another without danger of collision, and that, under the circumstances, both vessels were to blame.

THERE IS SOME STYLE about a Brace end like this. It has an air of Durability and Perfection. The Drawer Supporter is an entirely new innovation that will hold like a bull-dog, not a tin-toy. It's a trade bringer to every store who handles it. DOMINION SUSPENDER COMPANY, United States, NIAGARA FALLS, Canada.

Mercantile Summary.

ONE hundred and three boats, having an aggregate capacity of about 175,000 net tons, are wintering in Cleveland, on Lake Erie. The number of boats is less than a year ago, but the capacity is greater.

JAN. 10 is the date now fixed for launching the "North Land," second of the Northern Steamship Company's big twin-screw passenger ships, at the yard of the Globe Iron Works Company, Cleveland.

THE number of loaded railway freight cars that crossed Detroit River between Canada and Michigan during 1893 was: west-bound, 183,618; east-bound, 121,323; total, 304,941. At the rate of fifteen tons per car these could have carried 4,574,115 tons. The number crossing in 1894 is estimated to be much less, but the figures are not yet published.

AMONG the Americans spending part of holiday week at the Windsor Hotel, in Montreal, were Mr. Nicholas Fish, son of the well-known Hamilton Fish, one time Secretary of State for the United States. Mr. Fish is a prominent banker of New York city, and is largely interested in various railroad corporations. Another party is that of Mr. John G. Moore, who is senior partner in the big New York banking firm of Moore & Schley, and is a director of the Western Union and other large American concerns.

Mercantile Summary.

COMING from Walkerton, where he had a good record, James Brocklebank paid $7,000 cash for the hardware stock of W. Harkness in Toronto Junction. This was in 1890 or 1891. He has unfortunately made some heavy losses, and as trade was dull with him of late, and his health poor, he has been obliged to assign.—An assignment has also been made by Frank R. Gassion, tinsmith, of the same place.

THE Government of Russia has given to the Bethlehem Iron Co. of Pennsylvania a contract for the armor of two new battle ships. The contract, involving about $4,000,000, calls for more than 12,000 tons, and means a full year's work in the armor department. It was secured over fourteen competitors, including Krupp, and the Americans are proud, as they may well be, of their success.

AN assignment has been made by G. L. Stevens, general storekeeper at Enniskillen, who tried to compromise at 35 per cent. some weeks ago, but failed to induce his creditors to comply with his request.—An assignment has also been made by H. J. Gilbert, who has been a dealer in boots and shoes in Hamilton since July, 1889, at which time he purchased W. F. Wood's bankrupt stock, amounting to $4,400. On this purchase $1,000 was paid in cash. Gilbert's assets and liabilities are now about $7,000 each.

Mercantile Summary.

AT Toronto Junction, on the 10th inst., will be sold the machinery and stock which formerly belonged to the Barnum Iron and Wire Works Co. Mr. C. C. Going, of that place, is the vendor's solicitor.

THE superintendent of the New York State department of Public Works has completed his report on the operation of the State canals for the past season. The number of tons carried on the canals during 1894 was 3,882,550, as follows.

	Tons
Erie	3,144,144
Champlain	550,272
Black River	56,034
Oswego	98,843
Cayuga and Seneca	33,270

Compared to 1893 there is a loss of 449,403 tons. The past season's tonnage is the smallest that has been transported upon the canals any year since 1859.

AN American serio-comic journal has the following story, which illustrates what has possibly happened to many a business man in the United States and Canada: Registrar—"To what cause, then, do you principally attribute your insolvency?" Bankrupt—"To Mr. Smith's success." Registrar—"Smith, Smith. Is he a business rival?" Bankrupt—"No, but they were my nearest neighbors, and my wife would try to live up to them."—*Ally Slopper.*

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

THE Oromocto Coal Mining Company elected the following officers on 28th ult, says a Fredericton, N.B., despatch: Edward Moore, president; Wesley B. Nason, vice-president; Parker A Nason, secretary. Luke C Dewitt, treasurer.

AFTER giving two chattel mortgages, W. P. Essex, proprietor London Show Case Works, is asking an extension of time.——An assignment has been made by Geo. Wholtman, who is a Peterboro' grocer.——About the middle of the year 1887 J. L. Hagerman removed from Ravenshoe to Sutton, where he had a small store. For some years in the latter place he added to his capital, and in 1892 he was estimated to be worth $10,000. His assignment now is considerable of a surprise.

THE agent of the Dominion Government savings' bank at Sydney, Cape Breton, D. G. McDonald, of the firm of McDonald & Hanrahan, is a defaulter to quite a large amount, according to a Halifax despatch. A special agent from Ottawa discovered the defalcation and McDonald was arrested and tried under the Speedy Trials Act by Judge Dodd. Previous to this friends are said to have made good the deficiency, and McDonald pleaded guilty and was sentenced to three months in jail. The affair has created quite an excitement throughout Cape Breton.

IT is something like eleven years since Crozier & Fleming opened a general store at Orangeville, having a capital of $2,000 between them. For some time the firm did a prosperous business, but lately lost ground. A statement of their affairs has recently been made in which they claim to have a small surplus over liabilities of $8,000, and have assigned to Henry Barber. This showing is entirely different from the statement made by them in March last, when they claimed a surplus of some $16,000.——J H Notter, grocer at Owen Sound, after some weeks' effort, has failed to arrange a compromise and now he assigns.——In June, 1893, W Gordis & Co succeeded Michael Kane in a grocery store at St. Catharines, but having no experience in that line of business and possessing but little capital, few will be surprised to hear of his assignment.——It only required one year for Robt. Sellers, dealer in furniture at Walkerton, to lose all his capital and assign. He was a stranger in the town when he arrived to take up that business.

THE Dominion Brewery Company, Limited, and the Conger Coal Company have each sent us copies of their calendars for 1895.

"THE MARITIME WRAPPER CO." is the somewhat peculiar style under which Messrs. C. F. Titus, Charles Dickinson and John Dickinson have begun the manufacture of ladies' wrappers in Woodstock, N.S.

THE good old steamer "Magnet" will be rebuilt during the winter at Sorel, Que. Her berth capacity will be increased to 160 passengers, a new engine put in, the cabin refitted, and patent feather paddle wheels put in.

AT Halifax the customs' receipts for December were $2,094 less than in the previous December, and for the whole year $63,881 less. At St. John the receipts from customs for the year were $849,208 as compared with $779,797 in 1893.

FOR Nova Scotia the mercantile failures last year were 125 as against 127 in 1893; liabilities of $619,802 as against $807,886, and assets of $344,429 against $414,007. In Prince Edward Island the failures were 7 as against 20 last year; liabilities, $73,013 against $101,302; assets, $46,316 against $56,000.

THE Montreal *Star* hears it stated on the street that a change is to take place in the directorate of the Richelieu and Ontario Navigation Company at an early date. It is said that one or two of the present directors will retire, their places to be filled by prominent railway men. The selling of a large block of the company's stock last week is supposed to have been for a director.

HOFFMAN, WEGENAST & Co., manufacturers of furniture at Waterloo, disagreed, and dissolved in 1889, when Hoffman retired. Wegenast & Klippert continued under the style of Wegenast & Co.; both were industrious and good workmen, but their capacity for merchandizing was not of the highest order. Last year they suffered heavily by bad debts, a result of a jobbing business, and now they assign.

YESTERDAY evening a meeting of the creditors of H. Bradford Clark, dealer in upholsterers' supplies, Toronto, took place, but before going to press we could not learn what took place. He lost heavily by the Hault Mfg. Co. at Ingersoll. This, with other smaller losses, has brought about his present difficulty.——Teetzel & Smith, tailors, Toronto, assigned two weeks ago, and now the former offers 50 per cent. to creditors. This will probably be accepted if security is forthcoming.

A SOMEWHAT important retail dry goods firm in the northern section of Montreal, C. Vallee & Frere, find themselves overstocked, and also with a portion of their capital locked up in real estate, and are seeking an extension from their larger creditors.

AN Ottawa plumber named O. Higman has assigned. He made a specialty of sanitary goods, and formerly did business under the style of the Sanitary Plumbing Company, and as such got in trouble in 1892, and had to make some arrangement with his creditors.

A DISSOLUTION has taken place in the old established wholesale fur house of Gnaedinger, Son & Co., Montreal. Mr. Joseph Bourdeau, a partner for nigh a quarter of a century, retires, and is replaced by Messrs. F. G. and J. T. Gnaedinger, the business being continued under the old style.

R. J. MELVIN, of St. John, N.B., a hotelkeeper who has been in weak standing, has made an assignment.——In the same city, J. McConnell, a small grocer, has done likewise. The liabilities in both cases are local.——G. A. Harvie, a carver and gilder at Windsor, N.S., has assigned, making certain preferences.

AN extension of time is asked by Boisseau & Beland, jobbers in small wares and fancy goods, Quebec. They propose to pay in 3, 6, 9 and 12 months. Liabilities are about $15,000, with an apparent surplus shown of about $5,000. There has been some lack of harmony between the partners and a dissolution is arranged, the liabilities being assumed by a new firm under the style of Boisseau & Marcotte.

THERE are few business failures to be noted in the Province of Quebec this week outside the cities. E. Denis, general dealer at Rigaud, reported failed a fortnight ago, is settling with creditors at 75 cents in the dollar.——A. Plamondon, baker, Ancienne Lorette, has assigned, with small liabilities, altogether in Quebec.——A. Guerette, dealing in teas at Levis for the past two years, has made assignment of his estate, and owes about $2,500.

LEAVING Wiarton, where he made money, in 1892, Jas. McKim went to Union, B.C., where, with some members of his family, he opened a general store under the style of James McKim & Sons It is evident that this change of situation was not an advantageous one. They have not improved their position in any way, competition being heavy. Indeed they have made an assignment.——At New Westminster, A R. Tolmie's hotel is closed and he is reported in financial difficulty.

THE total transactions at the Halifax Clearing House for the year 1894 amounted to $58,778,698, at the rate of over $1,100,000 a week.

AN offer of 40 per cent. in thirty days is made by R. G. Gaucher, hardware dealer, Montreal, reported insolvent several weeks ago. The likelihood is that creditors generally will accept The liabilities are put at about $20,000

THE customs receipts at Montreal for December were $417,103, as compared with $439,133 in the same month of 1893. The total customs revenue at that port for the year 1894 was a million less than in the previous twelve months, viz., $6,088,000 against $7,038,000.

A GOOD thing to think of at the first of the year is to renew the subscription for your trade paper. If you are still in arrears for THE MONETARY TIMES, for instance, make a memorandum before you lay this paper down to send a post-office order for renewal.

THE report of Dr. John T. Nagle, registrar of vital statistics for the city of New York, shows that the death rate in 1894 was the lowest since 1814, which was the lowest in the history of the city. There were 41,212 deaths. The rate was 21.05 to the 1,000. In the same period there were 17,388 marriages and 55,643 births.

MONTREAL failures for the week are of small importance. A small grocer of two years' standing, named T. Bousquet, has assigned.——T. Belanger, who came from the country last spring to start in the retail tea business, has already come to grief. He only owes $700.——J. B. Tremblay, a small trader in St. Henry suburbs, has been asked to assign.——E. D Baron, tailor, whose trade has been interfered with by street widening improvements, has had to assign, with liabilities of $3,274.——Telesphore Provost, retail hardware, is seeking a compromise at 35 cents on the dollar; liabilities not stated.

IT is customary, we beg to remind the Oshawa *Vindicator*, to give credit to a journal which first publishes any matter of such interest as to be deemed worthy of republication in another journal. In its issue of 2nd January, the Oshawa paper copies part of Mr. Easson's paper contributed to the Christmas number of THE MONETARY TIMES, and applauds the skill of the author, but never a word does it say about where the "interesting sketch of Oshawa" was found. The Toronto *Globe*, *Telegram*, *World* and *Empire*, in copying portions of Mr. Easson's paper, were not above saying where they got it.

With a view to making the attractions of Toronto and vicinity better known to American tourists, a petition has to-day been sent to the mayor requesting him to call a public meeting to consider the best means of attaining that object. This petition is signed by a number of wholesale firms, financial men and manufacturers. It suggests the forming of an association to secure further hotel accommodation of a first-class kind, the advertising abroad of the attractions of our surroundings, the development of our park system and the improvement of our Island park. The suggestion is made to the mayor to call the meeting at the City Hall, on Thursday evening next.

His Honor Joseph E. Macdougall, judge of the county of York, before whom an investigation into Toronto municipal affairs has been for some weeks going on, has made his report to the mayor. He names three 1894 aldermen, three ex-aldermen, a street railway man and a clerk in the City Hall as having been corruptly influenced. The report concludes as follows: "It has been proven clearly that improper relations have existed between members of the council of the city of Toronto, and contractors and persons and corporations holding contracts and franchises with and from the city; it has been equally well established that contracts and franchises have been obtained by illegal, improper and corrupt means, and I think that it is a necessary corollary to these two facts that the public business of the said city and the good government thereof have been seriously affected by the existence of these practices."

HIDES AND LEATHER.

The month of January does not, as a usual thing, witness a marked advance in the price of hides, but the year 1895 had barely come into existence when the Toronto hide market took an upward turn. Some of the merchants who operate in country hides in Toronto have for the last few weeks been engaged in filling orders taken some little time ago. Had it not been for this fact prices to butchers would doubtless have been advanced a fortnight previous. The strength of tone is derived almost entirely from Chicago, and buyers who have just returned from that city report hide cellars there as bare of stock, while cattle receipts are very small; those of the week ending Dec. 29th amounted to but 31,988 head. When compared with the receipts during the last week of 1893 we find a decrease of something over 14,000 head.

Quotations on the local market now stand as follows green, cows 4c per lb., steers 4½c; cured and inspected 5c. Four months ago butchers were receiving but 3c per lb. for cows' and 3½ for steers' September hides. The January take-off is probably not worth within 50c. per 100 lbs. as much as that of September, and yet we find merchants now paying $1 per 100 lbs. more for green hides than they paid in September. This advance is not characteristic of one Canadian market alone. A Winnipeg market report says: A good many hides have been bought in the country of late at firm prices and competition is keen. From 2½ to 2¾c. has been paid for green frozen hides here, flat rate, which shows a further advance. Our Montreal correspondent writes of a small receipt and good demand with values held firm.

The stocks held by Ontario tanners are not generally considered large. We know of three extensive tanneries that have good supplies on hand, but beyond these it is more than probable that tanners have but comparatively few hides in store. The tanners of the Province of Quebec are said to hold exceptionally light stocks, and this is the cause of much congratulation among their western confreres, who are accustomed to regard the Quebec men as the prime cause of low values. But, although values are so stiff in the hide market, there is no rush of tanners to secure stock. Very naturally they are averse to buying dear hides until they become assured that their leather can be sold at something like remunerative prices. At present manufacturers are making only feeble enquiry for stock, and it is impossible to determine the real character of the leather market In a few weeks' time, when operations upon the spring cut are under way, it will be possible for tanners to decide upon their future course, and the hide and leather market may be expected to come more in harmony one with the other.

MAILING CASES

We beg to notify the trade that we have been appointed sole agents in Canada for the United States Mailing Case Co. and the Boston Mailing Case Co. These two companies control all the mailing case patents. By the use of these cases you can send samples of liquids through the mail. Circulars giving full particulars sent on application.

THE SITUATION.

The Americans are waking up to the fact that much has been done on their side of the lakes to deplete the rich fisheries from which they have drawn such store of wealth in the past. To the use of gill and pound nets the final disappearance of the herring at some points on the west side of Lake Erie, to a distance of twenty miles, is attributed; and the demand for new and less destructive methods to be enforced by legislation is heard. The herring is a fish which takes a wide range in its excursions, and any unduly destructive modes of fishing in any part of the lakes deteriorates the fishing in every other part. In this way Canada has suffered from the damaging modes of fishing pursued by Americans on their own waters. It is this community of interest which points to joint surveillance in the form of common regulations. In all such cases, the fishermen are their own worst enemies; so intent are they on present gain that they are always disposed, if not restrained, to destroy the fishing on which their calling depends. And when salutary laws, necessary for the preservation of the fish, are enforced, they cry out against the injustice of the law and the harshness of its administration. This is true of the fishermen of both countries if left to themselves. The true remedy is that now advocated by Americans, stringent laws against abusive methods. It is not the herring alone that has suffered; every other kind of fish has decreased from injudicious fishing. Hatcheries may do something to restore damaged fisheries; but the true dependence cannot even be on such regulations in the pursuit of the fishery as have been found necessary for the reproduction and preservation in their proper waters of available supplies of fish.

Of the two suspended banks in Newfoundland, one, the Union, is pronounced by a legislative committee to be solvent and able to pay its debts in full if time be given. The committee recommends that the right be taken by the legislature from note-holders to sue for immediate payment. But it is contended that these notes can be utilized, and to render this the more easy, the Government is to give them a qualified endorsation, that is, to guarantee 80 cents on the dollar. In the same way the notes of the Commercial Bank are to be guaranteed to the extent of 20 cents on the dollar. What sort of a measure of value will the notes of the Commercial, with a 20 per cent. guarantee and on unknown residium behind it, be? When this guarantee is given, the notes for which specie cannot be got ought to be made to bear interest from the time of suspension to that of payment. But there is not much use in talking about interest when the outlook for the capital is so bleak. The notes of neither of the banks under suspension are likely to be made to circulate at much above the Government guarantee, if so high. The Government's promise to pay at some future time is not equivalent to present payment. It would not be surprising if the notes of the Union fell to 75 cents on the dollar, while anything in the way of depreciation is possible of the Commercial Bank. That the leader of the Opposition advocated the Government endorsation of the notes of these banks to their full amount, shows the recklessness of the Island politicians, which has, in fact, ceased to excite surprise. A recent development of the financial troubles of the Island is a run on the Savings bank, a rumor having got afloat that the Government had pledged the securities held for the depositors for a loan of $500,000. The directors of the Commercial Bank, who were arrested for publishing false statements of its affairs, have been before the magistrate, but the case is not finished.

Whenever Mr. McCarthy appears on the public platform he shows a determination to stick to his text. He proclaims his object to be to get as near to Free Trade as possible, which means that he does not expect to make the whole distance. At Picton, last Friday, he dwelt on the deficit in the revenue for the first five months of the year, and said that this rate had only to be continued to make the total deficit for the year $4,500,000. In some way, it is clear, we may have to raise more revenue. If the possible deficit be realized, how is the gap to be filled? The restoration of the sugar duties, in an equitable form as between raw and refined, would probably be the easiest solution of the problem. But would this step be taken? Great credit was claimed for sacrificing the sugar duties, and there are plenty of people who would announce the discovery that almost anything else was a better object of taxation. A large deficit would raise a question of restoring, in whole or in part, these duties; but whether they would be restored is a question on which it would, at present, be useless to speculate.

For improving the canals of the State of New York, the constitutional amendment recently adopted virtually secures $20,000,000. The Americans have done wonders with the little Erie Canal, bearing on its seven feet of water boats carrying 250 tons, and the New York route has successfully competed with our magnificent waterways and greatly superior connecting canals. One of the conditions of this success has been the cheaper carriage on the lake portion of the route between the West and New York. A drawback to our system has been the limited extent of a single link in the canal chain, the Beauharnois Canal, which has only nine feet of water. When we get a continuous navigation of fourteen feet we shall be in a better condition to compete, but even then Canada will still be at a disadvantage on the Upper Lakes, where the Americans use larger vessels than a fourteen feet canal would admit. For internal purpose, the two canal systems with the lake extension will settle the problem of relative cost of freight; but even that will not, under all circumstances, prove an absolutely determining element. On produce exported to Europe, relative ocean freights play a part sometimes quite as important as the internal freight; and to be in a position to determine which route will be most favorable we must know the total relative cost of ocean as well as the internal

freight. It is quite clear that when the $20,000,000 is expended in improving the New York State canals, the conditions of the problem will be changed. To meet that change we shall have our canals with 14 feet of water at all points, where auxiliary canals are necessary, between Lake Superior and Montreal. That the American competition will be less severe in the future than in the past, we have little warrant to conclude. If we look at the past we shall find that relative cheapness of internal freight alone fails to give Canada the palm of victory in carriage from the Western prairies to Liverpool; and there are reasons to fear that this may be just as true in the future.

Sir Cecil Rhodes, Premier of Cape Colony, who, in common with our own Premier, received a new year's gift of knighthood, is said to favor closer commercial relations with Canada, and it is added that steps are being taken to sound public opinion in the Colony on the question of steamship communication with Canada. If favored by the Chambers of Commerce of the Cape, a proposal for steamship connection between the two countries is likely to receive attention.

A story that a mob took charge of the Newfoundland Assembly, on Wednesday night, and refused to allow the Opposition speakers to be heard, if true, is deplorable, if false, is atrocious. Some English journals see in the confederation of the island with Canada a remedy for the present ills. The trouble not being even half political, is not one which a change of political relations would not wholly meet. Such an union might be expected indirectly to improve the commercial aspect not less than the political. The opinion expressed in England that if any question of Newfoundland joining the Confederation is to present itself for decision, it must come from Newfoundland, not from Canada, is one that will find general acceptance in this country. Whether Canada would take the responsibility of accepting the union if union were offered, would depend a good deal on the conditions which might be obtainable.

SHIPMENTS FOR SUMMER TRADE.

The winter is now but barely beginning and in many parts of the country the first snow of the season has only recently fallen, and yet with the new year the warehouses begin making shipments for the summer dry goods trade. In part, an excuse may be found for this misdating of the spring season. Manufacturers of blouses, underwear and other fabric articles must receive their raw material at an early date if they are to be in the market for the spring trade of 1895; and in supplying the demands of these industries the wholesale houses are pursuing only normal business methods. But to send the retailer goods with paper therefor dated from April is inexpedient and foolish. Every wholesale merchant is willing to acknowledge the folly of this custom, but none appears brave enough to depart from it. Many events may happen within eight months. A retail firm which is a good enough customer in December, may in the following August be unsafe for credit. Many a retailer who knows that he is treading on dangerous ground, orders freely when certain that his liabilities will not fall due for eight months. He flatters himself that within that time his finances will improve, that he will be able to sell a part of the stock he has received, and when August comes around all payments will be met. The unforeseen happens, and assignment follows, and both the retail and wholesale trade are sufferers in consequence. There is but little likelihood that this custom will pass away; it receives encouragement at the hands of the larger wholesale houses. For under the present conditions of trade only those with considerable means can engage in the wholesale dry goods business; not every one can buy goods and distribute them all over the land, waiting one-half of the year before any returns for the expenditure is received. Probably no other feature in the trade has helped to close more warehouse doors than this custom of "dating ahead," and certainly none has been more instrumental in calling forth the importer who sells by order only.

BETTER COUNTRY ROADS.

It is gratifying to be led to infer, from the latest bulletin of the Ontario Department of Agriculture, that the meetings of farmers' institutes in the province are likely to possess increased interest and value during 1895. Not only are the subjects to be introduced (by specially informed delegates) and debated at these gatherings those of a kind immediately connected with the farm and the dairy, the orchard and the stable, but special attention is being given to considering the improvement of our country roads, the draining of fields, and to debating how best to keep the sons of farmers on the farm. These are matters of moment, for while, as we learn from both Canadians and Americans, the condition of the ordinary country road in Ontario is better than is the case in either Ohio or New York State, there is still much improvement to be desired. The country is losing a frightful sum every year by reason of poor roads.

In the counties of Prescott and Glengarry, Carleton and Lanark, Mr. P. Mahon, of Aberfoyle, will lecture to the institutes during January; J. C. Judd, of Morton, to the group of counties from Durham to Addington; J. F. Beam, of Black Creek, to those of Ontario, Victoria and Peterboro'; Alan Macdougall, C.E., of Toronto; James Sheppard, of Queenston; A.W. Campbell, C.E., of St. Thomas; Wm. Dickson, of Attwood; Alf. Hunter, of Harrowsmith, and Isaac Ussher, of Thorold, are other delegates from the Good Roads Associations of Ontario to the farmers of the counties lying west of Toronto. We trust their efforts may result in great benefit.

A WAR OF INDUSTRIES.

The people of Quebec, while they have of late shown marked ambition in the direction of industrial enterprise within that province, seem still to cling to the notion of paternal government, by which the French Canadians were so long ruled, and they want the Provincial Government to help this and that commercial enterprise. Just at present the Hon. Mr. Taillon, who is Provincial Treasurer, is withstanding a perfect siege of this sort. The finances of the Province of Quebec are limited; there is not enough in the treasury to justify yielding to such demands, and we trust Mr. Taillon will be firm. Mr. E. P. Bender is seeking $20,000 a year as a bonus to guarantee the interest on $500,000 for twenty years, which sum he proposes to have invested in an abattoir scheme at Three Rivers, Que. Mr. Bender's argument is, that as the Imperial authorities have placed such restrictions upon the exportation of live cattle, there is nothing left but to have the cattle slaughtered on Canadian soil. Further than this the slaughter of cattle in this country would give employment to a large number of Canadians, while the hides, tallow and other products incidental to slaughtering would all encourage trade in Canada. But to carry on a vast export trade requires a great deal of capital, and Mr. Bender, in consideration of the good which he thinks his scheme will accomplish for the people of the province, makes bold—Mr.

B. is a bold man—to ask the Government to insure the security of the industry during its initial stages.

However, Mr. Bender is not the only man with a scheme. The Dairy Association of the Province of Quebec recently decided that they wanted $20,000 a year to assist the butter export trade, which has now dwindled to small proportions. The idea is to enable exporters to compete in the British markets by granting a bounty of so much per pound upon butter sent out of the country. Both parties are ready to admit the poverty of the Provincial finances, but suggest that retrenchment can be made in other directions, and intimate that the bonus granted to the culture of beet roots might be withdrawn. And here it is that a third industry is brought into the war. However, the probabilities are that the bonus for the growing of beet roots will be renewed for another year, and that other claimants will have to wait a while longer before their schemes are realized.

NEW BRUNSWICK WOOD TRADE.

We have received Mr. J. B. Snowball's Miramichi Wood Trade Circular for the year just past, which is a resume of the wood trade of New Brunswick and Nova Scotia with trans-Atlantic ports. He has little that is encouraging to state respecting the operations of the past season. In the exports from New Brunswick, there is an increase this year over last of nearly fourteen millions sup. feet. Miramichi, Dalhousie and Moncton show increases; St. John, Bathurst, Richibucto and Shediac show a marked decrease. In Nova Scotia, the export has decreased about three millions sup. feet. St. Mary's River and Liscomb have more than doubled their exports, while every other port in the province shows a decrease. Of the export from Halifax three and a-half millions sup. feet was hardwood.

The advance in prices which usually accompanies the autumn increase of insurance rates was not realized, on account of the heavy failures in the trade in England, which caused several cargoes to be forced on the market and sold below current values. The winter of 1893-4 was the most severe on record for forest operations in New Brunswick. The result was a comparatively small output of logs, at a maximum cost of production. The present stock of merchantable deals and logs on hand, on the Miramichi, only 4,200 standards, "is the smallest we have ever had, and less than a third of an average stock. If we have any revival of River Plate and United States business, it will leave the stock to be placed in the European markets in very moderate compass."

Two cargoes were shipped from Chatham, N.B., to Rio Janeiro the past season, and several cargoes spruce deals have been shipped from St. John to the United States ports, at better profit than Britain yielded. This was brought about by the recent abolition of the United States import duty on lumber. Twelve cargoes were shipped from the Miramichi to France during the past season—all to Marseilles—in spite of the import duty; "but now that Canada is about to enjoy the favored nation clause under the recently ratified treaty, a large revival of our exports to that country is looked for."

St. John shipments of sawn lumber, which were 146 million feet in 1892 and 156 million feet in 1893, were only 153,478,000 feet last year, and the export of birch timber, 5,015 tons, was slightly reduced. Liverpool, Ireland, and Wales were the principal points of destination for these. From the Miramichi River the shipments of 96 million superficial feet were the largest since 1889, occupying 128 vessels of 101,951 tons. J. B. Snowball, W. M. McKay, and D. & J. Ritchie were the principal shippers. The total New Brunswick shipments, 326 millions, have been exceeded only once in ten years past. Nova Scotia shipments from Parrsboro were large, 89,519,000 feet, which is more than Halifax sent. The total from that province was 106,327,000 feet, which, while smaller than 1893, is larger in any year for a dozen years previously.

THE MUNICIPAL INSURANCE IDEA.

It must not be overlooked that the notion of towns and cities doing their own fire insurance has found lodgment in the minds of various town councillors in the Province of Ontario. We do not believe that all the councillors who speak in favor of municipal insurance believe in it—some of them are too intelligent for that. They use the scheme, however, as a "bluff" to frighten the Fire Underwriters' Association when it makes demands upon municipalities for better fire protection. Guelph and St. Thomas, Ottawa and London, have each been debating the scheme in council chamber, and not a few other places besides. Since we last wrote upon this subject we find it made matter of discussion in St. Thomas. The council of that city appointed a committee to consider the matter. This committee reported last week that inasmuch as only $2,694 had been lost by fire in St. Thomas last year, and less than $8,000 per annum for several years, the citizens could save $60,000 or $65,000 a year (which they now pay to insurance companies) by doing their own insurance. Fortified by arguments used by promoters of like schemes in other cities, notably Toronto and Guelph, the committee considered that "the profits reaped by the companies through fire risks here were ample without necessitating the extra expenditure of putting in an electric alarm system," as the Board of Underwriters asked the corporation to do.

Here is the way in which an Old Country authority, the London *Review*, laughs at these dangerous schemes: "The good people of Toronto intend to establish a municipal bureau of fire insurance. The corporation claims that about £150,000, roughly speaking, is taken out of the city of Toronto annually by those wicked institutions, fire offices. The municipality, therefore, thinks it would like to save this money to the ratepayers, which is very good and very proper indeed. Now, therefore, do they propose to have a municipal fire office, and everybody is to be insured, of course at the lowest possible rates, the general assets of the city to be liable for losses. We should very much like to see this done once. It has really become necessary that an object-lesson should be given of 'how not to do it' in the shape of a city managing its own fire insurance. There are such endless possibilities visible to the instructed eye, that it would be really very interesting and valuable in many ways to see the experiment tried for once. Those who know the enormous profits (?) now being made in fire insurance business would rather hail than otherwise the experiment on the part of the city of Toronto, and the abstention of fire insurance companies from taking any risks from that place for twelve months would, we think, be a most valuable experience both to the offices and to the municipality. It is curious how these ideas crop up from time to time—how wise they are in theory, and how utterly ridiculous they would turn out to be in actual practice."

THE UNITED STATES CURRENCY.

Commenting on the reports of United States Secretary Carlisle and Treasurer Morgan in their references to the currency position, the London *Economist* notes that both these documents point out that one of the causes of the weakness of the Treasury has been the insufficiency of the

revenue, the receipts for the last fiscal year falling short of the expenditure by $70,000,000, and in five months this year over $21,000,000. That there is a feeling of uneasiness in the public mind is shown, according to Mr. Carlisle's report, by frequent presentation of notes for redemption in gold not desired for export. That this uneasiness has not yet [22nd Dec.] abated, "is shown by the fact that the gold which the Treasury obtained through the recent issue of bonds is again being rapidly withdrawn from it, not only for export, but also to increase outside holdings."

It is quite evident, therefore, the *Economist* adds, "that the Government paper currency is discredited, and yet it is upon this currency that the new system of bank issues is sought to be based. The bank notes are to be made payable in 'lawful money of the United States,' there being no obligation to redeem them in gold. In other words, they are to be redeemable in greenbacks or Treasury notes, and it is of such Government paper that the so-called 'guarantee fund' is to be composed. It is thus upon the stock of gold in the Treasury that the ultimate convertibility of the whole of the largely augmented mass of the paper currency is to depend, and nothing is to be done to insure either that a large portion of the revenues will be paid in gold, or that the Treasury will be relieved from the task of supplying whatever gold is needed for export. And if the present task of the Treasury is beyond its power, we cannot see how the position is to be bettered by increasing its responsibilities without making it any fitter to discharge them."

AMERICAN RAILWAY BUILDING.

Railway construction in the United States, which has been declining for several years, in the year 1894 was greatly limited in extent, amounting to only 1,919 miles of new road, which is the smallest aggregate for twenty odd years last past. And surely there was reason for a decline of recent years, for the feverish haste and unreflecting folly with which the Americans built railways at the rate of five and ten thousand miles a year, many of which could by no possibility pay, was one of the astonishing things of that astonishing country.

In the year	1887	there were built	12,896	miles	railway.
"	1890	"	5,670	"	"
"	1891	"	4,282	"	"
"	1892	"	4,178	"	"
"	1893	"	2,635	"	"
"	1894	"	1,919	"	"

The *Railway Age*, from which we get these figures, reminds us that the United States now boasts the enormous extent of 179,672 miles of completed railway, and of this 54,300 miles has been added in the last ten years. Illinois still holds her position as the State of greatest railway mileage, the additions of the past year bringing her present total to 10,576 miles, which is over 1,000 miles more than that of the next highest.

There are seven States which have each 8,000 miles of railway or more. They are these:

Illinois	10,576	miles	road.
Pennsylvania	9,564	"	"
Kansas	9,272	"	"
Texas	8,931	"	"
Ohio	8,652	"	"
Iowa	8,513	"	"
New York	8,150	"	"
Total	63,658		

These seven great States now have 63,658 miles of railway, or over 35 per cent. of the entire mileage of the country, while they contain less than 20 per cent. of the total area (not including Alaska), and nearly 40 per cent. of the population. But these ratios must greatly change as unpeopled country is settled.

THE DETROIT RIVER.

An accurate report of the dimensions of the great stream of traffic that makes the River Detroit, between Lakes Erie and St. Clair, so busy a strait, cannot easily be obtained. The customs regulations do not secure the necessary statistics. But fortunately the United States laws require army engineers in charge of river and harbor improvements to report upon the commerce of the districts in which they work. By reason of this provision a summary of Detroit River traffic for several recent years has been furnished by General O. M. Poe, U.S. engineer. This report for 1893 is made up by Mr. H. Kahlman, of Detroit, assistant engineer, who has had local charge of Detroit River improvements, from reports furnished by collectors of customs. The report gives the number of vessels passing Detroit in 1893 (calendar year) as 33,165, of 23,091,889 registered tons. According to this same report the number of vessels cleared from all collection districts on the chain of lakes in 1893 was 51,649, of 34,571,208 registered tons. These statistics do not include Canadian vessels. The report in full of the cargoes carried is as under:

COMMERCE OF DETROIT RIVER DURING THE SEASON OF 1893, COMPRISING STAPLES ONLY, AND ONLY SUCH STAPLES AS CLEARED FROM UNITED STATES PORTS.

Commodities.	Quantities.	Tons.
Iron ore and finished iron		6,800,521
Coal		6,921,303
Copper ore		87,993
Wheat ....bushels	70,516,116	2,137,155
Flour ....barrels	9,528,794	952,879
Flax seed ....bushels	4,624,154	140,125
Corn .... "	57,600,309	1,612,808
Malt, barley and oats .. "	28,153,832	633,961
Stone		219,695
Salt....barrels	443,786	68,290
Provisions		325,500
Lumber ....feet B. M.	929,081,000	1,393,621
Shingles ....pieces	28,033,000	4,680
Laths .... "	16,310,000	3,200
Cement ....barrels	740,506	105,786
Unclassified freight		1,640,682
Telegraph poles....pieces	171,480	21,200
Cedar posts.... "	3,401,680	22,500

Number of vessels, 33,165 (exclusive of Canadian vessels).

If the figures under the head of tonnage given here represent the actual cargo of the boats for 1893, we have the following enormous figures of freight moved: Grain, and flour reduced to grain, 203,914,027 bushels; iron and copper, ore and finished, 6,888,514 tons; coal, 6,921,303 tons; wood in various forms, 1,445,271 tons; structural materials, salt and other merchandise, 2,359,953.

Taking the duration of the navigable season at seven and a half months, this number of floating craft given would mean that a steam or sail vessel of 700 tons average burthen had passed Detroit every ten minutes night and day from the middle of April till the close of December.

The visitor, as he watches from the banks of this beautiful stream the swift and graceful steel liner or the slow and ugly whaleback—the side-wheel passenger steamer or the steam-barge with trailing argosy behind her, wonders, naturally enough, where all the freight comes from or where it all goes to. The iron and copper ore come down from Lake Superior; the salt from the Saginaw valley of Lake Huron; the breadstuffs mostly from ports on Lake Michigan, some from Duluth; the lumber from Escanaba, Ludington, Bay City, and a dozen other ports; the provisions from Chicago mainly, and the thousands of telegraph poles, the millions of cedar posts, from Michigan and Wisconsin forests. These commodities are all eastward bound. But the boats, whether of three hundred or three thousand tons each, that throng this wonderful stream, must have something to carry westward again if it is to be had, and so the coal goes from Buffalo or Cleveland, *thirty thousand tons a day*, to ports west of Lake Erie, and seven thousand tons a day of goods from the East and South.

THE A.O.U.W. AND THE I.O.F.

The *Canadian Workman*, published at Orillia, makes a great ado over our reference to the Order of which that journal is the organ. THE MONETARY TIMES is charged with misrepresentation, and many other long words are flung at its devoted head, such as "vehemently opposed to beneficiary societies," and "deliberately false comparison," and "unjustifiably attempted," and "*ipse dixit*," in italics, and "Oronhyatekha's." It declares that we are writing on behalf of the old line insurance companies, and "we venture the statement," says this venturesome organist, "that the article in question is also well paid for by the society (I.O.F.) which seeks, through this channel, to obtain a favorable comparison." And on the strength of this fiction the *Workman* goes on to give Oronhyatekha's bantling a most unmerciful dressing down for its extravagance in "spending nearly $200,000 a year in paying agents to canvass for the Order, and in advertising and purchasing editorial puffs—even from the old line journals." A table is given showing that for eleven months past the Ontario Workmen have spent only $31,142.67 and paid death losses of $418,000, while the Foresters have spent $167,264.20 and paid only $332,385.86 in the same eleven months. Upon this the organist remarks: "The A.O.U.W. has therefore a working expense of a fraction over one-seventh of its death payments, while the I.O.F. has a fraction over 50 per cent. for the same thing." We think our intelligent readers will easily see that the organist has made a very large error in his "one-seventh." The $31,142 will go into $418,000 pretty nearly fourteen times, instead of seven times. But perhaps a different multiplication table is used at Orillia from the old-fashioned one governing computations elsewhere. The *Workman* shows that during the past eleven months there were 296 deaths among Independent Foresters and only 209 among the Workmen. But without knowing the membership out of which the claim arose, no idea could be formed from those figures as to which had most or least. We find, on enquiry, that the Foresters numbered 59,607 last July, and the Workmen only 25,474. Hence we find the real state of the case to be .—

Societies.	Members.	Deaths.	Upon 25,474 members.
I.O. Foresters.....	59,607	296	126
A.O.U. Workmen.....	25,474	209	209
Showing the A.O.U.W.'s extra deaths to have been....			83

This number, at $2,000 each, represents $166,000, and therefore less than ten assessments would have been needed the past 11 months, instead of over sixteen. These figures are surprising, but ought to be reliable, as they are found in the issues of the *Canadian Workman* and *Independent Forester*, respectively. They simply demonstrate the two points made in our previous article, viz., that the A.O.U.W. in Ontario, as elsewhere, has become an Old Man's society, and that its death losses have recently become much heavier than for years past, owing to a very natural sifting out of the younger and healthier lives.

Our critic shows that during the past 11 months, the Workmen who died paid assessments for an average of 7 years and 7½ months, while the deceased Foresters paid for only 3 years and 3½ months, on the average. This probably arises from the more rapid growth of the I.O.F. the past three or four years. From July to December of this year, 5,282 have been added to the one, and only 846 to the other, as we find from their December issues respectively. The *Workman* also proves that Foresters have died, in the past 11 months, at an average age of 38, while the deceased Workmen average 46½ years of age. This the organist deems a good feature in his society, and attributes it to allowing none under 21 to enter, while boys of 18 are permitted to get beneficiary certificates in the Foresters. We do not agree with him in this, for the difference between 18 and 21 is only three years, and is more than offset by the fact that the Foresters admit members eleven years older at entry, going up to age 55, while the Workmen stop at age 44. This should give the latter a much younger average membership than is indicated by its mortuary list in the following table, which we now repeat, not a figure of it having been disproven by the *Workman* :—

STATEMENT RESPECTING AGES AT DEATH OF 83 WORKMEN AND 85 FORESTERS

	Under 35.	35 to 45.	Over 45.
United Workmen	5	22	56
Independent Foresters	48	22	20

We had no idea of "puffing" or "stabbing" when compiling these figures, and do not see why our assessment critics cannot deal with facts and figures and principles on their own merits, as this journal invariably endeavors to do. Imputing base motives does nothing towards wiping out the disparity between the figures 5 and 48 at the beginning of the above table, or towards reducing the 56 to even double the 20. The figures stand there yet, unimpeached, and are not affected by the fact that the 85 Forester deaths occurred in three months, and those of the Workmen in four.

The *Workman* hurls the big word "exaggeration" at our intimation that the death losses are increasing in the Ontario jurisdiction. "We have 16 this year," he avers, "just as we had ten years ago, and one since then." This is stated in its long attack upon this journal, and in its first editorial article the statement is made that "there is no assessment for December." But the second editorial contradicts this by saying: "Ontario will be an applicant for Relief (with a capital R.—ED. M. T.) when the Relief Board meets in the beginning of January next. Let every death up to the beginning of December be reported to the Grand Recorder at once." And on another page of the same issue is found the Grand Recorder's call for "Relief Assessment No. 15," which means practically a seventeenth assessment upon the Ontario brethren during 1894. No doubt a large portion of it will go to help Michigan, Ohio, New York, Pennsylvania, Kentucky, California and various other grand lodges where the older men have predominated for years past, as they are now beginning to do in this jurisdiction.

WOOD WORKERS IN CANADA.

The census of 1891 enumerates thirty-four industries or occupations which depend entirely or in part upon wood or timber as their raw material for manufacture or commerce. These comprise a total number of 17,577 establishments in the Dominion, employing 95,741 hands, and turning out manufactured articles valued at nearly a hundred million of dollars. The actual figures are $95,029,828. Here are some of the principal of these industries, the number of their 1891 employes, and value of output. Saw-mills of course largely exceed any other;

Timber Industries	Factories.	Hands	Value Products.
Agricultural implements	234	3,656	$4,405,397
Cabinet and furniture makers ..	1,169	6,957	5,471,742
Carpenters and joiners	2,494	5,702	3,593,910
Carriage-makers	3,143	8,703	6,579,082
Cooperages	1,430	3,277	1,808,229
Sawmills	5,390	42,085	38,569,652
Sash and blind factories.....	356	2,878	4,872,362
Shipyards	227	4,454	3,557,258
Shingle factories	801	2,389	766,998
Planing mills.....	66	633	992,201
Broom and brush factories ..	91	957	762,884
Match factories.....	22	1,062	511,250
Wood-turning establishments ..	80	604	431,797

Carving and gilding works	82	500	516,675
Trunk and box factories	49	626	677,877
Shook factories	55	80	228,785
Stave factories	31	265	168,520

The above represents about $78,000,000 of goods. But to these are to be added boat-builders, pot and pearl asheries, pump factories, basket makers, bark extract works, pail and tub makers, last makers, window shade factories and pulp mills. Besides which the list includes 17 car and locomotive works, which turn out product valued at $3,956,000, and employ 3,154 hands.

WHAT OF THE SPRING AND SUMMER?

It may not be orthodox, according to Adam Smith, to say that the changes of fashion constitute an economic gain, but where would the manufacturer and the merchant be without the assistance of old Dame Fashion and her whims? Every man in the dry goods trade—whether manufacturer, importer or merchant—must scan the horizon for possible divergencies from existing styles of dress. At present all attention is concentrated upon the styles for the spring and summer of 1895. The New York *Dry Goods Economist* is a painstaking gatherer of news from the various fashion centres of Europe, and we present its views concerning some of the coming styles.

In fabrics, checks and stripes in cheviots and tweeds will obtain, as will silk and wool mixtures. Crêpons in wool, silk and wool and mohair effects will likely prove big sellers. Black dress fabrics in fancy effects are in vogue and will continue there. Open-work or perforated effects in silk for waists and in cotton goods will remain one of the ever charming, but never common, novelties.

The full effects like gauffrè, crêpon, plissé, shirred or goffered materials are settled in favor for the season.

As a trimming, piece velvet will not go until July weather drives it out.

Under the head of "Trimmings that are Sure," the *Economist* says: "Jet corsage pieces, bands and buttons will be worn. Steel will be worn, but chiefly for millinery and buttons. Heavy laces in points for flat trimmings through the spring and summer, and during the latter part of the season delicate net-top laces, will have a day. Black satin ribbons for trimmings, belts, sashes, etc., are permanent. Fancy millinery ribbons show chiné, gauze, striped and gilt effects; velvet on satin and much of taffeta aud Liberty satin textures."

In reference to silk we have the following:

Printed effects are very cheap and very pretty as well; so look out for them. Silk waists grow in popularity, and will be of taffetas, wash silks, printed Indias, etc. The merchant will be able to sell many a silk waist where he could never hope to sell a silk gown. Taffeta is the silk, unless for a trimming, where black satin duchesse overpowers it. Black moiré in small figures, black seeded taffeta, and black satin for godet skirts to wear with odd waists.

The most perplexing part of a forecast is the color problem. However, the *Economist* ventures to say that bright-blues, magenta-pinks, yellowish-greens, and golden-browns are paramount for 1895. Fuschia and dahlia shades are still good, gray is looking up, but bleuet seems scotched. Bright colors will prevail, and fashion allows contrasting colors and materials without number. Something entirely new may spring up in Paris, but now there is no sign of a startling color growing up in a night.

Soft cotton waists will be worn more than ever before. Starched collars and cuffs are in many styles, and every manufacturer is busy on waists. These keep silk and lawn bows and scarfs in fashion. Chemisettes will be worn with tailor gowns. Ready-made black, navy and brown woolen skirts will have a good sale to wear with cotton waists. Silk belts, buckles and safety-pins all apply to cotton waists, so they will sell. Ready-made neckwear will continue a large factor in the lace department.

THE HOLIDAY TRADE.

There was so much talk of hard times in various parts of the land that few merchants were courageous enough to believe beforehand in a good Christmas trade this year. But the predictions of the men who are always crying hard times were not altogether realized. Reports come from Chatham, Windsor, St. Thomas, and Peterborough of an active trade in those places in holiday supplies. Some districts of the country were apparently not favored as were these four towns, but many places in the Province of Ontario, and, we doubt not, throughout, indeed, the Dominion, have experienced an old time Christmas trade. And this in spite of the fact of a green Christmas; the lack of snow means a great deal to the country merchant. But it is from the large cities that the wail of hard times comes. In the winter the vagabonds from all over the Dominion congregate in the cities, where they are sure of a warm berth until spring from some of the various charities, and in addition have the chance of making an occasional dollar by corporation labor. Many of these persons are paupers or semi-paupers by reason of their own folly or laziness; many more are victims of circumstances, and must be helped because, being thrown out of their accustomed work, they have not intelligence enough or energy enough to help themselves. We are never without these classes, and it would be a huge mistake to think the country was not prosperous because of their existence.

FINANCIAL STATISTICS.

In the last issue of *Rhodes' Journal of Banking* appears an open letter from R. H. Peterson, of New London, Iowa, on the subject of metals, from which we take the following table showing approximately the wealth, debt, population, monetary systems, per cent. of debt to wealth, and per capita of indebtedness of nations tabulated. B indicates bimetalic; G gold, and S silver. The calculations, says Mr. Peterson, were made from the most trustworthy statistics at his command:—

Nations.	Wealth.	Debt.	Population.	Monetary system.	Per cent. of debt to wealth.	Per capita indebtedness.
United States	$60,475,000,000	$ 957,876,000	67,00[illegible],000	B	1.58	$ 14 29
England	43,600,000,000	5,695,659,900	38,000,000	G	13.06	149 88
France	40,300,000,000	4,892,840,000	39,000,000	B	12.14	125 45
Germany	31,600,000,000	2,695,265,000	49,300,000	G	8.56	54 65
Russia	21,715,000,000	4,869,768,000	113,000,000	S	22.42	43 09
Austria	18,065,000,000	2,642,021,000	40,000,000	S	14 62	66 04
Italy	11,755,000,000	2,250,000,000	31,000,000	B	19.14	72 58
Spain	7,965,000,000	1,106,650,000	18,000,000	B	13.89	61 48
Netherlands	4,935,000,000	518,000,000	4,500,000	B	10.49	115 13
Belgium	4,030,000,000	213,000,000	6,100,000	B	5.28	34 91
Sweden	3,475,000,000	580,000,000	4,734,000	G	16.89	122 51
Canada	3,250,000,000	273,000,000	4,324,800	G	8.42	63 14
Mexico	3,150,000,000	110,000,000	11,600,000	S	3.49	9 48
Portugal	1,855,000,000	593,670,000	5,000,000	G	32.00	118 73
Denmark	1,830,000,000	58,467,000	1,903,000	G	3.18	30 72
Switzerland	1,620,000,000	65,000,000	3,000,000	B	4.01	21 66
Greece	1,055,000,000	13,625,000	2,000,000	B	1.29	6 81
Norway	1,410,000,000	29,869,000	1,806,000	G	2.11	11 00

Not having statistics showing the wealth and indebtedness of the following nations, I give population and monetary systems of each The population of Turkey, 33,000,000; monetary system, gold. Australia, 4,000,000; gold. Egypt, 7,000,000; gold. Japan, 40,000,000; bimetallic. India, 255,000,000; silver. China, 400,000,000; silver.

For ages gold and silver have been used—largely concurrently—as media of exchange, and no substance has been discovered as a good substitute for them for use as currency. It is difficult for most persons to divest themselves of prejudice and accept the lessons of past experiences. To oppose the use of either gold or silver in their places in commerce would be almost as great folly as to attempt to prevent the waters of a lake from finding a common level, the use of both being so intimately interwoven in the commercial fabrics of nations. If the figures in the table teach us any lessons, one is the fortunate financial condition of the United States with her bimetallic money system, having only one and fifty-eight hundredths per cent. of debt to wealth, and a per capita indebtedness of only fourteen dollars and twenty-nine cents, while England with her gold monetary system has thirteen and six-hundredths per cent. of debt to wealth and one hundred and forty-nine dollars and eighty-eight cents per capita indebtedness.

The reader's attention is also directed to Portugal as having a gold monetary system, and she has thirty-two per cent. of indebtedness as compared to her wealth, and her per capita indebtedness is one hundred and eighteen dollars and seventy-three cents. The estimate of the entire gold and silver coinage of the world is not far from four billions each, or a combined total of eight billions.

CAPE BRETON'S INDUSTRIES.

In a review of the trade of Cape Breton during 1894 the marked increase in the volume of the coal trade is the first feature that calls the attention of the observer. The previous year's shipments of coal for that Island amonnted to about 1,000,000 tons; the shipments of 1894 total in round numbers 1,240,000 tons. This is a remarkable increase in face of the industrial depression which has been supposed to exist all over the continent, and can be attributed only to an increase in the export trade as a result of the severe strike in the United States bituminous coal regions in the early part of the year. In fact, had the mines had sufficient capacity during these labor troubles, there is little doubt that the sales would have reached a much larger total. During the 1894 season 1,846 sail of vessels arrived at ports on the island of Cape Breton, representing 680,000 tons of shipping, as compared with 1,629 vessels and 542,000 tons in 1893. Following is the detailed statement:—

	1894.	Tons.	1893.	Tons.
Steamers	605	507,884	543	470,892
Coasting steamers	60	18,947	49	11,153
Ships	6	8,070	7	10,276
Barques	140	61,653	74	42,868
Brigs	38	9,797	33	11,040
Schooners	1,024	87,138	904	76,972
	1,846	680,691	1,629	524,101
Number of seamen	18,712		13,765	

The American fishing fleet have comprised 120 sail, of 11,494 tons, being manned by 1,900 seamen. They reported a catch of 4,150,000 lbs. cod and 7,000 barrels mackerel.

NEW BRUNSWICK SHIPPING.

The decline of wooden ship building in our Maritime Provinces continues. Comparison of last year's registries with those of the year before show some 21,000 tons less at the close of 1894. St. John returns of shipping for the year show 494 vessels, aggregating 110,654 tons, remaining on the registry books in that city at the close of last year, as against 522 vessels of 131,909 tons one year before. There are only three vessels now building in New Brunswick, viz., a 100-ton steamer at Chatham for J. B. Snowball; a 400-ton barque by Messrs. Wallace, at Gardner's Creek, St. John County, and a 124-ton schooner at Cumberland Bay, Queen's County. Ten new vessels, totalling 1,090 tons, were registered at St. John last year. Five of these were small steamers and tugs. The value of the 21 vessels lost during the year totalled $144,200. They were divided as follows:—One woodboat, 12 schooners, two barquentines, five barques, and one ship, and aggregated 8,514 tons, against 41 vessels of 13,853 tons in 1893, and 28 vessels of 12,385 in 1892. The falling off for the province during the year is, as will be seen, over 20,000 tons as compared with the preceding year, and is in keeping with the steady decline in wooden shipping during the past decade.

CANADIAN BANKS IN NEWFOUNDLAND.

On Saturday evening last a staff of officials from the Bank of Montreal left Montreal for St. John's, Nfld., to establish a branch of that bank in the Island. The party consisted of Mr. J. M. Greata, the assistant inspector of the bank; Mr. H. Robertson, Mr. A. E. Nash and Mr. A. E. Holt. We are told that Mr. Macnider, the inspector of the bank, has been in St. John's for some days making arrangements. The announcement that the principal Canadian bank has arranged to open a branch in St. John's, as the Bank of Nova Scotia has already taken steps to do, will have an excellent effect in restoring confidence in financial and commercial circles in Newfoundland, and in creating hope for the future. Not only this, but these steps can hardly fail to increase commercial intercourse between Canada and the Island.

ACCIDENT INSURANCE RATES.

The London correspondent of the Glasgow *Herald* writes as follows, on the 20th ult., to that journal, in reference to the announcement that the principal accident insurance offices had agreed upon a tariff of rates, and had adopted a common form of policy based upon their experience of the existing Employers' Liability Act: "I understand that this arrangement was really arrived at as far back as October last, and will take effect from the 1st of January next. The offices which have joined in the arrangement are the Accident, the Boiler and Steam Power, the Employers' Liability Corporation, the Lancashire and Yorkshire, the London Guarantee and Accident, the Northern, the Norwich and London, the Palatine, the Provident Clerks, the Railway Passengers, the Scottish Employers, and the Sun Life of India. The only important accident office that is absent from the list is the Ocean Accident and Guarantee Corporation. Apart from that the list is sufficiently powerful to satisfy anyone, as it represents a paid-up capital of nearly £1,500,000, and funds, exclusive of capital, of £750,000. It may be observed that this is the first serious attempt that has been made to promote unanimity among the accident offices."

THE ORANGE TRADE.

Seldom is it that, at the close of the holiday season, the price of oranges takes a sudden upward movement. And yet this is just what has taken place this week. Two weeks ago Florida oranges were quoted at $2.50 to $3 per box, but present quotations for fruit of the same quality stand at $2.75 to $3. While the holiday trade has been good, the demand was not excessively large, and the rise in price is the result of the damage done to that part of the crop remaining in Florida. The total crop this year was estimated at fully 5,000,000 boxes, of which, up to this time, probably 2,000,000 boxes have been shipped, so that 3,000,000 boxes have been more or less damaged. During the holidays the work of picking and packing the fruit was temporarily suspended, and in consequence there is only an inconsiderable quantity in transit at present. Stocks here, or for that matter in other cities, are not large at the beginning of the year, and frost coming at this juncture is all the more severely felt. The extent of the damage has not yet been accurately ascertained, and the reports so far received are not unlikely somewhat exaggerated. Yet telegrams to prominent importers confirm in the main the press despatches.

We are just beginning to receive Italian shipments of Messina fruit in this market, and it is expected next week will probably sell at $2.65 per box. Some little time must yet elapse before California oranges are received in Toronto. The crop of this State is expected to reach 7,000 cars this year. At 330 boxes to the car this means 2,310,000 boxes. The fruit is reported as looking very fine, and we do not learn of any disaster to the fruit by reason of frosts. New trees are coming into bearing in large numbers in California, and those that have been bearing are increasing their production. Therefore the proportion of the Navel variety, as compared with the seedling, steadily increases

FOR GROCERS AND PROVISION DEALERS.

It is encouraging to see that, upon the programmes for January lectures before the Farmers' Institutes of Ontario, butter-making on the farm has so prominent a place. "The farmer's garden, and how to make it pay," is another of the topics.

The Worthfield Elevator Company intends to build eight or ten elevators of 25,000 bushels capacity in the Province of Manitoba. It is probable that an elevator of 200,000 bushels capacity will be built in Winnipeg, fitted with a process for cleaning and scouring grain

The Carlisle Packing and Canning Company has been incorporated in British Columbia by J. A. Carthew, W. A. Mathewson, and Edward W. McKim, with a capital stock of $25,000. The company will take over Mr. Carthew's cannery interests at Carlisle, on the Skeena River, and also the Price cannery at Gardner's Inlet

Mr. Kemp, the expert, who has had in charge the operations in connection with oyster culture in the Maritime Provinces, has returned to Ottawa from Nova Scotia. The past season has been devoted to the planting of oysters in artificially prepared beds at Tracadie, Antigonish county, N.S. The coast in that section of the province is said to be particularly well adapted for oyster culture, and good results are expected from the operations of the past summer and fall

"What section of the community now work the longest? The small shopkeepers and shop assistants. There is no question about the facts. The House of Commons Committee, over which I had the honor of presiding in 1886, unanimously reported that in many places the hours of labor in shops are over 84 per week, and that there is little prospect of shortening them except by legislation. Eighty-four hours a week are 14 hours a day. The Government themselves have admitted this to be the case."—*Sir John Lubbock.*

The following extract from an English tea circular is of interest to the tea trade; "The use of Indian and Ceylon teas in the continent of North America has made greater progress than is shown either by the figures of direct exports from India or Ceylon to North America, or of re-exports from Great Britain to that quarter. A large quantity has been transhipped through London during the past year or two without appearing in the figures, because transhipments have hitherto included all growths under the one heading of tea, making no distinction between those from China and other countries. Hence recent progress has in eality been far more satisfactory than was generally supposed."

LUMBER AND TIMBER PIECES.

Senator McClelan, of Albert County, New Brunswick, speaking to a reporter of a St. John newspaper, expressed it as his opinion that the cut of the present season in the county in which he lives will be larger than that of last year. An unusually large amount of birch timber is being taken out this season. Speaking of laths, the Senator said "he did not think they would ever command a very high price, for the simple reason that wire was being used in their stead in different parts of the United States, and, it was stated, with satisfaction. The wire came in rolls, and was tacked on the studding. He understood it came cheap."

The lumber trade on the Miramichi, New Brunswick, is year by year assuming larger proportions. Shipments for the season of 1894 amounted to almost 96,000,000 feet, the largest since 1884, with the single exception of 1889. The shipments of 1893 amounted to 83,000,000, in 1891 to 72,000,000, in 1890 to 88,000,000, while in 1889 there were 110,000,000, in 1888, 73,000,000, and in 1887, 68,000,000

Following is a detailed statement of this year's shipments

	Feet.
W. M. Mackay	27,447,797
J. B. Snowball	24,506,837
D. & J. Ritchie & Co	11,088,762
Ernest Hutchinson	9,318,892
F. E. Neale	8.730,980
Geo. Burchill & Sons	7,389,000
Wm. Richards	5,993,193
W. A. Hickson	1,124,168
Clarke, Skillings & Co	5,556
Total	95,605,185

This was carried in 128 vessels. In addition there was shipped 2,473,746 palings, 1,944,885 pieces of spool wood, and 16 tons of birch and pine timber. The distribution of the lumber was as follows:—To Great Britain, 53,549,292; Ireland, 31,090,061; France, 6,712,589; Spain, 2,079,210; Australia, 1,125,356; Africa, 1,048,677.

INSURANCE ITEMS.

Mr. Robert Blyth, C.A., F.F.A., manager of the Scottish Amicable Life Assurance Society, has resigned his office in order to become general manager of the Union Bank of Scotland.

The Right Hon. Sir Algernon West, K.C.B., late chairman of the board of Inland Revenue, has accepted a seat at the London board of the Northern Assurance Company.

Henry Keeney, who died in Hartford recently at an advanced age, leaving a fortune of more than a million, had several strokes of exceptionally good luck. One was his investment of $260 in the stock of the Hartford Fire Insurance Company in 1842. This stock, after yielding Mr. Keeney $124,864 in cash dividends, is at present worth more than $80,000.

In the three insurance company cases in London, Ont., involving a total assessment on income of $12,500, Judge Edward Elliott has handed down his judgment, which is against the companies. Those interested are the Sun Life, Standard Life, and the London & Lancashire Life. They were assessed on income, the Sun for $5,000, the Standard for $5,000, and the London & Lancashire for $2.500. The last named company placed $395 as its income over and above expenses, the Sun Life offered to pay taxes on $130, and the Standard Life on $1,868.63. The insurance men complain that the present decision is exactly opposite to that given last year by Judge William Elliott in the case of the Standard Life.

At the place where the great fire of London ended there is a wooden statuette of a naked boy. It originally had bright yellow wings, and an inscription stated that it was put up in memory of "the late Fire of London, occasioned by the Sin of Gluttony, 1666." Its propriety, we are told, was on one occasion thus supported by a Nonconformist preacher on the anniversary of the fire. He asserted that the calamity could not be occasioned by the sin of blasphemy, for in that case it would have begun at Billingsgate; nor lewdness, for then Drury Lane would have been first on fire; nor lying, for then the flames had reached from Westminster Hall. "No, my beloved; it was occasioned by the sin of gluttony, for it began at Pudding Lane and ended at Pie Corner."

The list of accidents which occur every day is very long, but for various reasons is still getting longer. One man has a disabling injury by the ring on his finger catching in the back of a street car, another steps on a banana peel, another falls over a wheelbarrow; still another falls astride of a chair upon which he is standing while lighting the gas; another falls from a step-ladder; another, a musician, catches his finger between the keys of a piano; two merchants have disabling hurts while splitting kindling; two more were struck by falling objects; another seriously injured his hand on an ice pick, and to cap the climax, a bookkeeper has a rib fractured by a man with whom he was sleeping rolling over upon him. If this is not enough the list can be extended indefinitely to show you how necessary it is for you to carry some accident insurance.—*Black and White.*

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Jan. 3rd, compared with those of the previous week:

Clearings.	Jan. 3.	Dec. 27.
Montreal	$8,839,004	$8,158,847
Toronto	5,350,094	4,667,866
Halifax	1,079,821	936,347
Winnipeg	1,233,458	961,594
Hamilton	667,543	588,163
Total	$17,170,770	$15,312,817

Aggregate balances this week, $2,798,441; last week, $2,344,724

BOOKS RECEIVED.

People's Almanac.—Facts and figures for the electors of Canada. Fifth year of publication. A supplement to the Montreal *Gazette*. Pp. 100.

The Chronicle; Extra Holiday Number. December, 1894; price fifty cents. Fifty-fourth volume, No. 26. A weekly insurance journal, $3 a year; Franklin Webster, editor.—An excellent number, containing articles for all tastes, from "Atavism in Life Assurance" to a parallel between Fontaine's lightning engines on the Canada Southern and the similarly brilliant failures as "lightning specials," Curtis L. North, Dinkelspeil, *et al*, of which latter genus it is said, "The evil that they did lives after them." For those who like pictures, "The Passing Show" series of cartoons, extending over thirty-two pages, is an instructive and amusing half dollar's worth.

The Bankers' Magazine.—A change has been made with the December number in the form of this long-established and valuable periodical, which has entered upon its 50th volume. The page is enlarged, and instead of 80 pages there are 150. This greater space will permit a larger variety of matter, both original and selected. The *Bankers' Forum* discusses the Baltimore currency plan. Appropriately the current number contains an admirable portrait of George S. Coe, of the American Exchange National Bank, and a sketch of his life by another bank president. Also an able article on the wheat situation from the pen of W. M. Grosvenor, formerly editor of that excellent financial weekly, the New York *Public*, and now editor of *Dun's Review*. Prof. A. S. Bolles, the former editor, continues to have charge of the banking law department. The new publisher is John G. Floyd, successor to the Homans Publishing Co., 233 Broadway, New York.

PATENT RECORD.

The following list of United States patents granted to Canadian inventors, November 27th and December 4th, 1894, is reported by James Sangster, patent attorney, Buffalo, N.Y. —

Edourand, Montreal, awning.

Tronson Draper, Petrolia, valve-facing tool.

Edward C. and W. C. Irwin, Winnipeg, window screen.

William F. Johnston and J. Grey, assignors to Massey-Harris Company, Toronto, apparatus for hardening knife-sections or other articles.

William H. Moore, Owen Sound, and J. Gardiner, Dundalk, said Moore assignor to said Gardiner, fire-extinguisher.

James O. Oakley, Montreal, extensible structure for use as a bridge, scaffold, tower, etc.

George R. Prowse, Montreal, assignor of one-half to firm of T. H. McAllister, New York, oxygen generator and holder.

ANSWERS TO CORRESPONDENTS.

S. B, Barrie.—The company was formed under authority of a private Act. Its dividend has been reduced. The shares are $100 each.

Alex. Hackett, Colchester; J. C., Montreal; J. S., Belleville; L. D., Detroit; J. S. D., W. C., D. W., J. S. B., City.—Unable to comply with your request. The Christmas issue of the Monetary Times is exhausted.

Subscriber, Durham.—Will reply to you by letter.

—Although founded but twelve years ago, the village of Lake Megantic, Que., now counts 2,500 inhabitants, and a branch of the People's Bank of Halifax is about to be opened there. Upon making enquiry as to the truth of this paragraph, we have it confirmed from the head office of the bank in question. At the same time we learn that the statement of our Montreal correspondent, to which we gave currency in our issue of 14th December, that the People's Bank of Halifax would open a branch in Montreal shortly, was incorrect. The intended opening at Lake Megantic this month probably gave rise to the report.

—The Calgary Board of Trade held its annual meeting the other day. The attendance was good. The following gentlemen were elected officers for 1895: President, J. Bannerman; vice-president, A. McBride; treasurer, A. Allan; secretary, I. S. G. Van Wart.

—The Ontario Minister of Agriculture told the Dairymen's Association of Eastern Ontario, at Gananoque, yesterday, that it had been decided by the Government of the province to ask the Legislature at next session for a grant of money with which to establish a pioneer dairy farm in one of the districts of north-west Ontario, not now settled, somewhere between Rat Portage and Port Arthur.

COMMERCIAL TRAVELLERS' DINNER AT HAMILTON.

The Hamilton branch of the Commercial Travellers' Association, instead of its usual conversazione or ball, gave this year a dinner, which happy event took place at the Royal Hotel on Friday evening last, 28th December. The attendance was in the neighborhood of 100, although covers had been laid for many more, who were unable to be present owing to the failure of the Dominion Association to conclude the business of its annual meeting in Toronto in time to get the train for Hamilton.

The appointments of the eight-course dinner were excellent. Mr. H. G. Wright, vice-president for Hamilton, was in the chair, and the vice-chairs were occupied by Mr. W. G. Reid and Mr. J. H. Herring. Mr. Herring presented the regrets of Messrs. C. C. VanNorman, R. H. Gray, and J. C. Beck, retiring president, president-elect, and secretary, respectively, of the General Board, who were detained in Toronto.

In his opening speech, the chairman noted with gratification the growth of the association from a membership of 558 twenty-one years ago to almost 4,000 at the present time. Our surplus, said Mr. Wright, in the year 1878 was only $959.96, and to-day it has reached the handsome sum of $238,524.28, and we have paid in accident bonuses and mortuary benefits the enormous sum of $201,329.79.

The usual loyal toasts were proposed, and the name of Mr. H. F. Gardiner of the *Times* was coupled with the toast of the Governor-General.

Mr. Gardiner, in the brief time at his disposal, gave entertaining sketches of a few of the Governors of Canada—the patriarchal Simcoe who built roads, selected town sites and designed public works; the military Colborne who was hanged in effigy in Hamilton in 1829 for not acceding to the request of the House of Assembly to release an editor from Toronto jail, and the Earl of Elgin, the constitutionalist who was stoned in Montreal 29 years later for signing the Rebellion Losses Bill in compliance with the wish of the majority of both Houses of Parliament. These incidents, he said, illustrated the growth of the idea of responsible government. With a passing reference to Lords Monck, Dufferin and Lorne, the speaker proceeded to Lord Aberdeen, whose proud boast it was that on a recent occasion he had been mistaken for a commercial traveller. In conclusion Mr. Gardiner asked to be enlightened with regard to the mysterious arts by which commercial travellers sold more goods to a customer than he could ever hope to pay for, and then squared themselves with their own governors when the notes for these goods fell due.

Messrs. J. M. Eagan and T. M. Davis sang "Larboard Watch," and Mr. John Leggat, "Truskalina Brown." Major J. Stoneman, Capt. Moore, and Capt. W. Hendrie (48th) responded to the toast of the "Army and Navy." The first named substituted his favorite recitation, "The Charge of the Light Brigade," for the usual speech. Capt. Moore's speech was capital. Capt. Hendrie succeeded Mr. Simpson, giving several interesting references to his own battalion (the Highlanders), and to the well-known prowess of the Scotch on the battlefields of the world.

"Canada, our Home," was responded to by Messrs. J. Madill and C. Murdoch. The former made an exceedingly patriotic speech. Canada was pre-eminent among the countries of the world in knowledge and morality. His hearers represented the backbone of the country. Mr. Murdoch believed that the commercial traveller had played no unimportant part in the welding together of this great Dominion. Wherever he goes throughout the length and breadth of the country he should endeavor to carry with him a good influence of loyalty towards Canada.

After the singing of the "Maple Leaf," by J. C. Taylor, with chorus by the company, the toast of "The Commercial Travellers' Association of Canada and Sister Associations," was enthusiastically honored. Mr. W. G. Reid, who has been identified with the C.T.A. since its organization, was the first to respond. He told of the early struggles of the association, when the membership was small and finances low, and referred to the past year as a hard one in the annals of the organization, in that no fewer than 30 deaths had occurred in its membership during that time. Commercial travellers were, in his opinion, the pioneers of civilization. Mr. T. M. Davis followed with a few humorous remarks about the practical side of the commercial traveller's life, and Mr. Eagan sang the well-known "Drinking" song and chorus.

"Mercantile and Manufacturing Interests" was responded to by Messrs. H. N. Kittson, A. Munro and J. Black. Mr. Kittson spoke at some length, saying that while he did not think there was much in the present outlook to warrant any enthusiasm on the part of business men, and particularly wholesale dealers, still it was a matter for congratulation that Canadian credit was so good in both the United States and England.

Mr. Munro thought greater care should be taken by wholesale men in dealing with men in a small way of business, to know that these customers thoroughly understood their business, rather than that they had an excess of capital. This precaution would usually prevent serious losses.

Messrs. Mathieson and Taylor sang "The March of the Cameron Men," and received a double *encore*.

Messrs. W. Bremner and C. C. Baird responded to the toast of the "Commercial Benedicts." For the "Commercial Bachelors," Mr. Wm. Casey, of Detroit.

Several other members sang, and Mr. B. Arthurs presided at the piano.

The singing of "Auld Lang Syne" and the national anthem brought the gathering to a close at an early hour Saturday morning.

WESTERN ONTARIO COMMERCIAL TRAVELLERS' ASSOCIATION.

The annual meeting of the Western Ontario Commercial Travellers' Association was held in the Masonic Temple, London, on Dec. 22nd last. Owing to the election of officers by acclamation the attendance was not so large as in former years. The retiring president, Mr. R. C. Struthers, occupied the chair. The annual statement placed the receipts for the year at $20,246.43, the disbursements at $13,287.15, making the balance $6,959.28. The assets of the association now amount to $33,478.86, and the liabilities $2,079.09. The travelling members now number 906, and the associate members 47.

Mr. A. S. Tassie, in criticising the report, pointed out that the membership was less than that of last year. Mr. Dan McKenzie said that the cause of this was the action of the different railways in refusing to renew the tickets of a couple of hundred insurance men. Mr. Robinson said that 197 new members had been received during the year, and he thought the number compared favorably with the other associations. Three mortuary benefactions, amounting to $2,000, have been paid during the year to the executors of the late D. H. Williams, T. P. G. Bryan and John E. Richards. Twenty-one claims for accident indemnity, amounting to $950.24, were also paid. There are five claims for minor accidents and one for accidental death awaiting proof. The reserve fund now amounts to $31,408.77, a gain for the year of $4,320.43

Several alterations and additions to by-laws proposed by Mr. Tassie were adopted. They related to accident benefits. The word "or by the taking of poison," in section 5, article 10, and the words "or suicide," in the same article, were eliminated. This means that when a man accidentally takes poison, or if he commits suicide while temporarily insane, the family will receive the amount of bonus carried by deceased. A clause was added whereby if a man should die solely from injuries received, but not within six months after receiving such injuries, his death shall be considered to be from natural causes and his heirs shall be entitled to the mortuary benefit. As the law stood before, unless a man died within six months after receiving the injuries his heirs could not claim the accident bonus; and as he did not die from natural causes there might be trouble over paying the mortuary benefit. The new clause definitely settles the question.

After the discussion of the by-laws, Mr. J. M. Dillon, president elect, assumed the presidency of the meeting. Mr. Tassie was accorded a vote of thanks for his work in relation to the by-laws, and in turn moved a vote of thanks to the retiring board. Mr. Struthers, P. J. Conroy and Dan McKenzie replied. The association intends holding a smoking concert on Friday, Jan. 18th next.

—For C. T. A. annual meeting see page 886 of this issue.

PULLMAN PALACE CAR CO

The report of the Pullman Palace Car Company, for the year ending July 31st, 1894 has been published in pamphlet form. It shows gross earnings of $9,505,066, a decrease of $1,794,829 as compared with the previous year, disbursements, $7,274,650, a decrease of $108,798, and a net surplus of $2,320,417, a decrease of $1,686,031 The number of cars owned and controlled is 2,588. The number of passengers carried during the year was 5,282,323, and the number of miles run was 197,409,503. The total number of persons in the employ of the company in its manufacturing and operating departments is 10,858, and the wages paid during the year amounted to $4,968,548. The number of employes for the previous year was 14,685 and the wages paid $7,751,644. There was no substantial change in the condition of the car building business, and the contracts taken before the strike and those since the strike are being executed at prices which give no profit, and such contracts are taken because the shops are being kept in operation for the repairing of the company's own cars and to give as much employment as is possible in the present condition of business.

A SELF-CONTAINED AGENT

The following is an extract from the Chicago letter published in the November *Insurance Monitor*:

"Mr. Bissell of the Hartford is still in the harness, and he can tell you many amusing anecdotes of early times. He often relates his experiences with an old friend of his away back in the sixties who lived in a little town somewhere up in Michigan. It seems he met his friend on the street one day and after considerable persuasion induced him to take an agency. So he loaded him up with supplies and sent him on his way. A month rolled around and no word from the new agent, when one morning he drifted into Mr. Bissell's office

"Wall," he said, "I cum to settle up and git more supplies."

"More supplies?" queried the surprised Bissell. "Why, you didn't do any business?"

"Thort I did purty well," was the laconic reply. "I writ thirty policies, and paid two losses, one of $700 an' tother of $800, an' thar's the balance. I got it all writ down on this slip of paper," and he laid the money and paper before the now speechless manager

It is needless to state that very, very explicit instructions accompanied the next batch of supplies that Mr. Bissell's friend received.

FIRE INSURANCE IN 1894.

The year 1894, fire insurance-wise, goes out in a blaze of glory, serious fires occurring in Toledo, Ohio, Louisville, Ky., Buffalo and New York; but, notwithstanding these expensive happenings, the year has been a good one for well-managed, old-established institutions. The 1894 fire loss will approximate $127,500,000, a pleasant reduction from the 1893 figures, which were $156,445,875

The principal features of 1894, says the *Journal and Bulletin* of New York, were the failure of the Columbian Insurance Company of Louisville and the Burlington Insurance Company of Iowa, both stock companies, and the starting of about one hundred Lloyds and mutual companies to write "surplus" lines No stock fire insurance corporation of any importance was started during 1894 although several are now projected, and some of these may materialize during the early part of 1895.

So many of the new surplus line concerns have been recklessly managed that failures promise to be numerous in 1895, and are apparently due to commence about March or April, with perhaps one or two even before then. There is no little curiosity about the condition of several of them, owing to the heavy losses they have incurred during the last quarter of 1894. The statements of nearly all of the institutions writing surplus business will be carefully studied by insurance brokers, particularly those who have not been very cautious in selecting policies for their customers, and now realize that they may be placed any day in an embarrassing position.

Taken altogether, 1894 has been as good a year as the old line fire underwriters have a right to expect. Rates have averaged higher than in 1893, and losses have been less. It is quite true that through poor judgment or bad

luck some companies will show a loss as the result of the year's work, but this is only to be expected. Fire underwriting will never be in such a condition that the poorly-managed companies and those which have suffered exceptional disasters will all make profits. If it were it would be very clear that rates should be reduced.

THE INSURANCE OF ATHLETES.

Science Siftings assures us that life assurance offices have come to regard athletes as poor risks. At any rate, they so consider them until they have been proved to be the contrary. Athletes, either professional or amateur, are always given a very rigid examination, especially as to heart, lungs and urine, and if any cardiac disease, lung disease, or albumen is found, the rule is to decline. A leading medical officer of a well-known company, speaking on this matter recently, said: "If we are wrong, either in theory or practice, we are ready to receive instruction. If athletes are as good as any class of applicants, we would be pleased to know why they are as good. If inordinate exercise is not to be feared as a cause of heart strain or muscular degeneration, of cardiac hypertrophy, of injury to cardiac valves and similar conditions, we would be pleased to be instructed. We may be doing companies a great injury by rendering them liable to lose good business, and that is what every medical examiner especially wishes to avoid."

AFTERNOON TEA.

They were at an afternoon tea, and each held in her delicately gloved hand a cup of amber fluid, which she supped daintily with a souvenir spoon.

But their technical knowledge would have made a tea expert's hair stand on end. "I like Fedora best," one of them was saying sweetly. "Do you?" said the other; "now I prefer Solong, because there is no nicotine in it." "Talking of tea brands?" asked a society bride, fluttering. "I just adore Boohoo; it's made in China, you know." "Well, afternoon tea is good enough for me," warbled a society bud, who didn't know anything but real knowledge, and wouldn't worry her head with tea kinds. But the hostess, who had served Formosa and Suchong and Bohea, sighed to think of the ignorance that sometimes existed in social circles.—*Detroit Free Press.*

ON THE SAFE SIDE.

It is hardly necessary to say that one's eating and drinking are matters that cannot properly be regulated by law or dictated by one's neighbor. There should be freedom in such matters, although some of our teetotal friends would not allow any discretion whatever. At the same time some considerations put forward by E. W. Bok in the January *Ladies' Journal* deserve to be pondered. He points out that indulgence in intoxicants of any sort has never helped a man to any social position worth the having; on the contrary, it has kept many from attaining a position to which by birth and good breeding and all other qualifications they were entitled. No young man will ever find that the principle of abstinence from liquor is a barrier to any success, social, commercial or otherwise. On the other hand, it is the one principle in his life which will, in the long run, help him more than any other.

BUILDING ASSOCIATIONS.

Two hundred and fifty co-operative building associations have been chartered in Pennsylvania since June, 1891, and the whole number in that State is now stated to be 1,239. The membership is 272,580, the cash income in one year is $44,432,686, and the assets $103,943,364. The average assets per society are $83,892; average expenses per society, $308; average salaries per society, $265, and average membership, 219. The average income per society is $35,054, and the average gains, $13,528. The assets above mentioned represent accumulations for an average period of seven years and a little over. It is estimated that in the past dozen years another $100,000,000 has been returned to the members in cash and satisfied mortgages, and 97,500 homes have been secured through these societies. There are now 81,658 borrowers from the societies. Philadelphia alone has 482 building societies, with assets of $42,076,431, an income for one year of $16,896,331, and gains of $6,520,534. The societies have 74,000 male and 31,000 female members.—*N. Y. Jour. Com. and Com. Bulletin.*

—A teacher gave out words for analysis. "Bank-note" was one of them, and the teacher's astonishment may be imagined when one young lady brought the following unique analysis: "Bank-note is a compound, primitive word, composed of 'bank' and 'note.' 'Bank is a simple word, meaning the side of a stream; 'note,' to set down. 'Bank-note,' to set down by the side of a stream."—*Vineland Independent.*

LIFE INSURANCE WIT AND WISDOM.

FROM THE ANNALS OF THE BOSTON LIFE UNDERWRITERS' ASSOCIATION.

By Emil Schwab in the Christmas Chronicle.

The after-dinner speaking at the meetings of the Boston Life Underwriters' Association has acquired a national reputation, both from the prominence of the speakers that have been attracted to these gatherings, and because of the helpful or entertaining nature of much they have said. Below will be found a collection of "plums," mostly "in lighter vein," extracted from the various rich intellectual puddings that the association and its guests have enjoyed:

JAMES T. PHELPS, NATIONAL.—The first person or thing made, or planted, or developed, or created, was a solicitor. He was there when Adam and Eve were put into the garden, and like all good solicitors, he got his work in early. The gentleman with a long tail was up in the tree of knowledge when our parents got there; he had a branch office, and the manager was in when the human race began. Here was the beginning of insurance. First it was a mutual company; then it became mixed; Eve and Adam made a joint apple-cation; they took the risk—and that was the beginning of insurance. There was more truth than jest in this, for with that act came labor; and insurance is a development of labor. So we have its history in a few words.

W. H. BRIDGEMAN, EQUITABLE.—Speaking of qnestionable modes of canvassing, especially attacking other companies, I was reminded of an anecdote in regard to a revival meeting in the west. A brother was sitting near a post when a violent thunder storm came up. He moved away from the post, and had hardly done so when it was struck by lightning. Something was said about how good Divine Providence had been to the brother. But an old chap, who had been induced by him to drop a policy which he had held a good many years, said: "My opinion is that the Divine Providence thought the brother was still sitting there."

PROF. DORCHESTER, BOSTON UNIVERSITY.—Macaulay says there are three stages in every reform: ridicule, argument and general acceptance. I think it is a marvelous thing that life insurance has passed so rapidly from the first stage to the last; so that to-day anyone who sneers at life insurance renders himself an object of ridicule.

DR. MILTON W. HALL, PROVIDENT LIFE AND TRUST.—I remember once when I had completed the examination of a timid fellow, he asked me if I found him all right in a tone which betrayed that he dreaded to know the truth. I told him that I did, and asked him why he had apprehensions to the contrary. "You know," he said, "that I have read a little something of physiology and of medicine, just enough to make a fool of me, and I had, some time ago, some pain in my abdomen and I was afraid that I had lodged a cherry stone in my duodinctum." When I assured him that the part of his anatomy to which he referred was all right, he seemed as much pleased as he did over the $2,000 policy which in the future protects his wife and baby.

MR. J. F. C. HYDE, EX-MAYOR OF NEWTON, MASS.—I am reminded as I look over these gentlemen here, of a little story I heard about a couple of travellers in a car. Sitting together, they naturally fell into conversation, and one man said to the other, who was a Jew, "What is your business, sir?" "Well, I am a drummer, sir." "What do you sell, sir?" "Well, I sell jewellery. Would you like to see my samples?" "Yes, I wouldn't mind looking them over." So the Hebrew showed him his samples, and then said, "What do you carry, sir?" "Brains, sir." "Why, then, do you travel without your samples?" Now, these men here do not travel without their samples, I have noticed that; for all the men who have brains, it seems to me, are life insurance agents and life insurance policyholders; they believe in the perseverance of the saints.

EDITOR C. C. HINE, OF THE "MONITOR."—I heard of a boy once who, while at play, unfortunately knocked his ball up on the edge of a barn, and it stuck there in the water-conductor which ran along the edge. The boy was a plucky boy, and determined that he would have that ball; so he shinned up the side of the barn door, and over the eaves and got his ball. But he ruined a new suit of clothes, and when he came down he had his fingers scratched to the quick, his shins all torn and himself in a generally dilapidated and demoralized condition; and the question in my mind was, Was it worth climbing for? And so this "volume" craze—is it worth climbing for, after the fashion of some of the companies?

INSURANCE COMMISSIONER MERRILL.—Somehow, this association is always getting me into a snarl. A couple of years ago, when his Excellency, the Governor, was ill, I was asked here to respond in his behalf; and the next morning when he read in the daily papers the

THE BRITISH CANADIAN
Loan & Investment Company, Ltd.

DIVIDEND NO. 34.

Notice is hereby given that a dividend at the rate of seven per cent. per annum on the paid-up capital of the company for the half-year ending 31st December, 1894, has this day been declared, and that the same will be payable on the

Second Day of January Next.

The transfer books will be closed from the 22nd to the 31st proximo, both days inclusive.

By order of the Directors.

R. H. TOMLINSON, Manager.

Toronto. November 20th, 1894.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Masonry Burlington Bridge," will be received until Thursday, the 10th day of January, 1895, for the construction of the Pivot Pier and Abutments of a Swing Bridge over the Burlington Channel, near the City of Hamilton, Ontario, according to plans and a specification to be seen at the Custom House, Hamilton, at the office of the Resident Engineer, 86 Toronto Street, Toronto, and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied and signed with the actual signatures of tenderers.

An accepted bank cheque, payable to the order of the Minister of Public Works, for the sum of two thousand dollars ($2,000.00) must accompany each tender. This cheque will be forfeited if the party decline the contract, or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,

E. F. E. ROY,
Secretary.

Department of Public Works, Ottawa, 18th Dec., 1894.

WESTERN ASSURANCE COMPANY.

words that I had put into his mouth, he wished he had never been born, at least he wished I had never been born. There is a legend around the state house that some years ago—a great many years ago—the head of one of the departments undertook in the absence of the Governor to respond for the Commonwealth of Massachusetts, and when the Governor, the next day, found what he had said in his behalf, he ordered a court-martial within twenty-four hours, and that head of a department, who was then an elderly gentleman, was sentenced by the court-martial which sat upon him (and it sat upon him heavily) to take out a life insurance policy for ten thousand dollars in the best company doing business in Massachusetts. There were then thirty-one of these companies transacting business in this commonwealth. The agent of each one came to this public functionary, and each one mathematically demonstrated to him that his was the best company. The result was, he took out thirty-one life insurance policies of ten thousand dollars each. They were the ordinary "whole life insurance." The result is that to-day, at the age of one hundred and one, he is paying his regular, lawful premiums upon thirty-one policies in the various companies.

Mr. J. F. C. Hyde.—As I rise to speak here to such an audience as this, I am reminded of the colored man in Albany who was arrested for larceny and brought before the court. The judge happened to know him, and said to him, after the indictment had been read: "Sambo, have you a lawyer?" "No, sah, your honor; aint no lawyer, sah." "Well, have you money to hire a lawyer?" "No, sah; aint no money to hire a lawyer, sah." "Well, Sambo, what are you going to do?" "Well," says he, "as far as I'se concerned, I'se agreeable to stopping the whole proceedings right here." Well, now, so far as speaking is concerned, on my part, I am perfectly willing to do as he wanted to.

Mr. Henry M. Whitney, ex-President West End Street Railway Company.—I am exceedingly happy to meet this company. I could not refuse the invitation extended to me by my friend, Mr. Carpenter—among other things, because it recalled to me my own experience with reference to life insurance. A little more than twelve years ago my father died, having $10,000 life insurance. I do not care to go into the discussion of family affairs, but I will say at that time the fact that he had $10,000 life insurance, and that it was promptly and cheerfully paid, and anticipated (my friend, Mr. Holden, who is here, holding one of the policies), was of the greatest assistance to me in preserving my father's estate intact. It was very much more important to me then than it is now; and I shall never forget, so long as I live, the great advantage that that $10,000 of life insurance was to me in helping me at that time.

Frank D. Allen, U.S. District Attorney—I am reminded of a little incident where a life insurance agent attempted to be his own lawyer. It was not, I believe, in this State. He appeared before the court, and said: "Your honor, I would like to argue this case. I know all about the facts, and I think I can save the court some time if I present the case myself. Although I am well aware of the old French adage that 'he who argues his own case has a fool for a client,' nevertheless, I will risk it in order to save the time of the court." The court consented that he might argue his own case, and the agent did so. After he had finished he said to the clerk that he was called away to a distant State, and he would be gone some few weeks, but would leave his address, and trusted the clerk would send him word as to the decision of the court. He was well aware, he said, of that old French adage, but he thought he had saved the court some time. Within a few days he received a telegram from the clerk, saying, "Old French adage affirmed, with costs."

Hon. Albert Mason, Chief Justice of the Massachusetts Supreme Court.—Perhaps the legal fraternity have some advantages in appreciating the excellence of those engaged in the insurance business that are not shared by the community at large. I think it is a very important consideration that notwithstanding all the technicalities that would seem to bristle in the insurance policies, both of fire and life insurance, that there is practically so little difficulty in adjusting losses under them. Now I do not attempt, and I shall not attempt to enter the field of law relating to life insurance, and one of the reasons that I shall not is that the courts have very little opportunity to become familiar with it. There is very little litigation growing out of life insurance. And if my brethren of the legal fraternity have come here to-night expecting to get many clients, I am afraid that this time the insurance men will get the better of them. There is a great deal more chance that they will get a customer than that the lawyer will get a client.

HYDRAULIC PRESSES FOR ALL PURPOSES

CEMENTS AND FIREBRICKS.—For cements there is, of course, little present demand, but prices are steady at $2 10 to $2 20 for English, Belgian $1 90 to $2 00. Firebricks are moving out pretty freely for repair purposes, and we quote $17 to $20 for ordinary brands, Glenboig $25 per M. Last steamers brought out fair supplies of Scotch bricks, which had been very scarce owing to the coal strike.

DRY GOODS.—Business is still quiet in the warehouses, but all travelling salesmen are again on their routes, and next report will probably show some larger degree of activity. The snow is helping trade in country districts, and city retailers report last week's business as satisfactory, and ahead of the week preceding Christmas.

MONTREAL GRAIN STOCKS IN STORE

	Dec. 17, '94.	Dec. 31, '94.
Wheat, bushels	693,391	668,899
Corn, "	2,016	2,326
Oats, "	198,807	216,746
Rye, "	5,375	5,529
Peas, "	42,726	60,332
Barley, "	5,624	16,116
Total grain	947,939	969,948

GROCERIES.—The broken holiday week has been an exceedingly dull one in this branch, but travellers will all be again on their respective grounds in course of a few days, and with the late heavy snowfall throughout the country generally, it is expected that trade conditions will improve, and orders come in fairly well. With regard to values there is not a novel feature to note. There is a slackened demand for sugars, which continue easy in tone; granulated is quoted at 3¾c. at the refinery, and an odd lot of low grade yellows is obtainable at 2¾c. Molasses is firm at 27½ to 28c. for Barbadoes in lots, single puncheons 30c., with probabilities of an advance when the Lenten demand sets in. Teas are very quiet at the moment, but there is no likelihood of any weakening in values.

HIDES AND TALLOW.—The past week has been one of the dullest for a long time in the way of receipts, some of the largest dealers not having received more than about 100 hides in the week. The Quebec demand, however, has continued good, and prices are firmly held. We quote No. 1 light inspected 5½ to 5¾c., heavies 6¼c. per lb. Lambskins 60 to 65c. each. Tallow is dull and easy at 5½ to 5¼c. per lb.

HOPS.—The market is decidedly dull, with values low and tending to easiness. From 6½ to 7¼c. is about the ordinary quotation, with an occcasional odd lot of choice at 8c. per lb.

LEATHER.—Ideas are certainly stiffer with regard to prices, but with the light demand prevailing at the moment there is not much opportunity to realize an advance. Splits, buff, and glove grain are certainly much firmer, and there has been talk of an advance in slaughter sole. Further requests have come from Britain for consignments, but better figures can be realized here. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 1 ¼c.; calf-splits, 27 to 30c.; calf-skins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c

METALS AND HARDWARE.—The heavy metal men all say that they might almost as well have been shut the past week, for all the business that was doing, and they hardly calculate on any demand of consequence for several weeks to come, many manufacturing establishments being shut down for the annual repairs. Local quotations are without any change. Scotch warrants are cabled lower at 41s. 7d.; ingot tin is also cabled a little easier. We quote:—Coltness pig iron, none here; Calder, No 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21 50; Eglinton, $18 50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19 00 to 19.50; Shotts, none here, Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18 50; Siemens, pig, No 1, $16 75

to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.00 to 2.05; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¾ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead; per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards

Oils and Paints.—Another dull week has to be chronicled in these lines, there being an entire absence of business. There have been some reports of an advance in linseed oil, equal to 4c. a gal., in England, but this lacks confirmation, and former quotations are yet undisturbed. We quote:—Turpentine, 43c. per gal. for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

Wool.—Business in this line is described as "miserably quiet," though it could not be expected to be very active at this season Mill stocks are, however, believed to be in small compass, and an improvement is looked for shortly by wool merchants. Prices remain as last quoted. An auction sale of 120 bales of slightly damaged Cape wool will take place here in the course of a few days.

TORONTO MARKETS.

Toronto, Jan. 3rd, 1895.

Dry Goods.—House trade is never brisk in January. However, there are a few buyers in the city, and the holiday trade throughout the country is reported good. Travellers have remained in the city during the last fortnight, but many of them left for their respective routes on Wednesday morning, 2nd January. It is as yet too early to report what success they have met. Orders for spring trade are good, especially those for prints and linens. The tendency in woolen goods is towards better values. Cottons remain firm and steady; values show no alteration.

Flour and Meal.—While the markets are firm and prices are being pretty well maintained, trade is quiet and void of anything like activity. A few sales of Manitoba descriptions are reported at advanced prices. Ontario millers have not their usual supply of wheat for this season of the year, but have sufficient to meet all the present requirements of the flour trade. The demand for mill feed shows improvement, but values continue without change.

Grain.—The holiday week is never a brilliant one in regard to business transactions Deliveries of grain have been light, and sales from grain merchants' hands of a limited character during the period under review. A correspondent in the North-West, who is generally well informed and not likely to be interested in making a false statement, writes us that Manitoba wheat is now within very small compass. Taking 15,000,000 bushels as the wheat crop of the province, with exports of already about 9,000,000 bushels, there cannot remain in the province more than 4,000,000 bushels. For a considerable quantity has already gone into consumption and has either been used or sent from the province as flour. The seed requirements for next year, estimated at about 1,500,000 bushels, leaves somewhere in the neighborhood of 2,500,000 bushels yet in the province. The report that a "corner" has been accomplished in Manitoba wheat is apparently not without foundation. At any rate, the wheat of our cereal province appears to be pretty well in the hands of three concerns, namely: W. W. Ogilvie, The Lake of the Woods Milling Co., and the Winnipeg syndicate of buyers. The important question remains as to the stock of Manitoba wheat held by Ontario millers None of the mills are believed to be carrying excessive stocks, most of them have enough for immediate requirements, but it appears evident that the great majority

These prices are wholesale by the car-load.

will have to buy the bulk of their supplies for the year at advanced prices. Quotations of Manitoba wheat have advanced 3c. per bushel during the week, and stand as follows: No. 1, 76 to 78c.; No. 2, 74 to 75c.; No. 3, 70 to 71c. On Nov. 2 we quoted No. 1, 62 to 63c.; No. 2, 60 to 61c.; No. 3, 55 to 56c. This gives an approximate advance of 14c. a bushel in two months time. Ontario wheat remains unchanged, and deliveries are not free. A certain amount of constraint in delivery is to be expected in the holiday season, but all through the fall the farmers have been holding back their wheat. This they have been enabled to do by means of the money received from the cheese factories. In barley only No. 1 grade is called for, other descriptions meeting with poor request. Peas are moving in but limited quantities. The demand, however, is keeping up fairly well. Oats are steady and unchanged.

The stocks of grain in store at Port Arthur on Dec. 22nd were 511,187 bushels. During the week there were received 65,373 bushels, and shipped *nil* bushels, leaving in store on Dec. 29th, 576,560.

GROCERIES.—The reaction after the holiday trade is, as usual, most severely felt by the grocery trade. Many of the travellers representing Toronto houses are remaining in the city; those who are soliciting orders from the trade meet with but indifferent success. Values, in the absence of business, have undergone no fluctuations. Dried fruits are inactive, and of blue fruit supplies are on a very limited scale. Sugars are dull and depressed; word comes from Halifax of a cut in prices by the local refinery. There is a pure sugar syrup, very bright in color and free from glucose, offering on the market at 40c. per gal. in half bbls. Teas are quiet and steady. Coffees are firm, and Rio is cabled as advancing in the primary market. The Newfonndland fish market is reported unsteady, as a result of the financial crisis in that colony. Canned goods are slow of movement, but will in all probability begin to go into consumption within a few weeks time. However, as most of the retail grocers have already purchased their supplies and have not drawn upon them to any extent, this will not immediately affect jobbers.

HARDWOOD LUMBER.—There is little or nothing to report in the shape of trade. January is always a quiet month, this January is exceptionally so. For 1 in. and 1½ in. cuts of basswood there is fairly good demand, the requirements being for the local trade. In butternut 2 in. is scarce; there is plenty of 1 in. cuts on the market, and mill men would do well to decrease somewhat the one cut and increase the other. The demand for red birch from the United States is brisk; the request is principally for use in interior decoration. A good export trade to American markets is being done in 1 in. and 1½ in. black ash. But beyond the above mentioned descriptions trade is dull. Quietude is the only thing to report of maple, oak, hickory, chestnut, cherry and elm. Values are nominally unchanged, although transactions are taking place at 10 per cent. under quoted prices.

HIDES AND SKINS.—It is an unusual thing for hides to advance on the first of the year, but on January 1st the local market took an upward turn, and we quote: Green cows, 4c.: steers, 4½c.; cured and inspected, 5c. Offerings are now beginning to show poor quality, and it is doubtful to predict how long this advance will last. We elsewhere refer to the situation in hides. Sheepskins were advanced on the first of the month to 70c., although the movement is rather slow. Calfskins are quiet, and prices nominal.

WOOL.—There has been during the last month a gradual improvement in the feeling in the market for fleece wool. Although merchants have not altered their quotations, in a quiet way they have been bidding for wool and paying, where necessary, prices in advance of the market quotations. These prices are now pretty well established, and we quote: Combing 18 to 19c.; clothing, 18 to 20c. per lb. Pulled wools are quiet and show no alteration in price; we quote: Combing, 16 to 18c.; super, 17 to 19c.; extra, 21 to 22c. per lb.

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

COMMERCIAL TRAVELLERS' ASSOCIATION.

The twenty-second annual meeting of the Commercial Travellers' Association of Canada was held on Friday last, 28th ult., in the parlors of Shaftesbury hall. The president, C. C. Van Norman, occupied the chair. On the platform with the chairman were Warring Kennedy, mayor of Toronto, Hugh Blain, James C. Black, A. A. Allan, James Patterson and John Burns, all ex-presidents of the association.

This association has attained a membership—on 30th November, the close of its year—of 3,764, as compared with 3,598 in 1893, an increase of 166. There were three sessions of the annual gathering, morning, afternoon and evening.

The annual report of the Board of Directors showed the financial affairs of the society to be in a flourishing condition. Notwithstanding heavy payments on account of mortuary and accident claims, the balance carried from profit and loss to permanent reserve amounted to $15,344.36. The total receipts for the twelve months were $65,558.21. From the relief fund payments amounting to $540.20 were made to indigent members or families during the year. The sum of $25,806 had been paid over during the year to the families of twenty-nine members who had died, and the sum of $2,556.40 had been paid under the provisions of the accident bonus by-law. The maximum mortuary benefit for 1895 has been continued at $1,200.

An explanation of the new mortuary benefit certificate adopted was given by Wm. McCabe, the actuary, with whose assistance the new form was drawn up. Instead of the certificate being issued annually, it is to be superseded by a new form, permanent in its character. The cost of insurance was stated to be as follows: At 35 years, $10.53; 40 years, $12.36; 50 years, $19.14; 60 years, $35.61; 75 years, $118.25. One member of 75 now gets insurance worth $118.25 for $10. The association's scheme of insurance was, in Mr. McCabe's opinion, unsurpassed.

Mr. Kennedy made a speech at the afternoon session, and wound up by proposing a resolution of condolence with the relatives of the twenty-nine members who have died during the year. A copy of this resolution is to be sent to each of the bereaved families.

Messrs. Allan, Graham, and Van Norman were appointed representatives to the Industrial Exhibition Board, and Messrs. Wm. Anderson and Wm. Badenach were re-elected auditors.

The following resolution of thanks was then passed unanimously: "That the thanks of this meeting be tendered the retiring president, Mr. C. C. Van Norman, and that he be requested to sit for an oil portrait to be hung in the rooms of the association, and the Board of Management are hereby instructed to procure a suitable testimonial to be presented to him for services rendered." Mr. Van Norman made an appropriate reply, thanking the association for its tribute.

A vote of thanks was also tendered the retiring officers and the board of directors, to which Mr. R. H. Gray responded. Messrs. Allan and Patterson both urged the association to adopt some scheme for the relief of worn-out and aged travellers.

A resolution of sympathy with the widow and family of the late Premier, Sir John Thompson, was passed, and will be forwarded to Lady Thompson.

At the evening session, Mr. Hopwood (who had objected to part of the report referring to the satisfactory relations of the association with the railways and steamboat lines) not being present, a vote of thanks to the transportation companies was passed without comment. Mr. Bedlington, the recording secretary, then moved a resolution, which was carried, urging "that the Board of Management during the coming year make enquiries and conduct negotiations with a view to federating with all sister benefit associations." The Montreal association was the one chiefly aimed at in the resolution. From the wording one would imagine this referred to mortuary benefits, but from the language of mover and seconder it appears intended to form an offensive or defensive union in dealing with the railways.

Much regret was expressed at the retirement of Mr. E. A. Dalley, of Hamilton, after nineteen years' service on the Board of Management, and the directors were instructed to present to Mr. Dalley an address, expressing the feeling of the association.

Messrs. A. A. Allan, T. M. Bayne, Joseph Bonnick, Warring Kennedy, James C. Black, C. C. Van Norman, Hugh Blain, William McCabe, C. H. Murdock and Joseph Taylor were appointed a committee to associate with a committee from the board to formulate some scheme of relief for old and indigent members of the association. Mr. McCabe expressed the opinion that it would be difficult to carry out such a scheme without a substantial contribution from the association.

When the election of officers was reached, the report of the scrutineers was as follows: R. H. Gray, president; R. J. Orr, first vice-president; C. E. Kyle, second vice-president.

Directors of the Toronto board—Messrs. Joseph Taylor, John Burns, E. H. Cosby, E. E. Starr, John Muldrew, H. Goodman, J. H. Devaney, C. H. Murdock, and Alex. Hart.

Directors of the Hamilton board—Messrs. W. Bremner, W. E. La Chance, James Hooper, J. H. Herring, G. A. Black, W. G. Reid.

The gathering then sang the national anthem, and the twenty-second annual meeting of the C.T.A. came to a close.

CATTLE EXPORT IN 1894.

At the request of a correspondent we give below an abridged statement of the exports over sea of Canadian cattle and sheep during the shipping season of 1894, as compared with 1893. The figures are taken from a two-column article on the subject in the Montreal *Gazette* of November 24th last. The months during which shipment went on were from May to November inclusive. Five British, one continental (Antwerp) and St. Malo, the French port on the islands near Newfoundland, are the points to which the animals were despatched:

	1894		1893	
Port.	Cattle.	Sheep.	Cattle.	Sheep.
Liverpool ..	31,684	34,326	33,104	3,247
London	23,564	47,192	23,943	356
Glasgow....	17,952	17,298	19,001	....
Bristol	9,716	39,029	5,076	107
Newcastle ..	1,093	1,918	2,098	33
Antwerp ..	2,761	....	100	....
St. Malo ..	834	....	....	....
Total	87,604	139,763	83,322	3,743

In the years 1890, 1891 and 1892 Aberdeen and Dundee received numbers of Canadian cattle. In 1890 no fewer than 18,000, in 1891 and the following year 10,800 and 6,500 head respectively went to Aberdeen, while Dundee took in those three years 8,700, 12,000 and 8,500 head. None went to those ports, however, in 1893 or 1894. Nor did Leith, Southampton or Hamburg receive any Canadian cattle in the two last-mentioned years, though several hundred head found their way thither in both 1891 and 1892.

On the whole, the season of 1894 was not as bad as the previous one, although it has been in a sense unsuccessful for shippers of cattle. There was money lost in the early part of the season, due to the large shipments of United States cattle and the heavy supplies of dressed beef offering on the English market. This had a depressing effect on values, which almost steadily declined until 4d. per lb. was touched, the lowest of the season. From this point slight improvement set in, and it has been fairly well maintained up to the close. The highest price realized was 5½d. as against 6½d. per lb. last year.

Canadian farmers had to accept lower figures for their stock in order for shippers to compete with American cattle. Last year (1893) it was estimated that the average price paid to the farmer was $65 per head, while this year (1894) it is only $55, which makes a total of $4,818,220 for the total number of cattle shipped this year, as against $5,414,760 last year. Another feature of the trade this season was the large shipments of Northwestern ranch and Manitoba cattle, Messrs. Gordon & Ironsides alone exporting over 17,000 head, as against 10,000 head in 1893. These cattle were bought at low figures, and it is said they lost less money than Ontario stock.

"An important feature of the trade for the season 1894 has been the large increase in exports of sheep, which is principally due to the scarcity of stock in England. When this became known here shippers went through the country and contracted heavily for regular weekly supplies. The season on the whole has been a good one, and the profits have been fair: in fact, we might safely state that considerable money has been made in this branch, but it has not helped the cattle shippers to any extent, as the heavy shippers of sheep were light shippers of cattle, and *vice versa*. The shipments of sheep for the season were 139,763 head, which shows an increase of about 130,000 over last year, and an increase of about 125,000 over 1892. Out of the above number about 30,000 American sheep went through in bond. The Canadian farmer received on an average $5 per head, or a total of $548,815 during the season."

MINERS WILL MEET.

The General Mining Association of Quebec Province will meet in Montreal on Wednesday, Thursday and Friday, January 9, 10 and 11, and the proceedings give promise of being attractive. The programme includes the following papers: An address by Dr. Geo. M. Dawson, C.M.G., on "Hydraulic Mining in British Columbia;" "The Albert Copper Mines and Capleton Fertilizing Works," by Mr. S. L. Spafford, manager of the Nichol's Chemical Company; "Notes on Asbestos," by Mr. John J. Penhale, manager of the United Asbestos Company; "Repairs to Rock Drills," by Mr. John E. Hardman, S.B., M.E., Halifax; "Mining as an Investment," by Capt. R. C. Adams; "Notes on the Prospecting Drill," by Mr. J. Burley Smith, M.E.; "The Occurrence of Lignite and Anthracite in Rupert's Land," by Dr. Robert Bell; "The Geological Survey of Canada and its Operations," by Dr. Robert Ells; "The Tar Sands of the Athabasca Country, N.W.T.," by Mr. R. G. McConnell, B.A.; "Charcoal in its Relation to the Development of Our Forest Wealth," by Mr. T. J. Drummond, Montreal, and "Notes on Mineral Waters," by Mr. James T. McCall, Montreal.

A new feature will be the various notes and statistics respecting the mining industry of Quebec to be submitted by the members. These will be discussed by the gentlemen whose names follow: "The Iron Industry," by Mr. G. E. Drummond, Montreal; "Copper and Pyrites," by Mr. John Blue, C. and M.E, Capelton; "Gold," by Mr. E. B. Haycock, Ottawa; "Asbestos," by Mr. John J. Penhale; "Phosphate, Mica, Chromic Iron, Plumbago," together with "Notes on the Coal Trade of the Province," by Mr. B. T. A. Bell, Ottawa.

THE NEWFOUNDLAND CRISIS.

The following extract from a private letter written by a prominent and respected citizen of St. John's to a friend in New York is published by the New York *Times*:—

St. John's, N.F., Dec. 17, 1894.

My dear ——: I replied to your kind telegram of inquiry at once. It would be difficult to exaggerate the misery caused by the financial crisis. The papers have informed you of the main features and of the condition we are in from the want of a currency, which, I think, is the most extraordinary thing that ever occurred in any civilized community. Without any warning the two banks closed the same day. My own case will serve as an illustration of what happened. I had in the house for current expenses about $50 in Union Bank notes and a few dollars in silver. I had lying in the bank on current account some $200 or $300. When the bank closed the notes were useless; the other money was locked up, so that I had about $5 to go on with. Of course, I had credit enough at the shops, and from a friend I managed to get $10 in silver to pay wages of servants and for other things.

Almost everyone was in a similar predicament. Trade was arrested, except on credit. Workmen were dismissed—no cash to pay wages. Some measures are about to be proposed to make existing notes in circulation legal tenders, under guarantee of Government. The failures followed each other rapidly. How many more will follow is quite impossible to say. All depends on relief coming soon in some form, so as to give time for realization of stocks held.

The position of the Commercial Bank is thoroughly bad—overdrafts to an enormous extent were allowed, and were obtained by the directors themselves. It is thought the manager will be indicted criminally. The Union Bank is much better—will be able to pay its debts but I expect the shareholders will lose their shares. You will be sorry to hear that I am one of them. I had the utmost faith in the Union.

Of course, we are terribly depressed, but hope for the best. This accursed credit system has been at the bottom of it. It led to a rotten banking system, and the inevitable crash. The failure of a house in London which sold most of our fish precipitated the crisis.

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE ONE FULL YEAR'S PROFIT.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

The Investment Annuity Polic
OF THE
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, the maturity of the endowment period, the Compa will pay the amount of insurance in 20 or 25 equ annual instalments, the first of such to be paid on t occurrence of the event or at the expiration of the e dowment period. This plan at once secures to the be eficiary an absolute guaranteed income for the peri selected.

The particular features of this plan are not embodi in any other policy of insurance offered to the insuri public of Canada. It contains elements which no co pany has yet offered to the insured.

A much lower rate of premium is chargeable on than on the other plans of insurance, on account of t payment of the face of the policy being extended over period of twenty or twenty-five years.

The favorite method of accumulating the profits equally applicable to this plan of insurance as to t other investment plans of the Company.

For further particulars apply to any of the Company Agents, or to

DECISIONS IN COMMERCIAL LAW.

ORIGET v. HEDDEN.—The Supreme Court of the United States decides that when the examination of one case in each invoice of an importation is sufficient to determine the value of the importation, the application of the valuation of that case to the entire importation of which it formed a part, is proper. Where the inference is a reasonable one that the goods in each importation are of the same character and value, the examination of one case of them is sufficient for all. If the importer is afforded notice and hearing on the appraisal of the goods as enables him to give his views and make his contention in respect of their value, he cannot complain. Where it clearly and distinctly appeared that the merchant appraiser examined the goods in one case out of each importation sufficiently to satisfy him that they were the same order of goods that his firm imported, this established the familiarity required by the statute, and placed his qualification as an expert beyond reasonable doubt.

PENNSYLVANIA RAILROAD COMPANY v. JONES.—The Supreme Court of the United States decides that it is the duty of the carrier, in the absence of any special contract, to carry safely to the end of his line and deliver to the next carrier in the route beyond. The carrier's liability as such, when no special contract is made, is limited to his own line. That a railroad company owns stock and bonds of other railroad companies, does not tend to show a partnership or agreement to run the roads of the latter on common account. That a railroad company advertises that it runs trains or connects with trains of other companies, so as to form through lines, without breaking bulk or transferring passengers, does not tend to show any contract or agreement between the companies to share profits and losses. A railroad company is not relieved from a liability by the transfer of its road to a receiver, unless the possession of the receiver is always exclusive, and the servants of the road are wholly employed and controlled by him. A railroad company cannot be acquitted of a responsibility because its road is in the control of trustees, unless the business of management and operation of the road are conducted by the trustees to the exclusion of the company, its officers and board of directors.

MUSER v. MAGONE.—According to the Supreme Court of the United States, the valuation of imported merchandise made by the designated officials, in the absence of fraud, is conclusive; yet it is open to attack for want of power to make it, as where the appraisers are disqualified from acting or have not examined the goods, or illegal items have been added independent of the value. Where the conclusion of the appraisers of imported goods was that the market value could be ascertained to their satisfaction, such determination is binding The presumption is that a sworn officer acting in the discharge of his duty, upon a subject over which jurisdiction is given him, has acted rightly.

THE BREAKWATER.—According to the Supreme Court of the United States, in view of the right of ferryboats to an undisturbed passage between their landing places, it is the duty of other steam vessels to keep as near as possible to the centre of the stream in passing up and down the harbor, in order that the exit from and entrance into the ferry slips should not be checked or embarrassed. Where a steam ferryboat has begun to move from her slip and has reached the outer end of the pier, the statutory rules of navigation as to crossing steamers then becomes operative. A vessel at rest has the right to start from her wharf in sight of an approaching vessel, and thereby impose upon the latter the obligation to avoid her. Where the signals exchanged between the two steamers indicate clearly that one of them accepts the situation and the obligation imposed upon her by the starboard hand rule, she is bound to take prompt measures to discharge herself of such obligation.

WILLIAM DEERING v. THE WINONA HARVESTER WORKS.—According to the Supreme Court of the United States, the claim of the Olin patent for an improvement in harvesters which describes a swinging elevator located upon the grain or ascending side of the main belt, cannot be construed to cover a similar device located upon the stubble side. If an inventor describes and claims only a part of his invention in his application for a patent, he is presumed to have abandoned the residue to the public. Oral testimony, unsupported by patents or exhibits tending to show prior use of a device regularly patented, is open to grave suspicion. Anticipations of patents are to be proven by evidence as cogent as to leave no reasonable doubt in the minds of the Court. Unsuccessful and abandoned experiments do not effect the validity of a subsequent patent. The first inventor of a machine is entitled to a patent therefor, though the infringer may make use of other means than those employed by him to operate it.

Mercantile Summary.

THE firm of Menzie, Turner & Co., whose offices are on Melinda street, and who succeeded to the business of the Macfarlane Window Shade Co., are, we understand, uninjured by the recent fire.

THE business heretofore carried on under the name of Hislop, Meldrum & Co., wholesale dealers in country produce, Montreal, was on Thursday last dissolved by mutual consent. Mr. Hislop has taken over the Commissioners street business and Mr. Meldrum the Brennan street business.

THE breeding of horses in the United States has received a check and their value is lessened of late years. According to the American Department of Agriculture in 1889, the average value of a horse was $71.89, from which it fell to $61.22 in 1893, and then to $47.83 in 1894, a reduction of about 35 per cent. in five years.

THE Canada Paint Co., Ltd., of Montreal, Toronto and Victoria, makes the announcement that Mr. W. H. Evans, who has been long and favorably known to the trade, will be its representative in Toronto in succession to Mr. A. G Peuchen. Mr. Lee will continue to be assistant to Mr. Evans.

JOSEPH MURPHY, the Arnprior, Ont., grocer lately reported failed, is offering his creditors 25 cents on the dollar.——Mrs. D. Rose & Co., who started in the millinery line about a year ago, at Cornwall, have assigned to the sheriff. ——The liabilities of C. A. Spratt, shoes, Ottawa, reported as assigned last week, are $2,504, and he makes an offer of 25 cents on the dollar.

CANADA PAPER CO.

15 Front St. West, TORONTO | 578 Craig Street, MONTREAL.

Mercantile Summary.

AN English exchange contrasts the cost of a steamer of 3,500 tons capacity, built on the Clyde in December, 1889, with the cost at which such a boat may be purchased from the same builders at the present time. The former price was £31,500 against £21,500 at present. Machinery is the same in both cases—triple expansion, 22,35 and 59 inches by 39 inches stroke

A NUMBER of sales of farm lands in Lanark and Grenville counties are noted by the Perth *Expositor*. Thus: "James McGregor has sold his farm of 100 acres, east half lot 2 in the 7th con. Drummond, to John McTavish for $4,300 Henry Morris has sold his farm, east half lot 15 in the 5th con. Drummond, 100 acres, to James Shail, jr., of Beckwith, for $3,000, and has bought Murray's hotel at Ferguson's Falls Mr. James Watt has sold 150 acres of lots 14 and 15 in the 8th con. Drummond to Joseph Horricks for $2,400, and is buying a farm in Wolford, Grenville, near Merrickville. There have been quite a number of smaller sales, and a good many are looking for farms."

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

ANY one who has read David Christie Murray's novels, or his travels, or his reports as a special correspondent, and in particular any one who has heard his graphic way of telling a story, will wish to hear his lecture in Association Hall to-night on the Scottish character

A MERCHANT of some twenty years' establishment at Mount Stewart, P.E.I., S. C. Clark, is seeking a settlement at the rate of 50 cents on the dollar, the liabilities being stated at about $14,000. There was a fire in his premises in December, and the insurance of $3,400 he claims to be his main present asset. Mr. Clark failed badly once before in 1879. He has been asked to furnish creditors with a detailed statement

A SHERBROOKE grocer named J. B. Bernier has assigned. He compromised only two months ago at 25 cents, the funds therefor being furnished by his father, and being unable to repay the advance, the latter has taken proceedings in insolvency.——P. A. Vaillancour, who has been carrying on a general store business at St. Charles, in Bellechasse Co., Que., since last June, has assigned. He was in business two or three years ago at Black Lake, and compromised there at 60 cents on the dollar ——Gustave Joly, since April last doing a general store business at St. David d'Yamaska, Que., and previously in business for a short time at Berthierville, has assigned in trust, with liabilities of $5,000 approximately

A DEMAND of assignment has been made upon Maurice Davis, doing business under the style of I. Davis & Co., jobbing furriers, Montreal. I. Davis came from New York about ten years ago, where his business was rather unfavorable, and did business for some years in his wife's name. Three years ago he got into embarrassed shape, a change being made as above ——Simeon Beauchamp, crockery dealer, Montreal, has consented to assign. He has not been in good circumstances for some time, and a demand of assignment was made upon him 18 months ago, which, however, was contested.——T. C. Coderie, a small suburban grocer, has assigned, with liabilities of about $500 ——Alfred Lussier, of Montreal, started a gentleman's furnishing business in June, '93. His record as a clerk was not favorable, and his success was questioned from the start. Still he could apparently command plenty of credit, and now on his assignment owes some $5,000

In April, 1892, Wm. Forest, dealer in furniture, Atwood, failed and compromised at 50 per cent. Since then his assets have been mortgaged, and now he is reported to have fled from his worrying creditors.——Wm. Sloan, who for many years did a small trade in jewellery at Milton, has assigned.

An assignment has been made by Mason & Peterson, jewellers, Vancouver, B.C. They have been in business since August, 1891, and did a fair trade; but being anxious to do more than they were able, they find a heavy stock on hand, and their assets are mortgaged for $765. Now they have liabilities of $4,000 or $5,000. ——Another assignment in the same place is that at of McKay Bros., painters.

H. McAllister & Co., brother and sister, bought out Clellan & Co., shoes and hats, Milltown, N.B., in 1891. The business was a fairly well established one, but the promoters lacked experience, the brother having previously been a saddler, and they have now had to assign. Several bills of sale are recorded against the stock.——R. McLeod, a butcher and trader, of Truro, N.S., has assigned, with small local liabilities.

An offer to compromise at 35 per cent. cash has been made by A. B.Terry, confectioner, who has been in business in Lindsay since Oct., 1884. He owes $1,700, and has nominal assets of about half this sum.——Another proposal of compromise is made by Mrs. F. C. Rogers, general storekeeper, Brussels. She wants her creditors to accept 50 per cent. on their liabilities of $7,000 or $8,000. Her assets are nominally the same.

On Tuesday last an assignment was made by A. Thompson, proprietor of the Old England clothing store on King st. east, Toronto, Richard Tew being the assignee. A statement of affairs is being prepared and stock is being taken. The liabilities are about $35,000 and the assets probably near the same amount. Mr. Thompson appears to have miscalculated the conditions of business in these days and the proportion of expenses that latter day profits will stand.

The price of granulated sugars—Canadian refined—which have been ruling the local market at $4.13 per 100 lbs. in 20 bbl. lots, took a drop yesterday to $3.75, with the possibility that it may reach $3.50 by the first of the year, This big cut is understood to be made to compete with German granulated, which is being imported into Canada in large lots at about $3.57 laid down and duty paid. The duty is 64 cents per 100 lbs.—*Halifax Recorder.*

The sheriff is in possession of the Canadian Hosiery Company at Beeton. This concern was started by Flatow & Everell, who assigned six years ago. After the assignment the assets were bought by Mrs. Everell, who is now th sole owner. Her husband, who managed the business, has been quite irregular in his habits and her embarrassed position is not remarkable. ——In 1890 or 1891 W. F. Lunn gave up his barber shop in Galt and opened a fruit and confectionery store, but never made much money and now assigns. —So does Samuel Neal, wagon maker, at Hagersville.——About two weeks ago we noted the assignment of H. J. Gilbert, dealer in shoes, Hamilton, who has since offered the creditors 50 per cent. But this was declined and now we hear that his father has bought the stock and they are promised 52 per cent.

An offer of compromise is made by George Baker, dealer in shoes at Ridgeway. ——In July, 1893, W. J. Gray purchased the grocery stock of C. E. Spong at Barrie, his father, a well-to-do farmer, securing the payments. As the son had no knowledge of business, his assignment will not be any marvel.——W. E. Weeks, furniture dealer and auctioneer for about seven years in Brantford, also assigns.——The sheriff has taken possession of the assets of R. G. Haight, general storekeeper at Gellert. Strong competition in that small place is the cause of his trouble.——An assignment has been made by Lipsett Bros., who are brickmakers at Mt. Brydges. They owe $3,000, and have nominal assets $1,000 less than this sum.——Mrs. Reid & Co., milliners at Port Dover, started in May last, and already they find an assignment necessary. Certainly a short business career.

Another short-lived business is that of H. Webb, who, in April last, removed from London to Stratford, where he opened a confectionery store. We now hear of his assignment.——F. E. McCormick, tailor at St. Thomas, bought a grocery stock from E. M. Oill last November for $1,700, paying $700 cash at the time of purchase. This week he assigns, claiming to owe his wife $1,300.——In the same place the confectionery stock of Fred. Rawlins has been seized for rent.——Wilson & Co., grocers, Woodstock, whose failure we noted some weeks ago, have compromised at 50 per cent.——This week we note another assignment of a furniture man in Waterloo. His name is Andrew Rockel. ——In May last John Dykes gave up farming and leased the Argyle hotel at West Lorne. Although his house had had a good reputation, we hear of his assignment.

A meeting of the creditors of Hart & Co., Alliston, was held at the office of Thomson, Henderson & Bell yesterday afternoon (Thursday).

About eighteen months ago Volshen & Cohen opened a general store at Carman, Man., but were not successful. Last month they were sued, and now assign to S. A. D. Bertrand.

Last week the troubles of H. Bradford Clark, dealer in upholsterers' supplies here, was noticed. Since then, being unable to arrange a compromise, he has assigned.——An assignment has been made by the Toronto Shoe Co., owned by J. J. Tolfree. This business was established ten years ago.

An assignment is made by Mrs. Harriet Trebilcock, London, who bought the bankrupt stock of her son W. H. Trebilcock, in December, '93, amounting to $10,700, at 38 per cent. discount. Since then her son continued to manage the business, but soon found that he could not restore it to public favor Much sympathy is felt for Mrs. Trebilcock, who was believed to be worth about $16,000 before she became the purchaser.

Montreal failures are reported as under J. H. Cross, formerly a traveller in the clothing line, began business barely a year ago in Montreal, as a jobber in brooms, brushes, and some other lines of grocers' sundries. He has been unable to make a success of the business, and has assigned, with liabilities of $2,876.——Jules Nadon, shoes, recently reported as offering 40 cents on the dollar, has now assigned.——A demand of assignment has been made upon Alfred Benn, a real estate operator; liabilities not yet ascertained.——Miss Kennedy, milliner, whose failure has been already noted, has succeeded in arranging her liabilities of $7,000 at 22½ cents on the dollar, payable in three instalments over twelve months.——Louis G. Thouin, a grocer, also doing something of a jobbing business in cigars, etc., and heretofore supposed to be in very good shape, has fyled consent to assign, a demand having been made upon him. The total of his liabilities is not yet known.——A demand of assignment has been made upon Exilda Bousquet, doing business in the dry goods line under the style of O. Dauphinais & Co. Mr. D. failed in 1890, and again last August he was embarrassed, and made some arrangement with his principal creditor. Present liabilities are $14,184.——George S. Holt, a maker of rubber stamps, etc., is reported an absentee, and a petition has been made to court to have a meeting of creditors called.

TORONTO, ONT.

THE LOSSES BY LAST SUNDAY'S FIRE.

The following figures show the losses of the different insurance companies in the fire of 6th, which practically wiped out the building and machinery of the *Globe* Printing Co., the plant of the Toronto Lithographing Co., the new building and millinery stock of S. F. McKinnon & Co., and the plant and stock of the Brough Printing Company: Northern, $45,000; Scottish Union, $28,000; British America, $24,500; Western, $30,500; Lancashire, $30,200; Queen, $21,600; Sun, $16,200; Liverpool and London and Globe, $15,000; Union, $12,500; Manchester, $12,500; Imperial, $13,700; Phœnix of Hartford, $12,500; Fire Exchange, $15,000; North British, $4,000; Alliance, $7,500; Hartford, $5,500; Atlas, $5,500; Wellington Mutual, $5,000; Gore Mutual, $5,000; Caledonia, $4,200; Eastern, $3,500; Royal, $27,500; London and Lancashire, $17,000; United Fire, $2,500; Perth Mutual, $3,500; Mercantile, $2,200; Ætna, $7,500; London Assurance Corporation, $10,000; Connecticut, $7,500; Guardian, $10,000; Hand in Hand, $5,000; Norwich Union, $5,000; Phœnix of Brooklyn, $4,000; Commercial Union, $16,000; London Mutual, $3,000; Waterloo, $4,200; Phœnix of London, $4,200. Total, $445,000.

Much sympathy is felt for Messrs. S. F. McKinnon & Co., wholesale dealers in millinery. They have displayed a great amount of enterprise, expending over $100,000 on a very handsome warehouse, which was burnt before they had time to arrange their new purchases of stock in the premises. To make matters still worse, Mr. McKinnon was at the time of the fire on the Atlantic ocean, on his way home from Europe. His insurances, which amount to $30,000, will not nearly cover his loss on the building. On stock they have $90,000 insurance and $3,000 on fixtures.

The Brough Printing Co. insurances amount to $13,000. The *Globe* Printing Co. carried $94,150 insurance on its building and contents. Michie & Co., with insurance on grocery stock amounting to $24,000, obtained a settlement of their claim for $600. This does not cover a slight damage to the building. The Toronto Lithographing Co., who occupied a portion of the *Globe* Building, were insured in eighteen companies, the total insurance amounting to $51,600. The substantial brick structure owned by Alexander Manning and occupied by caterer Harry Webb, was badly damaged. Mr. Manning's insurance was $20,000, with a loss of probably about $10,000. Harry Webb lost $17,000, covered by insurance. Messrs. Nicholas Rooney & Co. lose heavily upon building and stock, and this risk is a total loss.

CANADIAN BANK CLEARINGS.

We present below the monthly clearings at the Clearing Houses in Montreal, Toronto, Halifax, Winnipeg and Hamilton for 1894, compared with 1893. The Bank of Toronto not being a member of the Clearing House Association, its returns are not included:

	1894.	1893.
January	$75,266,317	$93,381,112
February	65,855,401	8 , 19,925
March	85,958,760	88,467,710
April	71,040,431	80,237,051
May	88,255,333	87,677,682
June	71,452,444	84,706,628
July	81,018,081	88,699,684
August	85,708,950	81,683,684
September	74,283,147	82,332,430
October	87,705,953	88,034,961
November	103,943,135	88,204,809
December	79,876,457	74,986,756
	$970,364,409	$1,018,432,382

The aggregates of last year at the different cities were:—Montreal, $543,248,650; Toronto, $277,484,530; Halifax, $58,778; Winnipeg, $45,803,419; Hamilton, $34,107,341.

THE partnership which has existed between John Stiegler and Andrew Oliver, in the village of Mildmay, was, on the 31st Dec., dissolved by mutual consent. Mr Steigler will continue the business

THE SITUATION.

Governor O'Brien, of Newfoundland, must be presumed to have acted in accordance with the royal instructions to colonial governors when he reserved the bill guaranteeing a percentage on the notes of the two banks which have stopped payment. It was his duty to refuse assent to the bill pending the expression of the pleasure of Her Majesty thereon, for it came under the category of "unusual" or "extraordinary." By this reservation, the Governor is not to be presumed to have expressed any opinion on the merits of the measure, but simply to have performed a duty incumbent upon him as the representative of Her Majesty in the Island. Whether it shall go into force will practically depend upon the decision of the Colonial Office. Whatever may be the result of the passing of the bill by the two Houses, there seems to be a general opinion in the Island that a Royal Commission might render a real service to the people at this juncture. The sudden departure of Sir Ambrose Shea for England, after conferring with the principal people at St. John's, is attributed to the desire of the British Government to consult him on the present crisis in the Island. A Royal Commission would be likely to collect valuable information on the present condition of affairs and the causes of the trouble, and it might, perhaps, suggest some remedy. The talk about the Island going back to the condition of a Crown colony was a wail of despair hastily uttered. It is plain enough that no such retrogression would be possible. The excitable political elements to be found there would, if such a metamorphosis took place, present a serious public danger. If a Royal Commission can point the way out of the present trouble, it would render an essential service to the afflicted Islanders.

Following the failure of the two banks and the losses involved, business in Newfoundland was reduced to a state of temporary paralysis. The losses suffered cannot be recovered, but to do what sound business remains, the means will be found. Already the Bank of Montreal has set up an agency at St. John's. Before the Government obtained a loan from the bank, the due bills in which it was paying current expenses fell to a discount of 25 per cent. What fish there is to send to market will have no great difficulty in finding its way there. The mercantile bankruptcies create an abnormal state of things, which liquidation can alone get over. The working fisherman is generally a partner in the enterprise in which he is engaged, but he as a rule draws on the future through the "planter," as the furnisher of supplies is called, and when the fishery fails in whole or in part, large numbers of men are plunged into poverty. The rule has been for the Legislature to grant large sums in relief of the poor, but now when the resources of the Government are under the most serious embarrassment, the difficulty of the situation is greatly enhanced. While the means of relief are shortened, the extent of the suffering calling for aid is on an unusually large scale. There are people who believe that the economic condition of the Island would be improved by a union with Canada. What are the facts relied on to support this conclusion we should perhaps better learn through a Royal Commission than in any other way. The obstacle in the way of union with Canada has hitherto been found in the supposed political necessities of one of the active parties. The real question is whether there is in the present condition of the Island anything to change the views of the Antis, for without such change experience amply proves that nothing can be done. It is probable that the politicians at Ottawa are not now averse to the Island joining the confederation any more than they have been in the past.

Mr. Ritchie, of Akron, Ohio, the chief promoter of the Canadian Copper Company and the Anglo-American Iron Company, after going to law with his partners, falls foul of the judge who decided against him. He has memorialized Congress to investigate charges against Judge Ricks. He claims to have lost $6,000,000 by adverse judicial decisions, which he has challenged. He says that he made arrangements in England, in 1889, to sell the two properties in England for $15,000,000, and that at this point his associates planned a scheme to rob him, the largest holder. Being beaten in the courts, he charges crookedness against Judge Ricks, besides involving another judge, a Senator, and two Canadians. The latter he charges with trying to put off upon him railway coupons which they had stolen from a Canadian railway. The charges, whatever their foundation, will be investigated. Canadians will listen with interest to the unfolding of a story which promises to be prolific in scandals of the first rank.

Should Canada elect to become a party to the recent treaty between Great Britain and Japan, the question may be expected to come before Parliament next session. The treaty will not go into force for five years, but a foretaste of it will come in the meantime in the form of intermediate concessions. It is probable that Canada will find her advantage in becoming the third party to the treaty, and the number of colonies participating may be increased at their own option. Whatever objection there may be to commercial treaties without a most favored nation clause, as tending to restrict the trade of the contracting nations with other countries, they would not apply to this treaty. The most advantageous commercial treaties are those between countries which had previously little or no trade with one another; for whatever trade results from the convention is a direct addition to that which before existed. Between Canada and Japan there is little commerce at present; if we join in the treaty, we shall certainly get some. Adherence to this treaty would not tie our hands in our dealings with other countries, with which we should be at liberty to make precisely the same arrangements as with Japan. To a treaty of this kind there can be little, if any, objection; and when Canada is required to say whether she will accept the conditions of the treaty, she will have some, if not strong, inducements to give an affirmative answer.

American shippers of meat to England who have been in the habit of allowing one lb. per quarter for shrinkage, on the voyage and in cutting, now wish to allow it no more. On the basis of this proposal the cry has been raised, in London, that the Americans may soon attempt to capture the London market. Sir R. Rollitt, who presided at a meeting of the cattle section of the Chamber of Commerce, admitted that if the meat were weighed after it arrived, the English purchaser would suffer. Perhaps he does not see that this is only another way of saying that the shrinkage does not equal the allowance made for it. The so-called shrinkage has two causes: part is due to the voyage and part to cutting up. The only real shrinkage would seem to be that which results from the voyage. There is waste in cutting, but this is not shrinkage properly speaking. It might help to a solution of the question if things were called by the right name. The proposed change, Sir R. Rollitt feared, would lead to the formation of rings for the control by Chicago of the London market. The Chicago men, he said, refused to trade with dealers who made the allowance which it is proposed to put an end to. Refusing to trade with particular people is not likely to be permitted; since, if the law, as it stands, is not strong enough to prevent indulgence in such capricious moods, Parliament will be appealed to to make it stronger. American monopoly methods have little chance of being transplanted to England. But it is not quite plain how Chicago monopolists can be brought under the English law, unless the offence be committed in England. If Chicago meat men should attempt to carry crooked plans out in London, they may soon find themselves supplanted by Canadian producers.

UNITED STATES COMMERCIAL FAILURES.

In the last issue of *Dun's Review* we find a tabulated statement of the failures of 1894 in the United States. Compared with those of the disastrous year 1893, they show a considerable falling off in number, and still more marked decline in aggregate liabilities. The number of failures were 13,885 and the liabilities $172,992,856. In 1893 the failures numbered 15,242 and the liabilities $346,779,000. Of these 3,429 were manufacturing concerns, with liabilities of $176,982,000, being more than half the total. The statement shows that most of the decrease in the United States is in manufacturing liabilities. A few States, including New York and Pennsylvania, show more failures than in 1893, and in a few Southern States the amount of liabilities is larger, but in Central and Western States very much smaller. In eleven of the last thirty-eight years, reported liabilities have been larger than in 1894, though for this year and 1893 the statement is confined to commercial failures, as it was not in former years. The failures have been 12.5 in every thousand firms doing business; the liabilities have averaged $13,277 to each firm in trade.

The complete review of different branches of business given to-day, says the *Review*, places in a clear light the fact that prices of commodities are at the lowest level ever known. Eight years ago, in July, prices averaged only 73.69 per cent. of the prices for the same articles and in the same markets January 1st, 1860, and this remained the lowest point ever touched until August 10th, 1893, when the average fell to 72.76, but early this year prices dropped below all previous records and have never recovered, the average December 26th being only 68.73 per cent. of the prices in 1860. The fall since a year ago has been 5½ per cent., but very unequal in different branches. In iron and steel products 14 per cent., in wool 13.4 per cent., in woolens and cottons about 15 per cent. These changes contrast sharply with the decline of wages paid per hour's work, which average only 1.2 per cent. less than a year ago.

THE FAILURES OF 1894 IN CANADA.

The mercantile failures of the past year in Canada exceed in number and amount of liabilities either of the two preceding years, and are about equal to those of 1890 and 1891, respectively. Nor are they as great in amount as, though they exceed in number, those of 1884. A comparison with former years is given herewith:

Year.	No. Failures.	Amount Liabilities.
1882	788	$ 8,587,000
1883	1,379	15,872,000
1884	1,308	18,989,000
1885	1,247	8,743,000
1886	1,233	10,171,000
1887	1,366	16,070,000
1888	1,667	13,974,000
1889	1,747	14,528,000
1890	1,828	17,858,000
1891	1,861	16,724,000
1892	1,680	13,703,000
1893	1,278	12,689,000
1894	1,856	17,616,215

A partial classification of the Canadian failures of 1894 is given by the Mercantile Agency of R. G. Dun & Co., and compared with those of 1893, showing a marked decrease of disasters among manufacturing concerns, and a still more marked increase of "trading and other commercial" concerns. Thus:

	Manufacturing.		Trading.		Other Commercial	
	No.	Amount.	No.	Amount.	No.	Amount.
1894	494	$5,898,385	1,345	$11,436,258	17	$ 281,572
1893	839	6,703,075	488	4,830,118	17	1,156,601

The assets are given as being $13,510,056, or, say, 76.69 per cent. in 1894, as compared with $8,321,570, equal to 65.57 per cent. on the liabilities of $12,689,000 in 1893.

THE FIRE OF SUNDAY LAST.

The chief of the Toronto Fire Brigade has repeatedly told the city council that he needed steam fire engines in order to properly contend with fire in tall buildings. The fire underwriters have memorialized the council again and again as to the necessity for steam fire engines in Toronto. The fire committee of the council has backed up these requests. The Board of Trade has petitioned the city council. But to no purpose. The reply of the council has been: "There is no danger; we are all right; haven't we got fire water pressure and a first-class fire brigade? We can't afford to buy steamers; we want a new city hall; we have to spend so much on pavements and on schools; then the councillors must have salaries—there is nothing left for steamers. Besides, we are not going to be bullied by the insurance agents. Not much!"

On last Sunday morning the need of steam fire engines was shown in a vivid manner. A fire broke out in the office of the *Globe* newspaper, one of the new tall buildings of the city. It was a mass of fire from cellar to cornice before the brigade was made aware. The water from the hydrants would not reach the fourth story under the pressure from the reservoir, partly because the fierce wind blew the jets into spray. Two three-story buildings and a seven-story warehouse took fire from the first and were gutted. Indeed so fierce was the mass of flame and sparks that but for the snow that covered adjoining houses, whole blocks might have been destroyed, and that in the heart of the business quarter. As it is, seven hundred thousand dollars worth has gone up in smoke. Worse than all, one gallant fireman lost his life, and several others, the chief of the brigade included, lie maimed and suffering.

This loss of life need not have taken place and two-thirds of this loss of property might have been averted but for the criminal disregard by the Toronto city council of

repeated requests for reasonable means of protection such as other large cities possess.

Of course, now that this disaster has taken place, aldermen and candidates declare loudly—especially on election day, just *after* this great fire—for steam fire engines, for inspection of buildings, for various preventive measures such as should have been provided long ago by those who are supposed to be the guardians of the lives and interests of the citizens. What the citizens want is that something shall be *done*, and that at once.

Two years ago, just after the three million dollar fire in Milwaukee, this journal used the following language:

"Milwaukee has a good fire department; it is well equipped, and was well handled on this occasion. But with the wind blowing from thirty to forty miles an hour, any brigade has a hard task to fight whole blazing blocks and railway trains. There is a lesson to be learned from this conflagration that Torontonians might do well to heed. We are too much accustomed to rely on the pressure in the mains for water to put out city fires. But suppose a fire high up in one of the tall buildings in our midst, can any one guarantee that there will be pressure enough to reach it? Certainly the chief of the fire department will not. That official has, in two successive annual reports, made it known to the city council that he needs more and better equipment, and it has not been provided. We are told that there is no other city in America of the size of Toronto that attempts to do without several steam fire engines. Is it apathy, or a desire for so-called economy, that prevents our city fathers from providing them? False economy it would prove if we find some night, with a thirty-mile gale blowing off Lake Ontario, a dozen of our choicest blocks in the business quarter reduced to smoking ashes. And this is no less likely to happen than the Milwaukee disaster of last Friday seemed."

TRADE WITH THE WEST INDIES.

There is a satisfactory record of growth in the trade of Halifax with the West Indies during 1894. The quantities of fish exported and of sugar and molasses imported at that city, compared with former years, are given in the *Morning Chronicle*. They show a decided increase in 1894 over any of the last five years, as may be seen by a glance at the subjoined figures. It is noticeable that not only the British West India islands are included, but Brazil, Cuba, Porto Rico and the Guiana settlement on the South American continent. The lists show "exports of fish to West Indies, including Demerara and Brazil, and shipments to Cuba *via* United States, and imports of sugar and molasses for the year ending Dec. 31st, 1894":—

EXPORTS—FISH.

	Quintals dry fish.	Barrels pickled fish.
Jamaica	103,757	44,745
Porto Rico	59,943	5,784
Demerara	45,099	4,186
Cuba	46,984	.....
Hayti	14,902	5,738
Trinidad	6,604	381
St. Kitts and Nevis	6,465	1,229
Barbadoes	4,967	310
St. Croix	2,957	1,575
Brazil	4,673	.....
Antigua	2,017	767
Dominica	930	97
St. Thomas	730	312
Bermuda	570	.....
	300,299	64,124
Exports for previous years:		
1889	267,728	38,175
1890	241,539	36,983
1891	247,537	36,170
1892	262,896	45,773
1893	238,807	46,206

Thus the exports of dry fish last year exceeded in aggregate by about 11 per cent. any year in the comparison, and those of pickled fish by about 30 per cent.

Halifax imports of sugar exhibit a marked increase for the year, especially in the quantity brought in in bags, the import being 353,026 bags, as compared with 240,276 bags in 1893 and 276,785 in 1892. Hogsheads number 7,294, as against an average of 5,318 in the previous three years. There is 34,000 barrels beet root sugar included in the list, presumably German or French.

Imports—Sugars from	H.	T.	B.	Bags
Windward and West India Islands	4,404	511	12,400	29,895
East Indies, etc	....	....	....	140,772
Cuba	....	....	....	100,257
Beet root	....	....	....	34,559
Demerara	....	....	50	29,036
Porto Rico	2,662	4	163	3,155
Brazil	....	....	....	14,500
Jamaica	228	130	568	862
	7,294	645	13,181	353,036
Imports previous years:				
1889	12,425	939	2,952	120,020
1890	13,698	199	3,192	137,813
1891	7,069	64	1,033	222,204
1892	5,597	464	3,500	276,735
1893	3,290	279	9,027	240,276

Molasses, on the other hand, shows a falling off in quantity, the imports being 7,978 puncheons, 2,096 barrels, 701 tierces, as compared with 9,092 puncheons, 1,212 barrels, 872 tierces in 1893. Porto Rico, Barbadoes and Antigua are the sources of most of this supply.

MOLASSES IMPORTED FROM:

	P.	T.	B.
Porto Rico	3,572	329	285
Antigua	1,692	234	696
Barbadoes	1,485	138	151
Demerara	608	....	....
St. Croix	378	....	790
St. Kitts	243	....	174
	7,978	701	2,096
IMPORTS IN PREVIOUS YEARS:			
1889	12,216	975	2,147
1890	12,765	839	1,828
1891	12,898	1,498	1,066
1892	9,730	773	1,772
1893	9,092	872	1,212

HOP CULTURE IN BRITISH COLUMBIA.

Just across the border line from British Columbia lies the State of Washington, certain districts of which State have long been justly celebrated for excellence in hop culture. Why the inhabitants of British Columbia have not turned their attention to growing hops has for some time been a query with those having knowledge of this province's resources and adaptability to this particular industry. There are some hop yards in British Columbia, and their product has been sent to both eastern Canadian markets and to England, where they were well received. Samples from the Okanagan country were considered especially good, and brought highest quotations. At the meeting of an agricultural association recently in Vernon, the whole question was thoroughly investigated. Mr. Dell, a gentleman who apparently had gone into the culture of hops upon a scientific basis, gave an estimate of the expenses, receipts and profits attendant upon the cultivation of one acre. The permanent investment, including cost of the land, hop cuttings, and expense of staking and setting the cuttings and price of the picking boxes, amounted to $173. The expenses of the first year, allowing 8 per cent. interest upon amount of permanent investment, were $88. In the first year 568 pounds of hops were picked, which brought $111.60, selling at about 20 cents per pound. The expenses of the second year amounted to $140.47, while the 1,440 pounds of hops grown upon the acre, if sold at London quotations, would bring $259.20 to the grower. In the first year it cost 15 cents to grow one pound of hops, and

in the second year but 10 cents. This reduction in the cost of production was due to the largely increased yield during the second year. The grower netted from the first year's operations $28.29, while in the second year he had $118.73 as a net profit. Thus, two years' profits almost covered the money expended by way of permanent investment. Mr. Dell is apparently accurate in his estimates, and his figures may be taken, we should think, as substantially correct. The industry is worthy of encouragement at the hands of the Agricultural Department, and should it attain any considerable degree of development must strengthen the financial condition of a province which is now devoted too exclusively to fishing, mining and lumber operations.

THE UNITED STATES GOVERNMENT AND THE BANKS.

Since the recent loan of $69,000,000, the United States Treasury has continued to lose gold nearly as fast as before, and another issue of bonds may soon become necessary. The deficit of $27,000,000 in the first half of the fiscal year has not been without its influence on the loss of gold by the Treasury Department. Another reason for the outflow of gold is that to a large extent an inferior currency takes its place. Silver certificates would be one of the best conceivable currencies if silver were equal to gold, and there was on deposit enough of the metal to meet the issue if all the certificates were presented for payment. But silver is not equal to gold, and Treasury issues of other forms of paper have a natural tendency to supplant gold, and cause it to be exported. Another loan may become necessary, but a loan will not cure the evil unless the cause be removed. Mr. Morgan, speaking for the banks, is reported to have told the President that, unless Secretary Carlisle were removed the bankers would not aid the Government to secure a new loan. There could of course be only one answer to such a threat, and Mr. Cleveland was not slow to give it. A popular loan, such as the French Government knows so well how to secure, would probably not be impossible in the United States—a loan in small amounts, the Treasury dealing directly with the lenders. The banks may not have been without just cause of complaint, if the action of the Treasury in foreshadowing another loan unnecessarily caused a decline in the securities they had purchased. But if another loan must be made, the fact of its coming could not be concealed. The loss of gold by the Treasury is notorious, though the fact may have been specially emphasised by Secretary Carlisle. If it came to a tussle between the Government and the banks, President Cleveland would probably show, as Jackson did, that great as the power of the banks is, that of the Government is still greater.

TORONTO TRADE FIGURES.

Imports at the port of Toronto for December last were of the value of $1,199,807, of which amount $832,154 consisted of dutiable goods. The imports in the same month of 1893 were $1,055,005, the proportion of dutiable goods being about the same. Exports last month were of the value of $443,977, as against $413,442 in December, 1893. We append our usual comparison of principal imports:

	Dec., 1894.	Dec., 1893.
Cotton and manufactures of	$81,568	$88,351
Fancy goods	29,395	27,562
Hats, caps and bonnets	1,762	1,447
Silk manufactures	33,113	34,610
Woolen manufactures	113,496	94,049
	$259,334	$246,019
Brass, manufactures of	$ 4,623	$ 4,050
Copper, "	482	5,073
Iron and steel "	71,015	71,749
Lead "	4,003	4,931
Metal and composition	5,984	8,134
Total metal goods	$ 86,107	$ 93,937
Books, pamphlets, &c	33,661	40,741
Coal, bituminous	34,282	30,537
" anthracite	87,517	.....
Drugs and medicines	15,148	14,396
Earthen and chinaware	10,305	12,192
Fruits, green and dried	69,882	62,298
Glass and glassware	18,415	11,483
Leather and manfrs. of	14,055	17,072
Musical instruments	11,581	14,714
Paper and manufactures of	25,860	18,296
Spirits and wines	8,874	10,495
Wood goods	7,183	12,609

The largest item among free goods is, of course, anthracite coal, of which $87,517 worth was brought in, Next to this come hides and skins, $56,848; then tea. $38,956; chemicals, $28,657; coffee, $15,942; settlers' effects, $12,688; wool, $10,789; tobacco leaf, $5,114.

Exports of Canadian goods amounted in value to $409,910, the largest item being bacon and hams, $98,595, and the next leather, $47,708, followed by barley, $88,015.

EXPORTS OF CANADIAN PRODUCE.

Produce of	Dec., 1894.	Dec., 1893.
The Mine	$ 38	$ 8
" Fisheries	.....	.....
" Forest	3,187	7,061
" Field	159,950	191,020
Animals, etc.	139,061	92,299
Manufactures	107,674	86,062
	$409,910	$376,450

THE A.O.U.W. AND THE I.O.F.

SECOND ARTICLE.

The *Workman* cannot deny that its Ontario lodges are growing prematurely old, and that never before has it been a supplicant for Relief Board assistance, as it is at this moment. Nor can it deny that it has members who are 60 to 65 years old who pay the same as their grandsons of 21; nor can it deny that though the net cost of risk for one year's insurance at the latter age is $80.26, the Order is getting from them, including the December relief call, only $17 this year; nor can it deny that those who survive will be 66 next year and 67 the following year, costing the society $87.40 and $95.28, and three years hence $104 each. Nor can it deny that there is much dissatisfaction among the young men in the Order at this state of things, and great reluctance on the part of young men outside to join its ranks of late on this account. Nor can it deny that "separation" is being resolved upon by whole lodges. The official notice of December 1st shows only two deaths under 35, with four from 35 to 45, and six at ages above 45—twelve in all. One was 68, another 62, and another 58.

Straws sometimes show which way the wind blows. The average assessments for the past fourteen years in the Ontario jurisdiction have been only $13.76 per year, but past assessments in all the grand lodges were light at first, and so they were in the Iron Hall, and the United Foresters, and the Canadian Relief Society, and the London Masonic, and the Canadian Mutual Aid.

Our Orillia contemporary need not hope to see so light an assessment as that again, especially if Brother John Milne continues to act as organizer. We notice that in the course of an hour and a half's speech, in response to a complimentary address presented him by the Mayor of Brockville, that gentleman "contended that a man at 44 was a safer risk than a man at 25, and went on at some length to prove his statement." And this in the face of the fact that after a man has reached 45 years of age he is not admitted to the Order at any price. Also in contradiction

of the experience of generations that the expectancy of the one is 25 years and of the other 38 years—fifty per cent. greater.

The A.O.U.W. is not the only assessment society which has to meet unduly increasing assessments with increasing age. That is what naturally occurs under that system, because it provides no certainty of his wife's winning the face of the certificate, after a man has paid and paid and paid, unless he speedily become a claim himself. The following gives the increase of death claims for ten years past in several societies apart from working expenses:—

	Year.	Members.	Net cost per $1,000.
American Legion of Honor	1884	57,005	$ 9 30
" " "	1893	60,076	16 00
Catholic Benevolent Legion	1884	4,306	5 62
" " "	1893	31,772	13 62
Chosen Friends, Indianapolis	1884	22,737	7 95
" " "	1893	34,892	16 99
Knights of Honor, St. Louis	1884	128,607	11 10
" " "	1893	123,354	17 15
Knight Templars, Cincinnati	1884	4,560	8 48
" " "	1893	4,403	16 00
Northwestern Masonic Aid	1884	25,572	6 13
" " "	1893	45,773	13 36
Oddfellows' Mutual Relief	1884	4,075	11 70
" " "	1893	1,820	28 30
Royal Templars of Temperance	1884	15,113	7 00
" " "	1893	12,957	19 86
Southern Tier Masonic, Elmira	1884	3,397	18 00
" " " "	1893	927	30 00

Some of these societies have brought in a very large amount of "new blood" during the ten years, and yet the assessments increase. In others the membership has decreased, owing to the heavy calls. These are now unable to get in much more new blood, if any, and the final catastrophe seems imminent, after the fashion of the Iron Hall, the London Masonic and the Canadian Relief, all of unpleasant memory. The receiver of the latter society has got a decision at Osgoode Hall that settles the question as to every member who recently let his certificate lapse being still liable for unpaid calls. The Judge held that there was a way of retiring, by a written notice, and that as no such notice had been given, all such members must pay the demands of the receiver until all claims are liquidated. "All is not gold that glitters."

A CHAPTER ON SUGARS.

No one will be surprised to hear that domestic refined sugars have again gone a notch lower. The quotations which Toronto jobbers now offer to the trade are as follows: Redpath Paris lump, 5¼c.; extra granulated, 3⅞c.; very bright, 3⅝c.; bright yellow, 3 30 to 3.40c.; medium bright yellow, 3¼ to 3.30c.; yellow, 3⅛c. per lb. This reduction, in face of the already low prices at which domestic sugars have been selling, might have excited comment were it not for the fact that everyone knows that the product of German refiners has been gradually displacing domestic sugars, in spite of the low prices at which the latter have been offering.

But the Canadian refiners are made of stern stuff, and are not willing to stand idly by and see their product driven from the market. They have sought to meet the Germans with their own weapons, viz., low prices. As a result the trade never bought sugars so cheaply as to-day. The German refiners have the advantage of a bonus upon exports amounting to 21½c. per 100 pounds, which goes a long way in reducing the protection (64c. per 100 pounds) afforded Canadian manufacturers by the tariff. And although there may be some difference of opinion as to the advisability of a protective tariff for Canada, there can be but little question that to remove protection from those industries in which other countries are offering a bonus upon exports, is to but bring about the annihilation of the home manufacture of these goods.

There is a surplus of granulated sugar in Germany at present When the German government began to assist the sugar refining industry, the natural consequence was a plethora of refineries arising on every hand. When the talk arose of free sugar in the United States, additional encouragement to refine sugar was given to the Germans, and still more factories were built; and the capacity of the German refineries is now several times greater than the needs of the home market Prices of granulated sugar in Germany have sunk to a hitherto unheard-of level, and in order to relieve, if possible, the home market, the large refiners have been ferreting out every possible source of outlet. In consequence scarcely a vessel arrives in New York from Hamburg that does not carry several hundred bags of granulated sugars shipped upon Canadian account.

The German granulated beet sugar—at least that sent to our markets—does not compare in quality to the extra standard grades of Canadian granulated. But this is an age of cheap commodities. Price, not quality, is the consideration uppermost in the consumer's mind when making a purchase, and the merchant himself is not loath to buy goods "at a bargain" when he has the opportunity. But two can play at the game of making cheap goods, and one of the refineries has very recently placed an "off granulated" sugar upon the market. It sells as low as the German article, and those jobbers who handle this grade quote it at 3⅞ cents per pound. This sugar stands a good test, rising so high as 96, it is said; and the one difference between it and sugars of the first grade lies in appearance. When placed side by side, the comparison is very disadvantageous to the latest arrival upon the sugar market.

There are those in the trade who predict trouble in the future because of the manufacture of this low grade article. But the whole blame must rest with the retail trade and the public. The call has been for cheap sugar, and they have it now both as regards price and quality. The company who refine this sugar consider that they have done all in their power to prevent a confusion of grades by plainly marking the nature of the contents of each barrel. But some confusion must nevertheless inevitably arise. In respect to package, this second grade domestic granulated sugar is superior to the German article, as it is put up only in the best Canadian barrels, while the German sugar arrives either in bags or large unwieldy barrels which poorly stand so long a voyage

RUSHING THE SEASON

Premature shipments by the wholesale trade mean premature displays by the retail trade. Thus it is that while the ground is covered with snow and the sun struggles in vain to enter through the frosted windows, we find the merchant offering prints, ginghams, muslins and other fabrics for summer wear to his customers. "And why not?" he asks. "These goods must be purchased some time; why not show them early in the year? If I don't have them on my shelves a competitor will, and he may steal trade that would otherwise be mine."

Hot-house fruit is never so luscious as fruit grown in season. Strawberries in February do not tempt us as do the berries of July and August. In the winter our taste is for winter fruit; in the summer that which was so appetizing a few months previous has lost its charms Taste is not the only sense which receives gratification in different ways at different seasons of the year. And if you will pause for a moment you will acknowledge just a shade of disappointment at the indifferent ways in which your first display of last summer's fabrics were received The goods were turned over in a half unconscious way, and excited but little comment. Later in the year, when spring had actually arrived, the patterns were voted old, and people wanted to know why you had nothing new to show them.

February and March are slow months for the dry goods trade. Quietude is necessarily attendant upon the reaction which follows the holidays. Having pretty well drained the pockets of his customers, not even by a display of new and beautiful goods can the merchant hope to again fill his tills. To show summer goods is not to sell them, but serves only as a reminder of approaching spring. Better is it to devote all the energy of the house to clearing off the balance of the winter stock, and making preparations for an active trade when spring arrives.

IMPROVEMENT AT LAST.

As old as our trade with Barbadoes is the question of flour packages. Wood is not a superfluous commodity in this West Indian island, and the barrels received by way of import are treasured and used again in the export trade. The American millers ship their flour in strong, durable barrels, just what the merchants of Bridgetown want; the barrels used by the Canadian millers failed to meet the requirements of the trade, and Canadian flour, in consequence, was at a discount compared with the product of the United States. However, continued complaints of shipping agents appear to have at last borne fruit, and the Canadian Commercial Agent at Barbadoes, in his last report to the Minister of Trade and Commerce, writes: "I am pleased to report that there is some better feeling being exhibited towards flour of Canadian manufacture. Although, owing to the depression already referred to, importations have not been large, I am informed that the parcels which have come through have given much satisfaction. Not only have the keeping qualities of the flour been greatly improved, but there has also been some improvement made in the packages in which the same is placed, the white oak and flat-hooped barrels giving place to those of red oak

round-hooped. From the present appearances, if the quality be kept uniformly good, and the packages like those now being sent, flour of Canadian manufacture will, no doubt, obtain a fair share of the trade here after a little while."

IMPURITY IN CLOVER SEED.

An article drawing attention to the impurity of the clover seed exported by Canada and the United States has received pretty wide circulation in the press this week. The question is not a new one, and unfortunately the statement made that the American seeds received by English importing houses are very impure, is but too true. In September last the Ontario Department of Agriculture issued a bulletin entitled "Impurities in Clover Seed." A tabulated statement was therein given showing the number of weed seeds and other impurities in a half ounce of both alsike and red clover seeds. Although the compiler is very apparently inaccurate in some of his figures, his work is valuable as drawing attention to the matter and this bulletin is the inspiration of the article in question. Nine reports are received from wholesale seedsmen in Toronto, Hamilton, London and St. Mary's and the most unfavorable test in this list gives ten weed seeds in the half ounce of alsike examined by each and six weed seeds in the half ounce of red clover tested. Some of the tests, however, as made by other than wholesale seedsmen, gave exceedingly bad results. These latter reports for the most part are made from small towns and villages, and show imperfect methods of cleaning. The moral, of course, naturally follows that in the interest of Canadian agriculture and of the seed export trade, farmers should dispose of their seeds to reputable merchants only. An export trade is in a peculiar position. Every man engaging in it is placed upon his honor to deal fairly and squarely. The knavery, incompetence or carelessness of two or three persons may jeopardize the very existence of the whole industry.

Some weeds are more obnoxious than others. To distribute wild mustard, wild flax and Canada thistles through seed for further culture is almost a crime, and the Government should take steps to prevent farmers whose land is overrun with these weeds from offering seed in the market. But that a certain amount of sorrel, smart-weed and grass seed will be found in all marketable seeds passes without saying; and only by the use of the most effective machinery can purity be obtained. But a thorough process of cleaning is expensive. Canadian exporters are constantly receiving letters from abroad asking "for low priced seeds irrespective of quality." Canadian farmers, too, are making similar demands. While dealers feel that it is not in the interest of the trade and of agriculture to fill these orders, they are forced by competition to meet the wishes of consumers. If farmers are willing to pay for pure seed, they can always obtain it; but they apparently prefer something "cheap," and certainly they appear to be getting what they ask for.

THE STATE OF TRADE IN CHINA.

We are favored with copy of a letter recently received from China by Mr. J. H. Wardlow, of Montreal, referring to the purchase there of China goatskins, which that gentleman imports largely into Canada, and which are used for the manufacture of glazed dongola kid.

The letter is dated Shanghai, 21st November, 1894, and regrets that the writer is unable to make any offers this season. "The war is checking business. Coolies and peasants are recruited in the interior for the army, and the ones remaining are afraid to travel and to bring their skins to market. Up to to-day we have seen only small ridiculous lots not worth while to be wired, and what is more, as soon as they appear they are bought. No Chinese merchant now gives refusals, and as in many places Chinese Mandarins are exacting heavy contributions from the rich merchants, they have almost all fled to the open ports, and there is nobody left in the interior with whom contracts could be safely made. We don't see any other way for you to do business this season in goatskins than to give us orders with your limits, so that we are enabled to buy the lots as they make their appearance."

RAW FURS.

Winnipeg was once almost the exclusive centre of the fur trade. But like lumber, as years roll by, the primary fur market moves farther back from the more settled districts of the country, and although Winnipeg has not lost its hold upon the fur trade, it must now divide the honors with Edmonton, that thriving, promising little town in Canada's Far Northwest. The *Bulletin*, Edmonton's bright little paper, in a review of the season, says: "This is a great season for fur. Foxes, lynx, coyotes and skunks head the list for number, but there is also a large trade in musk rats and mink, with more than the usual sprinkling of otter and fisher. Besides the abundance of fur-bearing animals, the mild weather and light snow have been most favorable for hunting, and the abundance of rabbits makes it possible for the Indians to go greater distances and hunt more steadily than they could if they had to procure their principal supplies from the traders. Added to this is the inducement to hunt offered by the keen competition and cash prices offered by the Edmonton fur buyers—prices which it is said state of world's fur market scarcely justify. Fur has been coming in at a rate of $500 to $1,000 a week for the past few weeks, for which cash is paid, and the money almost entirely spent in town. These furs come solely from points at no great distance from Edmonton. The most important and distant points have not yet been heard from. The foundation of all this trade is the rabbit—the insignificant, timorous, good for nothing rabbit. The rabbits have been on the increase for the past five years. The ravages of all the flesh-eating wild animals upon them have not kept down their numbers. Last year they were in thousands. This winter they are in millions."

SALT MANUFACTURERS IN SESSION.

For a long time the Ontario manufacturers of salt have held that their selling prices were too low and that the salt industry afforded little or no profit. Last Saturday a meeting was held in London to consider the question of bringing market values more in harmony with the costs of production. All the firms in Western Ontario, for here the industry of salt making is carried on, were represented, and the greatest interest was manifested in the proceedings. Mr. Gray, of Seaforth, was chosen charman, and Mr. T. H. Carter, of Courtwright, performed the duties of secretary. Amongst other prominent salt men present were Messrs. R. O. Kinney and H. C. Sanborn, of Detroit; Dr. Armstrong and S. A. Armstrong, of Moore; John Ransford, Clinton; R. S. Hodgins and John Fox, Lucan; R. W. Logan, Goderich. The proceedings were not opened to the press. A committee was appointed to consider the matter in the morning session, and this committee reporting after lunch recommended a general advance in wholesale prices. "Canadian salt," the statement given to the press continues, "is of far finer quality than the American article, and yet the former wholesales for 45 cents a barrel where the latter sells for 70 or 75 cents. The report was discussed until late in the afternoon, but nothing definite was done, except that a general understanding was come to that the standard price should be put up to between 60 and 75 cents. The details necessary to such an arrangement will be made by correspondence."

PHOSPHATE OF LIME.

The following returns of the output and shipments of Canadian phosphate of lime are taken from the *Mining Review* for December. They show, says that journal, the worst year's business in the history of the industry:

Phosphate of Lime Co. to Great Britain.....	2,693 tons
British Phosphate Co. " " about	600 "
Phosphate of Lime Co. to United States.....	1,200 "
J. S. Higginson, Buckingham, to United States....	800 "
Sold to Capelton and Hamilton, Canada.....	700 "
On dumps at 1st December, estimated	3,000 "
	8,993 tons

Last quotations for 80 per cent. c.i.f. Liverpool, 7d. per unit, equal to $11.65 at 8½ ex., and $8.74 Montreal f.o.b., and $6.88 Buckingham. Low grade 60 to 65 per cent. f.o.b. cars, Buckingham ground and in bags $5.50, equal to $3 per ton unground Buckingham; 70 per cent., 6d. per unit, equals $3.70 per ton Buckingham. The editor, Mr. Bell, believes that within a few years the phosphate business of the Ottawa district will be again on a substantial basis, as the demand for high grade ores is bound to come. The decline in prices has been abnormal. For 80 per cent. ore the price has steadily fallen from 16½d. in 1891 to 7d. during the season of 1894. Last quotation 80 per cent. in June, 1894, realized 8¼d., and in August 7½d., the last quotation being as given, viz., 7d.

BUSINESS IN CANADA.

J. H. Botterell & Co., manufacturers of boots and shoes, Quebec, write: "We have had an exceedingly busy fall season, and think, from present prospects, the coming spring season will also be brisk."

A merchant at Manilla, Ontario, writes towards the close of December: "As to the condition of trade, I find collections very difficult among the farmers; I also find them restricting their purchases to the lowest point. This makes matters commercial very dull here."

At Tilsonburg, Mr. William Imrie, broker and insurance agent, is "happy to say that in this town and its immediate neighborhood, while ready money may not be over abundant, yet at least on the question of 'cakes and ale' we are all O.K., and most of us are blessed with a plenty. Every success to your useful sheet."

In the opinion of Mr. Peck, the liquidator of the Reid & Currie Iron Works Company, at New Westminster, B.C.: "There is not much to boast about in the way of collections. Money seems to be very scarce, from the Government down, and until the lumber trade improves, the really staple trade of B.C., we do not look for much improvement in business. High interest and discounts here are a great drawback to all legitimate trade, and the commercial laws want amending very sadly in British Columbia."

SCIENCE AND INDUSTRY.

In 1825 the railway system of the United Kingdom consisted of 25 miles of line, two locomotives, and one passenger carriage. The most recent railway census gives 21,000 miles of railway, 18,000 locomotives, and 41,000 passenger carriages.

Car wheels are being made at three-quarters of a cent a pound, $4.50 for wheels weighing 600 pounds, and are the cheapest iron castings on record in this country. It seems only a little while ago when car wheels of this weight, or less weight, brought $26 to $30 a-piece, and we doubt if any one can make a good car wheel out of proper material for 75 cents per 100 pounds.—*Industry*.

The French iron trade is very dull, and during December many workmen were discharged. In the Loire district there is distress among the working people, who see no chance of employment for the winter. The chief cause of the depression is the complete absence of orders upon foreign account. At one time a great deal of business was done with Italy, Spain and Russia, but this latter country is now beginning to supply its own requirements. South American trade in this direction is also fallen off because of the condition of South American furnaces.

The position of the Belgian iron trade is hardly so satisfactory, says the *Iron Trades Journal*. Most of the producers are unable to find enough work to replace that now being completed, and the few orders that are now and then placed upon the market are invariably the subject of severe competition. Prices have indeed fallen to a point that in many cases leave no margin of profit whatever. Bar iron is quoted £4, f.o.b. Antwerp.

The Orange Boiler Works, at Bulmke, Germany, recently held a festivity to celebrate the making of the 2,000th steam boiler at these works.

The Belgian briquette industry continues to make rapid progress. During October last the exports amounted to no less than 46,510 tons, as compared with 26,757 tons in the corresponding month of last year. The exports for the ten months of the year ending with October last reach a total of 488,392 tons, as compared with 397,663 tons in the corresponding period of last year, and only 284,121 tons in the first ten months of 1892.

The German iron-makers have not found the treaty, which opened the Russian markets to them, as great a benefit as they expected. The pig iron production has increased, but complaints are made of the depressed state of the trade in finished iron and steel. Prices continue to fall, and many of the smaller works have been compelled to shut down. It is only the larger establishments, those that are able to work at low cost and to adopt the best and most economical methods, which have found themselves in a position to meet the market and continue running. The German manufacturers continue their efforts to build up export trade in the hope of improving matters, and they are meeting with some success, especially in Eastern Europe, where German iron and steel are replacing British to an extent not at all relished by the English ironmasters.—*Engineering and Mining Journal*.

The output of ironstone from the Cleveland, England, mines in 1894 has reached about 5,000,000 tons. The output for 1893 was 4,625,520 tons. The make of Cleveland pig iron in 1894 is estimated at 1,425,000 tons, against 1,388,043 tons in 1893. Over the 11 months ending November, 1894, the stocks of Cleveland pig iron increased by 37,737 tons. The make of hematite, spiegel, and basic pig in 1894 is put at 1,541,000 tons, against 1,336,141 tons in 1893.

Six years ago, says *Industry*, we ventured the prophecy that machine tools would soon be operated by independent electric motors. The advantage of the system was as well known then as it is now, but all this time has been required for evolution and adaptation of the motors to the different tools. Some clumsy attempts have failed where motors were set on shelves around the walls, and sometimes on the floor alongside the machines, to be stumbled over and broken, but when properly arranged as an integral part of original plans, and for the heavier class of tools, there have been no failures. The expense of the system is mainly in maintenance of the motors; any workman can take care of a countershaft and driving bands, but for the motors and electric connections an electrician is required. This has been the main impediment; another one was in adaptation by that inflexible body, the tool makers, who seldom change anything until compelled to do so.

Mr. William Brock, Paterson, N.Y., intends to show all the uses to which electricity can be put. He is having a home built for himself, and expects to have it completed in a few weeks. He will apply electricity throughout his domicile. The house will be heated by electricity, the cooking will be done on an electric range, the house will be cooled in summer with electric fans; there will be a burglar alarm connecting with every part of the house, electric annunciators, and the whole, from cellar to garret, will be lighted by electricity. The house will be so arranged that should it be invaded by a burglar an alarm will be given to the family when on the floor above, and by means of a switch the whole lower part of the house can be flooded with light. Should the burglar attempt to escape from one room to another or out of the doors, he will give the alarm by stepping on mats that will give notice of the intruder's movements and whereabouts.

FOR DRY GOODS RETAILERS

The master tailors and working tailors of Montreal recently held a joint meeting with the view of arriving at some plan whereby the wages of the latter might be increased

Silk goods are cheap—never so cheap before—and it cannot be expected that the present low basis of values will be long continued. The reductions in prices have been brought about by a decreased consumptive demand, but low prices are naturally bringing back the demand, and a smart advance in both the raw and manufactured silk markets would surprise no one.

In an unpretentious building at the corner of Yonge and Walton streets, Messrs. Irving & Co are busily making umbrellas. The firm has only had several months existence and already finds it necessary to add to its plant and increase the number of its employees. Mr George Irving, recently with Caldecott, Burton & Spence, is active partner of the firm and well deserves the success he meets with.

Montreal merchants have been purchasing American colored cottons. The prices are said to be low, under the quotations of domestic manufacturers, but there is some question as to quality. It appears, however, that first reports as to the trashy nature of the goods bought were exaggerated. Merchants, it is true, received some very inferior samples, but the bulk of the purchases were made in goods of fast colors.

There is not a man in the dry goods trade who will not sympathize with Messrs. S. F. McKinnon & Co. in the serious loss which they sustained by last Sunday's fire. From all quarters Mr. McKinnon was deservedly receiving the congratulations of the trade upon the magnificent building which he had erected, and it is to be hoped the damage done is not sufficiently serious to prevent the building from again appearing as beautiful as when it first left the builder's hands.

The fact that large dress sleeves are now all the rage has had an important bearing upon the mantle trade. Capes have been found more convenient than jackets, and while the demand for the former has continually grown, enquiries for the latter show a corresponding decline. Mr. John Northway, of the Merchants' Import Company, 16 Melinda street, Toronto, predicts a good spring and summer trade in appliqué trimmed capes, and reports having booked large orders for these goods. Fawns, browns, and blacks all receive favor, while a line of shepherd's checks, with silk-lined hoods, are exceedingly dainty.

Canadian shipping companies have been in a poor way lately. The Beaver line service from Liverpool has been suspended, and a meeting of the Dominion line shareholders was held on Wednesday to consider certain important proposals affecting their interests. Consignments of heavy drapery goods for Canada this year have not been a source of as much profit as formerly to the Montreal and Quebec lines. Under the circumstances, the sinister rumors afloat concerning the Cunard Company and Southampton cause the greatest anxiety in Liverpool. Whatever changes may be made, however, Southampton will never be a good port for American cargoes as far as Manchester and Yorkshire goods are concerned.—*Drapers' Record*

It is related by the Charlottetown *Patriot* that a lady in Nova Scotia recently sent to a firm in that city for a fur jacket, enclosing the money in payment, and leaving the selection entirely to them. A few days ago they received a post card bearing the following. It speaks for itself: "Received the coat yesterday. *It suits admirably*. Many thanks for sending so promptly. I shall always have a warm feeling for you when I have it on." A grateful woman that.

Now, says the joyful advertiser,
Merry Christmas day is nigh,
And I'm richer and I'm wiser
In this pleasant buy and buy

—*Philadelphia Record*

FOR GROCERS AND PROVISION DEALERS.

The large flour mills of McAllister Bros. at Pakenham that were recently burnt down, involving a heavy loss, are to be re-built.

A downtown baker displays the following sign: "I am prepared to do all the loafing necessary in this establishment." — *Philadelphia Record.*

Robinson Bros., wholesale grocers of Ingersoll, have shipped eight carloads of dried apples to Germany this season, and have one more under way for next week.

The early closing by-laws of the Hull city council went into effect last Friday evening. All the groceries closed at 7 o'clock sharp. The by-law was to have gone into operation at the commencement of the year, but its enforcement was delayed until the close of the Christmas and New Year holidays.

The United States exported 1,450,336 barrels apples in 1891, "the banner year." This season the total exports thus far are over 1,100,000 barrels, against little more than 100,000 barrels up to the corresponding date last year, when the transatlantic crops were abundant, instead of being scant, as is the case this year. Possibly the 1891 shipments will be equalled before this season's shipments have ceased. Choice Baldwin and Greening apples for shipment were selling at from $2.75 to $3 a barrel in New York last week.

The Canadian Commercial Agent at Trinidad, in an official report, writes: "It seems strange that a sugar-producing country should import sugar, but it is the case here. In spite of a protective duty of 10 shillings per 100 lbs., we imported in 1892 no less than 780,379 lbs. of refined crushed sugar, of which 41,172 lbs. came from the Dominion. Previously to that we had received none from Canada, but owing to the excellent package and quality of the sugar our imports by steamer from Halifax during 1893 increased about 130,000 lbs."

In an interesting review of Westminster's trade for 1894, the *Columbian* says: "Compared with 1890, the year which corresponds with 1894 in the salmon pack on the Fraser River, the increase has been large, but the pack of this year is 112,000 cases short of 1893, when all the records of the past were greatly exceeded. According to rule, next year's pack will be smaller than this season's, and the following year smaller still. Then will come another big year. Since last season several new canneries have been built on the river, and the industry is in a fairly satisfactory condition. The export of fresh and salt salmon continues heavy. Following is the Fraser River pack for 1894:

	Cases.
Sea Island Cannery	25,330
Beaver Cannery Richmond Cannery	25,230
Ewen & Co.	25,000
Deas Island Cannery	7,730
Victoria Canning Co. (five canneries)	53,023
Anglo B.C. Canning Co. (eight canneries)	82,942
Terra Nova Pkg. Co	9,000
Lulu Island Pkg. Co.	15,700
Pacific Coast Pkg. Co.	12,250
Steveston Canning Co.	17,450
Imperial Canning Co.	12,470
Canadian Pacific Canning Co.	20,500
Brunswick Canning Co.	16,500
Fishermen's Canning Co.	11,465
Gulf of Georgia Canning Co	18,430
Goodmurphy's Cannery	8,860
Fraser River for 1894	362,870
Northern pack "	135,235
Grand total for British Columbia	498,105

The northern salmon pack shows an increase of about 2,000 cases over 1893. Following is the value of the Fraser River salmon fisheries for the past five years:

1890	$1,989,599
1891	1,517,060
1892	1,148,860
1893	2,916,990
1894	2,362,714

FRIENDLY ACKNOWLEDGMENTS.

Throughout the year we have been favored with occasional letters of a kindly character from subscribers, and towards the close of the year quite a number of such communications were received. It may not be amiss if we quote from some of these:

A prominent banker, in a private letter to the editor, says: "Your journal is doing good work, and in a direction where such work is needed."

One of our oldest subscribers in Ontario, Mr. D. Thompson, of Cayuga, in making some suggestions as to market reports and quotations, adds, "I like your paper very much." It is not the first time that he has given similar testimony.

"Are we in the dumps? your circular asks. I reply, dumps never trouble me. I work off that kind of thing by looking for trade. As for Bill McKinley, I leave him to the political element. Long may you flourish." This from a Hudson Bay agent in the Northwest.

A private banker, J. W. Scott, of Listowell, Ont., writes; "I have read your valuable journal with interest week by week for many years, and I expect that it will grow even more welcome, if that could possibly be, as time goes on."

From E. O. Denison, private banker, Minnedosa, Manitoba: "I value your paper very highly, and would not like to do without it."

"We have subscribed for your valuable paper, THE MONETARY TIMES, for the past sixteen years, and know that it has been one of our best investments." So write Dixon Bros. of Maple Creek.

The agent of the Sun Life Assurance Company writes from Winnipeg: "I am always glad to receive your journal, because of its sound views and information respecting insurance and other matters."

A subscriber in Rochester, New York, having requested from us some particulars in addition to our banking review, writes this in reply to our letter: "Many thanks for the trouble you have taken. The information was just what I required. I own considerable stock in Ontario institutions and the only way I can keep posted is by reading THE MONETARY TIMES."

A bank manager in Chatham, in thanking us for something forwarded at his request, adds: "I have been a reader of your paper since it started, and am always pleased to respond to your collector's [Mr. Oliver's] request for my renewal subscription."

From among the letters of our English and Scotch subscribers we select the following two:—From a country gentleman near Liverpool: "I have watched each week with more than usual interest this year [1894] for the coming of THE MONETARY TIMES AND TRADE REVIEW, in order that I might gather from its pages how you in Canada had fared in the presence of so great a commercial and financial revulsion as t[illegible] your neighbors in the States. I am heartily glad to conclude fr[illegible] facts and figures you give that Canada has suffered but little. Y[illegible] financial system appears to be a sound one, and I trust that you may keep it so."

This from Glasgow: "There is much need—there has always been much need—for a check, a governor, or balance wheel in the business system of new countries at certain times. Especially is this the case in times of great prosperity, of unusual activity, or what you in America would call 'boom times.' This *role*, it seems to me, you aim to fill in recalling to the memories of individuals and corporate bodies the need of coolness and common sense in financial affairs. The old-fashioned virtues of caution and economy and steadiness are always of value in business. And you will perhaps allow me to congratulate you on implanting these in your readers' minds. I wish you well in the coming year."

A SECOND DISASTROUS FIRE.

Toronto has hitherto borne a good name among insurance companies, but has within the week lost much of her prestige. To have a $500,000 fire on one Sunday, and an even more destructive conflagration on the following Thursday, is enough to make the insurance men look askance at a risk in the business part of this city. The origin o either of these fires is, so far as we can learn, as yet unexplained. It is not likely, however, that either the one or the other was the work of an incendiary.

The fire of Thursday night began in the Osgoodby building, on Melinda street, to the west of the S. F. McKinnon warehouse, which stands in ruins, the victim of Sunday's flames. Spreading from the Osgoodby building, the fire forced its way to the south and destroyed some of the best warehouses on the north side of Wellington street, namely, those of Robert Darling & Co., Thomas Dunnet & Co., R. H. Gray & Co., Brereton & Manning, Boisseau & Co., and crossing the street, did great damage to the factories and stationery stocks of Hart & Riddell and Buntin, Reid & Co. The only thing that saved the city from a fire the greatest in its history was a substantial 24-inch wall between the Hart & Riddell and Buntin, Reid & Co.'s establishment, which confined the flames within the limits they already covered, and stayed their further progress.

The means for fighting the flames appeared miserably inefficient, and a stream playing upon the third storey of a building availed but little when the flames were creeping into the fifth storey. Toronto must have better fire protection, and that at once. No spirit of false economy should procrastinate the immediate purchase of the best fire fighting appliances, and until this is done the merchants, manufacturers and insurance men of the city of Toronto will never feel secure.

We have been unable, from the excitement and confusion of the hour, to obtain any figures of the losses and insurances of the sufferers which can be taken as accurate. However, the appended list may convey some idea as to what the insured and insurers lose:

	Losses.	Insurances.
J. W. Woods	$50,000	$25,000
R. Darling & Co.	75,000	60,000
R. H. Gray & Co.	50,000	12,000
do stock	30,000	30,000
Thos. Dunnet & Co.	50,000	50,000
Hart & Riddell	35,000	25,000
Boisseau & Co.	60,000	50,000
Merchants' Cotton Co.	18,000	8,000
Yarmouth Duck Co.	22,000	15,000
W. S. Johnston & Co.	14,000	10,000

These losses amount to $404,000, and the seventeen other losses will bring the aggregate up to $600,000, if not $700,000, on which there is probably $400,000 insurance.

BOOKS RECEIVED.

JOURNAL OF THE CANADIAN BANKERS' ASSOCIATION.—This issue, the second of the new volume, does credit to the association. It is by far the best number thus far published. The unusual size, 160 pages, is occasioned by the inclusion of the first four chapters of Mr. R. M. Breckenridge's valuable essay on "The Canadian Banking System, 1817 to 1890." The remaining chapters, we are pleased to learn, will appear in successive issues of the *Journal*. As a study of the joint stock banking in Canada and legislation thereon it is exhaustive, giving evidence on every page of careful examination An admirable portrait of the late James Stevenson finds place at page 101 of the *Journal*, followed by a loving notice of that good old gentleman. Mr. Fyshe's paper on "The Growth of Corporations" contains statements that will make some people stare. But such people may as well rub their eyes and read again, for Mr. Fyshe only tells some things about economic tendencies of to day that we need not blink, however we may differ as to how to deal with them. Mr. Stanger's paper on "Some Popular Fallacies concerning Banks" we reprint in another part of to-day's paper. Judging from the correspondence and the various contributions, the *Journal's* constituency is beginning to be aroused to the value of an interchange of views on banking subjects.

L'ESSAI, Poetique et Litteraire, Revue Illustree.—This new venture, which hails from Montreal, is intended to be published in Toronto on the 1st and 15th of every month. The editor-in-chief is M. Alphonse Reiverc, and the secretary, Mr. Gabriel Nevers. The causerie of the latter is evidently going to be a feature of the paper. The present (Dec. 15th) is the second number.

INSURANCE ITEMS.

The Metropolitan Life Insurance Company has removed its Toronto office from York Chambers to the second floor of the Confederation Life Building, corner Yonge and Richmond streets, which they have fitted up very handsomely.

After Christmas cogitations, the common sense philosopher of the Confederation Life Association puts forth the following, which will bear thinking over: "Life assurance *compels* a man to save, and may be described as a compulsory savings bank, because it *forces men to continue saving*. It gathers scattered fragments, and makes them a perfect whole; it enables a man, from sums which he would often expend without an equivalent, to provide a capital which may be the solace of his old age, or the support of his children."

Commenting on the curious discussion by the Presbytery of Toronto of the wording of part of the national anthem, and the desire of some meek brother to remove the obnoxious words asking the Lord to scatter the Queen's enemies and frustrate their knavish tricks, *Our Monthly* says: If the Presbytery intend to substitute another verse for the one they propose leaving out, may we suggest something to the following effect, that is to say:

Oh Lord our God arise
Open the people's eyes
Make them insure;
God bless the noble band
Agents in every land
By them the people stand
Firm and secure.

The general agency of the Norwich Union Fire Insurance Company has been placed in the hands of Mr. J. B. Laidlaw, who has been inspector of the Lancashire and has an excellent record. The appointment is made upon the recommendation of Mr. Alex. Dixon, the former agent, who will retain the agency of the Company in Toronto and its districts.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Jan. 10th, compared with those of the previous week:

CLEARINGS.	Jan. 10.	Jan. 3.
Montreal	$11,766,817	$8,839,004
Toronto	7,894,426	5,350,094
Halifax	1,248,256	1,079,821
Winnipeg	1,110,573	1,233,458
Hamilton	810,548	667,543
Total	$22,630,620	$17,170,770

Aggregate balances this week, $4,180,940; last week, $2,798,441

—"Sherbrooke" is informed that the duties on Canadian products going to Newfoundland were raised in the winter of 1891-92. The old and new duties are given below:—

		Old duty	New duty
Flour,	per barrel	$ 0 30	$1 05
Pork	" "	1 75	2 50
Cornmeal	" "	0 25	0 50
Tobacco	" 100 lbs 5 per cent *ad val* and	0 20	0 25
Kerosene oil,	per gal.	0 06	0 11
Hay	" ton 20 per cent *ad val* and	....	5 00
Oats	" bushel	0 05	0 15
Potatoes	" "	0 05	0 30
Turnips	" "	0 10	0 35
Cabbages	" 100	2 00	....
"	" dozen	....	0 64

-In the case of the tug "Grace," of Dunkirk, N.Y., seized for illegally fishing in Canadian waters, near Point Pelee Island, Judge Macdougall decides that when the alleged offence was committed, the vessel was well within Canadian waters. The fish, it seems, had been moving northward and had been followed across the boundary line. The decision is based upon evidence taken at the trial, and it shows that the "Grace" when captured was from half a mile to a mile over the line. It has been reported that the American Government, after causing the ground and the maps to be examined, had some doubts on the subject of where the international boundary, at this point, really was. The decision now given will, we presume, settle the question which arose out of the capture.

—From the moment of its introduction, we have been of opinion that the banking bill introduced to Congress on the recommendation of the Secretary of the Treasury, was predestined to failure. Virtual defeat came on Wednesday on a question of procedure. The reasons given for the decision, if invalid, are not the less effective. The advocates of State banks wanted better securities for their interest than the bill afforded, and the silver men made themselves felt once more. The only thing Congress could do for the State banks would be to remove the 10 per cent. tax on the issues; the State Legislatures must do the rest.

—The Lake Carriers' Association, consisting of steamship and vessel owners of craft plying on the Great Lakes, held their annual meeting in Detroit on Tuesday and Wednesday of this week. An account of the proceedings has just reached us, but too late to enlarge upon to-day. The annual report referred to the Chicago Canal and the effect it would have upon the level of the lakes. "Water transportation east of Buffalo," says the report, "is in a most unsatisfactory condition."

—Perpetual vigilance is the price of immunity from fire. Every town in Canada should examine its fire appliances once a month; should test the cisterns; see that the fire bell can be got at and will ring; take the engine out and set it working; inspect the hose and play through it; strengthen the chain of fire defence at its weakest link. Only by such precautions can a community be ready to fight fire when it comes—as come it will.

—The record of mercantile failures in Nova Scotia last year shows their number to have been 125, with liabilities of $619,802, which contrasts favorably with the 127 failures, $807,4 0 liabilities in 1893, and still larger sums in the preceding two years. Prince Edward Island shows only seven failures, owing $73,000, last year, against 20 failures, owing $101,000, in 1893.

—Mr. Jas. A. Cantlie, it is said, will be a candidate for the presidency of the Montreal Board of Trade, Mr. Torrance for the first vice-presidency, and Mr J A McKergow for the second vice-presidency

Correspondence.

THE CASH SYSTEM.

Editor MONETARY TIMES :

SIR,—We started on the cash system in our business on Dec. 1st, and find it working to our entire satisfaction.

We believe it to be the proper way of doing business, and the sooner merchants adopt the system the sooner the list of insolvents will be shortened. You can't speak too highly of it through your journal.

Yours truly,
H. REHDER,
General Merchant.

Paris Station, Jan. 9, 1895.

SOME POPULAR FALLACIES CONCERNING BANKS.

It may be taken for granted that, in the minds of the majority of those not engaged in any one business or profession, there are misconceptions as to its exact nature, purpose or function. Among others, the science, profession or business of banking seems to be peculiarly subject to misconceptions, both as to the principles which should govern it and the practice which should be deduced from those principles.

This special readiness to misconceive banking arises from the first fallacy to be noticed, viz.: That, while most businesses require long education and clever management in order to furnish a due proportion of profit, no very special training is required to manage a bank, and that any so-called common-sense business man could undertake to run a bank successfully. There is no doubt that any man could undertake without difficulty that part of a bank's business which consists of lending out its surplus funds, but it would likely require the best efforts of the most thoroughly trained of professional bankers to get most of it back again.

We have had in Canada some examples of the results of banking in the hands of insufficiently trained men, and the failures of so many banks in the United States last year, more especially in the smaller places, arose not so much from faults of the banking system of the country, as it is theoretically expressed, as from the amateur nature of the banking as practically carried out.

Allied to this is another fallacy which is frequently met with in country places, viz.: The idea which many people have that they know what is for the interests of the bank, probably better than the local manager, and certainly better than the executive at the head office. The estimates of the value of a banking account and of the profit to be made out of it are frequently ludicrously exaggerated. These over-estimates assume many forms in the concrete, and many such will no doubt have been brought before the notice of all of you. There is the account of the firm which draws out money for wages once a fortnight, the notes being at once expended in the town itself and probably nearly all coming back to the bank for redemption within three or four days—this account is supposed to yield large profits to the bank from circulation. Then there is the business man who pays in considerable mixed cash every day or so, his payments being counterbalanced by daily withdrawals by cheque or domiciled acceptances, so that the daily balance is small or varied by spasmodic overdrafts—this account is supposed, by some unexplained process, to be a valuable one, and more curiously still, the more bank stationery such a man uses, and the more cheques he draws, the more profitable he is apt to think his account must be.

Another popular misconception of the function of a bank is that it is clearly its duty to make loans to every one in business regardless of circumstances. It is frequently the case that a man having a small factory of any sort, which is mortgaged up to the hilt, and with some fixed machinery and plant, bought on long time, and either subject to the mortgage or to a lien in favor of the vendor, expects a bank to furnish him permanently with all the working capital for a business far more extensive than his means could possibly warrant. Or there is a jobber or retailer who thinks he is justified in putting a large portion of his small capital into mortgaged real estate, relying altogether on his banker to furnish all the means for carrying on all his business operations. In other words, many people expect a bank to become their special partner in business, furnishing all the working capital, but taking a very limited proportion of the profits.

We are unfortunately but too familiar with the remarkable difference between the statements furnished by such men when they are asking for an advance, and those they exhibit sooner or later to a meeting of their creditors.

But not only do people consider it to be the duty of a bank to make loans to them, but they are frequently apt to think they are doing a bank a favor by borrowing from it, and to assume a lordly air of distributing largesse when their request for a loan is made, followed by expressions of contempt and pity for the bank manager who can be guilty of the folly of letting such a chance go by. In this class are the people with little or no means who make experimental shipments or consignments of goods abroad, and are very much hurt because their drafts for full value are not purchased with the avidity which they expect.

Another man whom we all know is the one who signs a guarantee or endorses a note for a friend and then dismisses all idea of liability from his mind, saying, when called on, that it is the business of the friend, who will "attend to it." Akin to this is the belief that a note signed for accommodation is of the same class and just as good as if the names were given for a plain transfer of goods. Indeed, there have been instances in this country where a whole business community endorsed one another's notes, and where not only they, but even the banks concerned, deceived themselves into the belief that the ultimate result would be better than if the notes were single-name. The universal liquidation which followed in due course was a sufficient demonstration of the fallacy of such a belief.

A fallacy which obtains chiefly among a class which does not make direct use of banks, is that they are for the rich only, and that the money in them is that of the well-to-do, and therefore fair game for spoliative taxation. To a large extent, so far as deposit receipts are concerned, and to a still larger extent as regards savings' bank deposits, the very converse is the fact, that the money deposited is that of those who have but little to spare. The well-to-do, as a rule, employ their surplus funds in other ways, and the balances are those of people who have not enough to put into bonds, stocks or mortgages.

The subject is one that has its humorous side, and instances more or less amusing occur every now and then.

A correspondent in the June number of the journal of this association gave an instance of a mistaken idea of the purpose of a branch bank which could probably be paralleled by most of us with a few years country experience, except that in the case related the fallacious belief was presented in a more compact and crystallized form than usual.

You are all aware of the Irish crowd who publicly burned as many of an obnoxious bank's notes as they could accumulate, under the impression that they were doing the bank a serious injury.

There is the travelling man, frequent and aggressive, who comes in to cash a £10 circular note, and considers that this transaction gives him a title to a large amount of the manager's time on that and other days in imparting information on every subject connected with the country.

During my residence in California, at a meeting of labor agitators, one of their leaders, who had announced his intention of scarifying the banks, made out that they were all bankrupt because they had not the full amount of their deposits in actual cash on hand.

An instance, hardly perhaps to be classed as humorous, came under notice recently, where a man, who had at one time been overpaid a considerable sum by a paying teller, said, when the direction of the overpayment was discovered some time afterwards, and he was asked why he had kept silent about it, that he thought that a bank which could afford to put up such a handsome building could afford to lose the sum of money in question.

I will not, however, weary you by going very closely into the subject, or by multiplying instances. Many of the fallacies concerning banks and banking are harmless, and it is not worth being over sensitive about them or combating them at length.

In the case of some of the errors, it has been my own experience that they have not the same hold in England or the United States as they have in Canada. This leads to the only practical suggestion I venture to make—that it is worth while considering whether or not mistaken ideas on the part of the public as to the relationship between a bank and its customer may not sometimes be the result of excessive zeal for the extension of business on the part of local bank managers. Advertising in various forms is no doubt a good and legitimate thing, but the introduction of bargain day styles into banking can hardly impress the public with an idea of the value of the wares offered.—*E Stanger, in Canadian Bankers' Journal.*

THE 1894 FIRE LOSS.

The fire loss of the United States and Canada for the month of December, as estimated from our daily files, amounts to $10,321,000, and the total for the year is therefore $128,246,400. The following comparative table exhibits the losses by months:—

	1893.	1894.
January	$17,958,400	$10,568,400
February	9,919,900	11,297,600
March	16,662,350	9,147,100
April	14,669,900	11,540,000
May	10,427,100	10,777,800
June	16,344,950	8,282,300
July	12,118,700	16,307,000
August	13,222,700	10,432,800
September	10,508,700	10,149,900
October	11,014,700	8,186,700
November	11,493,000	12,135,800
December	12,105,475	10,321,000
Totals	$156,445,875	$128,246,400

During December there were 189 fires of a greater destructiveness than $10,000 each. A detailed list of these appear in our insurance columns of this date.

The principal losses of the month just closed are tabulated below:—

Buffalo, N.Y., wall paper factory	$400,000
Memphis, Tenn., grain elevator	300,000
Cleveland, Ohio, paper box factory	200,000
Tonawanda, N.Y., lumber yard	175,000
Buffalo, N.Y., two business blocks	200,000
Albany, N.Y., Delavan House	260,000
Toledo, Ohio, grain elevator	525,000
Louisville, Ky., several business houses	342,000

A glance at the first table will show how much less the losses of 1894 are than those of 1893 or even 1892. When the increase in insurable value in the country, and particularly the decided and general advances in fire insur-

ance rates are considered, it is not strange that the fire insurance statements now being published should confirm our predictions of last month as to liberal profits.

A large portion of the fire loss of the country is preventible, but there is a deplorable apathy of public sentiment upon this point. In spite of the fact that this apathy is responsible for fire loss and resultantly, expensive insurance, poor or crooked fire marshals are permitted to be appointed, political "combines" sell inefficient waterworks to municipalities, fire chiefs get a commission on rotten hose and defective engines, incendiaries are covertly admired if not applauded, as "slick" electric wires are recklessly installed, and worse than careless insurance companies insure suspected firebugs and dangerously constructed property.

Fully half the fire loss of the United States is chargeable to the combination of carelessness and crime, and a proper understanding of this fact by the masses would result in some reform at least. Who can doubt what the effect would be if the factors which make insurance costly were given with their respective proportions in detail in the agent's bill instead of the mere lump sum of the premium? Supposing for a ten-dollar premium the bill ran:

To natural and unpreventible hazard	$4 00
" unavoidable incendiarism	75
" crooked or incompetent fire marshals	75
" dishonesty in purchasing fire appliances	50
" political job in waterworks	50
" recklessness of electrical companies	80
" carelessness of underwriters	50
" taxes given away to exempt firemen	20
" other State or local taxes or fees	25
" poor or corrupt building inspectors	50
" owners not enforcing care in building	25
" commission to agent	1 50
Total	$10 50

Were every premium-payer to have the cost of his insurance analyzed for him, just as he was paying his premium, the needed reduction in fire loss would soon be brought about by a wave of public sentiment. It is wonderful how what might be called the "wrongness of a wrong" stirs the righteous zeal of the populace when the nerve running from the pocket to the moral sense is agitated at its lower extremity. If every male citizen of the United States were this month openly and specifically subjected to a tax of one dollar to make up for the unnecessary fire loss of 1894, there would be a general move in the direction of reducing the fire waste to reasonable proportions.—*N. Y. Bulletin and Jour of Com.*

—The annual meeting of the Toronto Board of Trade for the election of officers and the transaction of general business, will probably be held during the first week of February. The nominations will be made a week earlier. The date of the meeting will be decided upon by the council in the course of a few days.

Notice of Dissolution.

Notice is hereby given that the partnership heretofore subsisting between us, the undersigned, as general merchants, in the village of Mildmay, in the County of Bruce, has been this day dissolved by mutual consent. All debts owing to the said partnership are to be paid to the undersigned, John Stiegler; and all claims against the said partnership are to be presented to the said John Stiegler, by whom the same will be settled.

Dated at Mildmay this 31st day of December, A.D. 1894.

—Sullivan bought a goat, for which he paid $5. Shortly after he received a tax bill on the goat of $8. He called on Rafferty the assessor, and said: "Why do you tax me $8 on my goat, when I paid but $5 for him?" "Well," said Rafferty, "I have carefully read what the statutes say, and it reads: 'Whoever owns property a butting on the street shall be taxed $2 a running foot.'"—*Shoe and Leather Reporter.*

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Masonry Burlington Bridge," will be received until Thursday the 10th day of January, 1895, for the construction of the Pivot Pier and Abutments of a Swing Bridge over the Burlington Channel, near the City of Hamilton, Ontario, according to plans and a specification to be seen at the Custom House, Hamilton, at the office of the Resident Engineer, 36 Toronto Street, Toronto, and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied and signed with the actual signatures of tenderers.

An accepted bank cheque, payable to the order of the Minister of Public Works, for the sum of two thousand dollars ($2,000.00) must accompany each tender. This cheque will be forfeited if the party decline the contract, or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY,
Secretary.

ADDITIONAL SUMMARY.

JOB DUFOUR, for some 40 years in business in Chicoutimi, Que., and said to be the first to have begun business there, has been asked to assign. Latterly advancing years have much handicapped him in competition with others, and his trade has been a small one. He has tried to get along by doing also some farming, keeping boarding house, &c., but will now likely have to give up the fight.

THE town of Perth collected $19,406 in taxes last year, and miscellaneous revenue enough to make the total revenue $21,446. The municipality expended on schools $6,203, on debentures $5,366, on electric light $1,475, on fire department $953; and the total expenditure was $20,342. There is therefore a surplus. Thus the town of Perth realizes the "result, happiness," so gloriously proclaimed by Wilkins' Micawber as coming to all who bring their expenditure within their income. The town's assessment is $1,218,715, and it owes $32,400, as under:

High School (2 years)	$ 2,400
C. P. R. Bonus (8 years)	10,400
Tay Canal (13 years)	6,800
Gore St. Bridge (6 years)	2,600
Gemmel Bonus (17 years)	10,200
Total	$32,400

We are decreasing the principal of the debenture debt about $3,600 yearly, says the *Expositor*, and in two years the High School will be paid for. The rate for 1895 should be at least a mill, if not a mill and a half, less than for 1894. The finances of the town are therefore in good condition.

THE Buffalo Custom House is regarded as a barometer indicating the trade with Canada; most of the imports entered there are from Canada. It is shown by official figures that not in sixteen years have the imports entered been so small as in 1894, but there is an upward change of late. The value of goods entered this year subject to duty was $1,078,697 and the duties collected $472,244. The goods entered free of duty amounted in value to $930,501, while the years previous they were valued at $543,526. Since the adoption of the new tariff there has been a great impetus to the Canadian trade, as is shown by a statement of the value of entries of goods free of duty for the four last months of 1894 as compared with 1893:—

Month.	1894.	1893.
September	$168,345	$43,347
October	138,304	33,688
November	185,193	21,058
December	160,000	25,000

Details of the various commodities represented are not yet prepared, but lumber forms one of the biggest items of the free list goods increase, and we shall be surprised if barley be not another.

H. A. STONE & Co., dealer in dry goods here, succeeded Armson & Stone, dissolved in Feb., 1893. At that time there was a nominal surplus of $15,000, and Armson, being anxious to retire, accepted $3,000 for his interest in the business. Now we hear that his successors have assigned, with liabilities of over $15,000. The principal creditors reside in Montreal.——The Ontario Water Meter Company has gone into liquidation, with small liabilities.——In December, 1893, John Fergnson started a coal and wood yard. Now he assigns.

A LOFTY MISSION.

A tribute that none so eloquently as a Frenchman could pay is thus rendered to the life assurance agent by a French journal, *L'Argus*:—

"We do not know of a higher mission than that of the insurance agent. His work calls for education, knowledge, tact, eloquence, an indomitable energy and an activity which nothing can repress. A man of faith, of will, of persuasion, the insurance agent serves a cause which places him alongside the physician between the priest and the soldier at the head of the liberal professions. To society, to the family, to the individual, he renders service to which neither the lawyer, the attorney, nor even the judge, who enter our life only to torment it, can pretend."

THE ORIGIN OF MARMALADE.

According to the dictionaries, the word marmalade comes from the Portuguese *marmelo*, quince, also the Latin *melimelum*, honey apple. A correspondent, however, tells the following story as the origin of Dundee's famous confection: "When Mary Queen of Scots was detained a prisoner at Loch Leven Castle," says the correspondent, "she became more and more ill and low, and suffered from a serious loss of appetite. A Scotch confectioner at that time was inspired to make a jam of oranges, and a sample was sent to the imprisoned queen, which she so much relished that it was dedicated to her memory as 'Marie Malade.' Hence marmalade." Whether right or wrong, we prefer this legend to the testimony of any cyclopædist. —*London Globe*.

BRITISH COLUMBIA GOLD SHIPMENTS

The shipments of gold dust during the year amounted to $368,690.17. This is the largest shipment from the province in any year since 1881, when the shipments totalled upward of $800,000. Last year $316,279 worth was shipped.

The total exports of gold bullion for the year 1894 by Wells, Fargo & Co. are as follows:

January	$21,038 74
February	14,541 71
March	12,921 61
April	16,329 52
May	25,831 07
June	15,750 37
July	27,090 91
August	54,083 88
September	31,731 63
October	37,333 48
November	40,672 71
December	30,492 54
Total	$327,818 17

During the year the Northern Pacific Express Company shipped $40,872 in gold dust from here. That figure does not include coin shipments, which were very large.—*Vic. Times*.

FIRES IN VICTORIA.

There were during the year in the city of Victoria, B.C., 52 fires, representing a total loss of $57,000, and, with the exception of a few thousand dollars, covered by insurance. Three fires represented more than half the loss; they were the Westside, $14,000; Jacob Sehl's residence, $16,000, and the Marymont clothing store, $8,850, totalling $38,850. In 1893 the fire losses were $18,900, and the average for the past nine years, since the establishment of the present fire department, is $23,000 a year. The fires were confined to the buildings in which they originated, with the single exception of a fire in Milne street, Spring Ridge, damage $1,700, and which is a considerable distance from the fire hall. Although there are about 500 brick buildings, not one was burned. No accidents have occurred to the firemen or any one else at fires, save a slight burn received by one of the men. There are in the fire department thirty officers and men, of whom five are officers, nine permanent men and sixteen call men.

The *Times* adds that Victoria West and the eastern portion of the city are without fire protection, but, it is understood, that the matter will receive the attention of the incoming coun-

cil. The fire losses on Vancouver Island outside of Nanaimo amount to $60,000. The fire apparatus is not thought to be efficient for the proper protection of the city, nevertheless the showing, considering the size of the city, is good; the losses are comparatively low.

BUSINESS IN THE STATES.

The circular of Henry Clews & Co., dated New York, 5th January, says: "The immediate outlook in commercial and manufacturing circles is as promising as could be expected at this season of the year and under existing circumstances; for, with the exception of some sections of the west and north-west, the prospect for 1895 is decidedly more favorable, and indicates a business of larger proportions than existed in the year just passed. No better barometer of the trade conditions can be produced than the iron industry, and this is in far more satisfactory shape as regards the future than was the case a year ago. The stock of manufactured goods of all classes throughout the country is at a very low ebb. Consumption is going on all the while, and the time must soon come when fresh stocks will have to be taken on, and it is not very far away either, as is proven by the increased desire on the part of spinners to buy raw material. During the past few days the "bears" have been forcing liquidation on the part of weak holders, giving to the market a declining tendency, which would naturally indicate a situation which is growing worse all the time. This, however, is not the case. On the contrary, there is everything to hope for and to expect.

"We have already written at length in a previous letter regarding the true inwardness of the Pooling bill now pending before Congress and have shown why it should become a law and why it probably will. It is now quite likely that the Senate will take it up soon and that it will pass that body as it has the House. This measure, together with the currency question, should be settled without loss of time. All that is really desirable for the present short session to do is to pass the Railroad Pooling bill and to pass a bill to amend the law which authorizes the issue of 5 per cent. United States bonds by reducing the rate of interest to 3 per cent., and, in consideration for making that low rate, the bonds to be payable, both principal and interest, in gold coin. If this is done it would meet the present emergency, and would beyond doubt stop the export of gold and the present drain upon the Treasury in consequence. Europe would take an unlimited number of such bonds and pay a handsome premium for them, and would prefer them to our gold. This I do not hesitate to assert, as I know whereof I speak. The Governor of New York State, in his message just issued to the Assembly, says: 'I congratulate you and the people whom you represent that we commence the new year under favoring auspices. The business outlook is much improved as compared with its condition a year ago. The worst of the hard times has apparently passed away, and we may reasonably hope that during the ensuing year we will be blessed with a fair degree of prosperity.' These are encouraging words, and without question voice the sentiment of the masses. The cry should now be onward and upward; slow but sure."

MONTREAL MARKETS.

MONTREAL, Jan. 9th, 1895

ASHES.—We report another dull week, with values unaltered. No. 1 pots, $4.10; seconds, $3.70; pearls, no recent transactions. Receipts are very small. The statistics of the trade for 1894, almost wonderful to relate, show quite a considerable gain in receipts, whereas the past twenty years have shown a steady decline in the quantity of ashes marketed, warranting the belief that a few years would see the almost total extinction of the trade in this article, which in the earlier history of the country was one of Canada's leading exports. The receipts for 1894 were, pots, 1,936 brls., pearls, 224 brls., as compared with 1,593 brls. pots, and 159 brls pearls in 1893, thus showing a gain in both lines of 408 brls. The deliveries in 1894 were 1,909 brls. pots, 261 brls. pearls, as against 1,641 pots and 171 pearls in 1893. The stock in store Jan. 1st. last was 74 brls. pots, and 5 brls. pearls.

BOOTS AND SHOES.—The operatives' prolonged holiday-making ended with Sunday, being Epiphany, or Twelfth Day, and most of the factories are starting up easy. Travellers are also getting into harness again, and matters are now expected to resume some appearance of activity.

DRY GOODS.—Travellers are now getting nicely to work, and several houses consulted are apparently fairly satisfied with the amount of business being done. Some very good orders are reported, but the bulk of the purchasing is moderate in character. The city retail trade is dull, and dealers are trying to whet the appetite of buyers by liberally advertising discount sales. Nothing new is heard with regard to values. Fourth of January payments, being for domestic cottons, etc., bought 3 months Oct. 1st, 1894, were very fairly met, but general country remittances are reported quite wide of the mark.

GROCERIES.—Orders from the country have not yet begun to come in very freely. In teas, however, there has been quite a revival of local interest, and sales of some 2,000 pkgs. of Japans are reported within the last few days to city jobbers at firm prices. Offers have been received from Toronto for fair blocks, but have been declined, though there is only half a cent

between would-be buyer and holder. Enquiries are also reported from Chicago and St. Paul. The market has decidedly lost none of its strength, and a leading merchant forcibly describes the situation to your correspondent as follows: "The tea market has not been in so strong a position since you wore a hat." As the writer has worn one over thirty years, this may be considered a pretty strong statement. In sugars there is not a very active business, as there seems to be an idea in some quarters that even lower prices than those now ruling may prevail, though there is nothing to warrant this anticipation. Granulated is being sold in 50 brl. or car lots at the refinery at 3⅞c., but large lots would be shaded; yellows range from 2⅞ to 3⅜c. German granulated can be laid down, it is claimed, at $3.35 per cental. Molasses steady at 30c. for Barbadoes in a jobbing way. Rice, coffee and spices without change. Dried fruits dull, now the holiday demand is over. Canned goods show little activity; for standard brands of tomatoes and corn the packers' combination price is 87½c.

LEATHER.—No active buying can be noted yet, though most of the shoe factories are getting fairly under way. Stocks of splits are very low indeed, and some dealers claim to be getting a little advance, though it is found very difficult to get buyers keyed up to paying higher prices. Slaughter sole may be considered a point firmer, and we amend quotations a little. The exportation of leathers to England is small. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c.; common, 15 to 16c.; American oaksole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 1 ½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—There has been, within the last day or two, some little enquiry for pig iron, boiler tubes, and some few other lines, showing some little revival of interest in business, but no transactions of note are reported. A few small sales of pig iron have been put through on the basis of $21 to 21.50 for Summerlee, Eglinton $19.50, Canbroe $19. One firm is holding Summerlee at $22.50. Warrants are cabled at 41/8d. In other lines we hear of no changes. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.00 to 2.05; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5⅝ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6⅝c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 25c.; ingot copper, 9⅜ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards

OILS, PAINTS AND GLASS.—Travellers in this line are about getting on the road again, but as yet there is no revival of business since the holiday dullness. The reported advance in linseed oil, spoken of last week, originated in a baseless report in a New York trade journal, and has no foundation, though there is a decided firmness in Britain. Prices remain without change We quote:—Turpentine, 43c. per gal. for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

WOOL.—Orders from millmen do not come in any more freely as yet, and but a limited trade can be reported. In values there are no variations. We quote: Cape, 13⅛ to 16½c.; B. A. scoured, 26 to 33c.; Northwest, 10 to 11c.; domestic fleece, 17 to 19c.; pulled, unassorted, 19 to 21c.

TORONTO MARKETS.

TORONTO, Jan. 10th, 1895.

GRAIN.—Quiet yet steady the wheat market stands. In Manitoba wheat the firmness noted last week still holds and prices have again moved upwards. In Ontario, the holidays, elections and bad roads have all conspired to keep down deliveries, and trade is dull. No activity can be reported in barley. The American brewers are apparently still using domestic grain; they certainly are making no special call

The Oakville Basket Co.

MANUFACTURERS OF

1, 2, 3 bushel grain and root baskets.
1, 2, 3 satchel lunch baskets.
1, 2, 3 clothes baskets.
1, 2, 3, 4 market baskets.
Butcher and crockery baskets.
Fruit packages of all descriptions.

For sale by all woodenware dealers.

Mention this paper.

OAKVILLE, Ontario

Fine Electric . . Street Cars

OUR SPECIALTY

We also manufacture **Horse and Trail Cars** of every description

PATTERSON & CORBIN
ST. CATHARINES, Ont.

STEAM'S NOT IN IT

Either as to cost or efficiency, with one of our celebrated **ELECTRIC MOTORS.**

See the one that runs the MONETARY TIMES big presses and freight elevator. Not the slightest jar and almost noiseless.

Write and we will call and see you.

KAY ELECTRIC WORKS.

These prices are wholesale by the car-load

at present for Canadian barley. Only a retail trade is doing in oats and quotations have held unchanged the week through. Rye and corn are nominal.

The stocks of grain in store at Port Arthur on Dec. 29th were 576,560 bushels. During the week there were received 22,055 bushels, and shipped 668 bushels, leaving in store on Jan. 5th, 597,947.

GROCERIES.—Already an improvement in the number of orders received can be noticed. No large amounts are asked for—this is but a normal condition of the present season—but it takes almost as much time to prepare and ship a large number of small orders as the same number of large orders. Values, with the exception of sugar, show no change. A few belated orders for dried fruits are coming in. A shipment of Sphynx brand of prunes arrived this week. In figs there appears to be more of better quality left on the market than of inferior grades, and the market rules accordingly. Sugars are again lower, and we elsewhere review at length the situation. Teas are quiet, and apparently without change either in the local or primary markets.

HARDWARE AND METALS.—This is the stock-taking period, and but little business is being done. In metals, copper and lead are holding strong, while tin is, on the contrary, weak with quotations ruling lower. As a result of the recent meeting of the association few changes in prices have been made. Retail trade in the city is slow, while that of the country is not brisk. Collections are reported to be fairly satisfactory.

HIDES AND SKINS.—The week has developed nothing that would lead us to change our views as expressed in the rather exhaustive report which we then made. The Chicago *Review* of last Saturday, in explaining the bear side of the question, says: "The trouble is tanners are averse to paying relatively more for hides than the leather made from them will bring. As a matter of absolute fact the present selling price of harness leather is based upon 6½c. native steers of summer kill. Now, as every one knows, the price for even late December natives is 8c. to-day. It would not require a mathematician to discover how long it would take a millionaire tanner to land in the poor-house if he continued to buy at 8c. and sell at 6½c. Almost every tanner has tried the experiment at some time in his career, and he has always found that the other fellows got the money while he got the experience." The sheepskin market is void of interesting features; while pullers are not anxious to buy skins, holders in the country do not appear willing to part with stocks at present prices. A buyer returning from a visit to Ottawa, Kingston, Trenton and other Eastern towns, reports that the whole district is filled with sheepskins.

PROVISIONS.—The depression in the butter trade, instead of being relieved by the advancing season, appears more marked; large rolls are selling at 13c.; tubs are somewhat neglected, and the trade doing is merely of a retail character. Some fancy descriptions are selling at 15c.; medium qualities are neglected and offerings are made at 10 to 12c. Cheese is quiet and the local jobbing trade is rather limited. No change in hog products has taken place. Packers are moderately active. Deliveries of dressed hogs are sufficient to meet the needs of the trade, and quotations stand at $5.10 per cwt. The market is overstocked with held fresh and pickled eggs of uncertain age, and the existence of these descriptions seemingly depresses the entire consumptive demand. Business in evaporated apples is quiet, with 6 to 6⅛c. the quotation outside and 7 to 7¼c. the quotation here for small lots; the demand as yet is very poor; it cannot be expected to improve much during the next few weeks. There is more enquiry for dried apples for the export trade. Hops are quiet and depressed, with quotations unchanged.

WOOL.—The situation is not materially different from that of a month ago. In the presence of a depression in the woolen trade and little or no life to the export demand, there are but few transactions of considerable moment to report. Some parcels of fleece are arriving from the country, and have been bought at 18½c. per lb. The knowledge that a quantity of fleece remains as yet in the hands of country merchants by no means adds strength to the market. This is the quiet season of the year, however, and it is but right to expect improvement within several weeks ime.

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital ..... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

HARDWARE IN HISTORY.

An extremely interesting address on the subject of "Hardware in History" was delivered before the Massachusetts Hardware Dealers' Association, by Mr. A. W. Parmelee. We cannot give the whole of it to-day, but shall make copious extract.

Mr. Parmelee begins by stating that a grave has been unearthed on the continent of America covered with strata and soil of geological formation, which it must have taken 10,000 years to form. Its hewn stone casing and inscriptions give evidence of the chisel and the hammer. The ornaments and the kitchen hardware enclosed with the body are cunningly wrought and well-devised. Evidence accumulates that nations have flourished and disappeared, upon this continent, so far back in time that the mind cannot conceive it.

We have mummies that are older than any in Egyyt. These, in turn, are antedated by other peoples long since lost in antiquity. Ages before the flood they were raising corn in Ohio, and mining copper, silver and gold in various localities; they were weaving cloth, making dyes of all colors, from herbs, berries and minerals. The facts revealed point to a people who filled teeth with gold, and who operated for cataract in the eye—one of the most delicate attempts known to modern surgery. If this remote people could do these things, shall we suppose that they did not have the finest tools, and that they did not know all about fashioning, tempering and polishing them? From whom should they obtain these and similar tools except from the hardware merchant?

The American nations built public works as great or greater than any known in Europe. The Peruvians had public roads two thousand miles long. Humboldt pronounced them among the most stupendous works ever produced by man. They built magnificent bridges of stone, and even invented suspension bridges thousands of years before they were introduced to Europe. In Central America and Mexico the wonderful ruins tell of a dense population. One city covers a space six miles in diameter. Its long avenues are lined with ruins of public buildings, palaces, factories, edifices and halls, in continuous lines, like our modern cities. These evidences of former grandeur cover an immense territory, including many of our Southern and Western States. One fort in the little Miami River, Ohio, has a circuit of four or five miles, and an embankment of 20 feet high. It could garrison 60,000 men, with their families and provisions.

They had a chain of fortifications reaching from the State of New York across Ohio to the Wabash, and many other works of equal magnitude; yet nowhere in history can I find an ancient spade or shovel or wheelbarrow.

In the valleys of the Mississippi and tributaries, and throughout Ohio and many other portions of this country, are evidences of pre-historic man which baffle our present knowledge. Whatever the purpose of these mounds was, the fact that there are over 10,000 of them in Ohio gives some idea of the extent of the ancient people who built them. They are far more numerous in Southern localities, and in the Gulf of Mexico. To have such works possible, under any circumstances, there must have been settled life with its accumulations and its organized industries. They had their manufacturers and merchants; and they used implements of agriculture, of war, and of peace. No trace of their dwellings, or their factories, or stores is left. Their circular earthwork enclosures are perfect circles, and their square enclosures as perfect squares. They are constructed with geometrical precision, which implies a knowledge of science. Implements made of copper, silver, obsidian and greenstone, finally wrought, are found in abundance. Their axes, single and double, adzes, chisels, drills, or gravers, lance-heads, knives, bracelets, pendants, and the like, of copper; their ornaments made of silver and mica from the Alleghenies, and shells from the Gulf of Mexico, all testify to their organized industries. They had the art of spinning and weaving.

Some of the wrought ornaments of the mound builders equal in finish and beauty the finest manufactured by the ancient Peruvians. They made chain; and they had a great store of copper, flax, and other rich commodities.

The history of the conquest of Mexico reads like a fairy tale. Our present object, however, is to reflect that these great peoples had their merchants, their manufacturers; and that they engaged in the hardware business as we do to-day. The ancient graves disclose almost every article of hardware known to us at the present day: bodkins, screws, horse shoes, shawl pins, buckles, knives, helmets, shields, tweezers, door-keys, sheep shears, &c.

While it appears that in very ancient times the natives of Central America possessed copper implements for tilling the fields, and knew the use of the chisel, researches show that the use of the axe and hatchet, in various forms, the blow-pipe, the cooper adze and the meat-chopping knife, are *far* back in time. They made nails; and they are believed to have brought the manufacture of bronze to great perfection; and are even said to have possessed the art of tempering brass.

Those of us who have seen iron pipes buried in the earth return to oxides and to sand in a few years' time, and those of us who wonder what becomes of all our pins, can understand that through the ages that have elapsed, all traces of ordinary implements of hardware may well have disappeared again and again; nevertheless, bones and implements have been found in certain strata of the earth, the age of which is known to geologists. Some of these long preceded the flood. The more enduring stone is naturally found where perishable hardware of other varieties has disappeared.

In a pre-historic cave in France there have been found the remains of the bear, and of man, together with numerous well-made implements of stag or reindeer's horn, carefully fashioned and bevelled, with holes drilled therein; knives and other weapons; and the bear's tooth carved in the shape of a bird's head and drilled. This cave had a cement floor or layer of made-ground of an ossiferous and vegetable character, strengthened with fragments of stone. There are also ashes and charcoal, showing the existence of a fire.

The use of the bow appears to have been known from the beginning of time; and the bow-drill of our present day appears through all the history of antiquity. The flint arrow-head and the long bow are also common to mankind, in all ages, and in all lands. Stone implements of various kinds, and in some cases for uses which we can hardly conjecture, also appear to have accompanied man almost from his earliest stages. The varying types of these stone implements mark the date of the starting point of manufactures and the arts. We find among them flint knives, scrapers, agricultural implements, and domestic utensils. We have found, in this country, immense beds of flint flakes, showing that these implements were made at regular factories, and the chips and imperfect implements found in these beds indicate that they were made upon a very large scale; and that there was the manufacturer, and hence the merchant; and, of course, the drummer.

The manufacture of tomahawks, scrapers and chisels, and the skill required in fitting them to handles, gave employment to large numbers of men. These men were skilled mechanics, and had all the questions of wages, hours of labor, etc., which we have to-day. Perhaps they had their labor unions. These are the primitive hardware manufacturers. The potter's art we are not discussing, but it also dates back to the earliest epoch of man. How soon the potter's wheel or lathe was known we cannot yet determine.

Implements made of reindeer horn, shark's teeth, teeth of the cave bear, and of polished bone, are also found; while the needle, having an eye pierced at the base, was manifestly known to the cave dwellers and to earliest man. Bodkins, stilettos, saws and needles are found. The perfect flint drill, with sharpened point and cutting edge, also appears in the Stone Age. The spoon, made from the reindeer's horn, and delicate instruments made from polished horn and bone; the flint saw and the chisel; the bone harpoon and the horn comb were in use by the cave dwellers.

The plow is found in Ancient Egypt and in Ancient Peru; the axe of the Stone Age in Europe is the axe of the Stone Age in this country; the stone arrow-head of Switzerland is the same as the stone arrow-head of America.

The bronze chisel and the spear-head of oldest Europe are almost identical with those of North America. Both countries knew the use of the magnet, the signs of the zodiac, and they calculated eclipses, and watched the periods of the planets and constellations. The carpenter's and mason's tools of oldest Europe are almost identical with those we use to-day. Even the obelisks of Egypt have their counterpart in America. The division of time employed at Thebes was strikingly similar to that found in use in Mexico. The round towers of ancient Ireland and Scotland are the same as those in New Mexico and Colorado. Ancient Phœnician idols of the horned god Baal are the same as those found in Dakota and Peru. Coins of ancient Tyre and of Central America are strikingly similar in size and in the device thereon.

We find in this country mounds shaped like the elephant, yet it is known that the elephant never existed here. In ancient Mexico, also, idols and bas-relieves, faithfully portraying the elephant, have been found. These coincidences are mentioned to show that at various times, through vast antiquity, the old world and the new have, in some way, come together, and have interchanged knowledge, arts, forms of governments, implements of war and of agriculture.

Now who were the venturesome and ambitious men who undertook these voyages, and what was their incentive? I answer that it was the traders; and that they sold implements of war, of husbandry, of the chase, and of the domestic life; in other words they sold hardware and were the drummers. They pushed out into all quarters of the earth. Hardware and civilization have gone together since the Glacial Period.

The hardware implements found in these ancient graves record the progress of man, and fix his stage in the advancement of the race. Since time began commerce has been the great educator, explorer and mover of the world; and in the forefront of these exploits is the hardware merchant.

HAMILTON RETAIL GROCERS.

The last assembly of the Hamilton Retail Grocers' Association since the first of the year was the annual meeting. The reports of the secretary and treasurer showed the association to be in a flourishing condition. The election of officers resulted as follows:

President—A. Ballantine.
First Vice-president—J. O. Carpenter.
Second Vice-president—J. C. Bolligan.
Secretary—W. R. Harvey.
Treasurer—C. Bremner.
Executive Committee—C. H. Peebles, J. H. Horning, John Ronan, F. R. Close and A. Hayes.
Auditors—C. Holt and G. Powell.

Mr. J. H. Horning reported that the 9 o'clock Saturday closing system gave satisfactory results, and asked the other members to try it.

Mr. Adam Ballantine, who was re-elected president, made one of his neat speeches in again accepting the office. He reviewed the work of the association, and expressed pleasure at being able to report its affairs to be in such a satisfactory condition. Messrs. J. Ronan, F. R. Close, A. Ballantine, J. O. Carpenter and C H. Peebles were appointed a committee to arrange for the purchase of glass jars for the coming season. The secretary, Mr. Harvey, read a communication from Mr. E. Sutton, secretary of the London Retail Grocers' Association, stating that the question of the inspection of the weights and measures had been discussed by that association, the feeling being that the present system of charging the grocer a fee is unjust and exorbitant. The London association expressed the opinion that the inspector should be paid a regular salary. The matter was left over for discussion at the next meeting.

LAKE OF THE WOODS COAL.

W. W. Watson has just returned from a trip to Buffalo Bay, on the west shore of the Lake of the Woods, eight miles north of the Warroad River, where he has spent the greater portion of last summer with a crew of men in search of coal. Speaking of his venture to a reporter, Mr. Watson said: "Some time ago it was discovered that the south wind would roll up the water in Buffalo Bay with coal dust, after which the shore would be covered with pieces of coal of apparent good quality. Last spring I engaged a crew of men and started digging in a low place near the lake; at eighteen feet they struck a ledge of cannel coal a foot in thickness and of good quality. The progress of the work was hampered considerably by spring water. Later on in the summer a drilling outfit was put in operation, which has been working ever since. At 116 feet another strata of coal was struck, about the same in diameter as the first one. This proved that there was coal in paying quantities in the neighborhood, and the strata extends inland and upward."—*Winnipeg Free Press.*

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE

ONE FULL YEAR'S PROFIT.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DECISIONS IN COMMERCIAL LAW.

WRIGHT V. YUENGLING.—A patentee, having described a feature in his specifications and declared it to be an essential feature of his invention, and having made it an element of his claims, is not at liberty to say that it is immaterial, or that a device which dispenses with it is an infringement, though it accomplish the same purpose, in, perhaps, an equally effective manner. Where the novelty of the invention is at least open to doubt, the patentee should be held to a rigid construction of his claims. A mere difference, a carrying forward of an old idea, a result, though more perfect than had heretofore been attained, does not arise to the dignity of an invention according to the Supreme Court of the United States.

THE "MARY THOMAS."—Two policies of insurance were effected by the owners on ship and freight respectively. Each policy provided that general average should be payable according to foreign statement, if in accordance with contract of affreightment, and incorporated the ordinary sue and labor clause. On a voyage from Nicholaieff to Rotterdam the vessel stranded on the island of Malta. The cargo was discharged into lighters and the ship towed into Malta, repaired, re-loaded, and subsequently reached her destination. A general average statement was prepared in Holland, and the proportions due according to the law of Holland in respect of ship, cargo and freight were allocated. The underwriters paid their proportions in respect of ship and freight, but the shipowners failed to recover the cargo's proportion from the owners of the cargo, the courts in Holland having decided that the latter were not liable to contribute inasmuch as the stranding had been occasioned by the negligence of the master, notwithstanding that the policy on the ship covered loss from such negligence. The Court of Appeal in England decided that the shipowners were not entitled to recover from the insurers either as a partial loss or under the sue and labor clause, the portion debited according to foreign statement to cargo in respect of the expenses incurred in the operations at Malta and in warehousing and re-shipping the cargo.

IN RE HESS MANUFACTURING COMPANY (SLOAN'S CASE).—Two brothers named H. being desirous of purchasing a site for erecting a building in which to carry on the manufacture of furniture, and not having the means to do so, applied to S., father-in-law of one of them, for aid in the undertaking. S. obtained from the owners a conveyance of a site, the consideration being the erection of the building and running of the factory within a certain time, or, failing that, the sum of $3,000. The building was erected within the limited time, and a company having been formed the manufacturing business was started. S. was one of the provisional directors of the company, having subscribed for shares to the amount of $7,500, and, subsequently, the son of S. and the two brothers were appointed directors, through whom S. transferred the property to the company, having previously mortgaged it for $7,000, it having cost $7,300, besides which some $5,000 had been expended on it, the money being supplied by the wives of the two brothers. On the property being transferred to the company, 360 shares of the capital stock of the value of $50 each was allotted to S. as fully paid-up shares, and to include his former subscription. Of these shares 234 were afterwards transferred by S. to his son and daughter. The company having failed, the liquidator appointed under the Winding-up Act applied to the Master to have S. placed on the list of contributories for the 360 shares. The Master complied with this request of 126 shares standing in the name of S. when the winding-up proceedings were commenced, holding that S. purchased the property as trustee for the company, and so gave no value for the shares assigned to him. Held by the Supreme Court of Canada, affirming the decision of the Court of Appeal, that the circumstances disclosed in the proceedings showed that S. did not purchase the property as trustee for the company, but could have dealt with it as he chose, and having conveyed it to the company as consideration for the shares allotted to him, such shares must be regarded as being fully paid up, the Master having no authority to enquire into the adequacy of the consideration. Also that S. was a promoter, and as such occupied a fiduciary relation to the company, and having sold his property to the company through the medium of a board of directors who were not independent of him, the contract might have been rescinded if an action had been brought for that purpose. Where a promoter buys property for his company from a vendor who is to be paid by the company when formed, and, by a secret arrangement with the vendor, part of the price comes, when the agreement is carried out, into the promoter's hands, that is a secret profit which the latter cannot retain; and if any part of such secret profit consists of paid-up shares issued as consideration for the property so purchased, they may be treated, while held by the promoter, as unpaid shares for which the promoter is liable as a contributory.

Mercantile Summary.

THE Atlas Assurance Company's portfolio and calendar for 1895 is a convenient present to its patrons.

MR. GEO. MCMURRICH sends to his friends an occasional copy of the vest pocket memorandum book published by the company for which he is general agent, the Alliance Assurance Company.

—ST. HYACINTHE is to have a new hotel. A company is applying for incorporation with a capital of $50,000 having the purpose of erecting one, the title of this company to be La Compagnie du Grand Hotel de St. Hyacinthe.

THE wholesale dry goods firm of Thibaudeau Brothers & Co., of Montreal and Quebec, has been dissolved by the death of Mr. Geo. Larue on the 5th inst. The business is continued under the same style by the remaining partners, Messrs. A. A. Thibaudeau, R. Audette, and Roger Larue.

THE town of Gananoque, Ont., furnishes two failures to the weekly list. H. E. Walton, at one time manager of the Gananoque Carriage Company, and of late engaged in the manufacture of a patent damper, has made an assignment.——So also have done Fitzpatrick & Phillips, tailors, in which concern T. E. Phillips has been the only partner since the spring of 1893, Mr. Fitzpatrick having died about that time.

Mercantile Summary.

JOHN FENNELL & SON, of Berlin, favor us with one of their calendars for 1895, the conspicuous object in which is the old flag.

A DRY goods retailer at Ottawa, L. Taillefer, is seeking a settlement at 70 cents on the dollar. He began business in 1891 on small capital. Last month he was burned out, with only partial insurance. Liabilities are $10,516.

MESSRS. JOB BROS. & CO., general merchants, St. John's, one of the more important firms involved in the recent troubles in Newfoundland, are arranging a compromise at 33⅓ cents on the dollar, one-third to be paid in cash, balance within a year, security being furnished by the Bank of Liverpool.

WE observe that the *North British Economist*, the only financial journal published in Scotland, comes out in a colored cover at the New Year. As an organ of Scottish banking and financial affairs, it is valuable, its editorials being usually characterized by knowledge and good sense. Insurance is a leading department of the journal, and it frequently records new railway undertakings, and discusses schemes of railway finance. Furthermore it contains a digest of the chief cases affected by commercial and financial law. The annual subscription (post [free) is seven shillings, and there are offices at 377 High street, Edinburgh, and 11 Ludgate Hill, London, E.C.

Mercantile Summary.

WE thank the Dominion Dye Woods Company for a very neat calendar for 1895. Likewise the Intercolonial Railway Company for one of their's, with a most suggestive view of Baddeck and thereabout, the lovely Cape Breton landscape that Charles Dudley Warner has done so much to make known.

A PRESENT appropriate to the New Year comes to us from the B. F. Goodrich Company, of Akron, Ohio. This is a life-size lithographed fac-simile of Corcos' portrait of Josephine. It now ornaments our walls, and we invariably call the attention of visitors to the apt quotation underneath the picture.

H. PELLETIER, doing business in dry goods in his wife's name at Montreal, under the style of H. Pelletier & Co., has fyled consent to assign. The liabilities are estimated at $10,000 to $12,000. —— Cyprien Dumouchel, a saloon keeper in the same city, has assigned on demand, and shows liabilities of $3,418.

THE general store firm of McEwan & Co., Sudbury, Ont., whose embarrassment was noted in these columns a few weeks ago, have finally arranged a compromise at 65 cents on the dollar, in quarterly payments spread over fifteen months, and partly secured. The liabilities are $14,692, and assets, stock, $15,300; book debts, $4,397; cash, $550.

Special Notice to Large Consumers of Paper Boxes

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

MR. STEPHEN NAIRN, grain and flour merchant, Winnipeg, has remembered THE MONETARY TIMES by sending us one of his office calendars for 1895.

THE Hamilton Street Railway Company pays the city of Hamilton $13,145 as mileage rate and percentage of gross earnings for 1894. This is $641 more than in 1893.

IN the matter of the St. Lawrence Lumber Company, limited, which was up before Mr. Justice Tuck at St. John, on Friday last, after argument of counsel, the Judge appointed Senator Burns, of Newcastle, Richard Turner, of Quebec, and W. H. Thorne, of St. John, liquidators.

THERE has been what our correspondent calls a little whirl among Montreal retail crockery dealers, three of them being reported as failed within the last week or so. S. Beauchamp, crockery and tea dealer, has assigned, owing $6,491.——Mrs E. Vervais, doing a small crockery business in the western suburbs, has been closed up, owing about a round $1,000, and W. H. Depocas, in a similar line, is in the hands of the assignee, who makes up a schedule of liabilities amounting to $2,556.

IN the lower provinces we note the following recent failures: Mrs. M. A. Ross, doing a grocery business at Baddeck, N.S., has made an assignment. Her husband failed pretty badly in 1890, and business has since been done in her name.——George Eaton, 25 years a general dealer at Canning, N.S., has assigned. He failed before in 1869.——Macdonald Bros. & Co., general store, Montague Bridge, P.E.I., have been obliged to close up. They got an extension in 1888, compromising afterwards at 75 cents in 1890. The senior partner is an M.P.

ABOUT eight months ago J. H. Cleave removed from Chatham to Brantford, where he opened a dry goods store with but little capital. Since then he has been principally indebted to a Hamilton firm, and now is in the hands of an assignee.——Other assignments in the province are those of Frank Johnson, tailor at Uxbridge, and Robt. Holbrook, book agent, Alvinston.——The sheriff has seized the assets of John R Johnstone, blacksmith and undertaker at Freelton, and they will be sold.——A bailiff at St. Thomas is in possession of John Oxford's fruit store.——An extension of time is asked from the creditors of B. F. Young, who has a planing mill at Stratford. He finds collections very slow.

THE commercial travellers will give a ball in the opera house, London, Friday evening, Feb. 15.

THERE are two small failures in Toronto; one is that of A. J. Brown, butcher, who has assigned to W. A. Campbell, and the other is that of Mrs. E. Lewis, who has had her grocery stock seized by the bailiff

THE wholesale jewelry business conducted by Hiram Weidman has been taken into the hands of the sheriff. He dealt largely with peddlers, and as the latter have been meeting with poor success, it is natural that Weidman's business should fall off.

IN Toronto, a grocer named Mrs. M. A. P. Meeking, in business several years, has assigned. ——It is only a year since Frank Moses, stove and tin dealer, assigned. After arranging a settlement, one Clapp was admitted a partner Already they have become insolvent and an assignment has been made.

THE Erie Railway managers have made a traffic arrangement with the Grand Trunk in co-operation with their Port Stanley and Lake Erie Railroad and its Conneaut-Port Dover car ferry system. The arrangement includes coal from the Port Stanley and Lake Erie field and general merchandise to and from Canada by that route, including points south.

THE Toronto firm of George H. Hees, Son & Co. advertise by circular that they are the sole owners of the good-will of the business of the Macfarlane Shade Co., and that they own all the printing blocks, patterns, lace effects, catalogues of that concern. Mr. Macfarlane has gone to Detroit, where the firm of Hees, Macfarlane & Co. has been formed, and where they are building a brick factory 60 feet wide by 220 feet long and three stories high, to make hand made opaque shade cloth, in all widths. The firm will also make a specialty of art laces and fringes.

WE note a trio of failures from the Ancient Capital. D. & S. Arel, a firm of butchers and provision dealers, are offering 30 cents in the dollar, owing about $4,000.——O. T. Poitras, a jobber in flour, etc., has been too lavish of credit to doubtful marks, and cannot pay in full. He owes $18,000 direct and $5,000 indirect; nominal assets are $21,00 , but of these $13,000 is in poor accounts. He proposes that his creditors shall accept 20 cents in the dollar. ——V. Gastonguay, a producer of native wines in a small way, has made an assignment, but owes only a few local creditors.

IT is true that the bank clearings at the Montreal Clearing House during 1894, namely, $546,600,000, were four per cent. less than the $568,732,000 of 1893. But this decline is the smallest recorded by any of the large cities of America. In New York the decrease was 22 per cent., in Philadelphia 10 per cent., in Chicago 8 per cent., and in Boston 9 per cent. The average decline in all the clearing house cities was 16 per cent. Montreal stands tenth in the list of cities on this continent in respect of volume of clearing house business.

FROM Manitoba and British Columbia come reports of the following failures: W. M. McKinnon, hotelkeeper, Vancouver, whose stock is advertised for sale by the bailiff.——Mrs. S. M. Hilbert, Nanaimo, raised some money last month by way of chattel mortgage to help her in her grocery and fruit business, but now she assigns.——The largest failure to report from the western provinces is that of Baird Bros., of Pilot Mound. They have been doing a very fair trade as general merchants, but the dull times have prevented their making satisfactory collections, so they have assigned. Liabilities amount to $24,500 with assets of $31,000.

NEW addresses of some of the recent sufferers by fire: S. F. McKinnon & Co., 61 Bay st.; Haworth & Sadler, 28 Jordan st.; *Globe* Printing Co., business office 20 King st. east, editorial office Richmond st.; Geo. D. Ross & Co., 19 Front st. west; Toronto Lithographing Co., 28 Front st. west; Nicholas Rooney & Co., 60 Yonge st.; Thos. Dunnet & Co., 34 Front st. west; Brereton & Manning, Merchants Building, Bay st.; Boisseau & Co., 18 Front st. east; Hart & Riddell, 3 Wellington st. west; R. Darling & Co., 53 Yonge street; R. H. Gray & Co., 27 Front st. west; The Brough Printing Co., 78 Wellington street west.

FOR several years back the effects of G. E Steacy, contractor, Orillia, have been under the shadow of a chattel mortgage. Not being able to throw it off and getting into deep water, he has assigned.——A short life in business was that of James H. Bradt, of Stratford. He opened a harness business about four months ago, and already the landlord has seized for rent.——The Mowat Implement Mfg. Company, Whitby, have been making a good machine, but have been hampered in pushing the thing through an insufficiency of capital. The business has virtually been under the control of A Brown, of Toronto, who some years ago took a chattel mortgage amounting to $19,600. He has foreclosed

ON behalf of themselves and the members of the Montreal Board of Trade, the council of that body for 1893 has tendered a banquet to Mr. W. W Ogilvie, the retiring President, who has occupied the presidency for two years. The date of the banquet is fixed, we understand, for Thursday next

A PETITION has been presented to the court, asking for an authorization to wind up the Coal Saving and Smoke Consuming Co., of Montreal.——A similar action was taken with regard to the Gebharat-Berthiaume Lithographing and Printing Co., of Montreal, whose affairs have been in tangled, uncertain shape for some time Two years ago they arranged a compromise at 50 cents in the dollar, the plant, etc., being transferred to the two principal creditors as trustees, for the due completion of the arrangement. There has been a notable lack of harmony of late among the various heads of departments, and creditors have lost patience with the concern.

THE firm of Bowman & Moore has been in Hamilton many years as hardware dealers and did a prosperous business. In August, 1892, R. Bowman withdrew from the firm, with $24,000 to his credit. After this W. E. Sanford became a special partner, and after he retired from the firm with his capital of $7,000 and 7 per cent. interest, Moore then admitted his brother a partner. Owing to dull trade, with heavy stock on hand, their affairs are in such a state that they will call a meeting of creditors ——In 1888 John B. Weir, implement agent at Clinton, compromised with creditors at 50 per cent. He now assigns.——Other assignments are those of W. H. White, merchant, township of McMurrich, and John Owens, hotel keeper, Port Hope.

SEVEN years ago Maynard Bros., tailors at Orillia, began business, and soon did a nice trade; but it appears they granted credit too freely, and, being unable to collect, have to assign to Henry Barber & Co.——We hear that R. Mercer, jeweller at Seaforth, who assigned a couple of weeks ago, has compromised at 40 per cent.——After photographing at Listowel a quarter of a century, David Barber is trying to compromise at 25 per cent. He never made any money, it seems.——The furniture of Noah Liebler, hotel keeper at Hanover, has been seized under power of a chattel mortgage.—— The jewellery stock of Louis Vongunten in Chatham has been seized and sold by the bailiff. A man was brought from Toronto to open the safe, Mr. V. declining to do so.

Northey
Mfg. Co.
Limited
TORONTO, ONT.

D F YOUNG, Stratford, is in difficulties. A telegram is received stating that he has made an assignment.—At Tiverton an agent named J. H. Glass has assigned.——Henry Wilson, an Oakville grocer, is asking his creditors for a compromise, which will likely be granted. He has a good reputation as a business man, but seems to have had ill luck lately.——The dullness in the grain bnsiness has affected J. C. Hart, a dealer at Alliston In our last issue we mentioned that a meeting was being held to look into his affairs. At the meeting he offered a compromise with his creditors of 75 cents secured, but as they were not quite satisfied with the security offered, he left for home in the hope that he might discount a note and pay cash. We have not heard the result.

THE following country failures in the Province of Quebec are reported for the week; G. F. Lawrence, who bought a dry goods stock in Buckingham, about a year ago, was burned out last week, with only $4,000 insurance on a stock estimated at $13,000. A demand of assignment has been served upon him. If he continues in business he will carry more insurance.——Jos. Lalonde, who was a merchant at Valleyfield several years ago, left there for Montreal, where he sank money in an electric light company, etc. Returning to Valleyfield a year ago with diminished capital, he has evidently found it not easy to get back his trade. He has got behind, and insolvency proceedings have been taken against him.——A. Belanger, a biscuit maker and manufacturer of ginger ale, etc., who moved from Ottawa to Hull last spring, is seeking a compromise. He was burned out in Ottawa two years ago.——S. R. Page, general dealer, St. Ephrem de Tring, who has been trying to arrange a compromise at 50 cents, has been served with a demand in insolvency. He formerly did a fancy goods business in Levis, and when he moved to St. Ephrem paid a big price for a badly assorted stock.——The assignment is noted of P. Therrien & Co., general dealers at St. Antoine L'Abbé. Mr. T. succeeded his father in 1891, failed two years later, resumed in wife's name, died last November, and an assignee is now to wind up the estate.

LIST OF INSURANCES.

We noticed in last issue that another serious fire had broken out in Toronto on Thursday evening, 10th inst. It originated in the Osgoodby building, near where the fire of Sunday had been stopped. Before it was under control Thomas Dunnet & Co.'s, R. H. Gray & Co 's, Brereton & Manning's, Boisseau & Co.'s premises were completely gutted The fire also crossed Wellington street and did great damage to the stock and building of Hart & Riddell and Buntin, Reid & Co. Wyld, Grasett & Darling's stock, and that of the Corticelli Silk Co had a very narrow escape. These two fires, and several that occurred in 1894 in this city, suggest whether we have not professional incendiaries amongst us. The following is the amount of insurances on the burnt premises:—

Northern	$30,000
Scottish Union	24,000
British America	20,000
Western	25,000
Lancashire	18,650
Queen	6,500
Sun	4,000
Liverpool & London & Globe	16,000
Union	22,500
Manchester	13,500
Imperial	41,500
Phœnix of Hartford	15,000

TORONTO, FRIDAY, JANUARY 18, 1895.

THE SITUATION.

For the second time within eight months the Fraser River has overflowed its banks and flooded the lower lands. The first account received described the rise of the river as being two feet higher than in the flood of last June. Where dykes had been built the water flowed over them and generally swept most of them away. The flood of last year was regarded as so entirely exceptional that little danger of a recurrence of the dread visitation was apprehended. But the probabilities of the case are now reversed, and the danger of future floods is seen to be higher than the previous estimate put it. The authorities, it is said, put their reliance on dykes of greater height, and it is plain that every increase in height will require to be accompanied with increased strength. The source of danger is the liability to a sudden rise of temperature, under which the snow of the mountains melts faster than the water can be carried through the narrow gorges of the river. Much relief could be got if the capacity of these gorges was increased. This would serve a better purpose than dykes, which may give way under the action of water, even if they are higher than the highest flood. On this occasion the tidal water swept inwards by the Chinook winds did not recede till a second incoming tide added to their bulk and caused the mischief. The damage of last year's floods was much less than was at one time feared, and now there are no growing crops to be destroyed. But the crops of last year did not escape danger. On the present occasion the town of Vancouver has suffered, the flooding of cellars there being an addition to the calamity of last June. At this time of year a continuance of the temperature which brought on the trouble, 70° in the shade, for any considerable time, is improbable. Such freaks of temperature, if not exceptional, are not likely to be lasting in the month of January. In point of fact, the danger was, on this occasion, soon over.

It becomes more evident every day that the most drastic treatment of the Newfoundland case is regarded in England as the best, and indeed the only solution of the difficulty. Opinion seems to be rapidly shaping in favor of a suspension of the constitution, a royal commission, and the ultimate connection of the island with the Canadian confederation. Will the colony consent to renounce the privilege of governing itself, or, in case it should not, will the Imperial Government undertake to suspend the constitution, as, under the influence of Lord Russell, it suspended that of Lower Canada in 1887? It is known that the Colonial Secretary will not even grant a Royal Commission unless at the request of the local legislature. It is alleged, not without truth, that the colony has abused the privilege of responsible government. But will men who have acted without reason become so completely sobered by the present calamity as to atone for past errors, and prove their readiness to make sacrifices for the public good? Will they be willing to renounce ambitions which have been carried to the verge of insanity? The temper of the parties which flew at one another's throats, a few weeks ago, is so changed that the more violent of the two is willing to share the responsibilities of government with their old enemies, if a chance were given. The party which expelled the leaders of the opposing party from the legislature, by means of an election law, is now in dread of retaliation for its own more grievous sins in connection with the Commercial Bank. All parties admit that the intervention of the Imperial Government, in some form, has become necessary. And intervention, to be of any use, must be effective. Before a settlement is arrived at, the question of union with Canada is likely to be presented as a remedy for existing evils. It may stand a better chance of being carried into effect than it ever had before.

A despatch from Newfoundland states that the Government there is conferring with the Government of Canada to ascertain what terms for the admission of the island to the Confederation can be agreed upon. If the basis of an understanding can be found, the local legislature, it is said, will be asked to do its part next week. Whatever is done will be done with the consent of the Imperial authorities. The break-up in the island is complete, and it is necessary to make a new start. Spite of the failure of the local banks, the fish harvest can be moved without difficulty. The means to man next year's fishing fleet cannot be found where it has hitherto been got; new arrangements with new parties will have to be made. This will probably not be difficult. Many complaints were made of the methods of "the planters," and if these were well grounded, the future may have something better in store for the fishermen, the chief producers of the colony. The holders of the discredited bank paper are much to be pitied; the bank wreckers are in some danger. Some of the politicians are hopelessly involved in the commercial disaster and bank discredit. Out of the slough of despond all parties ought to be anxious to evolve order and to enter a new path with prosperity for its goal. It will be a great achievement to bring future prosperity out of present disaster.

On the question of prohibition, the Supreme Court answers the questions put to it, saying that a provincial legislature has no power to prohibit either the wholesale or retail sale of liquors; that it has no power to do so in parts of the province in which the Canada Temperance Act is not in force; that it cannot prohibit the manufacture or importation of liquors. In a local option case, the court decided that a by-law providing for local option is legal. It is not easy to understand the apparent contradiction between the decision that local option is legal and the opinion that the local legislatures have no power to grant local option. One thing is clear: a province has no power to pass a prohibition act, either as to the manufacture, importation, or sale. But how comes it to pass that if a local option by-law is passed by a municipality, it is legal? Can a local legislature confer on a secondary authority

power which it does not possess? Before the matter is settled, it is generally admitted, appeal to the Privy Council must be made. In refraining from assuming to exercise a power of prohibiting, the Ontario Government stands justified by the opinion of the Supreme Court. In the political arena, it will not be possible for some time to treat the question of prohibition otherwise than conditionally; there can be no prohibition until it be decided whether prohibition would be constitutional. The Supreme Court of the United States, if asked, would have refused to answer the questions put to our Supreme Court, as it will not undertake to instruct the Government or to decide cases in advance. But our Supreme Court had not the option of refusing to answer.

If the lessons of the late fires be not turned to account, it will be a great misfortune for the city. The deficiency in external resources, in the form of fire engines, will be supplied. But this is not enough. The building laws need careful revision, under scientific guidance. Neither of the buildings in which the fires originated was constructed as it should have been to resist fire. This discovery naturally creates a suspicion that many others may be of equally defective construction. When the by-law regarding fire limits was under discussion, many safeguards contained in the original draft were removed by the aldermen to suit the loose notions that prevailed in different parts of the city. The building laws of the best governed cities should be examined by experts, and a proper building by-law drafted on scientific principles. Aldermen do not always understand what is requisite in such cases, and when they do, they are often urged to do something else than their duty to please some of their constituents who love to pursue methods outside of the line of safety. It is just as important that a proper building by-law should be passed as that the city should be equipped with the best means of extinguishing fires when they do occur.

THE QUEBEC SESSION.

The Legislature of Quebec was prorogued on Saturday last. The Speech from the Throne refers to the large share in the deliberations of that body occupied by agriculture, the preservation of forest resources, and the progressive development of public lands. One of the subjects discussed at length was the proposed amendments to the charter of the city of Montreal, which, by the way, the legislature refused to permit. The result of this refusal will be to saddle that city with the heavy expense of certain municipal works, which many of the leading citizens consider unwise undertakings in the present state of affairs. This appears to be another instance of clamor by the mass of the voters for expenditures that shall give "work to the poor man," prevailing at the expense of and in opposition to the judgment of those who pay most of the taxes.

We observe that the contract made on the 1st July, 1875, between the Government and the Sisters of Providence for the care and maintenance of the insane, will terminate on the 30th June next (1895). New arrangements are therefore necessary, and the House appeared satisfied with the explanations given on the subject by the Provincial Secretary as to the intentions of the Government. Certainly, for the credit of the province, no such barbarous arrangement as to the insane should be permitted as once made the name of Quebec a by-word in two continents.

A bill was passed respecting railway subsidies, also bills incorporating the Quebec District Railway Company, the Cap de la Madelaine Railway Company, the Chateauguay and Northern Railway Company. Among the first measures passed was one extending the provisions of the law regulating the organization of gas and water companies to electric light companies, following which came Acts incorporating the Hull Electric Company and the Quinze Electric Company, also the Buckingham Electric Railway, Light and Power Company.

There were several measures passed relating to loan societies, one of them to amend the charter of the Sherbrooke Loan and Mortgage Company, another which concerned the Consolidated Land and Investment Company (Ltd.) and the Montreal Freehold Company, and to incorporate the Montreal Investment and Freehold Company, an amalgamation.

An Act is passed constituting Outremont (a suburb of Montreal) a town, and the charter of St. Henri and Cote St. Antoine are amended, likewise that of Dorion Village, and the Village of Senneville, while Cote Visitation is made a separate municipality. A somewhat unusual measure is that whereby the charter of the city of Hull is amended and certain territory is detached from the city. The charter of St. Hyacinthe also receives amendment.

PROGRESS IN BRITISH COLUMBIA.

British Columbia has come through the hard year 1894 very creditably. Economy, greater steadiness and better proportion have been reached in several of her industries. In all three of the principal cities of the province progress has been shown during the twelvemonth. In Victoria, for instance, while the aggregate expended on erecting new buildings or improving old ones was not up to the half million of 1893, the disbursement for the marine railway, the Esquimalt fortifications and the surface sewers will more than supply the deficiency. Imports at Victoria for 1894 amounted to $2,527,000, of which $677,000 were free goods. Exports were of the value of $2,982,000. Inland Revenue collections were $147,250, which is more than in 1892, though less than in 1893.

The catch of the Victoria sealing fleet for 1894 is the largest in the history of the fleet. The total Canadian catch for 1894 is 94,471, as against 70,332 for 1893.

The output of the Vancouver Island collieries during 1894 shows an increase of 134,577 tons. The Wellington collieries' output for 1894 was 366,765.06 tons; Union collieries, 221,700 tons; New Vancouver collieries, 393,772.17 tons.

According to the *Columbian*, the depression of business so general during 1894 has not been so seriously felt in New Westminster as in some other places. Elements of improvement are thus noted: "In former years a vast credit system was in vogue, people lived extravagantly, and among the great majority of our citizens little thought was taken of the morrow. Now, business is almost entirely conducted on a cash basis, economy is the order of the day, and, in spite of the hard times, a good deal of money is being put by to meet future contingencies. A better feeling pervades all lines of business, and the lumber trade is picking up." The exports from that city show the handsome total of $1,843,000 in value, as against $830,000 in the previous year, a very noteworthy showing. The imports were $531,703 in value, of which $394,000 was dutiable goods. This is less than in 1893 by some $62,000. In keeping with the increased export trade, the shipping returns show a large increase over 1893, both in number of vessels, coastwise and foreign, and in aggregate tonnage. Ten new vessels were added to the customs registry at New Westminster during the year.

The year has been a period of general liquidation in the B.C. coast cities, says the *News-Advertiser* of Vancou-

ver, a process painful while it lasts, but productive of much future benefit. "Traders have had many difficulties to contend with. The era of rapidly expanding trade which the opening of railway communication with the east brought about, brought also a large number of newcomers who hoped to secure a share of the business. Naturally the thing was overdone in many lines, while the new conditions also necessitated many changes in the conduct of business. . . . But as the fall in prices has materially reduced the cost of living, the conditions for the future are very favorable for increased business and better profits."

Great results were expected from the mining development of the Kootenay district of our westernmost province. And progress has, indeed, been made in 1894 in silver production, for the ores are of a high grade. But the low price of silver has necessarily had a most depressing effect on this industry. That mining can be prosecuted profitably when silver is not worth 60 cents per ounce, is questionable. When the silver question in the States and elsewhere reaches a settlement the trade of the Kootenay district, already not inconsiderable, must increase. The trade of a mining district is a peculiar one. But where mining has settled down to a legitimate industry—as it is now doing in Kootenay—the trade of such a district will be valuable.

BRITISH DISCOUNT RATES.

There are loud complaints of the unremunerative character of banking transactions in Britain during 1894. Business must be slack indeed or competition abnormally keen to draw from a writer in the *North British Economist* such a solemn complaint as what follows:

"For more than ten months the Bank of England rate has stood at 2 per cent. Notwithstanding the approaching close of the year, very little improvement occurs in the value of money; and it is generally recognized that any rise that may take place now will be of a very temporary character. With very quiet trade and extraordinary low values of wool, cotton, grain and other staple commodities, commercial requirements are so reduced that it is difficult to see how any marked recovery can take place in bill rates. Never in the recollection of any of the banking men of the present day have the rates for discounts been so unremunerative as they have been for the last year. Something, undoubtedly, must be done—some arrangement come to whereby the rates for discounts may be placed more on a footing of equality with the interests charged on overdrafts and cash accounts. The dissimilarity between the rates for these classes of business is too great; and the sooner the matter is firmly taken in hand by the managers of the banks, the better it will be for the institutions they represent and the country at large. Traders cannot afford to give 5½ per cent., nor can the banks afford to take anything much under 3½ per cent."

FIRE UNDERWRITING IN TORONTO.

At a largely attended meeting of fire underwriters, held on Monday last, it was decided to increase the rates on several classes of risks in Toronto, as stated elsewhere. Something of the kind was to be expected after the fires of last week, but still more in view of the inexcusable refusal of the city council to provide needed appliances with which to fight fire. We do not find fault with this advance of rates, since something had to be done to force the aldermen to action. But the step might well have been taken before. If the underwriters felt that the rates were insufficient in the defective state of fire appliances, they should have put them up before the fire. Then, perhaps, the citizens might have put pressure enough on the council to get steam fire engines purchased. It was mistaken generosity to their Toronto customers which led the underwriters to remain supine when they knew the risk to which companies were exposed. True, the council of 1894 has, since these great fires, assembled, and in silence voted as one man to purchase steam fire engines which a year ago or less, in spite of the urgings of fire officials and representative bodies, a majority stolidly refused to buy. No wonder we hear men say, when they recall these implorings, "I could bear my loss better, cleaned out as I am, if I could know that the aldermen who refused to buy proper fire appliances for Toronto were cleaned out in this fire, too."

Some of the British companies, we are told, will cease doing business in Canada because of these two Toronto fires coming on top of an unprofitable season. And we hear that their home managers have hard things to say of Canada and Canadian underwriting. Angry men are sometimes unjust, and we must not take too seriously words spoken in excitement. But it may do the underwriters good to hear some criticism from Canadian sources as well. A correspondent writes to this journal as under:

"The true theory of fire insurance is that of valuing the risk to be assumed and the expenses connected therewith, with sufficient loading for contingencies, and insisting on the sum of these as the rate to be charged, or the risk declined. To charge more than this sum would be extortion. To charge less would be folly. Not to know what to charge would be inexcusable. Any of these would be sufficient to destroy confidence in the fire insurance companies.

"The Canadian Board of Fire Underwriters have had their own way for many years. They have made rates, they have imposed conditions and restrictions, they have excommunicated those who presumed to differ from them, they have inflicted penalties on offenders within the pale. And yet *after* a fire we find them panic stricken because of its occurrence, whereas *any* fire should be an event fully provided for by their forethought and experience. To deny this position must convict the Board of incompetence; yet incompetent underwriting is unreliable underwriting, and unreliable underwriting is mere gambling, and gambling is immoral, whether in fire insurance or in *rouge et noir*

"If it be replied that the managers of the insurance companies *have* made full provision for such fires as have recently occurred in Toronto, and so cannot be accused of incompetence, then it is evident that they should not meet together *after* these fires have occurred and use the fact of their occurrence as an excuse for raising rates. It is beneath the dignity of the managers of the fire insurance companies to confess want of forethought—as it is to lay themselves open to a charge of extortion or of playing grab

"It is forethought which causes the payment of insurance premiums—those who pay them do so relying on the forethought of the companies to whom they pay them; were these not the case, they would rely on the mutual companies whom they are taught to despise and avoid on the ground that the hat would be passed after a fire to make up for the insufficient provision before the fire. And yet, if the newspaper reports concerning the meeting of the Canadian Board of Fire Underwriters held on Monday last be correct, this is justexactly the position assumed by them in Toronto to-day, as it was in Halifax a short time ago, and appears to be wherever and whenever opportunity occurs."

We are taught to regard fire insurance, properly done, as something approaching an exact science. Its origin and basis certainly were scientific. Surely of all persons a fire underwriter should keep on the even tenor of his way undismayed by anything which may happen. It is his profession to make provision for just such "happenings." He of all mortals has no excuse as to the exigencies of business. What is business to him if it is not right business? Politics—municipal log-rolling—personal friendship—secret society ties—a desire to get risks away from a rival—an insane craving for volume of premiums—(all factors in fire insurance canvassing of to-day)—none of these things should move the honest, competent fire insurance man. He should not underwrite a single risk unless he does it on right principles.

MODERN BUILDINGS AND FIRES.

The sufficiency or otherwise of some of the newer methods of constructing tall buildings is brought into question afresh by Mr. Jarvis' letter to the Toronto *Mail*, headed "The McKinnon Building." The first in his list of causes of damage to the walls of that structure is that "the expansion of the steel floor girders under such heat thrust the walls outward: no power can prevent this." It would appear, then, that this is a result which must be looked forward to by property-owners who want large modern buildings. If any one looks dubiously at the structures that United States architects are now-a-days pushing into the clouds, he is assured that they are all right—quite scientific—of undoubted strength. But such a thing as fire hazard has not often been allowed much weight in their planning.

To show that architects in the States are not agreed as to the desirability of such structures, we quote from a discussion by the American Institute of Architects at its annual meeting in New York last October. Said Mr. Geo. B. Post: "A tall building is only a tower as a problem of design. A city of towers, which this city will surely be if a check is not placed upon it by the Legislature, would be deplorable. The life of our buildings constructed in the form of steel cages embedded in masonry is to be short, and although I may not live to see it, others here will see the tearing down of many of them. I have removed beams that were cased in solid brick on account of the rusting of the surface of the beams." Another objection made by Mr. Post was this: "Tall buildings are not healthful, because, as bacteriologists tell us, germs of disease that die in sunlight thrive in darkness, and tall buildings would so shut out the sunlight that all sorts of germs might increase and multiply in the confines of our narrow streets."

It is only fair to place opposite to this the arguments of those who believe in sky-scrapers: Mr. W. L. B. Denny, of Chicago, said he had seen steel in Rome 500 years old which showed no effect of rust. In speaking of fires in fire-proof buildings, he said, "the fire should be allowed to burn itself out. We do not need protection from fire half as much as we need protection from fire departments. In a recent fire in a Chicago building the woodwork blazed up, and heated a terra-cotta ornament almost white hot, and when the firemen came and squirted water on it the hot material burst, and did much damage to the building."

At this annual meeting, Mr. T. M. Clark read an interesting paper on "Protection against Fire." The vulnerable parts of a modern building, he said, are the windows. To obviate this, he suggested the use of plate glass built up on wire nettings. These networks could be made ornamental, and thus disguise their usefulness.

CANADA'S TRADE WITH THE UNITED STATES.

A correspondent, whose letter we have mislaid, asked us several weeks ago to give certain figures of Canada's trade with the United States for the past twenty years. What he appeared to want was the yearly amount of our export trade and the aggregate as well. We give both in the subjoined table:

Year.	Aggregate Trade between the two countries.	Our Exports to U.S.
1873	$89,808,204	$42,072,000
1874	90,524,060	36,244,000
1875	80,717,000	29,911,000
1876	78,003,000	31,933,000
1877	77,087,000	25,775,000
1878	73,876,000	25,244,000
1879	70,904,000	27,165,000
1880	62,696,060	33,349,000
1881	73,570,000	36,866,000
1882	96,229,000	47,940,000
1883	97,701,000	41,668,000
1884	89,333,000	38,840,000
1885	86,903,000	39,752,000
1886	81,436,000	36,578,000
1887	82,767,000	37,660,000
1888	91,053,000	42,572,000
1889	94,059,000	43,522,000
1890	92,814,000	40,522,000
1891	94,824,000	41,138,000
1892	92,125,000	38,988,000
1893	102,144,000	43,923,000

FRANCE AND THE FRENCH.

The results of the census taken by France in 1891 were published only last month in full. The delay has been great, but now that the report is out it is found to be very voluminous. The statistics are apparently all-embracing, and one may find in them many illustrations of the economic conditon of that country. First as to the population. According to expectations and estimates it should have been forty millions at least, but is found to be but little over thirty-eight millions. The population amounted in

1801	to	26,930,756	
1846	"	34,546,975, average annual increase	170,000
1861	"	35,844,902 " "	86,528
1872	"	36,102,921 " "	23,456
1881	"	37,672,048 " "	174,979
1891	"	38,343,192 " "	67,114

With exception of the war period, of say twenty years ago, the growth was therefore lowest during the last decade, and taking further into account that at the end of 1891 1,130,211 foreigners and 170,704 naturalized subjects resided in France, the vast majority of whom immigrated during the last thirty years, it would appear that the increase of the native population, although nominally more, was really about 50,000 souls a year. This is evidently the result of the comparatively low number of births.

Out of the entire population of the country it was found that 17,435,888 persons, or almost one-half, followed agricultural pursuits; 9,533,560, or about one-fourth, were occupied in the industries, 1,191,333 in transport business, 3,961,496 in commerce, 715,624 belonged to the army, 699,611 to the civil service, 1,114,878 cultivated art and free professions, 1,169,750 were capitalists without occupation, and 1,304,250 appeared to have no specified work. The large number of persons who live an artist life, and the unusual proportion—over three per cent.—who are put down as "capitalists without occupation," attracts the attention. The civil service is well represented, too (where is it not?), and commerce gives employment, in its various ramifications, to more than one in ten, which is a good proportion. Paris has a population of two millions and a half; Lyons, of 440,000; Marseilles, of 388,000; Bordeaux, 256,000; Lille, Toulouse, Nantes and St. Etienne are next in order among the large cities.

Large landed proprietors are in France almost as scarce as manufacturers on an extensive scale, as the following table shows:—

	Masters.	Clerks.	Working-men	Servants.
Agriculture	3,570,016	75,400	2,890,118	688,540
Industry	1,021,659	207,222	3,319,217	169,477
Transport	62,501	138,707	245,979	22,106
Commerce	870,969	378,318	480,344	239,424
Art and professions.	420,133	.....	.....	137,397

Commenting on these figures the *Spectator*, which has gone into them with some minuteness, says they give an average of about one man (laborer or servant) for every landed proprietor, and about 3.3 men for every factory, whereas the commercial clerks and working-men together represent about one assistant for each individual firm. Most business houses manage evidently without any assistance. "The French people live in 7,842,053 houses or buildings of whatever kind. On the average 490 persons, or 136 households, exist in 100 houses, but although this proportion appears to be very favorable, as it amounts to less than five people per house, the character of the major-

ity of the inhabited buildings is described as very unsatisfactory." There are 3,986,686 so-called houses consisting of only a semi-floor (*rez-de-chaussée*); 2,661,798 have merely one floor; 875,273 have two floors; 221,799 have three floors; and 96,477 have more than three. It will thus be seen that about 90 per cent. of all "houses" are small cottages of half-a-floor or of one floor.

It is a curious circumstance that out of the 950,584 persons given in a previous census as "persons living on their incomes," apparently in no active business, no less than 425,534, or nearly one-half, were women. M. Paul Blouet told us in his lecture the other night that 70 per cent. of the French people were land owners. The maker of the soil did not intend that it should maintain three classes of people, the landlord, the tenant, and the labourer. The French peasantry, he said, combined all three of these in one, and this was why they were happy, comfortable, and rich on what the English contemptuously designated "three acres and a cow."

FINE SHOES AND THEIR RAW MATERIAL.

Great changes have been made within comparatively recent years as regards the style and character of foot wear in this country. This is especially noticeable in women's boots and shoes. Canada has been influenced largely by the United States in respect of the shapes, styles and materials of which fine shoes are made. And the skins from which to produce the fine foot wear have had to be sought for in different parts of the world in successive periods of years. So enormous is the consumptive capacity of the United States that the limited areas in which certain of the raw materials were sought were from time to time in danger of exhaustion. American women *will* have dainty boots and slippers, and Canadians have shown a like disposition towards elegance, not to say extravagance, in this particular. So it came about that manufacturers in Quebec and Ontario set themselves within the last decade or two to produce the sort of fine goods that the female heart cared for. From relying on the Americans for their raw material for these, it was a natural development of enterprise that our importers should look about them to buy the skins from first hands in the countries of production.

Accordingly we have sought to procure some information and data concerning the glazed kid industry.

We are told that the first firm to commence manufacturing what is known as "Dongola" leather was that of E. Frank Moseley & Co., of Montreal, in 1884, whose factory was situated at the suburb named St. Henry, at which place Moseley continued to do business until the tannery was burned down in 1886. In the following year, 1887, Moseley & Co. removed to St. Hyacinthe, where they have continued in business ever since. The factory at that French town is a large and commodious one, well lighted and equipped with the most modern machinery. The present production is estimated at about 500 dozen per week.

The next concern to manufacture Dongola was that of G. A. Mooney & Co., whose tannery was situated at Montreal, where they did business, three or four years, but unfortunately this concern came to grief in 1891, and the factory is now closed up altogether. Mooney's production when working was about 250 dozen per week. The next largest tannery to Moseley of this article in Canada is Mr. Paul Galibert, of Montreal, who has been engaged in this business for about four years. Galibert has quite a large factory situated on Wellington street, which is also well equipped so far as machinery, plant, etc., is concerned. The production of this tannery is estimated at 350 dozen per week.

The firm of A. R. Clarke & Co., of Toronto, has also been engaged in this business for some time past, and their production finds ready sale. The weekly production of this house is perhaps 250 dozen.

The Quebec house of A. Pion & Co. has also devoted some attention towards the manufacture of Dongola. Pion has not nearly as large a business as the others, and his production may be estimated at about 2,500 dozen per annum. The above named houses take in all those which are now actively engaged in the manufacture of goatskins into what is known as Dongola leather.

At the time that kid and goatskins were first tanned by this process the tannage was what is known as "Combination," in which gambier as an ingredient is largely used. About five years ago a new system of tanning skins was introduced into the United States; it was what is known as the "Chrome" or acid tannage. We are informed that this way of working or tanning skins is a most difficult one to accomplish well, but it seems to be the tannage of the future, because leather made in this way possesses qualities which no other system yet known has produced.

The firms engaged in this business in Canada were not slow to recognize the qualities of the "Chrome" system. As long ago as 1892 Messrs. Moseley & Co. paid particular attention in that direction, and at present the "Chrome" glazed kid produced by this house is a very fair quality indeed. Messrs. A. R. Clarke & Co. and Paul Galibert also produce "Chrome" kid in fair quantities.

It may be mentioned that not more than six or eight years ago fully nine-tenths of the glazed kid used in Canada was imported from France; but so well have the Canadian tanners succeeded that at present it is questioned if the consumption of French glazed kid amounts to five per cent. of the whole. It has been estimated that the total production by Canadian factories of this article is about 50,000 dozens per annum, in addition to which there is in the neighborhood of 10,000 dozens imported into this country from the United States.

As regards the raw kid and goat skins from which "Dongola" is manufactured, Mr. J. H. Wardlow, of Montreal, gives us the following information: The countries which supply these raw skins are mostly China, India and the Cape of Good Hope; there are, however, considerable quantities imported from such countries as North Africa and Russia. "I believe I am the only one in Canada in the goat skin business as an importer and merchant." This gentleman states that all he sells are imported direct from the land of production. "Raw goat skins are duty free both in Canada and the United States, which is advantageous as far as Canadian manufacturers are concerned; I mean by this that tanners are able to buy in the American markets the same as they would from myself." As to the total value of this output, it would be estimated at about $600,000. The foregoing may be considered a fair report of the glazed kid manufacturing business as it now exists in this country.

As the Dongola leather industry is comparatively a new one, so the importation of raw goat skins is a recent branch of business. Mr. Wardlow tells us that he used to sell the major portion of the French glazed kid that came to Canada. When Dongola superseded the foreign leather, he turned about and imported the raw material to make the domestic article.

THE FUR MARKET IN BRITAIN

Certain branches of the fur trade are sure to suffer from any marked commercial or financial depression. And a mild winter manifestly must have an unfavorable effect. The London trade circular of Messrs. Culverwell & Brooks finds that the year 1894 was less favorable to the fur trade than its predecessor. The prolonged and far-reaching commercial depression was one adverse influence to be reckoned with, and the mild winter failed to call forth any special demand for fur garments. "The progress and development of business being thus checked and hampered, a downward course for prices was plainly marked out The January sales first felt the influence of the altered temper of the market, and the two principal articles offered, beaver and musquash, both suffered a decline of 10 to 15 per cent. In addition, skunk receded 10, and raccoon 17 per cent., American opossum forming an exception and advancing 10 per cent. The spring series of sales bore, in its general result, the same character as the sales held in January. The supplies of the staple furs were of large extent, mink and marten in particular greatly exceeding the average quantity. Excepting in the case of the more valuable furs, which were required for Russia, the continental orders were restricted. The home trade bid briskly for black bear and a few minor articles, but otherwise their competition was unimportant. The most marked decline was exhibited in the sales of mink, which fell 50 per cent., and marten, which receded 35 per cent. Skunk sold at the decline established in January, and raccoon were again ten per cent. lower. Buyers for the Russian market afforded welcome relief to the prevailing dulness by their keen competition for foxes, silver and cross. These advanced 5 to 10 per cent. Sea otter, which becomes scarcer each year, ruled 10 to 15 per cent. higher. For a single skin the high price of £210 was paid. Bastard chinchilla have been in great request at steadily improving values. The remaining sales of the year were held in June and October. At the former sale the variations in value may be accounted for, to a great extent, by the inferior character of the collections. An improvement of 20 per cent. was shown in black bear, and of 10 per cent. in marten. The supplies at the October sales were not extensive, and beyond a further advance of 30 per cent. on marten, prices ruled in favor of the buyer; skunk and otter to the extent of 10 per cent."

—We hear from Montreal that the following gentlemen have been nominated for the offices named in the Board of Trade of that city For president, James A. Cantlie; for first vice-president, John Torrance; for second vice-president, John McKergow and Edgar Judge but Mr Judge declines to be a candidate; for treasurer, A. A. Thibaudeau and H. W. Raphael, but Mr Raphael declines

KEEP UP WITH THE TIMES.

The Germans, thrifty and thorough-going as they are, have made great strides of late years as a manufacturing nation. Britain finds Germany one of her strongest competitors in foreign markets, aye, and in colonial markets, too. The other day an Englishman appeared in a Canadian city as the representative of a large German manufacturer. This agent had a cab in which to make his rounds, and although his grip-sack with samples was not heavy, he deemed it the proper thing to have two horses to carry the bag and himself around town. At a Canadian warehouse upon which he called, he was asked how it was possible for his firm to lay down goods at the prices at which he was offering them. His reply was something as follows: "I am about the only person who derives benefit from this sale. The workmen who make our goods never wear either shoes or stockings. Their clothing is of the cheapest and scant at that, while their food consists mainly of black bread and soup. And then the manufacturer seems content with a return of five per cent. on his capital. However, I am not such a blawsted fool as these Dutchmen. I won't work for nothing and board myself. On the contrary, I live always as an Englishman should live, with plenty good beef and claret for dinner. And I don't smoke these blooming five or ten cent Canadian cigars. I cawn't stand them. The only ones fit for a gentleman to smoke here cost a shilling."

This knight of the road put up at the best hotel and enjoyed his ease, but far be it from us to say that he did not do faithful work for his employer. The life of a commercial traveller is a tiresome one at best, and one need hardly wonder that he makes himself comfortable in his own way. What we would point out, however, is the lack of agreement in his free and easy habits in the present case with the narrow economy and thrifty prudence of the workmen and the manufacturer whom he represented. It is quite probable that the frugal efforts of his employers in manufacture, enabling them to offer the goods at such prices as were quoted, might be offset by the needless expense incurred by their selling agent. Profits are at such a fine point now-a-days that it does not take much in the way of liberal spending by a salesman to convert a slight margin of profit into a clear loss. It may be that a season or two of this free-handed traveller will show him that an Englishman on the road may well take a lesson from the parsimonious "Dutchman" whom he affects to despise.

CUTTING PRICES.

There is something almost childish about the procedure of business men at times in cases where competition is endured or even where it is only feared. With the dash of a gambler or a plunger, a manufacturer, on this continent especially, will cut the ground from under his own feet while he is only thinking of upsetting an adversary. A contract has been made, we are told, between an iron smelting campany in the Southern States and a western manufacturer for pig iron, shipped f.o.b. cars in Tennessee, at $6.75 per ton. This, it will be admitted, is a low rate for pig iron, and cannot leave an exorbitant profit for the mill. But upon learning this fact another iron producer agrees to supply Tennessee iron at $6 per ton f.o.b. He could just as easily have got $6.50, but he probably wanted, like other over smart folk, to "do all the trade." It is such competition as this which has much to do with the abnormally low prices that staple commodities have reached. Possibly one should not complain, since consumers get the benefit, but when money is lost and industries wrecked by slapdash methods it is time to protest.

People of the sort mentioned above are not confined to the United States. Canada has her share of greedy men, who aim to control the trade in their particular lines, seemingly regardless of consequences to themselves and others. A practice of such people is to make a deep "cut" to a point that leaves neither himself nor his competitors a good profit in the price of a staple, with a view to "getting the trade." We have known cases in which this kind of thing was done too largely and too often for the financial health of the voracious manufacturer, whose banker and whose assignee discussed after the event—what the former wished he had discussed before—the prices that his customer had been getting for his product. When compelled himself to shoulder the losses that had been intended by his customer to fall on the shoulders of others, the banker determined to refuse his sanction by way of discount thereafter to persons who planned to get business by cutting prices below a reasonable limit.

MONTREAL HARBOR BOARD.

The Montreal Harbor Commissioners held a monthly meeting last week, when the annual report of the Harbor Master was read, showing the arrivals of sea-going tonnage for 1894 to have been 1,096,909 tons, a decline of 54,868 tons from 1893, and of inland tonnage 979,809 tons, a decrease of 73,791. Among principal items of export was 177,405,000 feet lumber, timber, etc., to Great Britain and the Continent; to the River Plate, 10,476,000 feet board measure, an increase of 26 per cent. over 1893. Phosphate, 1,034 tons. Grain—wheat, 5,392,125 bushels: corn, 2,035,970 bushels; peas, 1,189,414 bushels; oats, 87,113 bushels; barley, 52 bushels; rye, 48,811 bushels. A total of 8,746,485 bushels, showing the great decrease of 12,977,909 bushels from 1893. This however, is largely offset by the large exports of flour, 896,536 barrels, an increase of 361,664 barrels over 1893. Cheese, 1,695,292 boxes, an increase of 59,484 boxes. Butter, 36,660 packages, a decrease of ninety per cent. Apples, 273,496 barrels, an increase of 211,570 barrels Cattle, 87,604 head, an increase of 4,600 head. Sheep, 130,663, an increase of 127,014. Horses, 5,579, an increase of 3,927. Hay, 22,212 tons, a decrease of 45,653 tons compared with the previous year.

In the list of imports we find the quantity of coal from Great Britain, 21,154 tons, a decrease of 9,640 tons. Coal from the United States, 208,267 tons, a decrease of 18,097 tons. But of coal from the Maritime Provinces there was 733,338 tons, an increase of 46,338 tons. Total coal imported, 961,759 tons, an increase over 1893 of 17,601 tons The import of cement was 142,372 barrels, and of scrap iron 18,677 tons. The report closed with a review of the improvements done in the harbor during the year.

The Chief Engineer's report showed that the account against the city for its proportion of the work done on the guard pier during the year is $15,136. A contract was authorized with the Sincennes and McNaughton line for a new steel tug to be built at Sorel. The board authorized a formal application to the Minister of Public Works asking for the widening of the ship channel between St. Helen's Island and the Molson's shoal in Montreal harbor

TORONTO HARBOR TRUST.

The report of the Toronto Harbor Trust for the season of 1894 is to hand. The quantity of coal received was 523,109 tons, of which 385,512 tons came by rail and 137,597 tons by water. The coal by railway was about half anthracite and half bituminous. There has been received here during the last ten years, the commissioners say, 3,445,335 tons of coal, a large portion of which, if the down tolls of 20c. per ton through the Welland Canal were removed, would have come by vessel, the harbor tolls on which would have gone a long way to meet improvements in the harbor. As to other materials arriving at the port, while there is a decline in general merchandise and in building stone as compared with 1893, the receipts of horses, cattle and sheep, of grain, lumber and fruit, show a decided increase. Of fruit, for instance, there was received 234,760 baskets, 78 bags, 11,858 boxes, 4,172 barrels, each of which quantities shows a marked advance on 1893.

The number of arrivals at the port was in excess of those of the year preceding, Steamers 1,443 and propellers 294, showing a great increase, while schooners exhibit a falling off. Complaint has been made of low water this season, but this is a condition common to Lake Ontario ports generally. The engineer says: If the low level of the water in Lake Ontario should continue this year, further dredging will no doubt be required at the western channel and the slips. The level is now 11 inches below zero.

As to the extension of the Queen's Wharf, which the engineer recommends, we have heard the opinion expressed by a vessel man that inasmuch as the bay at the Queen's Wharf entrance is already dredged to the rock, it would be wiser to cut a new channel through the Hanlan sand spit 1,000 feet to the south, where plenty of water can be had.

The cash receipts of the Trust from all sources, including cash on hand from last year, and special deposit at bank, amount to $27,863.43. Expenses of all kinds amount to $16,056.32, leaving cash on hand and in bank $11,807.11; of this amount $10,424.50 is a special deposit to provide for maturing bonds, $5,000 worth of which will fall due on the 1st day of July next.

WINNIPEG GRAIN EXCHANGE.

The annual meeting of the Winnipeg Exchange was held last week, the president, Mr. S. A. McGaw, presiding. There was a large attendance of members.

Mr. McGaw, in his annual report, commented on the great interest manifested in all parts of Canada in the crop of Manitoba. He gave statistics showing that the crop of 1894 was by far the largest ever produced in the province. He pointed out, however, that the depression in prices had much depreciated the results of the crops. "In spite of this," he said, "in no country, I think, is the farmer more contented and energetic than in Manitoba, which is evidenced by the amount of land already prepared for next season's crop." The action of the Exchange in regard to the prevention of smut was praised by the president. The large increase in the membership of farmers' institutes was noted. Mr. McGaw endorsed the view that the grain standards should

be fixed by western men. He added: "I believe in a uniform standard, and when one is arrived at which will give as far as possible general satisfaction, allow that standard to remain This is following the American principle, which I believe to be a good one."

The report of the council reviewed the work of the year, dealing with the steps taken to provide good seed grain to farmers, the action in obtaining from the C.P.R. a reduction of elevator rates, action taken in regard to chattel mortgages, grain quotations, seed grain for the territories, etc The steps taken by the council in regard to grain standards was dealt with at length, and the position of the Exchange in claiming that as all the grain is grown and handled or milled by residents of Manitoba, the selection of the standards should be left entirely in the hands of the western people, without interference by eastern delegates. As to the methods of handling grain at Fort William or Port Arthur, or "mixing," as it is generally termed, the controller of inland revenue has made an investigation, but no decision had yet been made by the department.

The election of officers of the Exchange for the year 1895 resulted as follows:

President—George R. Crowe.

Vice-president—A. P. Stewart, Deloraine.

Secretary-Treasurer—C. N. Bell.

Council—Robert Muir, W. Blackadar, S. P. Clark, A. McBean, R. P. Roblin, F. W. Thompson, J. Harris, D. W. Cumming, S. Spink, S. A. McGaw, W. W. McMillan.

Board of arbitrators—S. W. Farrell, J. Harris, W. Martin, N. Bawlf, A. P. Stuart, S. Spink, D. H. McMillan.

Board of appeals—J. A. Mitchell, S. A. McGaw, A. McBean, S. Nairn, F. W. Thompson, D. G. McBean, I. M. Ross.

Call board committee—S. W. Farrell, W. Blackadar, S. Spink, A. Cavanagh, W. T. Gibbons.

INCREASED INSURANCE RATES.

The Toronto Board of Fire Underwriters have announced, under date 14th instant, that the following tariff changes come into effect on and after Tuesday, the 15th inst. This is plainly a result of the two recent big fires.

1st. That rates on mercantile and manufacturing risks (other than those rated under schedule) be increased to harmonize with those of similar risks in class "A" cities in Ontario.

2nd. That the 75 per cent. Co-insurance Clause be a condition of all insurances on mercantile and office and manufacturing risks (not schedule rated), both building and contents, failing which, 20 per cent. extra must be charged.

3rd. That the following additions be charged for height of building, occupied for mercantile, office and manufacturing risks (not schedule rated) over three stories:

On four story building	add	5 cents.
" five " "	"	10 "
" six " "	"	20 "
" seven " "	"	30 "
" eight " "	"	40 "

In the event of the council providing the required fire protection to the satisfaction of the board, these rates to be made as follows:—

On five story building	add	5 cents.
" six " "	"	10 "
" seven " "	"	20 "
" eight " "	"	30 "

The following reduction to be allowed on the above extra rates:—5 cents where there is a standpipe and hose on each floor, but such reduction shall only be made after inspection and publication in the minutes of the board. These rates to apply to contents as well as to building.

4th. That all retail stores of over five thousand square feet ground floor area be specially rated under following schedule, namely,—five cents additional for each one thousand feet or fraction thereof over five thousand square feet.

The above extras apply to all specially rated risks of the classes mentioned, as well as to such risks rated under the minimum tariff. New policies must be issued in cases of all risks affected by these changes.

TORONTO BOARD OF WORKS.

The expenditures of the Toronto Board of Works for the year 1894 amounted to $886,142. This went in part for pavements, 3 miles being asphalt; .826 mile cedar and granite on concrete; 2½ stone sets on concrete in track allowance; cedar and granite on concrete ditto, 0.39 mile; cedar block on sand, 0.461; macadam 0.059 mile. Permanent sidewalk laid measured 1.148 miles, other kinds about 15 miles. The department superintended the changing of the track allowances on Sherbourne street, Bloor street, and King street by the Toronto Railway Company. There were 14.66 miles of single track relaid, and 78 miles of new track, making a total of 15 44 miles laid during 1894 2⅔ miles sewers were built during the year and 107 dead ends of sewers were connected, to the great improvement, doubtless, of the health of the city. Slips have been dredged in the harbor front at the foot of five streets, while the Yonge street sewer was extended to deep water.

As illustrating the decline in building operations in the last two years, we note that where, in 1890, the building permits issued numbered 1,140, and in 1892 they were 1,075, the number had declined in 1893 to 732, and last year to 512 Although no agreement has been reached with the Street Railway Co. as to cleaning the snow off the city streets, the company has expressed its willingness to pay one-third the cost of such cleaning.

The water-works department reports that in sprinkling the streets 49,862,000 gallons water was used The quantity of water pumped by the fire engines at the pumping station was 6,589 million gallons, something over 18 million gallons a day, at a cost of 13.411 tons coal Under the head of construction, Mr. Keating reports that he expended over $14,000 in examining and repairing the conduit and intake pipes After adding new mains laid during the new year, and deducting abandoned mains, the total mileage of mains is given as 245½ miles, on which there are 2,839 fire hydrants.

OUR BUTTER TRADE

"Demand inactive, stocks excessive, quality poor, prices low, outlook dismal," was the somewhat expressive response of a Front street merchant yesterday to a query regarding the butter market. For a good many weeks we have been compelled to report a dull, discouraging trade in butter, and must continue to do so until some change is made in current market conditions. In the summer when Canadian creameries and dairies are making butter the English market is filled with stock, and prices are very low. It has long been the custom of Canadian makers and merchants to hold back their stock and ship in September or even later in the season. But of late, winter weather appears to have had but comparatively little influence upon London butter quotations. This change is due to the development of trade with the Australasian colonies, for from these countries it is possible to ship grass-fed butter of excellent quality to the London market during our fall and winter months. In competition with this butter our held stock, of mixed quality as it often is, has but little chance of success. In the summer our merchants refuse to ship butter because prices are low; in the fall and winter they are unable to ship because their stock has deteriorated by holding and no one wants it. Far better would it be for Canadians to face the summer market and sell their butter than to carry it during the winter and finally dispose of it as grease.

HARDWARE AND METAL TRADE NOTES

Sisal rope is reduced to a basis of 6½c. per pound

An increasing demand for mica for electrical purposes has stimulated the industry in Canada.

All the different brands of horseshoe nails have been brought to a uniform discount, namely, 60 per cent

Orders for spring delivery in both hardware and tinware lines are being more freely given than they were last January

The manufacturers of steel clad baths have formed an association on the same lines as the other hardware manufacturers.

An estimate of the value of minerals mined in West Kootenay for 1894 is silver $400,000, gold $175,000, lead $182,000, copper $18,000.

The discount allowed on one-pound packages of wire nails has been made 5 per cent. less than that allowed on the full ordinary packages.

Cut nails have been advanced by the Manufacturers' Association 35c per keg, making now a basis of $2 10 f.o b Montreal, London, Hamilton and Toronto.

A reduction has been made in the price of horseshoes, amounting to 5c the keg, and quotations are now as follows Montreal, $3 50; Toronto, $3 60; London, $3 65 per 100 lbs

From January 14th barb wire in plain twist and staple lines has been offering at 3c. per lb. Terms remain unchanged, freight being allowed as before to a maximum of 25c. per 100 lbs

Messrs James Watson, Glasgow, report, January 4th: "Business was resumed after the holidays on Thursday morning, but there is still a holiday feeling about and little business doing. The tone on the whole is steady."

Petrolia oil refiners report that in the last quarter of 1894 their trade was good The demand for Canadian illuminating oil has been strong from all points of the Dominion, as a result doubtless of the

marked improvement in quality noticed of late in shipments from Sarnia and Petrolia.

A Belgian inventor has devised an immense lamp, such as has probably never been seen before. The lamp is composed of 3,000 pieces. It is 6 feet high, and measures 7.10 feet in diameter. It is fed with lard oil, and the consumption is said to be very small, its light being so powerful that one may read by it at a distance of 600 feet.

A hardware association was formed in St. John, N.B., last week by the hardware and iron merchants of that city. Thirteen members of this important mercantile profession were present at the organization. Mr. W. H. Thorne was elected president, and Mr. John Barry secretary-treasurer. Messrs. S. Hayward and Thomas McAvity were appointed a committee, with the president and secretary, to draw up by-laws.

The Metal and Hardware Association, in affiliation with the Montreal Board of Trade, held its annual meeting last week. After the retiring president had read the annual report, the following gentlemen were elected officers: President, Mr. James Crathern; vice-president, Mr. Thomas J. Drummond; treasurer, Mr. J. B. Learmont; directors, Mr. F. Fairman, Mr. James Phymister, Mr. Wm. Macmaster, and Mr. A. C. Leslie.

The shipments of coal for the past month from Nanaimo, B.C., amounted to 55,949 tons, making a total for the year of 741,767, with a valuation of $2,799,905. The total output was as follows:—

New V. C. Co	393,722
Wellington	366,765
Union	221,700
Total	982,187

In reviewing the British iron trade for 1894, Messrs. Griffiths, in the *Iron and Steel Trades Journal*, say: "In 1893 Canada ranked after Australasia in the order of importance, but this year the value of our iron and steel exports to the Dominion has declined 30 per cent., and Canada drops to the seventh place in our list. The shipments of hoops and sheets, including Canada plates, this year show an increase of about 25 per cent. in value, bringing up the figures to the level of 1892, but with this exception Canadian business shows an extraordinary decline. The contraction in the value of our pig iron exports is 50 per cent., and the shipments of railroad material show an equal decline. Cast and wrought ironwork shows a loss of 40 per cent., bar iron and steel blooms, etc., 30 per cent., galvanized iron 15 per cent., and tin plates 5 per cent. The attempt of the Canadian Government to encourage native industry by subsidizing blast furnaces and taxing the imports of bar and scrap iron, have had some effect on imports, but the whole aspect of the returns is unsatisfactory. The commercial crisis over the States border has had a depressing influence on Canadian trade generally, but this is passing, and our export business with the Dominion will almost certainly be of greater volume and value in 1895."

The following circular has been issued to the trade by the Horse Nail Association. It bears date of January 1, and is signed by the Canada Horse Nail Co., Peck, Benny & Co., and Montreal Rolling Mills Co., Montreal; and James Pender & Co., St. John. N. B.: "We have pleasure in informing you that the following prices, terms, and discounts for the sale of horse nails in Canada have been adopted by us, and will take effect this day:

STANDARD LIST.

No.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Length	1⅛	1⅛	1¼	1⅛	2	2⅛	2¼	2⅜	2½	2⅝	2¾	2⅞	3	3⅛	3¼
Price	$1.10	1.00	.75	.50	.30	.27	.24	.23	.22	.22	.22	.22	.22	.22	.22

Trade discount: 60 per cent. Terms: (4) months, or three (3) per cent. discount for cash in 30 days. Delivered, F.O.B. Montreal."

After several meetings, and an abundance of correspondence, the nail manufacturers combination has again been patched up, with the result that the base price of cut nails has been advanced 50 cents per keg. To-day the mills quote $2.10 as the base price with 5 cents off for car-load lots in one shipment, 15 cents off 1,000 kegs lots, and 20 cents off 5,000 keg lots. Buyers of these latter to have the whole season to take them in. But the trade are somewhat doubtful as to how long these prices will continue, as the Lower Province makers are still outside of the combine. The concerns forming the pool are the Canada Rolling Mills, Pillow, Hersey & Co., Montreal Rolling Mills, Abbott & Co., Graham Nail Works and the Ontario Rolling Mills.—*Montreal Star, 16th.*

FOR GROCERS AND PROVISION DEALERS.

The Easter fish trade is week by week growing larger.

The sugar refinery at Moncton is working to its full capacity.

The Redpath sugar refinery in Montreal continues shut down.

The Quebec union of journeymen bakers have decided to join the Knights of Labor.

The journeymen bakers and confectioners of London have organized themselves into a trade union.

Mrs. Humbody—"Home is the dearest spot on earth, after all." Mr. H.—"Yes; the rent is a trifle high, isn't it?"—*Philadelphia Record.*

At Houlton, in the State of Maine, where many potatoes from the Maritime Provinces find a market, prices are at present ruling very low.

A shipment of California apricots, in bags of 60 to 70 lbs. each, arrived this week. They are of exceedingly good quality and ready sale at 11½c. per lb.

The total amount of evaporated apples imported into Great Britain in the year 1894 was 34,897 pkgs., against 16,428 pkgs. in 1893, and 36,081 pkgs. in 1892.

The St. Lawrence Refining Company is turning out a grade of unbranded granulated sugar at 3⅞ cents per pound, intended to meet the competition from the German article.

It is stated that at the recent London convention of the Ontario salt manufacturers, an ineffectual attempt was made to bring the C.P.R. salt well at Windsor into the association.

Monday, the 14th inst., was the date upon which an early closing grocers' law took effect in Quebec city and suburbs. The grocers' clerks formed in procession and marched through the city to see that the rule was everywhere observed.

Re-exports of foreign sugar, not above No. 16 Dutch standard, from this country during the eleven months ending November 30th, were 41,277,293 pounds. In the corresponding period last year 15,141,410 pounds were sent out.—*N. Y. Journal and Bulletin of Commerce.*

Granulated sugars are again lower. The "off grade" granulated, the advent of which we chronicled a week ago, is meeting with good request, especially from the city trade. Jobbers are now almost universally handling this grade, and prices have been reduced from 3⅞ to 3½c. per lb.

Large quantities of apples have been forwarded to the English market from Halifax during the past fortnight. The steamer "Mesario," carrying 11,000 barrels, and the "Halifax City" with some 13,000 barrels, sailed last week, while another cargo of 10,000 barrels is to go forward this week. Some 50,000 barrels yet remain for shipment.

The British schooner "Rimac," the last of the 1894 salmon fleet, sailed from Victoria on the 6th inst., for Liverpool, Eng. Her cargo is valued at $190,643, made up as follows: R. P. Rithet & Co., 10,971 cases, valued at $43,169; Findlay, Durham & Brodie, 5,673 cases, valued at $28,365; Robert Ward & Co, 4,760 cases, valued at $23,750; Anglo-B. C. Packing Company, 18,381 cases, valued at $186,430.

The shareholders of the Montreal Fruit Auction Company held their annual meeting on the 10th inst. The statement of the year as presented showed a surplus after paying the annual dividend of six per cent. The following are the officers for the ensuing year as elected: J. J. Vipond, president; J. R. Clogg, vice-president; Jos. Brown, Louis Sylvester, Geo. Vipond, of Vipond, McBride & Co., Irwin Harris, of McBride, Harris & Co., Owen Hart, of O. & E. Hart, directors; C. E. Thurston, secretary and manager; C. M. Hart, treasurer.

A correspondent writing from Florida to the London *Free Press* says concerning the damage caused by frost: "The loss of oranges is estimated to be in the neighborhood of 3,000,000 boxes. Thousands of the orange trees, now that it is getting warm again, are shedding their bark. The pineapple and vegetable plantations have been frozen to the ground as far south as the Straits of Florida. It is the opinion of prominent business men of the State that Florida will feel the effects of the freeze of 1894 for some years to come, for it has taken till now to recover from the freeze of 1886, when the mercury fell to 22° above zero."

The London *Grocer* of January 5th says: "Canadian and American cheese exhibit the same features as noticed for months past, and purchases are much restricted—fine quality at 49s. to 51s., and choice at 52s. to 53s. The estimated stock in London on the 1st inst. was 143,000 boxes, as compared with between 140,000 and 150,000 boxes at the same time in 1894; but it is regarded as a hopeful sign for the future that existing top quotations are 5s. per cwt. below those of last January. Some importations of New Zealand cheese of this season's make have been recently landed here, and at once taken off at 46s. to 56s. for lots in excellent condition. Liberal quantities, we understand, are coming forward, and the development of this branch of the cheese industry in the colonies is well deserving the attention of the trade at home."

The Butter and Cheese Association held its annual meeting in Montreal on the 14th inst., Mr. Wm. Nivin, president, in the chair. The president submitted the annual report of the business transacted by the association during the past year, which was unanimously adopted and approved of, and ordered to be printed and inserted in the annual

report of the Board of Trade The election of officers resulted as follows: President, Mr. William Nivin; vice-president, Mr. George Wait; treasurer, Mr. Frank Duckett; directors, Messrs. A. J. Brice, P. W. McLagan, D. A. McPherson, H. Hodgson; arbitration committee, Messrs. George Hodge, Arthur Hodgson, John McKergow, J. A. Vaillancourt and W. T. Ware; transportation committee, Messrs. A. A. Ayer, James Alexander, A. J. Brice, George Wait, Arthur Hodgson, D. A. McPherson, J. A. Vaillancourt, W. M. Campbell, W. T. Ware, J. C. Warrington. The cheese branding question was discussed, and the following committee was appointed to take charge of the matter and watch any legislation which might be proposed in reference to it: Messrs. Arthur Hodgson, John McKergow, D. A. McPherson, J. C Warrington and W. T. Ware. Mr. William Nivin, the president, was unanimously chosen to represent the association in the council of the Board of Trade.

LEATHER, BOOTS AND SHOES.

Some English leather buyers passed through the city on their way to Chicago this week. They report an improvement of late in the leather markets of Great Britain, and consider the outlook as encouraging.

Last winter, in speaking of the spring trade, designers predicted elaborate ornamentations, and their prophecy came true. The same tendency will be continued another season, and upon even a more extensive scale.

The rubber trade continues good with both retail and wholesale merchants. Manufacturers say that the season has been a good one for them. It is refreshing to find one branch of the footwear business who find their conditions satisfactory.

Our Montreal correspondent, writing on Wednesday, says that leather values are decidedly firmer, and "I have seen letters from several tanners saying that they must obtain an advanced price or stop tanning." This is precisely what they should do. Time and money enough have been lost by tanning without profit.

One of the features of next spring's footwear will be the varied designs of misses' shoes. There was a time—some years ago—when girls wore plain shoes, and the idea uppermost in the manufacturer's mind was to secure durability. But now, to sell, misses' shoes must be showy, and, to catch the fancy, as varied in style as the footwear of grown folk.

Word comes from Quebec that certain manufacturers have advanced prices on staple lines of shoes 5c. per pair. The report may not be well founded. but if at the moment untrue, it is only premature, for an advance is certain to come soon. Under the present conditions of the market there is no profit in trade for either the tanner, the manufacturer or the jobber.

Messrs. Sterling Bros., London, have recently had some little trouble with their shoemakers. The men were asked to accept a reduction in wages and went out on a strike. It is the intention of the proprietors of this factory to begin the manufacture of a low-priced shoe in order to withstand the competition of eastern shoe factories and cater to what is just now the all popular demand.

At the last regular weekly meeting of the Montreal Board of Trade, a petition, signed by 37 of the leading members of the trade in Montreal and 26 in Quebec, was received from prominent hide dealers, leather merchants and boot and shoe manufacturers, asking that the inspection of green hides be placed under one head. Some time ago the council addressed the Government on the subject, and they now ordered that copies of the petition be forwarded to the Government at Ottawa, as they thought there should be only one inspector for the district of Montreal.

A large number of horse hides were offered on the market this morning. The reason given is that it does not pay to feed the horses through the winter, when no work can be found for them. One man who worked a number of horses on the T., H. & B. Railway, sold seven of them this week for $2.50 a head—just the price of the hide.—*Hamilton Spectator*. Is it any wonder that tanners of harness leather find their market depressed? The trolley and the speedy bicycle appear to be superseding the horse, and it is difficult to imagine what the future of this noble animal will be should the course of inventive genius remain unchecked.

RETAILING DRY GOODS

Velvet has apparently good prospects for 1895.

In dress goods plain designs are to be all prevalent in next spring's trade.

Jobbers' stocks of staples for spring are now pretty well complete. Novelties will come down later in the season.

"You never accept any more of my jokes about lady shoppers who never buy," said Snickers to the editor

"No, I'm married now," was the satisfactory response.—*Detroit Free Press*.

Good spring shades on velvets: Turquoise, the Magenta shades, the new pink called *rose vif*, terra-cottas, emerald and bleuets.—*Economist*.

Good shades for velvet this spring are turquoise-blue and the reds of the Magenta family. Then follow the bluets, light greens and terra-cotta browns.

The De Joinville scarf is growing in popularity. It receives special attention from the trade in that it is called for by women who affect men's neckwear

At a meeting of the directors of the Cornwall Manufacturing Company, held on Saturday, 12th inst., Mr. Robert Meighen was elected managing director.

For the season of 1895 the double and treble draws on the backs of mocha and kid gloves will predominate extensively and more especially on the first grade of gloves.—*American Glover*.

The ready-made clothing, merchant tailoring and gentlemen's furnishing establishments of Woodstock, during January, February, March, July and August, will close their places of business at 6 o'clock p.m., except on Saturdays and the evenings before holidays.

The beginning of a new year finds many off shades in one's stock of dress goods. This year, says the *Economist*, affords ample opportunity of renovating that condition, since black fabrics will have so large a distribution. All colors which you think are doubtful for the coming season ought to at once be dyed black

A carding machine of unusual size and excellence has been added to the plant of the Peterboro' Woolen Mills Co. A special cylinder is attached to the machine for the purpose of detecting and removing all burrs and other foreign matter. Many of the farmers still prefer to have their own wool carded and returned to them to be spun by hand at home, and to them the new machine will give special value.

"When a person buys an imperfectly made article, a glove for instance, how much more satisfactory is it to have it returned at once to the shop," said a King street gentlemen's furnisher the other day. "It is but justice to the manufacturer and to the merchant. Many people, however, instead of pursuing this common sense course, become prejudiced against the retailer who sold the goods and the manufacturer whose name they bear, and are not slow in rehearsing their opinions to their friends."

At the monthly meeting of the Retail Dry Goods Merchants' Association, held in Montreal on Wednesday of last week, a resolution was passed protesting against the action of the Quebec Government and the attitude of the members representing the different divisions of Montreal in the legislature, with respect to the provincial tax. The resolution states that although promise was made that the tax would be reduced to three per cent. for the second year, and it was understood that it would be abrogated after the third year, still the Montreal members seem to be quite indifferent in the matter and to care little for the iuterests of the commercial class which includes their constituents. It was resolved to send a copy of this resolution to Mr. Taillon and to the Montreal members.

A HARD TIMES PROCEEDING.

There is much clamor against the Canadian Pacific Railway managers for their recent action in dismissing a number of their mechanics and a number of clerks in their Montreal and Toronto offices. When we recall the usual saying about corporations having no souls and caring nothing, therefore, about the effect of such dismissals upon the families of the sufferers, the hard things which are being said just now about the C.P.R. are not surprising. But it is possible that sweeping condemnation of the road for its action is unjust. It seems to us that the managers of this corporation have only done what any other business man would do under like circumstances. The gross earnings of the railway for the eleven months ended with November were $17,197,000, as compared with $19,328,000 in the same period in 1893, a decrease of $2,131,000. The net profits for the same period of 1894, as compared with 1893, show a decrease of $1,326,000 Expenses must be reduced, therefore. In the nature of things additional work is thrown upon the reduced staff. To say that the men who are responsible for depriving hundreds of men of their incomes in mid-winter care nothing for the privations to which those dismissed must be exposed, is to accuse the chief executive officers of a total lack of heart. We cannot believe that this is the case. Responsible officers of such corporations have to do some hard things in cases of the kind; but to say that they do them wantonly, and without a keen sense of the sorrow that will be caused by their action, is to aver that they are totally wanting in natural feeling.

INSURANCE ITEMS.

The prettiest thing of the kind that has reached our office this year is the calendar of the Provident Savings Life Assurance Society. It is one of John A. Lowell & Co.'s dainty pieces of engraving.

The Marine Underwriters' Association of Montreal met on Monday last to consider changes made necessary by the death of the president, Mr. John Popham. The result of the meeting was that Mr. Archibald Nicoll was chosen president, Mr. E. L. Bond, vice-president, and Mr. J. H. Routh, treasurer.

In their letter of thanks to the injured chief of the Toronto Fire Brigade, enclosing a cheque to be applied to the firemen's fund, Messrs. Wyld, Grasett & Darling say: "We are sure we only voice the desire of thousands of the taxpayers when we express the hope that the proper authorities may realize their duty fully, and provide forthwith, and before our city may be visited again in a similar manner, all proper and complete "up-to-date" appliances for the extinguishment of large fires."

On Saturday last the annual reunion of the superintendents of the Metropolitan Life Insurance Company was held at the home office of that company in New York city, and a grand banquet was given at Delmonico's by the company. Speeches were made by the officers and a large number of the superintendents. A very enjoyable time was passed, which will no doubt be fresh in the minds of all present for many years to come. The net increase in industrial business for the year 1894 was $71,000, and there was $14,000,000 business written in the old line.

Yachting rules don't go in court. When the "Valkyrie" was sunk last season, in collision with the "Satanita," due to a small boat being in the way of the latter's manœuvres, the "Satanita" was wholly responsible, according to the yacht club regulations. The underwriters of the "Valkyrie" thereupon sued for the total damages. But the court decided that while regulations among yachtsmen might be proper enough for the adjustment of questions connected with the race, they did not supersede the ordinary rules of law governing marine collisions.—*Monitor.*

When a man holds out his hand to another, in Toronto, and condoles with him on heavy loss by the recent fires, he is apt to be staggered when the other replies by pulling from his pocket a tablet on which is inscribed, "Yes, quite a fire." Yet this is what was done the other day, and the fellow who was offering condolence was taken all aback until he learned that the tablet so inscribed was a device of that inveterate Callaway of the C.P.R. If the hotels, stations and fleet of that road were burned, Cal. would somehow make capital out of it.

PATENT RECORD.

The following list of United States' patents granted to Canadian inventors, December 18th and 25th, is reported by James Sangster, Buffalo, N.Y.:

Thomas Belair, Montreal, Canada, cultivator.

George E. Edwards, assignor of one-fourth to W. Hartwell, Brantford, Canada, danger signal and lock for switches.

William Morrison, Toronto, Canada, water heater and cooler.

John F. Pharo, Danville, assignor to M. Boas, St. Hyacinthe, knitting machine.

William T. Vale, Toronto, Canada, and G. A. Ohl, Newark, N.J., assignors to Vale Barrel Machine Company (Ltd.), Hamilton, Canada, barrel-making machine

Andrew C. Davidson, St. Thomas, Canada, pneumatic tire for bicycles.

Francis Lousaw and T. E. Clarke, Bothwell, Canada, insect powder dusting machine.

Stanley C. Peuchen, assignor of one-half to P. Clarke, Toronto, Canada, apparatus for vaporizing petroleum or other liquids.

David G. Gross, assignor of one-half to J. R. Eden, Berlin, Canada, car coupling.

ANSWERS TO CORRESPONDENTS

John Horn, Montreal.—The series of articles on "The Telegraph in Canada" was begun in THE MONETARY TIMES of April 22nd, 1892, and were continued until the winter of 1893-94. We cannot undertake to furnish particular numbers between these dates. Your only plan would be to buy bound copies of yearly volumes 26 and 27 of the paper. We still have, as before, occasional references to the subject, but the papers, as a series, have ceased. Mr. Easson's old-time letters have since contained entertaining recollections of telegraphic construction and progress.

C. C. J., City.—Unable to say where the paper was originally published. We found the extract in an English journal and further condensed it. You might write to the association mentioned

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Jan. 17th, compared with those of the previous week:

Clearings.	Jan. 17.	Jan. 10.
Montreal	$12,005,559	$11,566,817
Toronto	6,301,271	7,894,426
Halifax	1,223,837	1,248,256
Winnipeg	1,005,862	1,110,573
Hamilton	621,832	810,548
Total	$21,158,361	$22,630,620

Aggregate balances this week, $3,432,635; last week, $4,180,940.

—A meeting of the Ontario Good Roads' Association is to be held in the Y.M.C.A. building, Toronto, on February 7th, afternoon and evening; February 8th, forenoon—three sessions in all. Addresses and papers are expected from a number of prominent men interested in the movement, besides officers of the association. Among these may be mentioned Lieutenant Governor Kirkpatrick, Hon. Thomas Ballantyne, Judge Woods, of Chatham; A. F. Wood, ex-M.P.P., and others. Delegates have been invited from the boards of trade, the municipal bodies and the various agricultural associations and societies of the province. There is no economical subject now before us that is of greater importance to the prosperity of Ontario than the improving of our country roads. The public spirit of the people should respond to the efforts of the association and the press to get something attempted, something done, to improve them.

—At noon on Tuesday last the United Fire Insurance Company, of Manchester, ceased to do business in Canada, and its risks, amounting to $17,268,994, according to the Government returns for the year 1893, have been reinsured in the Western. The United has been doing business in Canada about three years, having its head office in Montreal and agencies in each of the provinces of the Dominion. Should the Western continue to carry the risks it now accepts they will probably bring an annual increase of over $175,000 to its net premiums. Mr. Robertson, inspector of the United Fire, enters the services of the Western in a similar capacity, with his headquarters in Montreal. It will be remembered that the Palatine took over the business of the United Fire in England, and the latter company will be wound up.

—The report made by the chief of the Detroit Fire Department shows that the losses by fire in that city last year were $613,773, which is much less than the losses of 1893, when over a million ($1,075,092) went up in smoke and flame. There were 778 alarms of fire, 184 of which resulted in no loss. The big fires of the year were Hinchman's drug store, $120,000; Farrand & Williams' drug house, $110,000; the Keenan & Jahn fire, $82,000; the Richard mill, $28,000; and the Tenth st. depot, $23,000. Six firemen were killed during the year.

—The first railway train arrived at Louisburg, C.B., on Friday, 11th, from Sydney, with President Whitney, Manager Mackeen, of the Dom. Coal Co., Treasurer McLennan, Mr. Pearson, Senator McDonald and several others on board. Every available flag was hoisted, guns were fired, and the citizens cheered the officers of the company This marks a new epoch in the history of Louisburg

—A story published on Tuesday last in *La Minerve*, of a rumor in Liverpool of the sale of the Allan line steamers plying between that port and Canada to a Manchester firm, to be used in the cattle trade of that port, is denied by Mr. H. Montague Allan, who says: "There is not the slightest truth in the story. It is an entirely baseless rumor."

—Members of the Chicago Board of Trade, at their annual meeting on Monday last, expressed themselves with striking unanimity against the bucket shop evil and in favor of reform of the grain speculation department. President Baker's inaugural address contained a severe arraignment of what he called "the tyranny of the elevator monopoly," which brought forth loud cheers of approval.

—A despatch to Mr. Shaughnessy from the Pacific Division, C.P.R., says that while the melting of snow has raised all the small streams above usual height and the Fraser, Columbia and Thompson somewhat, no damage is done to the railway thereby, and that the loss to farmers is unimportant.

MONTREAL TELEGRAPH COMPANY.

The shareholders of the Montreal Telegraph Company held its annual meeting on the 10th inst., Mr. Andrew Allan, president, in the chair. The directors, in their annual report, presented the following statement for the year ending December 31, 1894:

ASSETS.

Telegraph lines		$1,625,890 00
Telegraph cables		33,487 39
Offices and equipment		212,500 00
Real estate in Montreal, Ottawa, Quebec and Toronto		279,946 46
Cash, other real estate, accounts receivable, etc		101,853 19
		$2,253,677 04

LIABILITIES

Shareholders' capital		$2,000,000 00
Dividend No. 122, payable 15th January, 1895		40,000 00
Unclaimed dividends, etc		1,794 75
		$2,041,794 75
Excess of assets over shareholders' capital		151,823 85
Contingent fund		60 058 44
		$2,253,677 04

It was added that the quarterly 8 per cent. per annum dividend from the rental paid by the Great North-Western Telegraph Company had been distributed. The death of Mr. Henry Yates, of Brantford, Ont., a member of the board, was duly noticed, with expressions of regret. The report was unanimously adopted.

A resolution of Mr. J. H. Joseph that three per cent. of the available assets of the Company be distributed among the shareholders, found no seconder and fell to the ground, but another motion by Mr. John Crawford, seconded by Mr. William Rae, that the directors take into consideration the wishes of some of the shareholders and report the result of their deliberations at the next annual meeting, was accepted by a vote of eleven to three.

The election of directors was then proceeded with and resulted as follows: Messrs. Andrew Allan, Hector Mackenzie, Jesse Joseph, William Wainwright, Henry Archbald, William Rae and William J. Withall. The only change is that Mr. William J. Withall takes the place of the late Mr. Henry Yates on the board.

At a subsequent meeting of the directors Mr. Andrew Allan was again chosen chairman of the board.

BANK OF NEW BRUNSWICK.

The following statement of the results of the business of the year has been sent to shareholders of the Bank of New Brunswick. We find it in a St. John paper.

Total profits on hand 30th December, 1893 (as per statement)		$556,098 60
Profits for the year 1894, after deducting charges of management and all expenses except taxes	$81,202 40	
Less taxes—		
Provincial $1,100 00		
City 7,125 00		
	8,225 00	
	72,977 40	
		$629,076 00
Dividends:		
6 per cent. on $500,000, June 30, 1894	$30,000 00	
6 per cent. on $500,000, Dec. 31, 1894	30,000 00	
	60,000 00	
Total profits on hand 31st Dec., 1894		$569,076 00
Amount of last dividend to 31st Dec., '94, payable 10th Jan., '95		30,000 00
Reserved profits after payment of dividend		569,076 00
Overdue debts, Dec. 31st, 1894 (all doubtful provided for)		2,038 06
Profits for the year 1893		78,387 88
Profits for the year 1894		72,977 40

Liabilities.

Capital stock		$ 500,000 00
Notes in circulation		441,578 00
Bills of exchange current		48,276 66
Balances due to other banks		56,182 16
Cash deposited, not bearing interest		570,152 38
Cash deposited, bearing interest, including interest to date		1,248,108 20
Rebate for unearned interest on bills discounted		25,000 00
Rest	$525,000 00	
Profit and loss	44,076 00	
Total profits on hand		569,076 00
		$3,428,373 40

Assets.

Dominion notes		$ 138,700 00
Specie		174,086 59
The bank circulation redemption fund		23,524 69
Notes and cheques of other banks		50,699 00
Balances due from other banks		438,829 61
Bills of exchange current		48,649 02
Loans and bills discounted		1,823,882 87
Bonds and stocks		700,881 62
Banking house		30,000 00
Other assets		4,120 00
		$3,428,373 40

With this statement the shareholders are receiving their half-yearly dividend cheques at the rate of twelve per cent. per annum.

MONTREAL REAL ESTATE MOVEMENT.

So far as can be gathered from statistics of land transfers, the year 1894 was the dullest in Montreal real estate business since 1888. The following figures are taken from a newspaper published in that city, called the *Indicator*, and devoted largely to such matters as sales of real estate and matters connected with building.

The total real estate transfers amounted, in 1894, to $9,200,000, those for the last five years being as follows:—

1889	$ 9,340,000
1890	10,756,000
1891	12,794,000
1892	12,906,000
1893	9,830,000
1894	9,200,000

By wards the transfers for December were:

St. Antoine	$ 89,478 00
St. Ann's	35,932 00
St. James	206,440 00
St Lawrence	26,350 00
St Louis	54,316 27
St. Mary's	31,727 95
St Jean Baptiste	24,380 00
St. Gabriel	46,157 60
St. Denis	26,973 13
Hochelaga	6,775 00
Mile End	8,050 00
Montreal Annex	12,850 71
St Cunegonde	61,922 54
St. Henri	40,874 40
Cote St Antoine	38,559 70
East	53,100 00
Montreal West	5,724 02
Cote Visitation	1,425 00
Turcot village	775 00
	$770,391 32

The total amounts loaned on realty for 1894 were $7,004,814, as against $8,628,313 in 1893. The prevailing rates of interest for December ranged from 5 to 7 per cent.

—It is announced, says the British Columbia *Courier Journal*, that Mr. R. P. Rithet, of Victoria, and other gentlemen, have purchased a beautiful Hawaiian plantation about twelve miles outside of Honolulu, which during favorable years has paid 40 to 50 per cent. on its capital stock, and is capable of still further development. In ten years it has paid half a million dollars in dividends to its stockholders.

—The annual meeting of the Canadian Press Association will be held at the Provincial Legislature buildings, in this city, on Thursday and Friday, January 31 and February 1. All Canadian journalists and ex-journalists are invited to be present, and the programme of the convention is such as will certainly attract a large attendance.

GRANBY RUBBERS

THEY WEAR LIKE IRON

MONTREAL MARKETS.

MONTREAL, Jan. 16th, 1895.

ASHES.—Business has ruled dull in potash, and the only outside sale for the week was a 5-barrel lot to the United States. Receipts since the first of the present year have been about 40 barrels. Values remain about the same, first quality pots being quoted at $4.10, seconds rather firmer at $3.75, pearls about $6.50 per cental.

CEMENTS AND FIREBRICKS.—There is little doing in the sale of cements. Quotations are $2.05 to 2.15 for English, while Belgian is $1.95 to $2. For firebricks there is moderate request, regular brands selling at a range from $17.50 to $22, and Glenboig $25.

DAIRY PRODUCTS.—Both butter and cheese have ruled very dull and quiet for several weeks past. There has, however, been some little revival of enquiry in the latter article, and holders are more cheerful, though no business of consequence has yet transpired. We quote fine Western 10 to 10¼c., Eastern 9⅜ to 9¾c. per lb. Beyond a moderate jobbing demand for local consumption, there is little doing in butter. Creamery is quoted at about 20c., Townships dairy 18 to 19c., Western 15 to 16c. Eggs are easier under somewhat plentiful supplies.

DRY GOODS.—Spring orders are beginning to come in rather more freely, and several leading houses express satisfaction with the amount of business being done, all things considered. A member of a prominent firm who has just returned from a three weeks' trip among their Lower Province customers, reports the trade in the maritime districts in a generally healthy shape. The Christmas and New Year's business was a good one down there, and he brings back quite a respectable block of orders.

Barley, "	19,930	12,252
Total grain.....	969,186	969,645

GROCERIES.—The general movement of merchandise towards the country has not yet reached any active phase, though some houses report a certain proportion of moderate orders. The revival of the interest in teas noted last week has been maintained, and there have been a good number of bids, resulting in some moderate sales of Japans to Toronto. Chicago and St. Paul houses are also improving their offers, and one round lot in transit from the Pacific Coast has been sold to St. Paul. A cable just received from London reports a very strong market for Indians and Ceylons, especially in the lower grades, from tenpence the pound down. Sugars are moving just moderately at about the former prices. Redpath's standard granulated is quoted at refinery at 3⅝ to 3¾c. per lb. The St. Lawrence Company are producing a grade of unbranded granulated at 3⅜c., designed specially to meet the competition from the German article. Yellows range from 2¾ to 3¼c. The Redpath refinery is still shut down. In other lines there is nothing special to note, except that there is some strengthening in molasses, probably due to the approach of Lent, when there is a large consumptive demand; holders are said to be asking 29 to 30c. per gal. in lots, and 31 to 32c. is quoted for single puncheons.

HIDES.—Continued scarceness of stock is reported, and the firm tone of late prevailing in this mardet is fully maintained. For No. 1 light green hides dealers are paying 4½ to 5c. per lb., with quotations to tanners at 5½ to 5¾c.; heavies, 5½ to 6½c. Lambskins are selling at 60 to 65c. each.

LEATHER.—A little more looking around by shoe men is reported, but principally among the smaller manufacturers. Some of the larger firms apparently anticipated the present firmness, and bought quite liberal supplies in some lines in the autumn. Values are decidedly firmer, and we have seen letters from several tanners, saying they must get an advance or stop tanning. Splits are scarce, and may be called 2c. advanced from lowest points; for good heavy boot split 15c. is now asked, for medium 16c., and fine light splits 18c. Buff and pebbled leathers are also stronger in tone. In sole the feeling tends the same way, and for No. 1 slaughter 20 to 21c. per lb. is now the quotation. Some fair shipments of Canadian tanned Spanish sole are still going forward to England.

METALS AND HARDWARE.—As yet there is not a great deal more business doing, though enquiries are more numerous. Montreal and western rolling mill men settled the base price of nails a week ago at $2.10, 5 cents less for car lots, but the lower province men are not in the combine, and we already hear that they are making offers here at cut rates. Bars remain at $1.60. Scotch warrants are cabled at 41s. 7d. Local prices for pig iron are about the same as before. Summerlee can be bought at $21 per ton, though one or two holders ask more. A close canvass of the market shows that in plates charcoal tins can be bought at $3.25 in fair lots; for cokes $2.85 is asked, but a lower bid would answer business. Canada plates are fairly steady at $2.05, though it is said the 8,000-box lot brought in just before the close of navigation is still almost intact. We quote: Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates — Blaina, or Garth, $2.05; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.25 to $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.80 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead; per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 17 to 17½c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3⅞ to 4c.; ⅝ in., ½c.; ¾ in., 3¼c., ⅞ in., and upwards

OILS, PAINTS AND GLASS.—Some very fair orders are coming in from travellers for forward delivery, but there is no immediate business of account doing, and in values there is absolutely nothing new to note We quote:—Turpentine, 43c. per gal. for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class

brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

WOOL.—Little notable improvement is apparent in this line yet, though some small orders are reported. There was a sale of 108 bales of damaged Cape wool held here last month, which attracted a fair audience. Prices realized were considered satisfactory, ranging from 9⅜ to 12½c. A part was bought for local consumption, and a local mill agent bought several fair parcels for western manufacturers. Prices are without change.

TORONTO MARKETS

TORONTO, Jan. 17th, 1895.

GRAIN.—The close of the week leaves wheat in a somewhat weaker position than it was seven days ago. Ontario deliveries are poor, or were, until the snow of thel ast few days. Latest reports from the country indicate more liberal offerings. Manitoba wheat is now in a somewhat peculiar position. As we have previously indicated, some parties have been attempting a "corner" upon Manitoba's famous cereal. They waited until the bulk of the crop had apparently gone forward to Europe, and then "cornered" what remained in the country. But as it happened, a quantity of the wheat sent forward in bond via American ports still remained in Buffalo. Grain men here were talking something like 80c. for Manitoba wheat. After looking around the Buffalo merchants concluded that Canada was their best market, and now offer to send the wheat back to this country. The question comes can this be done without a payment of duty to the Canadian Government, and upon the decision of our customs' officials this transaction depends. Barley is quiet. However, local brewers have been taking some stock, and small shipments have been made to the United States, but we do not learn of any round lots going forward by way of export. Oats are firm at 31 to 32c. The local jobbing trade is fairly brisk, while some of the mills are picking up heavy oats. The market is dull in reference to peas. The export trade has apparently ceased. Prices have declined in London, and parties who bought for export are storing in Port Hope and Montreal. The quality is not so good as that of last year, but is believed to be better than Russian grain, which is our strong competitor in England.

THE VISIBLE SUPPLY

A comparative statement of the visible supply of grain in Canada and the United States for the week ended Jan. 12, 1895, and for the corresponding week of 1894, has been prepared by the secretary of the New York Produce Exchange

	Jan. 12, '95. Bush.	Jan 15 '94 Bush.
Wheat	86,615,000	80,434,000
Corn	11,093,000	11,310,000
Oats	8,663,000	3,973,000
Barley	2,624,000	590,000
Rye	477,000	261,000

TORONTO STOCKS OF GRAIN.

The following table shows the stocks of grain in store at Toronto on Monday morning, Jan. 14, and corresponding date last year

	Jan. 14, 1895.	Jan 15, 1894.
Fall wheat, bushels	24,600	99,031
Red wheat, "	nil	nil
Spring wheat, "	3,619	14,107
Hard wheat, "	57,400	28,972
Goose wheat, "	nil	1,523
Oats, "	15,932	33,732
Barley, "	41,702	55,279
Peas, "	713	6,666
Corn, "	1,161	nil
Rye, "	nil	nil
Buckwheat, "	7,700	nil
Total bushels	152,827	239,310

The stocks of grain in store at Port Arthur on Jan. 5th were 597,947 bushels. During the week there were received 284,021 bushels, and shipped 600 bushels, leaving in store on Jan. 12th, 625,749.

GROCERIES.—While January is never a brisk month, the low price at which some staples are selling is bringing out a demand from the retail trade. The movement in dried fruit after the holiday trade is naturally somewhat limited. The raisin market is well supplied with off stock, quoted at 3⅞ to 4½c. Some nice California apricots are offering in bags of 60 to 70 lbs. each, at 11½c.; they are of fine quality and good value. Granulated sugars are again easier. An increased number of jobbers are handling the "off grade" sugar, the advent of which we chronicled last week. They felt somewhat diffident about handling it, but were compelled to by the retail trade. In the cities it meets with the best enquiry. Teas are firmer abroad, and reports concerning low grades more especially indicate higher prices. Some of the local jobbing houses have increased their selling price 3c per lb. Japans and Congous are firm, with the market hardening. Fish are moving freely. Canned goods are unchanged, although from this time forward the consumptive demand may be expected to improve.

HIDES AND SKINS.—No change has taken place in the hide market since our last report, and this must be regarded as an element of strength, for the quality of offerings is deteriorating with an advancing season, and an unchanged price means a higher price. The tanners are not realizing the higher prices they so confidently expected in December. However, the situation in both tanning and manufacturing circles undoubtedly shows improvement. Some English buyers who passed through the city on

their way to Chicago report the English market firmer and trade prospects brighter. We have previously shown that the country is full of sheepskins, and dealers considered the supply such that no change in price was made in the middle of the present month. Tallow is weak and dull, prices nominally unaltered.

METALS AND HARDWARE.—While the immediate trade doing is strictly seasonable and thus of a limited character, the situation is regarded as more hopeful than it was a year ago. In the first place we have not to face the uncertainty of tariff reduction, while last January this was the all absorbing feature of interest. During the year many reductions have from time to time been made in price, until values are now on a basis which every retailer recognizes as exceedingly low. Any change in the price list must apparently be of an upward character, and in view of this merchants are disposed to order more freely in advance of their requirements. On the whole it may be said that orders booked for spring supply are, in both hardware and tinware lines, considered satisfactory. Cut nails are higher in price as a result of the action of the association, and prices are now on a $2.10 basis f.o.b. Montreal, Toronto, Hamilton and London, or 35c. higher than the previous quotation. Horse shoes have been reduced 5c. per keg, and we quote Montreal $3.50; Toronto, $3.60; London, $3.65. In wire nails the association has made no change, with the exception of reducing the discount allowed on 1 lb. paper pkgs. by 5 per cent. Barb wire in plain twist and staple lines, since the 14th inst., has been offering at 3c. per pound. Terms remain as before, viz., freight allowed to a maximum of 25c. per 100 lbs. Sisal rope has been reduced to a 6½c. basis. Manilla, however, remains unchanged. All the different brands of horseshoe nails are now sold at the same discount, viz., 60 per cent. An association of steel-clad bath manufacturers has been formed, and the discount is now 20 per cent., with an extra 5 per cent. allowed on orders of one dozen or more. Import orders are being booked for galvanized and tinned iron, while a large number of orders for tin plate to be delivered in May are being placed. Window glass is also being ordered for June delivery.

PROVISIONS.—Each week we have to report increasing depression in the butter trade, and must continue to do so until some change is made in the present system of the production and distribution of this commodity. We elsewhere at length describe market conditions Cheese is quiet and unchanged; the demand is slow and of a strictly retail character. Receipts of dressed hogs on the local market are large and prices correspondingly easy; quotations stand at $5 to 5.10. The feeling in hog products is weak all around, although quotations have not undergone change. In eggs, strictly fresh are bringing 16 to 17c.; pickled, 12c.,; held stock, 8 to 10c. per doz. There is but little enquiry for held stock as there is great uncertainty as to quality. Dried and evaporated apples are unchanged from last week.

WOOL.—The market presents no features of an absorbing interest at this season of the year. There yet lingers some movement in fleece, but stocks in the hands of Canadian merchants are small and every week lessens the quantity. Some pulled combing has been sent to the United States this week at 19c.; shipments of the same quality were made a week ago, at 18½c. American merchants continue to send samples of fine clothing wools here, and doubtless pick up a fair amount of trade throughout the country.

LIVERPOOL TIMBER MARKET

We received, too late for publication last week, Farnworth & Jardine's wood circular, dated Liverpool, 1st January. Happily it shows a reduction in the arrivals of timber and lumber from British North America during December, in which month they were 11 vessels, 9,241 tons, against 22 vessels, 21,166 tons, during th corresponding month last year. But the aggregate

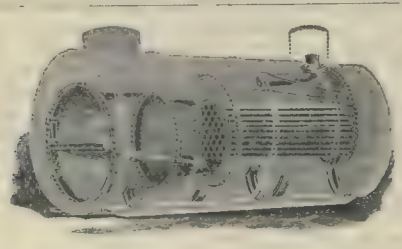
DYNAMOS AND MOTORS

MONTREAL ELECTRIC CO., Agts. for Province Quebec, 302 St. James St., Montreal



The "Monarch Economic" Boiler

No Brickwork,
Furnace Surrounded by Water.
NO HEAT WASTED.
No Cold Air Leaks into Furnace.
Water Circulates Rapidly.
Large Effective Heating Surface.
SAVES FUEL.

ROBB ENGINEERING CO., Ltd
AMHERST, N.S.

ELECTRIC WATER WHEEL GOVERNOR

(PATENTED)

Variations in speed detected by fast running, sensitive Governor Balls. Gate movement instantly set in operation by electric current. Quick and powerful action.
Thirty days trial.
Write for particulars.

tonnage from all places during the years 1892, 1893 and 1894 has been 436,723, 410,389 and 448,874 tons respectively, so that last year's arrivals were greater than the preceding. Business on January 1st was quiet. Stocks are quite ample, in some articles too heavy. There is no improvement to report in values, which, generally, are unsatisfactory. We quote:

CANADIAN WOODS.—There has been no import of waney and square pine, the shipments from the St. Lawrence having now closed for the year; the deliveries have been small, and the stock is sufficient; there is no change in value to report. Red pine is seldom enquired for, and prices rule low. Oak has not been imported; the demand has been very limited, and the stock is too heavy; values are unchanged. *Ash*—The arrivals have been entirely from the United States ports and have chiefly gone direct into consumption; there is no change in value to report and the stock is sufficient. Elm has not been imported; there has been a fair enquiry and the stock is moderate. Pine deals have been imported in excess of the corresponding month during the past two years; however there has been a fair enquiry, and the deliveries show an improvement; the stock still held over, however, is too large; there is little change in value to report, although a firmer tone.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—Of spruce deals the import has been 2,740 standards, as against 7,744 standards and 1,506 standards the corresponding months in 1893 and 1892 respectively; the deliveries have been fair, viz., 5,020 standards, against 7,301 standards and 2,286 standards same months in 1893 and 1892 respectively; the stock, however, is much too heavy, viz., 19,002 standards, against 18,332 standards and 15,148 standards the same time in 1893 and 1892 respectively; there is little change in values to report, although latest sales show a slight decline. *Pine Deals*—There is no change in values to report.

BIRCH.—Of logs there has been no import, but there has been more enquiry, and the deliveries have been satisfactory; the stock, although sufficient, is now in a more moderate compass, and prices are rather firmer. Planks are still too heavy in stock, and the demand is unsatisfactory; prices still rule exceedingly low.

UNITED STATES OAK.—Of logs there has been no import; the stock is still too heavy and prices rule low; of planks the import continues moderate; the demand, however, has not been very satisfactory, and the stock is still too heavy. For first-class planks prices are steady, with a slightly upward tendency; inferior planks are as dull of sale as ever.

PITCH PINE.—The arrivals during the past month have been 2 vessels, 1,998 tons, against 1 vessel, 770 tons, during the like time last year. Hewn wood has moved away slowly, and whilst no improvement in value has taken place, the feeling is somewhat better, and stocks are reduced to a moderate compass. Sawn wood continues very depressed in value, the deliveries have been on a small scale, stocks are very excessive, and sales on contract most difficult to make. Planks and boards have moved off to a fair extent, and whilst the stock is ample, an increasing business is being done in this branch of the article.

SEQUOIA (CALIFORNIA REDWOOD).—One cargo on contract has arrived which is going away fairly well from the ship's side, the importers having sold all they could to arrive; yarded stocks are, however, still heavy and prices rule low.

BRITISH COLUMBIAN AND OREGON PINE.—There have been no arrivals, the demand continues limited, and stocks are ample.

UNITED STATES STAVES.—Imports continue on a free scale, and stocks are heavy; however, there is rather more enquiry and prices are steady.

BALTIC AND EUROPEAN WOODS.—The arrivals during the past month have been 14 vessels, 7,049 tons, against 9 vessels, 5,399 tons, during the like time last year. Of fir timber there have been no arrivals, the deliveries quite nominal, and stocks sufficient, though by no means heavy. Red and white deals have been unusually quiet, the import nominal, consumption small, and stocks in dealer's hands are fully heavy. Flooring boards have arrived freely on contract, the deliveries have also been on a large scale; prices are steady, and stocks by no means excessive. *Masts and Spars*—Imports have consisted of common qualities for mining purposes, which usually go direct into consumers' hands from ship's side.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A TIDY INSURANCE BUSINESS.

Four thousand millions of dollars is the aggregate of fire insurance placed on property in the metropolitan district of London, England, during 1893. This great total of risks was distributed among sixty-two companies, one of which was American and two or three continental. The *Post Magazine* gives a list of these, with the relatives amounts appended. Its figures, totalling £838,963,000, are translated into dollars in the list which follows:

Phœnix Assurance Co. of London	$420,847,085
Sun	417,543,825
Law	295,585,190
County	279,829,415
Royal	274,312,065
Liverpool & London & Globe	202,418,750
North British & Mercantile	191,690,855
Royal Exchange	161,053,545
Alliance	154,056,285
Commercial Union	143,159,615
Westminster	143,134,670
Union	140,386,045
Imperial	134,110,650
London Assurance	118,671,275
Guardian	117,257,300
Hand-in-Hand	117,135,000
London & Lancashire	106,786,375
Norwich Union	92,796,730
Atlas	88,099,545
Northern	78,886,305
Law Union & Crown	76,688,430
Manchester	66,250,000
Palatine	46,106,475
Scottish Union & National	36,609,220
Lancashire	36,443,000
British Law	32,168,225
West of England	27,332,470
Kent	26,518,715
Underwriters at Lloyds	23,838,545
Caledonian	21,389,260
Hong Kong	19,140,250
Equitable Fire	18,542,355
Yorkshire	18,321,270
Economic	16,032,750
Lion	10,487,795
Fine Art	8,193,925
Ecclesiastical Buildings	8,130,585
Patriotic	4,605,250
Scottish Alliance	3,800,000
State Fire	3,013,475
National of Ireland	2,223,840
Straits	2,195,000
Madgeburg	1,900,000
Co-operative	1,777,230
Commercial Fire of Scotland	1,248,905
Insurance Co. of N. America	1,224,765
Sixteen other offices	2,786,775
Total	$4,194,819,535

We remark upon this list that the British companies doing business in Canada have underwritten fully half the total. The Phœnix and the Sun have each written about one-tenth of the whole; the Law and the County about 7 per cent. each; the Royal, 6 per cent.; the Liverpool and London, and the North British and Mercantile, between 4 and 5 per cent. each, and so on. Among the companies having less than a million each at risk in this district in that year are the Wesleyan Methodist Trust, $500,000; the Primitive Methodist, $363,000; the Congregational, the Welsh Calvinistic—and cheek by jowl with these the Brewers and General, the Oldham Tradesmen and L'Union des Proprietaires. Appropriately we find in the list an "Economic" company and a "Salamander," an "Esperance" and a Hand-in-Hand, while the underwriters at Lloyds are down for something like five millions sterling.

THE WEALTH OF THE WORLD.

The publication by the Census Office of the true valuation of property in the United States affords the basis for some interesting comparisons of the relative progress and wealth of the United States and the leading European countries. The figures for the United States by States have already been published in the *Journal of Commerce and Commercial Bulletin*, and it is only necessary to give the summary of the figures for purposes of aggregate comparison. The classification of wealth, according to the census bulletin, is as follows: Real estate, with improvements thereon, $39,544,544,333; live stock on farms, farm implements and machinery, $2,703,015,040; mines and quarries, including product on hand, $1,291,291,579; gold and silver, coin and bullion, $1,158,774,948; machinery of mills and product on hand, raw and manufactured, $3,058,593,441; railroads and equipments, including street railways, $8,685,407,323; telegraphs, telephones, shipping and canals, $701,755,712; miscellaneous, $7,893,708,821. The aggregate of these items is $65,037,091,197, or $1,036 per capita for the entire population of the United States in 1890, against $43,642,000,000, or $870 per capita, in 1880, for the population then existing. The value returned for 1890 includes $941,031,378 of vacant national lands and Indian reservations, not embraced in the figures for 1880. The figures for the earlier date were not reported separately for different classes of property, and the distribution by States and for the entire country covers the location of the property without regard to the question whether it is owned within the State or within the United States or outside their limits.

Turning to the question of the gross holdings of property in Great Britain and France, a summary of some of the latest calculations is given in the recent work of Professor Claudio Jannet of the Catholic Institute of Paris, "Le Capital la Speculation et la Finance," based upon the work of M. de Foville, "La France Economique," and the work of Robert Giffen on "The Growth of Capital." Professor Jannet's summary is as follows:

M. de Foville values at about 70 milliards the figure of the negotiable securities of all sorts owned by Frenchmen, against 80 milliards credited to land, 40 milliards to built property, and 10 milliards for movables properly so-called and tools of trade not represented by stocks and securities. Mr. Robert Giffen, at the same epoch, valued the capital owned by Englishmen as follows: Land, 42 milliards of francs; built property, 48 milliards; industrial, national and foreign securities, as well as foreign public funds, 115 milliards; finally, movables and implements not included in these calculations, from 20 to 25 milliards.

The aggregate of these figures gives in round numbers a valuation of $40,000,000,000 for property in France and $50,000,000,000 for property in Great Britain. There is probably little doubt that nearly all this property is absolutely owned in these two countries, while in the case of the United States a deduction would have to be made for property located there but held abroad. The deduction of $1,000,000,000 on this account and the elimination of a part of the high appraisement put upon vacant national lands would carry the aggregate wealth owned in the United States down to about $63,248,472,500, and the per capita wealth of the three countries, according to the latest returns at hand, would then figure out as follows:

		Valuation		
Country.	Population.	Total.	Per capita.	Per family.
U. States	62,622,250	$63,248,472,500	$1,010	$5,050
Gt. Britain	37,482,415	50,000,000,000	1,338	6,690
France	37,000,000	40,000,000,000	1,081	5,405

The census figures for the United States are so made up as to include nothing for negotiable securities, as in the case of Great Britain and France, but the property capitalized in such securities is fully accounted for in the returns of railways, telegraph lines, mines and factories. The figures seem to include, moreover, a considerable item for products on hand, which is not separately stated in the figures for Great Britain and France. It would seem, if the theory of John Stuart Mill, which is now generally accepted, of the renewal and fluidity of wealth year by year, is correct, that this item should be much larger than reported, and should cover the great accumulations of manufactured stocks, as well as agricultural products, in existence at the taking of the census on a given date. The fact that the item is not large for the United States, and is not specifically covered for other countries, serves to make the comparison reasonably fair, whether the figures are comprehensive or not. Probably a portion of the capital invested in such fluid wealth is covered in the case of Great Britain and France by the negotiable securities representing industrial corporations and syndicates.

The fact that a considerable proportion of the property of the United States is owned abroad is indicated by the great excess of exports over imports shown by our statistics. This balance amounted in the fifteen years ending June 30, 1894, according to some computations made by Mr. Franklin W. Lantz of the Treasury Department, to $1,559,872,627 in merchandise and silver, while the balance in favor of the United States in importations of gold was a paltry $4,313,090. This average of about $100,000,000 per year in excess of exports, in spite of large possibilities of error in the figures, probably indicates in a measure the interest charges on borrowed foreign capital which the United States are compelled to pay. If the figures are correct, they would represent, on the basis of interest at five per cent., a capitalization of $2,000,000,000. Mr. Giffen made the much higher estimate in 1880 that the foreign capital invested in the United States was $5,000,000,000, and this might easily have been the case in view of the fact that the value of imports in official returns appears to be usually quoted higher than that of exports. An allowance for this variation would swell the reported amount which the United States are paying in exports in excess of the true value of their imports for the use of foreign capital. The figures of British foreign commerce bear out in a striking manner the theory that Great Britain is the creditor nation of the world, for they show an excess of imports which has not been less in any year during the past fifteen years than 137,000,000 pounds sterling, and in 1892 was 196,000,000 pounds. Mr. Robert Giffen estimated at about $440,000,000 the interest earned on foreign and colonial investments in 1885 by securities held in Great Britain, representing a capital of about $8,000,000,000. This represents an increase of about $150,000,000 per year between 1875 and 1885, in spite of heavy losses in South American investments within that time. The foreign stocks held in France are estimated by Prof. Paul Leroy-Beaulieu and M. Alfred Neymarck at $4,000,000,000, of which $1,300,000,000 are estimated by the latter to be in Italian securities, $14,500,000 in English stocks and $21,500,000 in German. M. A. Raffalovich makes the high estimate that French placements in Spain exceed $500,000,000, if they do not reach $600,000,000.

The comparisons given are unfavorable to Great Britain and France, because the estimates were made for the most part at an earlier date than the United States census of 1890. The rapid growth of wealth in real value, if not in denominations of money, has probably been as rapid in the European countries as in the United States, so that a considerable increment of increase should be added to the figures for Great Britain to bring them down to 1890. The statistics of earnings by manufacturing employes in the United States show a very marked advance between 1880 and 1890, if the census statistics for both years are fairly computed upon the same basis. The earnings per employe in 1880 were only $346.32 per year, distributed among 2,732,595 employes, while they were $484.5 per year in 1890, distributed among 4,712,622 employes. These earnings cannot be compared with per capita earnings of an entire community according to population, because they represent the earnings of persons actually employed in manufacturing industries, and do not include women and children not actually employed. Probably an approximate estimate of the earning of a family would represent double the earnings per employe in manufacturing establishments. The aggregate earnings of the people of several leading countries, with the earnings per capita and per family of five, based upon late authorities, are shown in the following table:—

			Income	
Country.	Total income.	Population.	Per cap.	Per fam.
United States	$8,453,970,000	62,622,000	$135	$675
Great Britain	6,200,000,000	36,000,000	172	[illegible]
Prussia	2,400,000,000	29,087,000	80	400
France	4,000,000,000	37,321,000	107	535

—Washington correspondent N.Y. Journal of Commerce and Coumercial Bulletin.

A STUDY IN ANATOMY.

One of our officers, whose business chiefly lies in connection with our general indexes of policies—those books which contain the names of our tens of thousands of members spread all over Australasia—has handed us a list of names of members which struck him as peculiar. They are not peculiar in themselves, but certainly the connection is somewhat singular, as our readers will see. We have a Body and a Soul. Having the former we have a Head, Scull, Brain, Hair, Face, Eyes, Temple, Chin, Tooth, Pallett, Tongue and Cheek! We have Blood and also Veins. We have a Frame with Bones, Joynts, Arms, Hands, Palmes, Fingers, Leggs, Knees, and at least one Foot with Toe, Heal and Sole. We of course have a Hart and we have a Back, and with all these it is not surprising that we have both Height and Weight. Being a life assurance office we look for Death amongst us, and lo! it is there!—*Mutual Provident Messenger.*

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE

ONE FULL YEAR'S PROFIT.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.
Toronto Office—33 Adelaide St. E.
F. G. COPE, Cashier. W. T. McINTYRE, Manager.

Subscribed Capital - - - -	$25,000,000
Paid-up and Invested - - -	2,750,000
Total Funds - - - - - - -	17,500,000

Established 1824

ALLIANCE ASSURANCE CO'Y

Head Office: Bartholomew Lane, LONDON, Eng.

Branch Office in Canada 157 ST. JAMES ST., MONTREAL.

Rt. Hon. LORD ROTHSCHILD, CHAIRMAN.
ROBERT LEWIS, Esq., CHIEF SECRETARY.

G. H. McHENRY, Mgr. for Canada.
GEO. McMURRICH, Agt. Toronto & Vicinity.

N. B.—This company having re-insured the Canadian business of the Royal Canadian Insurance Company, assumes all liability under existing policies of that company as at the 1st of March, 1892.

THE TEMPERANCE AND GENERAL

LIFE ASSURANCE COMPANY OF NORTH AMERICA

Gains in 4 Years: Head Office, Manning Arcade, Toronto

Dec 31st.	Number of Lives	Amt. of Insurance	Assets not including Capital
1889	1,957	$3,040,972	$ 54,587.74
1893	4,148	5,269,620	238,422.33
Gains . . .	2,191	$2,228,648	$183,834.59

GAINS in '94 much more satisfactory for first six months than in any corresponding period. Money to Loan on easy Terms. Agents wanted.

HON. G. W. ROSS, President. H. SUTHERLAND, Manager.

ÆTNA

Life Insurance Company

Of HARTFORD, Conn.

Cash Capital, all paid-up, $1,250,000 00
Accumulated Assets, $40,267,952 90
Deposit at Ottawa, $3,541,617 00

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

DECISIONS IN COMMERCIAL LAW.

SCHILLINGER v. UNITED STATES.—Government is not liable for unauthorized wrongs inflicted by its officers on the citizen, though occurring while engaged in the discharge of official duties. When a contractor, in the execution of his contract, uses any patented tool, machine or process, and the Government accepts the work done under such contract, it cannot be said to have appropriated and be in possession of any property of the patentee in such a sense that the patentee may waive tort and sue as on an implied promise. This is a judgment of the United States Supreme Court.

WARREN v. KEEP.—According to the Supreme Court of the United States, where a patent is for a particular part of a machine, the profits recovered must be due to the particular invention secured by the patent in suit. Where a patent of invention is sold separately the patentee is entitled to damages arising from the manufacture and sale of the entire article. The rule requiring that the profits arising from the patent features must be separated from those arising from the unpatented features, has little application in a case where every feature is patented.

GARFIELD v. CITY OF TORONTO.—In June, 1892, an excessively heavy rain fell in Toronto, in consequence of which the sewers of the city became overcharged and backed up their contents into the cellars of several houses and stores, doing considerable damage. This was an action brought against the corporation for damages for negligence whereby the plaintiff's premises, on Queen street west, were flooded by means of the defendant's sewers being so overcharged. The city pleaded, "act of God," in that the rain storm was so excessive as to be beyond what they were called upon to provide for, and the Court of Appeal has given effect to this contention, thereby relieving the city of Toronto from liability for damages under the circumstances.

BARNES v. DOMINION GRANGE MUTUAL INSURANCE ASSOCIATION.—The plaintiff's testator applied to the defendants in writing for an insurance against loss by fire, and undertook in writing to hold himself liable to pay to the defendants such amounts as might be required, not to exceed $46.50, and signed a promissory note in favor of the defendants for $15.25. The defendant's agent gave him a written provisional receipt for his undertaking for $46.50, "being the premium for an insurance," etc. The receipt contained a condition to the effect that unless the insured received a policy within fifty days, with or without a written notice of cancellation, the insurance and all liability of the defendants should absolutely be determined No policy was sent within the time limited, nor was any notice of cancellation given within that time, nor until, by letter, two days before a fire occurred on the insured premises. Held by the Court of Appeal, that the application, undertaking note, and receipt, constituted a contract of fire insurance within the provisions of the Insurance Act, which could be terminated only in the manner prescribed by the 19th of the conditions set forth in sec. 114, that is, when by post, by giving seven days' notice, and thus the contract was still subsisting at the time of the fire

CLARKSON v. McMASTER & CO.—The defendants had obtained a chattel mortgage in this case from one of their clients covering stock-in-trade, but did not register it. Subsequently the client made an assignment to E. R. C. Clarkson for the benefit of creditors, and other creditors commenced actions on behalf of themselves and other creditors, against the clients, to recover debts due them as simple contract creditors. Before the assignment and before the suit brought by the simple contract creditors, McMaster & Co. took possession of the goods under their unregistered chattel mortgage and sold them, whereupon Clarkson, after an assignment of the same goods to him as assignee for creditors, brought action for direction that McMaster & Co. should account to him for the proceeds of the goods so sold, and Judge McMahon directed them so to account. An appeal was taken to the Court of Appeal, where the question of the validity of the unregistered chattel mortgage came up. In 1892 the local legislature endeavored to extend the rights of assignees in insolvency, and creditors sueing on behalf of themselves and other creditors, so as to exclude the right of a chattel mortgagee under an unregistered mortgage to cure the defect of want of registration by taking possession, but according to the Court of Appeal the legislature has not done so effectually Their judgment, just delivered, is to the effect that McMaster & Co.'s mortgage was validated by the taking of possession before the assignment to the plaintiff Clarkson, and before the action brought by the other plaintiffs as simple contract creditors sueing on behalf of themselves and other creditors. The difficulties that always arise where unregistered mortgages crop up in this way, do not seem to have been yet removed.

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE Paris Octroi duties produced last year the sum of 149,692,537 francs, equal to say $29,800,000, which was 885,000 francs less than in 1893. The principal receipts were from drinks, 66 million francs; provisions, 31 millions; fire and light, 13 millions; liquids other than drinks, 17 millions, the other items bearing these municipal dues being materials, forage and timber.

IN the January issue of *Shipping*, published in London and Liverpool, is a picture of Mr. James Huddart, of Huddart, Parker & Co., and Mr. W. Becket Hill, of the Allan and Wilson-Hill lines. They are represented as boys in bibs riding the Canadian mail cart. One is sucking at a "subsidy" bottle, the other blowing upon a penny trumpet, and the legend underneath the cartoon is "The Heavenly Twins."

FROM the Lower Provinces we receive word of the following late failures: At Fredericton, J. W. Tabor has done a fair sized grocery business for some time. Several years ago he claimed to have made a serious loss by a clerk, and he has since shown a good many signs of financial distress. He has now assigned owing some $8,000, and assets are stated at about $3,000.——H. F. Staples, of the same town, who began a confectionery and fruit business last spring, is reported failed.——Kinnear Bros., two young men of small means, started a gents' furnishings business in St. John, just about a year ago. Already the assignee is in possession.——T. H. Hall, the St. John stationer, reported failed a few weeks ago, is offering 20 cents on the dollar, payable in quarterly instalments over twelve months. He owes $24,264, and has apparent assets $14,686 in stock and accounts.——L. McLean, tailor, Montague, P.E.I., is compromising at 60 cents on the dollar, at 6, 9 and 12 months Liabilities are $2,807.

THE Province of Quebec furnishes the following list of country failures for the week: A. T. Lafreniere, general dealer at Louiseville, who assigned several weeks ago, is arranging to pay 25 per cent. on liabilities of $2,500.——A. Plumley LeBarron, a very respectable blacksmith at North Hatley, evidently believes that "variety" is the spice of life," as he has been running a hotel for summer boarders, a livery stable, and a small pleasure steamer on Lake Massawippi, working at his forge when other lines were quiet. His hotel venture, however, was too big for his means, and he finds himself embarrassed. He proposes paying creditors 35 cents in the dollar, with the assistance of a brother; liabilities are $4,500.——E. Bourgoin, general merchant, St. Flavie, who failed in 1887, resuming thereafter in his wife's name, has been again asked to assign.——Desparais & Frere began a small shoe business in Valleyfield only last August, and have already failed.——The liabilities of Joseph Lalonde, dry goods, of the same town, whose failure we noted last week, are about $18,000.——A demand of assignment has been made upon David Levi & Co., dry goods, St. Johns. He was formerly of Levi Bros., who failed about 1891. That business was continued by his brother Raphael Levi, who compromised the liabilities at 60 cents in the dollar, and David shortly afterwards resumed business in his wife's name. The obligations in the present case are about $8,000, and the estate will be a poor one.——J. A. McHardy, lumber, has assigned. Some years ago he was in the same business at Drummondville and failed there.——O. Delisle, a general dealer at St. Casimir, is reported to have compromised at 50 cents cash.——The estate of P. Therrien, jr., & Co., St. Antoine L'Abbe, whose failure we noted last week, is such a poor one that the assignee would not undertake the liquidation.——Godfroy Tremblay, prominently in business as a miller and merchant at Ancienne Lorette, is seeking a settlement at 50 cents in the dollar.——Laurin & Peloquin, dry goods, Sorel, have assigned. The business was started by J. A. Laurin alone, who failed in 1893, the stock being bought in by the present firm.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

THE land to be used for the Michigan Central Railway extension in Amherstburg has been purchased.

THE total value of the imports into Great Britain during the year 1894 was £408,505,718, and of the exports £216,194,239 This shows an increase in the value of imports of £3,817,540 and a decrease in value of exports of £1,900,626, as compared with those of 1893.

THE quarterly return by the United States consul of exports from the consular district of Victoria to the United States during the quarter ending December 31, is as follows: Gold bullion, $109,351.99; furs, hides and skins, $25,828.70, liquors, $4,096.33, wool, $9.520, fish, fresh, $574.64; rice, $1,594.80; opium, $392.70; Indian curios, $352.50; bananas, $117; oat bran, $89.10; stone, $236.96; miscellaneous, $45.85, making a sum total of $152,200.57.

IN Montreal, on Saturday evening last, Mr. A. L. de Martigny, manager and cashier of the Jacques Cartier bank, was pleasantly surprised when the members of the bank staff presented him with a beautiful and costly onyx vase. The occasion of the presentation was the departure of Mr. de Martigny on a business trip to Europe. An engrossed address was made by Mr Bienvenu, the assistant manager, to which Mr de Martigny made a suitable response.

A DESCRIPTION is given of a craft now at work on the Thames, the steel screw tug "Cleveland," said to be one of the most powerful craft on the river. We give some of her dimensions so that our readers may compare her capacity with those of St. Lawrence river tugs or those which do towing between Lakes Erie and Huron Built of steel throughout, she is 92 ft over all 17 ft. 9 in. beam; 10 ft. 5 in. molded depth 500 horse power; classed 100 A1 at Lloyd's, and fitted with all modern appliances

THOSE who have seen a steamboat 400 feet in length may not be prepared for the advent of boats of that size on the great lakes. But a contract has been placed with the Chicago Ship Building Company for a boat 400 feet long by the Interlake Company. The dimensions of the new steamer are—Length over all, 400 feet; on keel, 380 feet; beam, 48 feet; molded depth, 28 feet. The ship will have a water bottom 5½ feet in depth, and carry about 4,200 tons on a 14½ foot draft. The estimated cost of the new boat is given at $225,000, and she is expected to be ready for launching on July 1st, 1895

Two groceries and a private dwelling in Sorel, Que., have within a few days been entered by burglars, and goods or money stolen.

It is twelve or fourteen years since a tannery was started at Baden, Ont., by C. Heldman & Co. Mr. H. has just made an assignment.——James E. Patimore, who did business in London as agent for English houses, and lately had shipped on his own account, has assigned.

From British Columbia comes word of two failures by traders. Russell & McDonald, Victoria, have assigned. We gave full particulars of their trouble a couple of weeks ago.——A jeweler at New Westminster, Fred Crake, has also assigned. He has been in business but a short time and did a very small trade

At the annual meeting of the bankers' section of the Montreal Board of Trade, held last week, Mr. George Hague was unanimously elected to represent the section on the general council of the board, to succeed Mr. E. S. Clouston, whose term of office had expired. At the same meeting, Mr. F. Wolferstan Thomas was selected to succeed Mr. Hague as chairman of the bankers' section.

A furniture dealer, John Gilmore, of St. Catharines, Ont., is offering 60 per cent., spread over fifteen months' time. He owes $3,400, and has assets of $3,000.—— Fred Donaghy, a grocer at Fordwich, is offering 75c. in the dollar, secured by endorsement.——J. H. Collins, grocer and butcher, Hamilton, is embarrassed. His obligations will hardly exceed $1,000. —— Hugh McPherson & Sons, carriage makers at Ringwood, have made an assignment; so has Levi J. Leach, general dealer for a few months at Sturgeon Falls.

In Toronto, H. J. Bray inherited a fruit business, but seems to have done no better than his father, for he now assigns.——W. G. Taylor, who succeeded his father as a grocer, could not meet his bills, and an assignee now has his effects.——Wm. Walsh & Co. opened a few months ago the Happy Home Furnishing Company, but the alluring title did not attract the business expected, or else did not bring the money. A bailiff is in possession.——J. L. Davidson, contractor, has assigned to J. Dickson, of this city.

The tin firm of Ballantyne & Wilson at Brussels are offering to compromise with their creditors at 40 cents on the dollar. The business was established in 1878 by Haycroft Bros., who were succeeded in 1887 by Turnbull & Ballantyne. The present firm was formed in October, 1890. The inattention to business given by one of the partners is the cause of the trouble, and if this compromise is accepted a dissolution of the partnership will result. The assets and liabilities are, as yet, unknown

The annual meeting of the Toronto Board of Trade will be held on Wednesday next, 30th January. The following officers have been chosen without opposition: For president, Stapleton Caldecott; 1st vice-president, E. B. Osler; 2nd vice-president, Edward Gurney; treasurer, D. W. Alexander. There remain to be chosen 15 members of council, 12 members of the board of arbitration, 2 representatives on the harbor trust, and 2 on the Industrial Exhibition Board. The meeting is called for 3.30, and the ballot will close at 3.45 p.m. sharp.

A meeting of the creditors of Alan Goodridge & Sons, general merchants, St. John's, Nfld., was held on the 11th inst., when a full statement of their affairs was submitted. The liabilities foot up to $694,250, the two principal creditors being the Commercial Bank, $225,000, and C. T. Bennett, $244,000. The assets are estimated at $361,749. In valuing the assets there evidently has been much pruning done, as fishery accounts, figuring nominally at $285,000, are valued at $20,000, and other book accounts at $29,500. Additional leading items of assets are fish, $128,950, and store stocks, $38,800. An offer of 40 cents on the dollar is talked of.

Scarcely two weeks have passed since the December issue of the *Canadian Photographic Journal*, with its one side printed and the other yet on the press, was doomed to burn in the first of the great Toronto fires. But through the courageous offort of its editor and publisher, Mr. Geo. W. Gilson, the *Journal* is able once more to make its bow to the public in an entirely new dress, with a cover specially designed by Howard for the "Emergency Number," and with a front page inset consisting of photograph on Aristo-Platino paper, from the studio of Frank A. Place, Chicago. There is a large field and should be a happy future for this journal, for neither professional nor amateur who once gets it is likely to do without it.

The firm of Bowes & Co., dry goods men, Kingston, are reported as assigned to T. D. Minnes. Mr. B. has had a checkered career. Originally he was in business in Gananoque, and failed there some years ago. He was then clerk for a while for F. X. Cousineau. In 1880 the firm of Bowes & Bissonette was formed, and did quite an active business, with branches at Arden, Parham and Marlbank. They dissolved about 1892, Bowes taking over the Kingston and Marlbank stores, and assuming all the liabilities, but he shortly afterwards assigned with liabilities of $32,000. In July, 1893, he started again as Bowes & Co., only to be closed up in January, 1894. He again found dry goods houses to stock him shortly after, but without any better success, and a few days ago his estate was turned over to one of his Kingston creditors.

Recent Montreal failures embrace the following: T. Bricault, who failed in the haberdashery line in Toronto, in the year 1890, and who subsequently started business in Montreal, buying out a bankrupt stock, has made assignment of his estate.——Joseph F. Desjardins, fruiter, has assigned with small liabilities.——Compain & Co., restaurant, who were in trouble only a short time ago, have consented to assign.——Pauze & Lamarche, hardware, paints, &c., had a meeting of their creditors last week, and made an offer of 50 cents, unsecured. They only owe $4,769 direct, but are liable as endorsers for $21,972. They have never had the name of being very good business men, and their lending their name so lavishly proves pretty conclusively that they are not.——F. Porcheron, a small shoe dealer in St. Henri suburbs, has assigned with limited local liabilities.

We note the following recent applications for joint stock company charters, all for Montreal concerns: Messrs. Wm. Yuile, J. R. Gordon, S. Bell, A. McIntyre, and Chas. W. Gordon, propose incorporating the Standard Shirt Company, with an authorized capital of $200,000.——The General Importation Company of Canada is being organized, with a capital of $150,000. The petitioners for a charter are Messrs. A. Letang, J. M. Beausoliel, R. Prefontaine, Chas. C. Coursol, and O. Marin.——The Taylor Hydraulic Air Compressor Company will have an authorized capital stock of $500,000, and the names of those associated in the enterprise are C. H. Taylor, Henry Millen, W. T. Ross, J. R Fair, R. L. Murchison, R. W. Sutherland, and H. Mallet, of Montreal, W. H. Campbell, of Belleville, and D. T. Ritchie, of Glasgow.——The Featherston Piano Company, with a capital of $50,000, is being formed to take over the business of A. M. Featherston. The applicants for charter are J. W. Dugdale, W. Harris, L. W. Channell, and A. M. Featherston.

It will be a long time before the effects of the late fire in this city have passed away. The flames then rapidly devoured the premises of R. H. Gray & Co., makers and jobbers of white goods. By persistent effort and attention the firm had built up an apparently prosperous industry. But the fire consumed the entire stock and prevented them from filling orders, and generally demoralized their business. The result has been a meeting of creditors last Wednesday in Montreal, where a compromise of 62½ cents in the dollar was offered. In all probability this will be accepted. It might be said that the business was commenced about thirty years ago, and their balance as at the 1st Jan., 1894, was a nominal surplus of $36,000.

Declining years have had about as much as anything to do with the present financial trouble of S. E. Stephenson, jeweler at Aurora. We stated a week ago that he was financially embarrassed, and since then he has assigned.——Bowman & Moore, hardware, Hamilton, have assigned.——Some six years ago Peckover Bros. took up the furniture business of their father in Hamilton, who had just assigned. They have handled only a cheap class of goods and done business with a poor class of customers. An assignment has now been made by them.——A small grocer at Essex, Thos. Hicks, has had to assign. He began business there in May, 1890, but has never made more than a small living.——Daniel Lavery, at Kirkfield, who succeeded Lavery & Rehill about a year ago, has assigned his general stock to J. W. Lawrence. He formerly came from Myrtle, where he had been in business for a number of years. He always had a good reputation as a business man, and up to the present was considered fairly well to do, so that his assignment is somewhat of a surprise. ——From Berlin we hear word of the trouble in business of Stuebing Bros. They have carried on a grocery and fancy goods trade. In January, '92, Henry Stuebing, the senior member of the firm, admitted his younger brother into the business, and at that time they claimed to have a cash capital of $3,000. Of late their trade has been very slack, and this has made them very hard up. They have assigned to W. Ross.

The death of Mr. A. M. Smith, though it can scarcely be said to have been unexpected, for his strength had evidently been long declining, has called forth from business men very general expressions of regret. Such men as he are of pronounced value to a community, and their taking off lessens our general stock of wisdom and helpfulness. They "solder society and sweeten life," as Cowper phrased it. The portrait by Forster of the late Mr. Smith, as it hangs in the board room of the Western Assurance Company, presents to the eye the benignity which was one of the marked qualities of the deceased gentleman. His was a kind nature and a just. Such was the confidence felt in his integrity and common sense, that people went to him for advice as well as for sympathy. Many are the instances where he has smoothed differences, arbitrated disputes, helped the deserving either with advice or money, without hope of reward. But it would be a mistake to suppose that his placid benevolence of disposition implied a pliant or easy-going nature. He was a man of great firmness, likewise of unusual pluck, and in respect to certain business principles and practices a martinet. It says much for the innate qualities of the man that in his younger days a private soldier with very limited opportunities of education, he should have risen to be a bank president, an insurance president, a member of Parliament, and a partner or director in a variety of financial and commercial bodies. He had accumulated a good deal of money, and we understand has left large bequests to charitable institutions.

THE SITUATION.

Whether Manitoba wheat sent to Buffalo can be reimported into Canada, free of duty, is a question which the Canadian Government has been called upon to answer. And, owing to the state of the law, the answer has been in the negative. The Canadian dealers who sent the wheat to Buffalo say they thought that by doing so they would be in a position to sell either in the Canadian or the American market. The wheat has not changed hands, and it is added that over 16,000 bushels of such wheat, bonded in Buffalo, has afterwards passed the Canadian customs. But if so, it must have passed in error, and now that the matter is thoroughly understood, the operation cannot be repeated. So the Government decides, in obedience to the law, and it has no legal option in the matter. The only way the Government could have given the relief sought would have been by assuming the responsibility of obtaining from Parliament an Act of indemnity for permitting an irregularity. It would have been easy to ascertain that no wrong to anybody could result from removing the restriction in this instance. On this ground a reconsideration of the case would not be unreasonable. The owners, it is said, have actually sold the wheat, and Canadian millers are likely to suffer for want of it, even to the extent of being obliged to shut up their mills. Such at least is the allegation. As far as the interpretation of the law goes, it may be conceded that the Government had warrant for its decision. It has done much in the name of protection; surely it might now take the responsibility of removing a restriction for which it ought to receive commendation and not censure.

Once more, in the Brooklyn trolley embroglio, we have proof that a labor strike on a considerable scale is nearly always attended with obstruction, riot, and outrage. And when this happens, if the police is unable to cope with the rioters, the military are called in, as they have been on this occasion. The rioters hurl bricks and stones from the tops of houses on the defenders of the peace; they obstruct the running of cars, and altogether resort to methods which remind us of the Paris commune in the days of its uprising. Unfortunately, while such a state of things exists, the first thing to do is to restore peace; consideration of the alleged grievances of the strikers has to be postponed until this end is accomplished. If, as alleged, the men were required to work thirteen hours a day, this was a great deal too long for their own well-being, and even for the safety of the public, for men overworked lose their alertness and something goes wrong, possibly to the loss of the lives of passengers. But all this can be considered and a remedy applied only after peace has been restored. The first duty is to put down riot and to get the cars in proper running condition. The Chicago strike, last year, appeared to have convinced the labor leaders that strikes afforded a very uncertain remedy; but, if so, the influence of this opinion did not extend to Brooklyn. No less than 8,000 militiamen are under arms in the city, and, from the first appearance of State troops on the streets, it has been quite evident that their rifles must win. The necessity for their employment is deplorable, but was not the less inevitable from the moment the police proved unable to cope with the rioters. A continuance of the disturbance inconveniences the public, but it does not slacken the desire for a return to peace by putting an end to the rioting.

There is nothing new in the Liberal platform, as explained by Mr. Laurier at the Montreal banquet. After reciting the Ottawa platform, his personal explanations made the main plank a little more definite. The party's ultimate object, he said, was to obtain free trade on the broad lines on which it rests in England, but the first step was the enactment of a tariff for revenue, leaving out of the estimate all considerations of protection. This, he expressed his belief, could be done without bringing on a crisis or creating any serious industrial disturbance. He reads the history of protection and free trade, even in this country, so as to show results in favor of the latter and against the former. Thus the issue between him and Mr. Foster widens rather than narrows, and the general election, whenever it comes on, will turn mainly on this question. When the elections will take place is a matter on which opinions differ, some holding that there will first be another session and others that there will be no session before dissolution. The odds appear to be in favor of another session. The electors' lists will not be ready for use till March or later, and a session in the meantime would seem to be inevitable.

Out of the commercial and financial bouleversement of Newfoundland, the question of a union of the island with Canada is distinctly emerging. A delegation to Ottawa to see what can be done is now almost a matter of certainty. Even the members likely to comprise it are named: Premier Greene, ex-Premier Whiteway, and ex-Colonial Secretary Bond. For the first time the belief is general that, if the question were submitted to the electorate of Newfoundland, the response would be favorable. The Imperial Government has assented to a bill removing the disability which attached to Sir William Whiteway, under decision of the election court, and he will be free to re-enter public life. But it is thought that he is more desirous of appearing as Governor of Newfoundland, under confederation with Canada, than in any other capacity. Canada, as well as Newfoundland, has to be satisfied that the accession of Newfoundland to the union will be an advantage to her. If we look only at the present, the benefit of union to Canada would be doubtful; but if we look to the future, the position of Newfoundland at the entrance of the Gulf of St. Lawrence, the doubt will be removed. The present condition of the island would impose on us a heritage of trouble, but this would have to be borne for the sake of the benefits which the future promises. There was a time when there was reason to believe that Great Britain would have objected to the union of Newfoundland with Canada; but that was when Imperial statesmen thought that the

best thing for Canada was to prepare her for independence and that in that event it would be necessary to retain the island for Imperial purposes. At present, the British Government appears to favor the union of the island with Canada.

Wild is the word that best characterizes the deliverance of the Patrons, signed by Grand President Mallory and the Grand Secretary. These ambitious titles, by the way, are little in accord with the levelling pretentions of their owners. Not that every plank of the new platform is to be rejected as unsound. The acceptance of free passes by members of Parliament, it may be admitted, has become an abuse to which an end ought to be put. Some of the adjacent States make the acceptance of such favors by legislators a matter of constitutional inhibition. The Patrons would make it a ground of diqualification and forfeiture of the seat of the accepting member. The proposal to make stockholders of corporations who ask or obtain "aid or emolument" [for the corporation?] ineligible to a seat in such legislature is one of the novelties of this programme. Members of Parliament may accept sessional allowance, but no other fees or emoluments for any service performed for the Government. The abolition of Government House at Ottawa is called for. What attention would be given to a demand to pull down the White House at Washington? Is the Governor-General to lodge in a hotel? Superannuations are condemned, except those for military service. The mounted police of the North-West are pronounced useless, apparently in the belief that the wild Indian, if not under restraint, would let the settlers pursue their avocations in peace. The military college at Kingston, our West Point, is condemned by this utterance to extinction. Steamship companies are to receive no more subsidies. Finally, the tariff is to be so arranged as to give the farmer much of what he wants, free of duty, while others are to pay through the tariff the fullest amount of taxes that the articles of their consumption will bear. Is that a foretaste of the statesmanship that is in store for this country?

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of December, which bears date Ottawa, 18th January. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

Canadian Bank Statement.

LIABILITIES.

	Dec., 1894.	Nov., 1894.
Capital authorized	$ 73,458,685	$ 73,458,685
Capital paid up	61,683,719	61,669,355
Reserve Funds	27,470,026	27,287,526
Notes in circulation	32,375,620	33,076,868

Greatest amount notes in circulation during month	34,450,532	35,640,491
Loans to directors or their firms	8,034,039	7,978,669

The bank statement for December is chiefly remarkable as showing a still further increase in the deposits of the banks, and in the total deposits of the country.

Deposits in Canadian banks on the 31st December, 1894, touched "high water mark" in the history of Canadian banking, being ($192,000,000) one hundred and ninety-two millions, as against ($179,000,000) one hundred and seventy-nine millions, as at the end of December, 1893.

If the present steady augmentation goes on for a few months longer, bank deposits will touch two hundred millions.

It is, however, dangerous to forecast. But taking the deposits as they are at present, viz., of $192,000,000 in banks, or $267,000,000, which is the sum of all the deposits in chartered banks and savings banks combined (including the Government savings banks), we have a very striking evidence of the fact that the savings of the people, as a whole, in spite of all drawbacks, are steadily augmenting.

This form of augmentation is of course only one amongst other forms, for the amount of savings represented by the clearing and development of lands, the erection of buildings of all kinds thereon, and other forms of addition to fixed capital, have to be taken into account as well. These statistics afford some measure of solid satisfaction in view of the fact that the gains of business enterprises on the whole during the year have been far from satisfactory.

There is scarcely any line of business in which even the better class of traders—men with capital and experience—have made more than bare interest on their capital, or the bare cost of living. And many even of these have not done as well as this. What with depreciation and fall in values, continually increasing expenses, and that terrible drain of profits—bad debts—there are many good and substantial firms who are not as well off to-day as they were a year ago. That is a simple fact.

But there are numbers of men who during the year have succumbed altogether to the pressure of circumstances, and find themselves to-day wrecked and stranded after years of fruitless labor. Many of these, doubtless, are reaping what they have sown. They ought never to have been in business at all. There experience while in business has resulted in no good to themselves, and has done great harm to others.

It is undoubtedly the case that a large number of men foolishly strike out for themselves in business, who would have done far better if they had remained as employees or

otherwise. And equally true, that many who continue in business to-day would be far better if they closed up their stores and entered into the service of others again. This has often been said before; there seems, however, some strange fascination about entering upon business as a principal, and people constantly make up their minds to encounter its risks, notwithstanding the innumerable warnings that there have been from past failures.

The one consolation, and it is a practical one, is that we are probably better off than our neighbors and friends. That the year 1894 was one in which little money was made in business in the United States, goes without saying; nor were things very much better in the United Kingdom. Stagnation has been the rule in nearly every line of business, and nearly all traders complain that business is overdone. Competition is as keen across the Atlantic as it is here; and the complaint is that there are too many engaged in business for the volume of business to be done.

In the great cotton spinning town of Oldham, in Lancashire, where nearly all the business firms are now merged into joint stock companies, nearly the whole of these companies report either no profits at all or a downright loss. In that town, it is said, there are more spindles than in all the factories of New England put together. There are in fact sadly too many for the interest of the proprietors and stockholders. A large part of the business of this town has been carried on for years solely for the benefit of the workpeople. And a paragraph on another page relates how unprofitable the English ironmasters have found last year's business. The cotton mills of Canada have settled down into a steady line of manufacture, with reasonably steady profits. Good management, economy and an absence of unreasonable competition have resulted in reasonable returns to the stockholders in the mills, while it is certain that the article is produced at as cheap a rate as could reasonably be desired. But business in the sugar refineries has been bad, and is so still.

There is one thing that Canada can always be congratulated upon, that is the stability of her currency. That currency has always rested upon a solid basis of gold. We have never been tormented with foolish theories about silver as a foundation for currency. No body of bi-metallists have appeared amongst us thrusting their foolish theories into public notice. Silver has not become a disturbing factor in our politics. Our Government has never been guilty of the extraordinary folly of accumulating immense vaults full of silver which it does not want and cannot use. In some respects we are fortunate in having no immense silver mines, for silver is a disturbing factor in the currency position all over the world. In India and the East generally, the decline in silver has been productive of serious consequences to the great banks doing business in these regions, as well as to the officers of government and other employees who have seen their salaries—even if nominally increasing—steadily diminishing in purchasing power for years. From all such complications we are happily free.

In entering upon a new year, one of the most pressing questions will be with wholesale houses as to the amount of credit they are to extend to their customers. There can be no doubt that under pressure of competition credit has been much abused of late years. The intimate connection between the length of credit and the total amount of credit to one person is not always perceived. If credit was cut down from six months to four, the average amount of risk to each customer would be reduced one-third. Losses by bad debts would be reduced in the same ratio, and a far easier state of finances would generally supervene. If the losses and misfortunes of the past year lead to a thorough reform in this respect, they will not have been suffered in vain.

CANADIAN CHEESE.

The value of a good reputation for trade products is a very definite quantity, and may be as important, relatively, to a nation as to a man. Pains must be taken to ensure the continuance of conditions that formed this reputation, if it is to be maintained. And, what is more, the aims or acts of competitors must be kept in view, and the improvements that time or change suggest should not be ignored. This, or something like it, appears to have been in the mind of Mr. Pattullo, president of the Western Ontario Dairymen, when he spoke on the occasion of the convention at Stratford last week of their association. Canada has a good reputation for cheese, and exports a great quantity of it. Let her take pains to keep up, nay even improve, the quality of the article, rather than too hastily extend the industry. This is the advice of Mr. Pattullo in view of the stimulus given to cheesemaking in other countries by the success of Canada. Overproduction is to be feared as a result of this stimulus. "There never was," he says, "a time in the history of the trade when it was more necessary to be alive to the feverish spirit of competition abroad, and to guard the position which we hold against all who, by honest endeavor or otherwise, seek to equal us in the English market."

Reviewing the past twelve-month, its lesson to salesmen is found to be that they should endeavor to sell their cheese as early as possible in the year, especially the make of the first months of the season. And good reasons are

given for the conclusion that by doing so makers would probably realize as good or better prices than by holding—that is by speculating—for a rise.

The true economy of superseding antiquated factories by new buildings, or at least the best and most modern appliances, is contrasted with the false and dangerous economy of beating down the price paid makers. "Most men in the trade will agree with me," such is the language of the president, "that there is an enormous tendency towards squeezing the makers down to a point at which they cannot employ experienced or skilled help, use the best of boxes and other material which they engage to supply, care for the factory and its surroundings as they should, and retain an adequate balance of profit at the end of the season." This, he tells them very plainly, will not do. Intelligent skill must be paid for. A rich American asked a celebrated artist to paint a portrait of him in a hurry, naming the number of days he could spare for sitting. The portrait being finished satisfactorily, its price was named, a thousand guineas. "A thousand guineas for the work of a few days! You charge a good price for your labor," remarked the American. "I have charged only a hundred guineas for my labor," responded the artist, "the other nine hundred is for knowing how." When we consider that our cheese has to run the gauntlet in the English market of cheese tasters and dealers in the first place, and consumers in the second, the cheapest cheese-maker may be the dearest in the end. "In the selection of a maker, experience, skill and success should be the sole test rather than a willingness to work cheap." A man who "knows how" should be well paid. The importance of the industry to the country is emphasized by the consideration that since it became of marked proportions the price of cheese has, with the possible exception of a single year, afforded a fair margin of profit to the producer. This is a remarkable fact during a period when nearly every other product of the farm has fluctuated in value, if it has not become permanently low. The arguments for the efficient maintenance of this branch of production are neither few nor weak.

PRICES OF COMMODITIES IN 1894.

Not for many years has there been such a continuous and general fall in the prices of commodities as during 1894. The reasons are, according to the London *Economist*, the long-continued tariff unsettlement in the United States, the lack of recovery in Australia, the unsettled condition of the relations between capital and labor. Happily, however, says that journal, in a January issue, trade has latterly been showing distinct signs of recovery, and the outlook is more hopeful than it was a year ago. "The movement in prices during the year, as registered by our index number, was:

End of December, 1892	2,120
" " 1893	2,082
" " 1894	1,923

[In the first quarter of 1894 they fell 60 points, in the next 47, in the third 22, in the fourth 29.] This shows a fall in 1894 of fully 7½ per cent. as compared with a drop of rather less than 2 per cent. in 1893, and from the following statement it will be seen how general was the decline:

PRICES OF COMMODITIES.

	End of 1894.	End of 1893.	Rise or fall in the Year.
Scotch pig iron	41/10	43/5	— 1/7
Steel rails	72/6	72/6	....
Coals—B. Wallsend	15/9	23/6	— 7/9
Copper—Chili	£41 5/8	£42 3/4	— £1 7/8
Tin—Straits	£61 1/2	£74 1/2	— £12 7/8
Lead—English	£9 1/8	£9 1/8	....
Wheat, Gazette	20/9	26/6	— 5/9
Barley, Average	21/3	29/	— 7/9
Oats	13/11	18/	— 4/1
Beef—Inferior	2/6	2/8	— 2d
" Prime	4/4	5/	— 8d
Mutton—Prime	6/	6/	....
Sugar—West India	9/3	13/6	— 4/3
Coffee	103/	100/	— 3/
Tea (common)	4d	4 1/16d	— 1/16d
Rice	5/6	5/7½	— 1½d
Cotton—Middling	3 11/16d	4¼d	— 1 5/16d
" 40-mule twist	6¼d	7¼d	— 1d
Wool—N.S.W., Unw	6½d	7½d	— 1d
Tallow	23/	29/9	— 6/9
Saltpetre	22/9	21/6	+ 1/3
Hemp—Manila	£17½	£23½	— £6
Silk—Cossimbuzar	9/9	12/9	— 3/
Jute	£11½	£16½	— £5
Flax	£31	£41	— £10
Petroleum	4d	3½d	+ 1/16d

In some cases, it will be observed, the quotations in this table represent fractions of the pound sterling, which must not be confused with shillings and pence. For example, Chili copper is quoted in 1893 at £42¾, and in 1894 at £41 5/8. The fall in price between thesedates is £1 and seven-sixteenths.

Of the twenty-six leading commodities included in this table, only two, petroleum and saltpetre, were higher in price at the end of the year than at the beginning, three finished where they began, while all the rest show a more or less heavy fall. The downward movement, moreover, was continuous as well as wide-embracing. The prominent features in this table are the phenomenally low prices of wheat and cotton, the very heavy fall in tin and the sharp drop in coal, which is regarded as a natural reaction from the inflated prices accompanying the great coal strike of Britain.

LIFE ASSURANCE QUESTIONS.

The complaint is made by a correspondent in to-day's issue that the life companies ask of applicants for life assurance a lot of "foolish," "impertinent" and "unnecessary" questions. He avers, in his first paragraph, that a certain class of persons "cannot get assurance without making public details of family history very painful to disclose, and which disclosure is entirely unnecessary." In this statement he is certainly wrong. We have examined the medical examiner's forms of two Canadian, an English and an American company, all sound and long-established offices, and we find that, with respect to his first and chief subject of complaint, two out of the four offices permit that any circumstances relating to peculiar family relations, pecuniary embarrassment, etc., may be communicated by registered letter to the managing director at the head office of the company and will be held strictly confidential. In the application forms of the others no question is asked about the mental malady of the applicant's relatives.

His second paragraph, instancing the supposed case of an individual through whose mental derangement the rest of the family, though "mentally beyond suspicion, are debarred from seeking life assurance unless they," etc., etc., is negatived by what has already been said above. The report of the medical adviser of the company upon any risk is confidential as between him and the company, and need not be seen by the agent at all. It will not be if the applicant so request. Next as to the statement that if the influence of heredity is feared an applicant after 40 years of age might well be spared such questions. It would be very unsafe to conclude that although a person be to all appearance sound and mentally sane at 40 years, he or she is beyond developing traits of disease, if that can be proven to exist in his ancestry or collateral relatives.

Again, with respect to the statement that almost any company's application form contains foolish and impertinent questions. After looking carefully over those of the companies we have mentioned, it seems to us that they are neither. The queries concern the appearance, physical characteristics, residence, habits, descent and occupation of the applicant, the health of his parents and family. These,

surely, are not irrelevant questions when their object is to ascertain the probable duration of the applicant's life. Anything and everything that has a bearing on his probabilities of longevity is proper to be known by an office which undertakes the insurance of a man's life. To make the questions "fewer and more general," as AN OLD SUBSCRIBER suggests, might result in charging a first-class risk the higher rates properly chargeable upon a risk of the second class—an injustice which our correspondent would likely be the first to resent. As to his intimation that life assurance companies are in any case "at the mercy of their medical advisers," if by this he means to imply that doctors cannot always be trusted either as to skill or honesty, the implication is too sweeping to be either just or sensible. But there are checks upon even dishonest physicians, who, to the honor of the profession, be it said, are rare. And if such once break faith with a company, their career as medical examiners is pretty certainly closed.

THE LAND MORTGAGE COMPANIES' ASSOCIATION OF ONTARIO.

The annual meeting of this association, which comprises thirty-five of the leading investment companies in the Province of Ontario, representing an aggregate paid-up capital of $27,255,935, and assets amounting to $106,311,311, was held yesterday afternoon in the board room of the Canada Permanent Loan & Savings' Company. The report of the executive committee, and that of the secretary-treasurer, were submitted and approved. The retiring officers were re-elected as follows: President, J. Herbet Mason, Toronto; vice-president, H. D. Cameron, Hamilton; secretary-treasurer, R. H. Tomlinson, Toronto. Executive commitee: Walter S. Lee, James Mason and Andrew Rutherford, Toronto, W. F. Bullen and George A. Somerville, London; R. S. Schell, Brantford, and George M. Furby, Port Hope. In the evening the president was entertained by the representatives of the companies in the association at a complimentary dinner in the Toronto Club. The vice-president, Mr. H. D. Cameron, of Hamilton, presided, and there were about fifty representatives present

CANADA LANDED AND NATIONAL INVESTMENT CO.

In view of the fact that we are face to face with reduced earnings in commerce and finance—lower prices of commodities, lower rents for houses, lower rates for money lent—the suggestion is timely as to whether this state of things is to be regarded as permanent. If it is, then it is tolerably clear, as the president of the Canada Landed and National Company put it in his address yesterday, reduced dividends must naturally follow, and that at no distant date. Mr. Blaikie's address takes a wide view of Canadian financial affairs; having a long experience in the field he is enabled to speak with some authority. And the conclusion he reaches is simply this: "Money lent out on mortgage security will no longer yield the return for its use that it did in the past, and companies will sooner or later be obliged to say to their stockholders—what we cannot get we cannot give." The fact that money is obtainable at lower rates in the United Kingdom is not lost sight of, but the low rate at which debenture money can be got does not make up for the reduced rates at which companies have to lend, so keen is the competition here from the funds of private holders, of insurance companies, &c.

The Canada Landed and National has earned its dividend, and some $12,000 more, which it puts to contingent account. The report states that its borrowers have met their payments well during 1894, both in this province and Manitoba. With respect to the increase of some $160,000 in debenture liability, it is explained that this money has been invested, not in mortgages, in sterling bonds and other immediately available securities. A new departure is announced on the part of this company in adopting a plan common on the other side of appointing trustees for the debenture holders, and giving to these gentlemen a trust deed on the uncalled capital and all the assets, this deed not to be operative, however, so long as the company makes no default in principal or interest. By this move, it is stated, the debenture holders are made easy in their minds and rendered willing to take a lower price for their money. The Canada Landed and National, having no depositors, and but trifling obligations outside of stockholders and debenture-holders, can make this move with greater ease than companies differently circumstanced. It remains to be seen whether the trust deed arrangement is to become common among Canadian companies. There are only one or two other companies, we believe, who have thus far done so.

MUNICIPAL FIRE INSURANCE

Town and village councils in various parts of Canada are coquetting with schemes of municipal fire insurance. Some of the speakers who advocate this form of indemnity seem honestly to think it workable. A favorite argument in their mouths is: "See how many years this town (or village) has been without a serious fire. All we have lost by flames in ten years past is but so many thousand dollars, and surely we have paid twice that sum to the fire underwriting companies." The havoc that would be made with the pockets of such people and with the credit of their municipality in case of a sweeping fire would cause a terrible awakening from a silly dream. Some of the Vancouver alder men who want to do away with property qualification, and who, like their Toronto brethren, want salaries, are hinting at a revision of their charter. Is it likely that the people of Vancouver will put their affairs in the hands of men with no responsibility and pay them a salary for their services? We think not. Then ½ per cent. is proposed by these men to be added to all the taxes as a civic insurance fund, the said tax to be placed in a sinking fund, to insure all the property in the city, whether the owners thereof be willing or unwilling. Land, houses, goods and merchandise are all to be included in the proposed insurance.

A correspondent of the *Mainlander* discusses as under the unbusinesslike proposal as to insurance, and condemns as well the other proposals: "The wild-cat scheme of the city making a law of compulsory insurance seems so utterly ridiculous, that it were almost folly to notice it. How will Jones, who owns a lot, intending some day to build on it, like to be taxed to pay insurance on the house of his neighbor Brown, which is worth, say, $5,000? How, too, will Brown like paying toward insuring Robinson's stock of $50,000? Moreover, no bank would accept such a fire policy for collateral security on an overdraft based partly on realty. Loan and insurance companies lending on mortgage would also refuse to accept the civic insurance, but would compel the borrower to insure elsewhere. Thus the latter would have to pay double insurance. Again, if a big fire did occur, and the city had not sufficient funds to meet the consequent demand, how would an adjustment be made? In fact the idea is so preposterous in the case of our small and largely wooden-built city, that no sane man should entertain it for a moment."

MANUFACTURERS' PROFITS.

That the profits of manufacturers are nowadays disappointing is confirmed by the admissions of men in various lines of production, not in Great Britain alone, but in many countries. An instance that appears to us a striking one is that of Sir Alfred Hickman, M.P., who last month addressed the Ettinghall Conservative Association, Wolverhampton. Sir Alfred has four blast furnaces at Spring Vale, near Bilston, besides being the chief shareholder in a concern whose Bessemer plant adjoins his furnaces. He claims to produce about a third part of the whole production of pig-iron in the Black Country, and, moreover, he has extensive coal mines, from which he obtains his fuel for both the furnaces and the steel works. On that occasion he declared that he was carrying on his large concerns—furnaces, steel works and collieries—"absolutely without profit." With the present price of materials and high rate of wages, he could not obtain prices for the finished article that would enable him to see his own money back again, to say nothing of his own time, capital, and the ordinary depreciation of plant and stock. In a word, he was not making "both ends meet." This in spite of the fact that his furnaces were built on the best principles—they were comparatively new, and with four furnaces he made nearly 2,000 tons of pig iron per week.

Here is an iron master and coal master who for generations has been a manufacturer. Many of the workingmen among his listeners had never during their lives had any other master. Surely such a man must know intimately the conditions and prospects of trade, and such a man, if he cared for his own pocket merely, would shut down his works rather than lose money. But his is a case where *noblesse oblige*. To close the works would mean starvation to thousands. The Birmingham journal from which we take the incident remarks that unfortunately Sir Alfred's experience has been lately the experience of too many others.

FIRE PROTECTION AMONG OUR NEIGHBORS

Toronto has been for years without a steam fire engine. Let us see what is thought of the necessity for such machines by some Michigan towns and cities. Ann Arbor, with a population of 9,500 and a reservoir system with 50 to 100 lbs pressure, has a steam fire engine and six hand engines. Battle Creek, whose population is 17,000, has a steam fire engine and a chemical engine. Bay City, which boasts 36,000 inhabitants, has two steam fire engines and two chemical engines, and the total value of its fire protecting plant is $80,000. Grand Rapids, with 85,000 people, has provided itself with six steamers

and two chemicals. The 23,000 people in Jackson are protected by two steamers and two chemicals. Kalamazoo, with 21,000 people, has steam fire engines and a chemical engine. Lansing, with 18,000 population, has a steamer and a chemical. Manistee, 13,300 people, a steamer and a fire boat. All these four places last mentioned are pro vided with the Holly system of water pressure. Muskegon, with 20,000 people, has a steamer, a chemical and a fire boat, and West Bay City, whose population is only 13,000, has a steam fire engine. Lastly, Detroit, which claims 300,000 people, has, in addition to waterworks pressure, *eighteen* steam fire engines, a fire boat, a water-tower, and in reserve three second-size steam steamers and a double tank chemical engine. These facts we obtain from the Michigan *Insurance Directory*. If, with water pressure, such engines are needless, what fools the councillors and taxpayers of these ten places are!

HARDWARE AND METAL TRADE NOTES.

Orders for the poorer qualities of glass, delivery in June, are very satisfactory.

The works of the Canada Screw Company, Hamilton, which have been closed for some time, were re-opened this week with a full staff.

Travellers have received orders from the houses which they represent to offer barb wire at 2⅞c., with freight prepaid on lots of 500 lbs.

Living skeleton—"What's the matter with the glass-eater to-day?" Fat woman—"I hear he has a pane in his stomach."—*Philadelphia Record*.

A charter of incorporation has been applied for by W. A. Brock, bookkeeper; Elizabeth Mary Ferguson, and Gillean McLean, of London, for a company to be known as "The London Hardware Company (Ltd.). The amount of capital stock of the said company is to be $50,000. The number of shares is to be 1,000, and the amount of each share is to be $50.

The operatives in the horse shoe nail factory of Messrs. Peck-Benny & Co. have notified their employers that they are willing to accept the terms which the latter offer. A proposition was made to the men that, while the scale of wages remains unchanged, they should agree to a temporary arrangement whereby 10 per cent. would be deducted from all wages during the time of depression, the regular wages to be paid again as soon as circumstances permit. Some of the men talked "strike," but wiser counsel prevailed.

Belleville business men assembled last night to talk over a project proposed by certain Americans to erect a steel plant in that city. "The subject in all its bearings," says the *Intelligencer*, "was fully discussed by Messrs. Robt. Richardson, manager Bank of Montreal; W. Lee, manager Brown M'f'g Co.; W. A. Hungerford, City Clerk Robertson, ex-Mayor Wallbridge, L. W. Yeomans, J. G. Frost, W. B. Northrup, M.P., and others, who expressed themselves favorable to the scheme and advanced the claims of the city in all its bearings from a business point of view for the establishment of such an industry."

The shipments of crude and refined oil, reduced to crude equivalent, which left here over the lines of the Grand Trunk and Michigan Central Railways for the month ending Dec. 31st, 1894, are as follows:

GRAND TRUNK RAILWAY.

Crude.	Refined.	C. Eqiv.
20,620	17,490	64,345

MICHIGAN CENTRAL RAILWAY.

2,755	10,150	28,130
23,375	27,640	92,475

—*Petrolia Advertiser*.

The Stellarton *Trades Journal* publishes its annual statement of the output of the Nova Scotia collieries, showing a total output for 1894 of 2,055,114 tons, as compared with 1,968,613 in 1893, an increase of 86,500—from the following collieries:—

	1894.	1893.	Incr. or decr.
Caledonia	120,050	154,908	d 34,858
Glace Bay	139,200	116,579	i 22,652
Dominion No. 1	34,156	.....	34,156
Gowrie	127,822	113,430	14,392
International	128,934	143,653	15,271
Old Bridgeport	54,844	46,700	8,144
Reserve	211,706	174,613	37,093
Victoria	120,910	96,345	25,505
Sydney Mines	217,500	195,092	12,408
C. B. Colliery	14,675	2,400	12,275
Springhill	385,000	391,000	d 6,000
Joggins, West	90,000	82,000	i 8,000
Sundries	1,000	1,000	.....
Intercolonial	214,000	210,000	4,000
Acadia	64,122	80,775	d 16,653
Albion	79,653	98,144	d 18,491
Vale	51,521	65,858	d 14,337
Total	2,055,114	1,968,613	86,501

There was sent to United States ports by the Dominion Coal Company 50,000 tons direct from Cape Breton, and 30,000 tons found their way there *via* Montreal. Springhill mines sent 35,947 tons, composed of 15,312 tons run of mine, 18,942 tons of culm and 1,694 tons of nut The General Mining Association sent 2,677 tons and the Joggins, 2,400, or a total of 120,000 tons. In addition to coal shipped, the Albion mines shipped 16,288 tons of coke. The light stocks in Montreal at the present time encourages the belief that 1895 will witness brisk shipments.

PRESCRIPTIONS FOR DRUGGISTS.

Catechu and potassium chlorate in a dentifrice have exploded in the mouth from the friction produced by a dry tooth brush. Take warning!

Valencia saffron and salicene have advanced in price, while the following drugs are quoted lower: Opium, alcohol, ergot, jalap, oil anise, oil cubeb, caraway seed.

Ingestol has been introduced for the treatment of ague and chronic stomachic troubles and for sea-sickness. It is a feebly opalescent liquid of a lemon-yellow color, and appears to contain magnesium sulphate, sodium sulphate and chloride, potassium sulphate, ether, alcohol, and iron salts.

It is said that rubber goods which have become hardened by age may be restored to original softness by simply soaking in water of ammonia diluted with twice its bulk of water. Soaking for ten minutes is usually sufficient; after drying the whiteness may be restored by dusting with chalk or kaolin.

To remove rust from steel instruments, Songu recommends placing them over night in a saturated solution of zinc chloride. The rust disappears through reduction. On removing the instruments, they are to be rinsed with clear water, placed in a hot soda and soap solution, and dried. It is also well to polish with absolute alcohol and chalk.

The New York *Reporter* of Jan. 21st says of the drug market: "The market has presented a comparatively quiet appearance, though the jobbing trade with many dealers has been of fair proportions. In a speculative way nothing is doing, as there is no disposition to take hold without support from consumers. The changes are nearly all in the nature of declines."

THE DRY GOODS TRADE.

Messrs. W. H. Storey & Son, of Acton, recently received an order from the Department of Militia and Defence for 3,000 pairs of men's calf mitts.

Mr. William Somerville, late manager of the Globe Woolen Mills, in Montreal, has been appointed manager of the Cornwall Manufacturing Company.

The annual meeting of the shareholders of the Collingwood hosiery mills was held last week. This firm are improving their factory by adding a system of steam-heating throughout.

The third annual drive of the overseers and second hands of the Dominion Cotton Mills Co., Magog, was held on Saturday afternoon, Jan. 12th, to the neighboring hamlet, Georgeville, where a dinner was served.

The annual meeting of the shareholders of the Eureka Woolen Manufacturing Co., was held at Eureka, Pictou Co., N.S., last week. The operations of the year have been the best in the company's history, and a satisfactory dividend was declared. The following officers were elected: President, M. H. Fitzpatrick; vice-president, W. D. Cameron; manager, C. A. Clarke; secretary, J. P. McLennan.

It is always pleasant to learn of the progress made by a Canadian industry. But with a protective tariff in existence it is impossible to arrive at the real standing of our factories as compared with those in other countries, unless by figures of export or import trade. The Dominion Suspender Co., of Niagara Falls, have received from their agent in Australia orders for over a car load of suspenders, and this in competition with English brace-makers. No better proof than this fact is needed to show that this particular industry in Canada has attained a high degree of excellence.

FOR GROCERS AND PROVISION DEALERS.

Americans use 90,000,000 pounds of tea a year.

A canning factory may be established in Forest, Ont.

A neat tobacco pouch is called "the widow," because it carries the weeds.

A butter and cheese factory is to be erected at Brown's Yard, Kent Co., N.B.

The difficulties in the cultivation of black pepper in the West Indies are said to have been successfully overcome in Trinidad.

"Prythee, fair youth," quoth the good merchant, "hie thee away with this bill and strive to collect a goodly portion." "'Tis dun,' murmured the youth, as he hied.

Advices from Smyrna indicate an advance of from 2 to 3s. per cwt. in the price of Sultana raisins. Stocks in primary markets are apparently now within narrow compass.

An advice received in Toronto from Barbadoes says: "With the advancing season it becomes more evident that the unprecedented dry and unfavorable weather will bring about a considerable shortage in the sugar crop."

It is understood, says the St. John *Sun*, that the worthless raisins sent here from New York in the sch. "Clayola" to escape the payment of the duty, will be taken over by a St. John firm. What will be done with them is not known

This has been a favorable season for the British Columbia halibut fisheries, and fish from our Pacific coast province have been displacing Atlantic halibut in the markets of the Eastern States. The fish are sent *via* the C.P.R., in cars especially adapted for the purpose.

Latest advices show currants remaining in Greece to be only 40,000 tons, a quantity so small when the period to next crop is considered, that the market there has assumed a decidedly stronger appearance, with a recent advance in the price to 7s. 6d. for good provincial fruit

In London higher prices are being asked for low grade Indian and Ceylon teas, and this has had the effect of stiffening our markets here. Toronto jobbers are asking an advance of 1c. per lb. on some lines. The tea market generally throughout the Dominion is strong, and many merchants express their opinion that prices have already passed their lowest point for the season

Stocks of dried fruit held in Toronto are not excessive, and of some lines there is apparently not enough to supply the market's requirements. Sultana raisins are in rather scant supply. Orders have been placed abroad in anticipation of a shortage, and advices of transhipment at Liverpool are already to hand. The fruit may be expected here within a week or ten days time

The Canadian apple trade in Liverpool is reviewed as follows in Messrs. Woodhall & Co.'s circular under date of January 5th: "During the past fourteen days the total arrivals were only 17,912 barrels, and shippers showed discretion in limiting supply at a time when demand is naturally small. Arrivals from Canada were in sound condition, but only occasional parcels realized extreme quotations."

The bakers of Cornwall held a meeting last week, and organized the Cornwall Bakers' Association. Mr. F. J. Nicholson was elected president; Mr. P. J. Lally, secretary, and Mr. Fred. Carpenter, treasurer. In view of the rise in the price of wheat and flour, it was decided to raise the price of bread to 20 cents a pan (wholesale), $1.35 per dozen half-pan tickets, or 6 cents a loaf, retail. The association will hold monthly meetings

The following is a statement of the total shipments of sugar from Manila, Iloilo. and Zebu for first eleven months of the year:

	1892.	1893.	1894.
Great Britain.....tons	71,257	88,632	60,602
Continent ..... "	2,772	4,203	3,993
United States ..... "	57,985	73,900	43,506
Canada .. .. "	32,575	13,810	13,385
China and Japan ..... "	74,536	76,121	67,050
Total	229,125	256,666	188,536

—*N. Y. Journal and Bulletin of Commerce.*

As a result of the recent disaster to the Florida orange crop, more than usual interest is turned this year towards California. The San Francisco *Grocer*, January 18th, says: "The orange crop is moving, as is shown by the shipment of 21 cars from this city, 13 from Stockton, 31 from Sacramento and 91 from Marysville. The record for the southern counties is not obtainable, but not many have gone from there to date. As soon as the weather clears that section will enter vigorously into the work of marketing the big crop on the trees. It is estimated at 6,000 to 7,000 cars.

According to British Board of Trade returns, the following were the imports of cheese into United Kingdom during past three years:

	1894.	1893.	1892.
Holland .....cwts.	298,693	269,364	273,821
France ..... "	52,965	58,346	45,605
Canada ..... "	1,142,104	1,046,704	1,038,599
United States ..... "	672,347	645,235	818,433
Other countries ..... "	97,178	57,813	56,359
Total.....	2,263,287	2,077,462	2,232,817

The showing made by Canada in this list is nothing if not satisfactory While the exports from the United States have fallen off some 146,086 lbs. in the last three years, Canadian exports have grown continually large, and now reach the respectable total of 1,142,104 lbs

"Five cents to the rich, ten cents to the poor The same loaf of bread that costs the well-to-do citizen five cents, or a shade over that figure, costs the poor and destitute man ten cents It seems incredible, but such is actually the case." The Winnipeg *Free Press* begins in this manner an article under the heading of "A Cry for Cheap Bread." The explanation lies in the fact that in that city 18 loaves of bread are sold for $1, while a single loaf costs 10c. The reason alleged by the bakers for this discrepancy in price is that a single loaf is worth more than 5c., and since no coppers are in circulation in that community the next price to be charged is 10c. Four loaves are given for 25c. For the very poor—and even Winnipeg is perhaps not without its paupers—coppers would prove a blessing.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Jan. 24th, compared with those of the previous week:

Clearings	Jan. 24	Jan. 17
Montreal	$10,363,496	$12,085,559
Toronto	5,855,269	6,301,271
Halifax	968,225	1,223,837
Winnipeg	752,097	1,005,862
Hamilton.....	550,169	621,832
Total	$18,489,256	$21,158,361

Aggregate balances this week, $2,688,970; last week, $3,432,635

—A meeting of the Underwriters' International Electric Association was held in New York since our last issue, at which the word "National" was substituted for the word "International" in the title of the association. The meeting kept in session two days, at which the electrical system and its relation to fire insurance was discussed from all sides. Among the important resolutions adopted was the following, which shows that the damage which is being done to underground pipes by electrolysis, caused by the introduction of the electric trolley, is attracting serious attention: "Resolved, that each inspector be requested to make tests for difference of potential due to trolley roads between water and gas mains, and other underground metallic conductors, and between them and the earth itself, in the various towns and cities in his territory, and report to the secretary of the association at as early a date as possible."

—The chairman of the British Mortgage Loan Company made some suggestive remarks at the annual meeting of that company last week. He referred to the reserve of $80,000—which the report described as being "the fruit of the self-denial of prosperous years"—as an element of great support to the company, particularly in times of depression. Six per cent. dividend, he said, was really a higher rate of dividend, with money loaning at six per cent., than was the seven per cent. dividend paid when loans were yielding eight and nine per cent. Mr. Ballantyne's views coincide with those of the president of a Toronto company, reported in our columns to-day, that the earning power of the capital of all companies has been diminished. And the report realizes that more vigilance is required by a mortgage company to avoid losses than ever before.

—Referring to the prediction it had made in December of a reduction in dividends by some of the London banks by reason of the extreme cheapness of money during 1894, the *Economist* of 5th inst. announces the reduction of the London and Westminster Bank's dividend from 11 per cent. to 9 per annum; that of the City Bank from 10 to 8; the London Joint Stock from 10 to 9; the Union Bank of London from 10 to 8½. In the case of the London and Westminster, while the amount carried forward is some £16,000 less than in 1893, a sum of £56,000 is taken from the reserve fund to meet possible losses in connection with the Newfoundland financial troubles.

—The secretary of the Winnipeg Clearing House, Mr. F. H Mathewson, writes to say that the clearing house figures published in our issue of 11th inst. do not correctly represent the Winnipeg bank clearings for 1894, which were $50,540,649, the transactions of the Bank of British North America, which is not a member not being included

—With reference to the article on glazed kid inour last issue, we have learned that Mr. Paul Galibert, of Montreal, has been manufacturing that article largely for about five years, and in a smaller way for about two or three years previously. Ours was an under estimate of his production, for we now learn that his output is nearer 500 dozen per week than 350 dozen.

—The amount of money subscribed in Great Britain to new loans or new companies last year, exclusive of vendors' shares, was £91,834,000, which is almost double the £49,141,000 similarly subscribed in 1893. The total for 1892 was £81,137,000, for 1891 it was £104,594,000, and in 1890 it was £142,565,000

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st December, 1894.

LIFE ASSURANCE APPLICATIONS

Editor MONETARY TIMES:

Sir,—I write in the interest of a class desirous of life insurance in reliable stock companies, and yet who cannot obtain it without making public details of family history very painful to disclose, and which disclosure is, I submit, entirely unnecessary.

For example and this is not an uncommon case, financial disaster or family trouble overtakes an individual, preys on the mind, which finally becomes unhinged. The rest of the family may be mentally beyond suspicion, but they are debarred from seeking life insurance unless they expose to the public what should be (and generally is) held sacred—the mental affliction of a relative.

Is there any necessity for this, or any sense in it? One would think, if the influence of heredity is feared, that, say after 40 years of age, an applicant for life insurance might well be spared such questions. A perusal of almost any company's form of application shows a number of foolish and impertinent questions. I would suggest that the fewer and more general the questions the better. After all, the insurance companies are at the mercy of their medical advisers.

Should you think this worthy of insertion and reply you will gratify

AN OLD SUBSCRIBER

Ontario, Dec., 1894

Meetings.

CANADA LANDED AND NATIONAL INVESTMENT COMPANY (LTD.)

The annual general meeting of the shareholders of the company was held in the company's offices, in Toronto, on Wednesday, January 23rd, 1895, at 12 o'clock noon, the following being present: John L. Blaikie, president; John Hoskin, Q.C., LL.D., vice-president; Messrs. James Campbell, Hon. James Young, John Stuart, Frank Turner, J. S. Playfair, Newman Silverthorn, John Scott, A. R. Creelman, Q.C. A. J. Somerville, Alex. Smith, Geo. Robinson, Henry Pellatt, Alfred Hoskin, Q.C., Oliver Gilpin, W. A. Parlane, C. S. Gzowski, jr., Dr. Larratt Smith, Q.C., G. Tower Fergusson, W. J. Robertson, John Stark, E. Saunders, J. E. Hansford, and James Mitchell. The president, Mr. John L. Blaikie, having taken the chair, the manager, Mr. Rutherford, acting as secretary, the following report and balance sheet were read:

REPORT

The directors have again the pleasure of laying before the shareholders a statement of the affairs of the company for the year 1894.

The profits, including a balance of $662.88, brought forward from last year, amount to $288 704 02

After deducting cost of management, interest on debenture bonds, and all other charges, there remains a net profit of $82,436.37, which has been disposed of as follows:

Interim dividend of 3½ per cent., paid 2nd July, 1894	$35,140 00
Dividend of 3½ per cent., payable 2nd January, 1895	35,140 00
Transferred to contingent fund	12,156 37
	$82 436 37

The unsettled condition of the financial world, which was referred to in the report of last year, has continued throughout the year just closed, and has necessitated a continuance of a conservative management in all monetary institutions. The board have therefore considered it wise to continue the policy adopted in 1893, not to enlarge or extend the business of the company, but rather to call in doubtful loans and re-invest the money, although at a lower rate of interest, on more desirable and substantial securities.

The debenture debt, it will be noticed, has been increased during the year by $159,357.[illegible] The money was offered on such favorable terms that your directors did not feel justified in declining it; however, this addition to the borrowed capital has not materially increased the liabilities of the company, as the whole sum so obtained has been invested in Government bonds and municipal securities (largely sterling bonds, which can be realized

upon at any time, thus forming practically a large cash reserve.

Payments by the company's borrowers, both in Ontario and Manitoba, have been well met during the year

The manager, as usual, visited Manitoba in the latter part of the year to examine into the company's investments in that province, and the inspector of the company has during the year personally inspected and reported on a large number of the securities in Ontario. There appears to be an increased demand for farm lands in good sections in Western Ontario, but the low price of wheat which has ruled during the year has operated to a serious extent in curtailing the sale of farm lands in Manitoba.

Statistics obtained from various sources show a considerable increase in the population of the city of Toronto. It is hoped that an improvement may soon take place in the demand for desirable city properties, but undoubtedly much of the outlying lands which were laid out as building lots during the "boom," must return to market gardens and farming lands. The company, the directors are glad to say, is practically free from the latter class of investments.

With the view of securing to the debenture holders an undoubted first charge on the entire assets and undertaking of the company, and also with a view of obtaining money on the debentures of the company on the most favorable terms, your directors decided early in the year, following the rule adopted by all the leading English companies, borrowing money by way of debenture bonds, to appoint trustees for the debenture holders, giving these trustees a first lien on the proceeds of the uncalled subscribed capital and all the assets of the company, and with this end in view the president and manager, in March last, proceeded to Edinburgh, and completed arrangements to this effect. A resolution will be submitted asking you to confirm the directors' action in the matter.

Owing to declining health, necessitating permanent absence from the country, Mr. William Alexander tendered, and the board accepted with regret, his resignation as a director of the company. A by-law will be submitted for your approval reducing the number of directors to eleven.

The books and accounts, as well as the company's securities, have been duly audited and examined by the auditors, whose certificate is appended hereto.

All which is respectfully submitted.

JOHN L. BLAIKIE,
President

Toronto, 23rd January, 1895.

ANDREW RUTHERFORD,
Manager.

AUDITORS' CERTIFICATE.

We hereby certify that we have examined the several accounts of the Canada Landed and National Investment Co. (Limited) for the year 1894, and have found them to be correctly stated, and that the balance sheet exhibits a correct view of the company's affairs at 31st December, 1894. We have also examined the securities and found them in perfect order.

G. TOWER FERGUSSON. }
H W WILLIAMSON. } Auditors.

Toronto, 17th January, 1895.

In moving the adoption of the report, the chairman said :

GENTLEMEN,—I have pleasure in moving the adoption of the report and accompanying balance sheet, now submitted for your approval. In doing so, I have to call your attention to some of the more interesting and important features therein apparent.

You will notice that after paying a dividend of 7 per cent. and all expenses, a balance remains of $12,156.37, which is carried to the credit of contingent account. We have thus, at the 31st of December, 1894, a reserve account of $350,000, and a contingent account of $23,880. Every known claim, including commission to agents on debentures, has been paid, and nothing outstanding is left to be carried forward.

It is well known to all observers of the financial horizon that money appears gradually, year after year, to yield a smaller and smaller return for its use. For example, not many years ago any gentleman with say a hundred thousand dollars, could lend that out, and for the use of it get eight per cent., or $8,000 a year; then it fell to $7,000 a year, after to $6,000, and now it has fallen to $5 000 or $5,500; and this condition of affairs has been more clearly seen and more acutely felt during the past year than at any previous time. Not only have lending rates ruled low, but the demand has been light, and really good securities have been very scarce indeed.

Loan companies, and all money-lending corporations, are meeting with the same experience, and being obliged to lend at greatly reduced rates of interest, their profits are correspondingly reduced. They cannot earn as much as formerly. The question naturally arises, is this condition of affairs to continue or soon to pass away, and money again to yield old rates of interest?

There are many indications of a permanent reduction, save perhaps a little spirt now and then of dearer money. If this reduction be really permanent, and the earnings of loan companies, of all money-lending corporations, and of private capitalists, be in consequence very materially reduced, it must be self-evident to every intelligent and thoughtful person that reduced dividends must naturally follow, and that at no distant date.

The process of reduction will be gradual but steady. Suppose, for example, that a company or money lending corporation of any kind has on its books mortgages amounting to $1,000,000, or any other large amount, bearing, it may be, 7 or 8 per cent. A considerable portion of that will be falling due every year, and if not paid off, will, in order to retain it, have to be renewed at, it may be, 5 or 5½ per cent.

In this way, every year, or every half year even, the proportion of high rate of interest mortgages grows smaller, and the proportion of low rate mortgages grows larger.

This process goes steadily forward, and money, no matter by whom it is lent out on mortgage security, will no longer yield the return for its use that it did in the past, and companies will sooner or later be obliged to say to their stockholders—what we cannot get we cannot give.

In these days, when investors have money fall into their hands to be reinvested, they are usually sorely perplexed to know what to do with it, or if they sell out their stock in one company, thinking a reduced dividend probable, they soon conclude (having regard to the fact that reduced profits must certainly come to all companies) that they might just as well not have sold out, as lower dividends cannot fail, before any great length of time, to be the rule and not the exception.

Higher rates of interest, as you all know, are current in Manitoba and the North-West Territories, than in Ontario. We, however, have not deemed it prudent materially to increase our loans in Manitoba and have not made any loans in the North-West Territories. We have some excellent business in Manitoba, but are not disposed to add to our investments there for the present, seeing that the province has suffered greatly from the extremely low price obtained for wheat. It is gratifying to know that farmers there are ceasing to rely solely upon wheat, and are changing their management to mixed farming, and where they have devoted themselves to dairy farming, have been successful

Into the Territories beyond Manitoba your directors have not gone, for although much excellent country and rich land abounds there, the cost of transporting products of all kinds to market is so great as to leave a very small balance to the producer as recompense for his labor and capital, hence high rates of interest cannot tempt us or induce us to do business in such remote regions.

I have spoken of the gradual reduction in the earning power of money as accounting for diminished profits. I may also mention that in a number of cases, where interest has not been paid, but where the property covered by the mortgage is ample security for the money advanced, no interest has been charged to the loan or carried into the balance sheet before you.

If any one asks, why act thus? I answer that it is just because our company is thoroughly sound, and it must be kept so. Where any doubt whatever exists in any case as to interest being paid, we do not credit such at all; with a moderate rally and movement in property, much, if not all, of that interest may be paid, and it will inure to the profit of the company at that time, but we conclude that it is the part of wisdom not to make the condition of the company to appear better than it is; rather, if anything, to appear worse than it is, in short, to err upon the safe side always. To act otherwise would be perpetrating the folly of inserting a rotten plank into a sound vessel.

There has been an increase of debentures issued during the year of $159,357, and that, I am glad to say, at lower rates of interest than ever before. Never in the history of the company had we so large a proportion of our debentures renewed as at the Martinmas term in Scotland, in November last. Renewals, I may mention, were at 4 per cent. per annum, and new money was taken for three years at 3½ per cent., and for 5 years at 3¾ per cent., which is a good token of confidence and satisfaction with the company. The low rate, however, at which money is now obtained on debentures does not by any means fully make up for the reduced rates at which companies have to lend out their money.

Let me call your attention to the fact that instead of investing this new money in mortgages, we have invested it in the purchase of municipal debentures of a high class, and of Ontario Government securities. Though these only bear a low interest, yet your directors have judged it wise, in the best interests both of stockholders and debenture holders, to have these as part of our assets, available as they

are at almost any moment to be readily converted into cash.

I have pointed out the results to shareholders and to all lenders of money, arising from the fall that has taken place in the rates of interest; but, gentlemen, their loss, it may be supposed, is the borrowers' gain, enabling them to make more profit by the use of the borrowed money, and so tending to promote the prosperity of the community generally.

As is well known to all of you, the past two years have been testing and trying ones in many lands for industrial, commercial, financial and agricultural interests.

It is a matter of thankfulness and congratulation that Canada has stood the strain and test as well, if not better, than any country we know of. Our banking and monetary institutions have stood well, and have prospered in a moderate measure. The extremely low prices that prevail for agricultural products generally have made hard times for many farmers. It is, however, gratifying to know that in those sections of the country where farmers have gone into dairy products, making butter and cheese, comfort and plenty are everywhere apparent, and land well adapted for stock and dairying is not depreciating, but on the contrary is appreciating in value.

We have a grand country—a country of vast resources, with an intelligent, thrifty and law-abiding people—so why should we not look out upon the future with hope and confidence?

I have now to invite your attention to a most important matter, that is the executing of a trust deed for the special protection of debenture holders.

This action of the company has been misunderstood by some, and been misrepresented by others.

By the deed, three trustees are appointed, two of them residing in Scotland (where most debenture money is obtained), and one in Canada. The trust deed is entirely inoperative so long as there is no default by the company in the payment of either interest or principal, and not until it has been in default for six weeks. The business of the company is carried on by its own directors and officers, just the same as it has been for the past thirty-six years, and as you know the company has during that long period punctually and promptly met all its obligations—which, there is no reason whatever to doubt, it will continue to do in the time to come. The financial convulsion that in 1893 swept over Australia and the United States of America, resulted in the collapse of numerous loan companies and banks in Australia, these companies having borrowed many millions of pounds in Scotland. This very naturally alarmed the British investing public, more especially when it was found, in some cases, certain creditors had obtained a preferred claim upon the assets to ordinary debenture holders

Upon this being brought prominently to light, and from a desire on the part of your directors to give to our debenture holders as absolute a security as possible, that they had a first lien upon the assets of the company, and that all creditors would rank *parri passu*, and not only so, but also to provide for trustees ready to act in their interest, if necessity ever arose for their doing so, your president and manager proceeded to Edinburgh in the spring of last year, and after meeting many times with our agents in Edinburgh, and with some others, a trust deed was drawn up and executed, and, without hesitation or reserve, I have to say that a wiser step, or one more in the interests of both debenture holders and shareholders, was never taken during the whole period of the company's history.

It has given great satisfaction to the many parties through whom debenture money chiefly comes, and has placed this company in the front rank of companies borrowing money in that way. The wisdom of executing the trust deed is further evidenced by the fact already mentioned as to the renewal of our debentures in November last, and the favorable terms on which new money was then obtained. *Having no deposits* and no creditors, except debenture holders, facilitated and made easier the making of a trust deed satisfactory to all parties

On this subject I have only to add that it is due to our debenture holders that anything that could possibly be done to give them full assurance of their interests being carefully guarded and fully protected should be done, and we have cheerfully done it, being fully satisfied that in doing an act of justice to our debenture holders, their confidence, and the confidence in the company of lenders generally, is increased, making it easy to obtain money on the very best terms, and thus acting in this matter in the very best interests of the shareholders also.

A resolution will be submitted for your adoption, signifying your approval of the trust deed

The report informs you of the resignation of our old and much esteemed friend, Mr. William Alexander, whose health is such as to render necessary permanent residence in California Mr. Alexander's connection with the company has been of such long duration, extending over a period of about thirty years, and his wise counsels and advice have often been of such value, that all his co-directors part with him with regret, all the more so that it is delicate health compels him to reside in a more sunny clime. Very sure I am that he carries with him the best wishes for his happiness and welfare, not only of the directors, but of many shareholders who were privileged to enjoy his friendship.

A by-law will be submitted for your adoption, reducing the number of directors to eleven, as it is deemed unnecessary to have a larger number.

It would not be just to our manager, Mr Rutherford, and indeed to all our staff of officers, did I omit to express my personal obligations to them for their zeal and devotion to duty in the interests of the company. In such times as we have passed through during the past two years, it calls for all the ability and skill possessed by the staff to conduct the company's business with safety and efficiency, and all these qualities have been cheerfully and unceasingly put forth.

I desire to add that Mr. Rutherford's assistance in Edinburgh, in connection with the preparation of the trust deed, was invaluable, and he is well entitled to the thanks of the shareholders.

This building, in which we are now met, has stood for many years among our assets, as of the value of $40,000. I may state that about $4,000 have been expended upon the building in putting it, in all respects, in first-class condition. All outlays have been paid as part of the current expenses, but the building is allowed to stand at the old figure of $40,000, although, with perfect fairness, it might be written up considerably.

Every room and office is rented to good tenants, at rents that produce 7 per cent. upon the $40,000, and leave the company in possession of their office rent free, which is, it must be admitted, a very satisfactory state of affairs.

I cannot conclude without referring to the valuable services of our Edinburgh agents, Messrs. Hamilton Kinnear and Beatson, W. S., and Messrs. Mill, Bonar & Hunter, W.S. Our relations with both of these firms are of the pleasantest possible description, accuracy and promptness distinguishing all their business correspondence.

I have trespassed upon your time and patience at greater length than has been usual for me in the past, but the interest and importance of the matters I have dwelt upon will, I trust, secure for me your generous forbearance.

I have now to move, seconded by the vice-president, Dr. Hoskin, that the report be adopted and printed for circulation among the shareholders, but before putting the resolution I shall be pleased to answer any questions, if any gentleman desires information upon any matter.

The vice-president seconded the motion, which was unanimously adopted.

It was moved by A. R. Creelman, Esq., Q.C., seconded by A. J. Somerville, Esq., and unanimously carried, That the action taken by the directors in appointing trustees for the bondholders, thereby securing to them a first lien on the proceeds of the uncalled capital and on the whole assets and undertaking of the company, is hereby approved of and confirmed.

The other usual resolutions were carried, and the scrutineers reported the following elected directors, viz.: J. L. Blaikie, James Campbell, A. R. Creelman, Q.C.; Hon. Senator Gowan, LL.D., C.M.G.; Dr. Hoskin, Q.C.; J. Kerr Osborne, J. S. Playfair, N. Silverthorn, John Stuart, Frank Turner, C.E., Hon. Jas. Young.

The meeting then adjourned.

At a meeting of the directors subsequently held, John L. Blaikie, Esq., was elected president, and Dr. Hoskin, Q.C., vice-president

Is too sedate and solemn,
For all the exercise he gets
Is running up a column

BRITISH MORTGAGE LOAN COMPANY OF ONTARIO

The sixteenth annual general meeting of the shareholders of the above company was held at two o'clock on Thursday, January 17th, 1895, in the office of the company, Market street Stratford, the stockholders present being: Hon Thomas Ballantyne, president; Mr S. S Fuller, vice-president; Messrs. James Corcoran, Toronto, J W Scott, Listowel David Morton, Hamilton; C.W. Young, W. Machan Mitchell; W. Maynard, jr., John McMillan George Innes, Woodstock; John Parker, Robt. Morton, East Zorra, W Buckingham

Hon. Mr. Ballantyne was appointed chairman, and the manager, Mr. Buckingham, secretary.

The directors' sixteenth annual report, the financial statement and the auditors' report were severally read, as follows

REPORT

There are but few features that the directors deem it their duty to dwell upon in relation to the business of the past year

In the presence of phenomenally low prices for almost everything which farmers formerly depended upon for the money to make their payments with, they have stood the strain wonderfully well Interest has continued to be met with a very fair degree of regularity, and many of those who no longer rely exclusively on cattle, horses and grain, but devote their attention as well to dairying, have paid off portions of the capital also It cannot be longer doubted that the mixed system of agriculture, with special reference to dairying, is the only profitable system that can be depended upon, and we are gratified to know that it is being prosecuted in this district, to which our operations are chiefly confined, to an extent already large, and that it is of steady and continuous growth.

The margin of profit in money-lending operations has become so small that more vigilance than ever is required in order to avoid its being wiped out altogether in the shape of losses. It may confidently be asserted that not greater prudence and care are exercised by any other company or by any individual lender than by us. The manager, with Mr. McMillan, who is most attentive as a director, and is very experienced as a farmer and in values of agricultural property, drove through the country last summer, and made personal inspection of most of the lands and buildings under mortgage to the company. We are glad to report that they found the securities in excellent shape. But slight provision, as usual, has therefore been found necessary to be made for shrinkages, and the sum which the directors are pleased to be able again—with the addition of a few hundred dollars of the amount standing last year to the credit of profit and loss account—to carry to the reserve, may be regarded as having been fairly earned, and may be depended upon as a substantial gain.

With $766.54 brought forward from 1893, there was $54,800.61 for disposal in 1894, as compared with $55,585.78 in 1893 and $54,065.91 in 1892. The two half-yearly dividends at the rate of 7 per cent. absorbed $22,000.40, and after paying the other charges, we have been enabled to place $5,000 to the Rest, and to carry forward $114.66 to 1895. The reserve now stands at the goodly round figure of $80,000. It is the fruit of the self-denial of prosperous years, and it goes a long way during the lean period in enabling the manager to make dividends.

Deposits have kept up very well, considering the "hard times."

To meet desirable applications for loans which came in as the year was closing, we have availed ourselves of our bank accommodation; but this will soon be covered by receipts from mortgages

THOMAS BALLANTYNE,
President

Stratford, Jan 17th, 1895

AUDITORS' REPORT.

We hereby certify that we have carefully audited the books of the British Mortgage Loan Company of Ontario, monthly, for the year 1894; that we have examined all vouchers and find them to correspond with the entries therein; and that the foregoing statement indicates the financial position of the company on the 31st day of December, 1894.

C. J. MACGREGOR, WM. DAVIDSON, } Auditors.

Stratford, Jan. 15, 1895.

The president moved the adoption of the reports and the statement, and expressed pleasure that the business of the year had, all things considered, resulted so satisfactorily. Throughout the country it had been to investors a year of low rates of interest, and the earning power of the capital of all companies had been diminished. Thanks to the careful management, we had happily escaped losses which, in a time also of falling values, some other companies had incurred. We had met all charges fairly, paid the customary dividends, and placed a surplus of profits again to the reserve. The showing at such a time was therefore excellent. Eighty thousand dollars of a reserve on a paid-up capital of something over $300,000 was of immense assistance; but it was still, he hoped, but a nucleus for a large future rest. To that end the shareholders should not, in the time to come, expect to divide the whole of the profits any more than they had done in the past. Six per cent. was really a higher rate of dividend, with money loaning at 6 per cent., than was the 7 per cent. which we paid when loans could be more freely made at 8 per cent. and 9 per cent. We should never forget that a main strength to a company, particularly in times of depression, was the money it had to the reserve. The president concluded by words of warm commendation on the management and of confidence in the solidity of the company.

The vice-president, as seconder of the resolution, spoke in a similar strain. He attributed our splendid position to constant watchfulness and vigilance, and stated that care and prudence were more necessary now than ever, when profits were so close and the margins of security offered by applicants for loans were so small.

The motion was unanimously adopted.

Mr. Wm. Davidson, mayor of Stratford, and Mr. C. A. Macgregor, M.A., were re-appointed auditors.

The directors were re elected, namely: Messrs. Ballantyne, Fuller, Scott, Corcoran, Parker, McMillen, Innes and MacFarlane.

Votes of thanks were accorded to the president, with a grant of $200, and to the vice-president, with a grant of $150, for their services during the past year, and thanks were also voted very cordially to the manager and his assistant.

The directors afterwards met and re-elected Hon. Mr. Ballantyne president, and Mr. S. S. Fuller, vice-president.

BAD FAITH.

The Chicago Associated Press, which is a comparatively new press organization and different from the United Press, whose former title it seems to have taken, has committed an unpardonable breach of faith in furnishing news, according to the following editorial paragraph in the New York *Evening Sun* of 18th instant:—

"For the convenience of newspapers it has been the custom of public officers to furnish copies of all public documents in advance of their publication subject to a release. Yesterday, Senator Lexow followed the ordinary custom and gave to the representatives of the papers at Albany copies of his report and exacted a pledge. Late in the afternoon the Senator learned that a Chicago organization was contemplating a violation of the pledge and protested. Last night the Chicago Associated Press, disregarding the protest, released the report to such papers as belonged to it. To-day Senator Lexow read in the Chamber the pledge which had been signed by the Chicago affair, and asked that an investigation be made by the Judiciary Committee. Every honest newspaper man in the city and State of New York will rejoice in a full and exhaustive investigation of this outrage, and the public pillory of men whom neither honesty nor the written word can bind."

MONTREAL MARKETS.

MONTREAL, Jan. 23rd, 1895.

ASHES.—Trade is very dull, and the Liverpool market is cabled lower at 22 shillings for first quality pots, a figure which will not permit of a quotation of more than from $4 to 4.05 here; seconds are relatively stronger at $3.65 to 3.70. In pearls there is absolutely nothing being done.

BOOTS AND SHOES.—Some of the larger factories are moderately busy, others are cutting very little stock, because orders are by no means coming in briskly, and people are not hurrying to ship spring goods. Some houses talk and act as if deferring purchases of leather would result in lowered prices, but the feeling in the hide market and the attitude of tanners appear to us to warrant quite an opposite conclusion.

DRY GOODS.—A general carefulness is being evinced in orderings by country merchants, and though some houses profess satisfaction with the business they are doing, the aggregate of wholesale trade in this line is not more than moderate. City retail trade is quiet, and many dealers are engaged stock-taking. Matters in the North-West are in unsatisfactory shape, there being a great scarcity of remittances from that quarter, and quite a few houses here have decided not to court further trade in that direction. In general collections there is perhaps a slight shade of improvement to be remarked.

FURS.—The annual January fur sales are now in progress in London, and by next week we shall be able to say something with regard to the results thereof. There is some expectation that small furs may improve a little in value, but a decline in a good many lines will not be surprising. In the meantime dealers are not anxious buyers, as quotations are naturally unsettled. The collection thus far is called a fair one, though there has been quite a scarcity of red fox. There has been a certain amount of shipping from interior parts to New York, in the expectation of getting better prices, but we are told that the experience of a good many of these parties who have given our own market the go-by, has not proved very satisfactory or encouraging.

MONTREAL GRAIN STOCKS IN STORE.

	Jan. 21, '95.	Jan. 22, '94
Wheat, bushels	663,791	635,275
Corn, "	2,126	3,287
Oats, "	216,245	164,069
Rye, "	5,529	37,774
Peas, "	73,334	137,428
Barley, "	13,711	63,165
Buckwheat "	1,954	2,383
Total grain	975,690	443,381

The quantity of flour in store on Monday last at this port was 28,868 barrels, which is 500 barrels more than last week, and 30,653 barrels less than at same date, 1894.

GROCERIES.—It would appear as if the turning point had about been reached in sugars. The regular quotation for Redpath's standard granulated is 3⅞c. per lb., though a shading of an eighth has been allowed for 800 or 1,000 barrel lots, but all outside markets for raws are showing a strengthening tendency, and there is an evident anticipation of a reaction, which causes refiners to be less disposed to make concessions. The St. Lawrence refinery people are still producing their special grade of granulated at 3⅞c. The business in German refined seems killed for the moment at least, owing to the higher price of raw beet sugar and some difficulty in getting low freights, and it is reported that a large lot has been rejected in Hamilton, ostensibly for quality, but it is presumed that the present low price of domestic refined has a good deal to do with the refusal. The Redpath refinery is just starting up again. Molasses is in peculiar shape. The city reporter who has any stock at present is holding it at 43c per gal for Barbadoes, while the gold has not yet altered the card, and single puncheons are being jobbed at 36c. Still. Dried fruits are very dull indeed. Currants and raisins remain nominally at former quotations. Smyrnas 6 to 7c., bag figs, 4 to 5c., fine dates in small boxes 12 to 14c.; evaporated peaches, 12 to 15c.; apricots, 14 to 17c. Teas are quiet at the moment, but February is generally a brisk month in this line.

HIDES.—Some sort of arrangement has been at last arrived at among the dealers in hides, which it is hoped will put a stop to the extreme competition that has prevailed of late. This has resulted in an advance in the price of cured to tanners, No. 1 light being quoted at 6c. per lb., and No. 2 heavy at 6½c. Dealers buy on the basis of 5c. per lb. for No. 1 green light, and 5½ to 6c. for heavies. The price of lambskins is from 60 to 65c. each.

LEATHER.—There is no very active cutting of stock going on, for only a few of the larger shoe factories are cutting actively. Buying of leather, therefore, is still of a quiet, moderate character. Some shoe men are apparently deferring purchases in hopes of a weaker market, but the firmness noted in late reports is still maintained, and tanners keep on writing that they should get higher prices. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c. No. 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c., common, 15 to 16c.; American oaksole, 39 to 43c., waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, 14 to 17c.; do. juniors, 11 to 12c.; calf-splits, 27 to 30c.; calf-skins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Business shows little improvement as yet. The local foundries, etc., are but lightly employed, and there is but small demand for pig iron or heavy metals. The general quotation for Summerlee pig iron is $21. It was reported that a lot had sold at $19.50, but this was subsequently denied. A moderate lot, however, was done at $20.50 in one case. Domestic pig iron has not varied recently. It is expected the Siemens' furnace at Londonderry, N.S., which has been under repair, will go into blast again in course of two or three weeks. In Canada plate and tinplate and galvanized sheets there is nothing new. Ingot tin is easier at 16 to 16½c., and is reported as low as 13½c. in New York. Lead is a little stiffer. Barb wire and staples have been reduced a quarter cent, the present quotation being 3c. freight paid on over quarter ton lots. We quote: Coltness pig iron, none here; Calder, No.

Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., 3½c.; ¾ in., 3¼c., ⅞ in., and upwards

Oils, Paints and Glass.—The movement of goods in these lines is a limited one, and the warehouses show little activity, but travellers, who are all out on the road, are sending in fairly satisfactory orders for spring delivery. The only noteworthy feature with regard to values is contained in a letter from Savannah, which reports an advance of 1½c. in turpentine within the last few days, and some stiffening here is possible. We quote:—Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

Wool.—For wool a little more enquiry is reported, and some moderate sales have transpired at pretty steady prices. The London sales opened on the 17th inst., and prices show firmness. A cargo is reported to be loading at the Cape for this market. We quote greasy Cape 13½ to 16½c.; B.A. scoured, 26 to 32c.; North-West and B.C., 10 to 12c.; domestic fleece, 17 to 20c.; supers, 20 to 21½c.; extra, 23 to 26c. per pound.

TORONTO MARKETS.

Toronto, Jan. 24th, 1895.

Grain.—Although good roads now exist for the most part throughout the country as a result of repeated falls of snow, trade in grain has not developed any marked activity. This constraint in delivery is the result of the weakness in the market. The visible supply of wheat decreased 1,029,000 bushels, oats decreasing 239,000, while corn increased 1,195,000 bushels. During the week both English and American wheat markets have lost strength, and while prices here are not quotably less than they were at our last review, the feeling is much easier. The export trade is of a strictly limited character, and the only movement taking place is that to local millers. Barley may be considered a shade steadier. Some lots are going to the United States, and for the next week or six days this trade may reasonably be expected to be active. Oats are easier than they were last week. There is a feebler demand for oats from the eastern provinces, and the natural inference is that these markets are pretty well supplied. Rye and corn remain without change.

These prices are wholesale by the car-load.

and, incidentally, the jobber. Values are steady. Lo ally, coffees show no change; primary markets, if anything, are firmer. There is as usual at this season of the year but moderate movement in dried fruits. Sultana raisins are quoted from two to three per cent. higher abroad, while currants are firm in Patras. Sugars continue to sell at low prices, and we hear of retailers advertising 30 lbs. of granulated for a dollar. Low grade India and Ceylon teas have advanced in London, and the market here is very firm.

HARDWARE AND METALS.—Our last report was not of a pessimistic character; since that time conditions have, if anything, improved, and there is now every sign of a good spring trade. Orders received at present are however rather small, but numerous, extending as they do over a general assortment of hardware and tinware. For shipment in March orders for nails, barb wire, hinges, etc., continue to be freely placed, while the enquiry for spring specialties, such as milk cans, churns, garden tools, green wire cloth, screen doors, etc., is of a most satisfactory character. Trade in metals for shipment from stock has not shown much improvement, but early import orders are fairly numerous. Glass to be delivered in June meets with good request, the demand for the lower qualities being best. Business in plumbing goods and gas fixtures is flat. No further changes have taken place in prices since our last report; we should, however, make one exception to this general statement, as barb wire is slightly weaker and jobbers are offering it at 2⅞c., with freight prepaid on lots of 100 lbs.

HIDES AND SKINS.—It is exceedingly difficult to size up the hide market at present. Farmers cannot afford to pay higher prices. The grubby season has commenced, and yet local quotations are maintained. Large sales of packer hides have recently been made in Chicago. "Within a period of about two weeks," says the *Review*, "the packers have sold considerably more than 100,000 hides. The most recent sales were of Texas steers at 7½c., and branded cows at 5½c. The ¼c decline in native butt-branded and Texas steers and branded cows is in point of fact no decline at all when the quality of the hides is considered." On Monday of this week sheepskins were advanced 5c., and now stand at 75c. Tallow is weaker, and sales are being effected at a decline of ¼c.: rendered is quoted at 5¼ to 5⅜c. per lb.

LEATHER.—Manufacturers are now beginning to take stock for the season's wants. They are naturally unwilling to fall in with the spirit of the leather market and pay the advanced prices which tanners justly demand. Transactions have, however, been made at higher values. Glove grain, which has been selling at 9c., has been disposed of at 10c. per lb. For pebble leather, manufacturers are disinclined to pay the advance, although we are pleased to learn that some tanners have refused to do business on the old basis. One English buyer was in the market this week and purchased a quantity of splits. It is an encouraging feature to see English houses buying here direct and not soliciting consignments. Harness leather continues dull and prices low, and this without reason, for the trade is now carried on through so few hands that it would seemingly be an easy matter to arrive at an understanding to advance priees.

PROVISIONS.—Trade is slow and dull. The butter market is weak and shows no signs of better conditions in the near future. Choice tubs are quoted at 13 to 14c.; rolls at 12 to 13c., while all other grades of dairy make sell at 8 to 10c. Cheese is easy at 10 to 11c. per lb., with trade of a retail character. Hog products are easy all around, with long clear quoted at 6¾ to 7c. and hams at 9½ to 10c. Dried apples are firmer with sales at 5 to 5¼c.; there is but little movement in evaporated, although there are firmer tendencies. Eggs are weaker, and less is being paid for strictly new laid.

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A RETAILER'S ADVICE.

A successful grocer in the Quaker city, while abroad on the Atlantic, took occasion, according to an exchange, to write to Secretary Smedley, of the Philadelphia Retail Grocers' Association, and give to young grocers and aspirants for independence some good advice, as follows:

"A word of counsel to young grocers—first, study your adaptations; if you are adapted to the business and like it, then make everything bend to accomplishing success, but remember this can never be done unless you have in the first good moral habits; this is the first qualification; to my mind there is no such thing as what some would call luck. To my mind, based on experience, pluck is luck; the old adage holds good, 'Keep your store, and your store will keep you;' let this be a motto, and depend upon it you must succeed.

"Again, never buy more goods than you can pay for when the bill becomes due; never make a promise, without you first see your way clear to fulfil it. Always try and discount your bills; it will pay you!

"Do not allow salesmen to persuade you to buy what you do not see your way clear to sell before the discount season arrives. You will find this an excellent plan—first, because it makes more money for you, and all merchants hunt up the men that discount, with the bargains they have to offer.

"If you want to enlarge your business never do it by keeping your wholesaler waiting for his money; if you find it needful, go to some friend and borrow what you require and pay interest. By this means it enables you to be always independent and respected. That is the plan I adopted in my business life, and I recommend it to any young man; it is bound to succeed if these suggestions are adopted. Last, but not least, never lose faith in yourself, and aim high, and you will 'get there.' I will close with the words of Solomon: 'See'st thou a man diligent in business, he shall stand before kings, and not before mean men.'"

SUICIDE AND ITS CAUSES.

A review of a work on "Suicide and Insanity," published lately in a London journal, contains the following: Confining attention to recent years, we find from statistics based on the registrar-general's returns that in the period of 1867-88 (twenty-two years) the number of suicides has risen steadily. In the former year there were 1,316 discovered in England and Wales, and in the latter 2,308, showing an increase for the period of over 75 per cent. This steady and rapid increase of self-destruction, remarks Dr. Strahan, is "common to the whole civilized world. It is most marked in those countries which take leading parts of the world's doings, but it is noticeable in all," and particularly on the North American continent. And now as to causes. Dr. Strahan has fairly well demonstrated that "the cause of all true suicide lies in that degenerate condition which is the constant product of civilization."

"All that goes to make up what we call civilization, aided by drunkenness, gluttony, and all other vicious excesses, leads to degenerative changes in the organism, and it is from the abnormal condition thus acquired that arises true suicide and such allied evils as insanity, idiotcy, epilepsy and instinctive crime." Dr. Strahan has made an analysis of the several causes to which suicide has customarily been attributed, and the chief of his conclusions are "that intemperance can be charged with but a small portion of the increase," and "that the increased ferocity of the struggle for life cannot be set down as the cause of much of the additional self-destruction." The question then arises, to what are we to attribute the increase? and his answer is, "Hereditary transmission."

The importance of attention being given by medical examiners to the family history of applicants for assurance thus becomes apparent, and a closer scrutiny of this, in the light of the facts adduced by Dr. Strahan, might well be enjoined on all connected with the medical department of life assurance offices.

The difficulty of proving by statistics the part played in the production of suicide by heredity is insurmountable; but notwithstanding the efforts of relatives and friends to conceal the truth, enough is known to prove the soundness of our assertion—that the greater part of the increase in recent years is due to hereditary transmission.

Statistics of suicides, alluded to by the Paris correspondent of the London *Standard*, show that during the last four years 26,000 persons, three or four times the number in England, have in France put an end to their own lives; in Italy, with a population almost equal to that of France, the number of suicides during the same period has not exceeded 8,000. In seeking the reasons for this great difference, the well-known Parisian journalist, M. Henri Fouquier, explains that in Italy the Roman Catholic religion is still strongly rooted in the population, and that it acts as a deterrent against self-destruction. Formerly, in Italy, the body of a suicide was dragged through the streets and then exhibited on a gibbet. Moreover, if Italy is not so rich a country as France, poverty there is less severely felt and more easy to bear than in France, thanks to the Italian sunshine and blue sky. It is estimated that perhaps a quarter of the population of Naples, for instance, live in a state of poverty which could not be borne by a workman in Paris or in the towns of the north of France. In addition to this, mendicity is not, in Italy, regarded as either shameful or humiliating. Therefore, notwithstanding the extreme poverty prevailing in Italy, M. Fouquier is not astonished that it should lead but few persons to commit suicide. M. Fouquier points out that in Italy self-destruction is in most cases the denouement of a love drama, whereas in France, out of an average of 6,500 suicides a year, there are not more than about 300 that can be classed as suicides of passion.

In France, money, or rather the lack of it, is the cause of self-destruction. M. Fouquier considers that some 2,000 suicides a year may be due to insanity: but he points out that it is now demonstrated by the statistics that in France 4,000 persons a year, that is to say, about ten persons a day, hang, drown or stifle themselves with the fumes of charcoal, or blow out their brains because they are ruined, because they are prosecuted by their creditors, because they cannot earn enough to procure food and are dying of starvation.

NEWFOUNDLAND BANKS.

A special despatch from St. John's, N.F., dated 17th inst., to the Montreal *Gazette*, states that the condition of the Union Bank was disclosed in a report made by the committee. It is very bad. The liabilities are $3,464,900, and the assets $3,174,798, leaving a deficit of $290,000. This deficit will probably be much greater on realization. The bank may pay its creditors sixty to seventy cents on the dollar. The over-drafts of the directors reach nearly a million and a quarter of dollars. The loss on this item will be more than three-quarters of a million of dollars. The shareholders lose double the value of their shares. Much indignation is felt against the directors.

Another despatch to the same journal, dated Saturday last, says that a statement of the condition of the Commercial Bank was presented to the shareholders on the previous day. It shows assets worth 48 cents on the dollar. The meeting of the shareholders was very stormy, and the directors were denounced in strong language. The five directors who composed the board overdrew $1,250,000, and the total over-drafts amounted to a little over $2,000,000. Prosecution of the directors of the Union Bank has not yet been begun, but the Government has the matter under advisement.

PAWNSHOPS IN GREAT BRITAIN.

But few persons are aware of the enormous part which the pawnshop plays in the life of the British people. In no country in the world is more pawning done. It is estimated that the pledges amount to ten per head of the population a year, which would give 400,000,000 annually. The average value of the pledges is about 4s., which would mean that the loans amount to £20,000,000 a year. This estimate is not by any means exaggerated. At an inquiry held by a select committee of the House of Commons for the benefit of the pawnbrokers in 1870, it was stated by the chief witness who got up the evidence for the trade that in Liverpool there were 9,088,000 pledges taken in a year. On this same basis we might estimate that the number of pledges in London every year now will be about a hundred million. At the same inquiry the secretary of the Glasgow Pawnbrokers' Association stated that there were 6,960,000 pledges annually in that city, and that money lent amounted to £1,392,000.—*Finance Union*.

A PROPOSED AMENDMENT.

The second stanza of the British national anthem is rather shaky poetry, and also pretty tough sentiment for a Christian nation in these latter days of enlightenment and toleration. To be sure, it breathes something of the militant spirit of the psalmist in his most bellicose frame of mind, and it is not out of keeping with some British practices in the past. But the Toronto Presbyterians are doubtless wise and right in dropping it. How would a verse like this do as a substitute?

Oh, great John Bull, to thee,
Boss of the land and sea,
We tribute pay.
You'll rule by wile or might:
Your cunning's "out of sight;"
In bossing you delight,
For that's your way.

This may be no better poetry than the eliminated verse, but it has at least the merit of truthfulness to nature.—*New York Commercial Advertiser*.

FIRMS A CENTURY OLD.

One of the latest and not the least interesting of the retrospective societies of the United States, of which the *American Historical Register* is the organ, is the Association of Centenary Firms and Corporations. As the name implies, any firm that seeks fellowship in the association must be at least a hundred years old. The youngest member of the 31 firms that make up this unique society has just completed its century. It is the drug firm of W. H. Schieffelin & Co., of New York city. The oldest is more than two hundred years in operation, and is the Francis Perot's Sons Malting Company, of Philadelphia. Next to it comes the James M. Wilcox Paper Company, of the same city, which dates back to 1718. Among the other branches of business comprised in this list of venerable firms are publishing, milling, provisions, tobacco, pig iron, lead works, transportation, glass works, augers and bits, earthenware, snuff, seeds, tin and watches. Of the 31 firms represented, 21 have their home in Pennsylvania, 4 in New York, 2 in Massachusetts, 2 in Delaware, 1 in Maryland, and 1 in New Jersey. The condition of membership is that the business must have been for at least a hundred years under the control and management of the same family. Montreal has at least one firm that could claim (if the society were international) the right of admission—that of Gibb & Company. The *Gazette*, though nearing the close of the second decade of its second century of existence, has changed hands several times. There ought to be some old firms in Quebec. The Neilson family had an interest in the Quebec *Gazette* for nearly, if not quite, a century. Halifax, St. John, and Three Rivers ought also to furnish examples of centenary firms.—*R. V., in Montreal Gazette*.

A GOOD SIZED ISLAND.

In a recent paper Mr. Tyrrell, of the Canadian Geological Survey, reaffirms that this continent north of the Churchill River and east of the Mackenzie, is a great island, a statement that was denied by Father Petitot five years ago. The explorer of the Geological Survey says that from the large body of water known as Wollaston Lake emerge two almost equal streams, the one flowing to Lake Athabasca and thence by the Slave and Mackenzie Rivers to the Arctic Ocean, and the other to Reindeer Lake, and thence by the Reindeer and Churchill Rivers to Hudson Bay, the island thus formed comprising about one-third of the Canadian domain; and directly southeast is another large island and between Lake Winnipeg and Hudson Bay, the result of a bifurcation in the little Sandy Lake, which has an outlet to Hudson Bay through the Severn River, and another to Lake Winnipeg through Family Lake.

—"If I live long enough," he said, moodily, "I hope I'll get over being a natural mark for any bunko steerer that happens to be loose."

"What's the matter?"

"I concluded I'd have to economize, so I sent 50 cents to a man who said that was all he'd charge to tell me how to make a little money go a long way."

"And what did he tell you?"

"He simply wrote: 'Send five cents by express to San Francisco.'"

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE

ONE FULL YEAR'S PROFIT.

Sun Life

Assurance Co of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

TEMPERANCE AND GENERAL LIFE ASSURANCE COMPANY.

The following is a synopsis of the annual report which was submitted at the annual meeting of the company, held at its offices in Toronto on 23rd January, 1895.

(Detailed reports can be had on application at head office or to any agent of the company.)

The report shows an income from premiums after deducting payments for re-insurance of $129,199.34, and from interest of $13,475.72, being an excess in total income of $16,020.84 over the previous year's income.

The net death losses were 16 for $22,099, which was a loss rate of 3.8 of the average number of lives at risk, and $4.02 per $1,000 of the average amount of insurance in force.

Briefly stated, the company's cash income for the year was $142,675.06, while its net death losses, payments for surrendered policies and expenditures for all other purposes, amounted to $86,881.92, leaving the handsome sum of $55,793.14 from current cash income for permanent investment.

Referring to the company's assets, the report says:—

"We did not have a single dollar's worth of real estate on our hands or a single dollar of interest overdue and unpaid.

"Our assets at the end of the year amounted to $365,566.71, being an increase of $67,144.38 over what they were at the end of the previous year."

The liabilities of the company were $284,826.99, being an increase of $47,467.03 over the previous year. This was an increase of 41.5 per cent. more in assets than in liabilities.

One thousand eight hundred and thirteen applications for $2,100,000 of insurance were received, and 1,634 for $1,883,725 were approved.

At the close of the year the company had 4,793 polices in force on 4,519 lives for $5,877,958.51, as follows: There were 3,650 policies in the Temperance Section for $4,256,879.51, and 1,143 policies in the General Section for $1,621,079.

A division of surplus to the amount of $6,726.44 was recommended to take place amongst the policies entitled thereto, those in the Temperance Section being entitled, according to the experience of the company, to one-third more on similar policies than those in the General Section.

A dividend of 5 per cent. was declared on the paid-up capital.

The concluding sentences of the report are as follows:

"So far, this year, not only has the payment of our outstanding and deferred premiums been more prompt and satisfactory than in any previous year, but the amount of new insurances applied for has also been in excess of any previous year's record.

"We have pleasure in referring again to the loyalty and efficiency of all the members of our office and field staff. They have our fullest confidence and deserve our highest commendation.

"Independent audits have been regularly made by the company's auditor, and by the auditing committee of the board, whose certificates are attached to the financial statement and are warrants for its correctness and for the correctness of our accounts.

"By section 9 of our Act of incorporation, all the directors retire, but are eligible for re-election."

GEORGE W. ROSS, President — H SUTHERLAND, Manager

CONDITION DECEMBER 31ST, 1894

4,793 policies in force on 4,519 lives for	$5,877,958 51
Assets at present value	365,566 71
Liabilities	284,826 99
Surplus to policy-holders, not including $40,000 uncalled guarantee capital	80,739 72

The following gentlemen were elected directors:

Hon. G. W Ross, LL.D, Hon S H Blake, Q.C., R. McLean, P. H. Burton, Thomas Caswell, barrister, William Waterworth, George H. Wilkes, W. H. Bowlby, Q.C., LL.D., J. Lyons Biggar, W. Nattress, M.D., Joseph A. Fife, M.D., Joseph Williams, A. J. Wilkes, Q.C., LL.B., J. A. Robertson, M.D., H. M. Pellatt.

At a subsequent meeting of the directors the former officers were unanimously re elected

THE ANTIQUITY OF WEIGHING MACHINES.

The origin of the balance is lost in the haze of antiquity, for in some form or other, however primitive, it seems to have been known to most nations. Indeed, the use of a balance is such a primary essential in commercial affairs, that it is difficult to believe that any nation or race, with a pretence to civilization, could long exist without it. In the early times, merchants were obliged to carry a balance and set of weights about with them chiefly for weighing the bars of metal which they exchanged for goods. Thus it is clear that a standard of weights must have been agreed upon. Deceit, however, was also known and practised, for dishonest traders carried two sets of weights: one to buy with and the other to sell with. It would appear, therefore, that a perfect Weights and Measures Act and a sound system of inspection were as much needed then as now. A thousand years B.C., King Solomon said, "A false balance is an abomination," and five hundred years before that, a Scriptural request was written, viz., "Let me be weighed in an even balance."

The Jews were most probably taught the use of the balance by the Phœnicians and Assyrians. The Chinese date the origin of their balance—or steelyard—back to a prehistoric period, and as, with many other things, they attempt to make the prehistoric invention serve the nineteenth century.

—A delegation of players from the company visited the manager. "We have come, sir," said the spokesman, "to ask you on behalf of ourselves, that a portion of the part played by Mr. Jackson be cut out." "What portion is that?" "Where he wants to borrow $5 from the disguised duke." "What's the objection to it?" "A very serious one, sir. He rehearses the part on us, sir, every time he thinks any of us has any money."—*Detroit Free Press.*

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE Patrons of Industry have invaded New Brunswick and established their first lodge at Middle Sackville with 16 men and women.

THE Montreal Transportation Co. held its annual meeting recently, when the report upon the business of 1894 was presented and approved, and the former board of directors re-elected.

Mr. D. MORRICE stated on Friday last that "the cotton mills at Hochelaga and Ste. Anne's are working full time, and there is no change in the strength of the working force from what it was in the corresponding period of 1894."

NOT a pleasing statement to read, that made by the assignee of the British America Starch Company at Brantford. The liabilities footed up $53,207, and the dividend was $532, about a cent on the dollar. The creditors were sixty-two in number; the bank for $21,216; George Foster for $17,360; the Michigan Central Railway for $2,198, and fifty others for sums varying from two dollars to a thousand. All that the assignee realized from stock was $5,000, and from machinery and book debts $640. Out of this he paid wages and salaries, $2,173; trustees, $2,314; lawyers, inspectors, the sheriff and himself, so that there was but $532 left for creditors. Accordingly one cent in the dollar dividend is declared.

Mercantile Summary.

A GAIN in population equal to about twenty per cent. in three years is shown by Brantford. When the census was taken in 1891, Brantford had a population of 12,753. According to the latest figures, its inhabitants now number 15,679.

WOOD pulp from Nova Scotia is being shipped to the British market per steamships "Ulunda" and "Barcelona," which left Halifax last Friday and are booked through to Manchester by way of the Manchester Ship Canal.

THE annual meeting of the Ontario Natural Gas Company took place the other day at Walkerville. The former officers were elected, as follows: President, Hiram Walker; managing director, Dr. S. A. King; directors, H. A. Walker, C. M. Walker; general superintendent, S. T. Copus.

THE Richmond Industrial Company has made application to the Quebec Provincial Government for a charter. The object of the company is to take over the business of the Richmond Water Power and Manufacturing Co., and the capital is to be $100,000. Messrs. L. Thomas, M. B. Bourne, W. E. Jones, J. M. Nunns, H. A. Allan, K. A. Cummings and F. H. Nunns, of Richmond, Melbourne and Coaticooke, are the parties interested.

Mercantile Summary.

THE Tilbury *Times* notes that honors came thick and fast on Mr. W. C. Crawford of that place on New Year's day. His employés presented him with a gold-headed cane, and the electors of the village presented him with the highest gift in their power—the reeveship of the village—by acclamation.

IN 1892, L. Wartelsky removed from Montreal to Carleton Place and opened a clothing store. He has just assigned. It is said that free crediting to peddlers has had a good deal to do with his failure.——Joseph Larocque, a baker at Glen Robertson, Ont, has failed with small liabilities.

MONTREAL failures for the week are unimportant. George Lafranchise, butcher, has assigned, owing $5,040.——P. F. O. Charlebois, a grocer in St. Henri suburbs, is also reported insolvent, and shows an indebtedness of $3,112.——H. Pelletier, the retail dry goods merchant, reported failed a week or two ago, has made an offer of compromise at the rate of 60 per cent. spread over a year.——Cyprien Dumouchel, hotel-keeper, is offering $350 to pay liabilities of $3,500.——J. M. DeRepentigny, grocer, who bought out A. Rolland just about a year ago, has assigned.——J. S. Smith, fancy goods and crockery, has assigned on demand.——L. P. Lavoie, grocer, is offering 25c. on the dollar, cash, on liabilities of $3,400.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

A QUEBEC dealer in peddlers' supplies, C. Bernfeldt, is in embarrassed shape, and is endeavoring to arrange, as best he can, with creditors, some of whom hold partial security He owes about $2,300.——Jean Paquet, of the same city, flour and grain merchant, is offering a compromise at the rate of 30 per cent. cash on liabilities of about $2,500

THE Electric Match Company, of Louiseville, Que., a style adopted by Messrs. C. Trepanier and Edmond Bourret, has assigned They had a fire on Dec. 22nd last, and their failure is due to loss then sustained. The liabilities are only about $2,500 ——Gustave Joly, general dealer, St. David d' Yamaska, whose failure we lately noted, at a meeting of his creditors last week offered 45 cents on the dollar; liabilities $6,782, assets apparent $5,790

FOR the fiscal year ended with June, 1849, the return of the tramway expenditure in the British Islands showed but slight increases The total length of line opened at that date was 975 miles, a growth of 15 miles in the year; 772 miles of this was in England, 115 in Ireland and 88 in Scotland. The capital was increased from £14,104,000 to £14,388,000 The gross receipts were £3,615,837 and the working expenses £2,859,056 or 79 per cent. Net receipts were 5.26 per cent. of the capital expenditure, as compared with 5.45 per cent. in 1893. The number of passengers carried was 616,972,830, an increase of eighteen millions on the number carried in the previous twelve months.

FROM the lower provinces comes advice of the following failures: W. J. Davidson, a lumber dealer of St. John, N.B., is offering his creditors 33⅓ per cent. cash on liabilities of $7,000. He has been in business on his own account only two or three years.——P. J. Dwyer, who began the tailoring business in Halifax four years ago in a modest way, has assigned. He has made preferences amounting to about $800.——The creditors of L. & E. Hart, of Guysboro', dealing in general goods and fish, held a meeting of creditors some few days ago at which liabilities were stated at $20,000, assets $11,000. The firm has made a proposition to pay 40 cents on the dollar. The business was originally established by Wm. Hart, who failed, the estate being bought in by the present firm in 1885.——Andrew Nisbett, of Sydney, N.S., doing a small business in groceries and flour, has assigned for the general benefit

THE assessment of Hamilton for 1895 shows an increase of $463,300. The total this year is $25,155,020, as compared with $24,691,720 last year, an increase of $463,300.

RECENT assignments among Ontario traders are those of W. H. Wooden, carpenter and lumber dealer at Burford; William Precious, grocer, St. Thomas; G. B. Belden, dentist, Seaforth; Monroe Miller, hotel keeper, Webwood; John Johnston, shoes, St. Mary's.

—AT Sherbrooke, the ratepayers voted last week upon a by-law to grant $30,000 to the Jenckes' Machine Company. It resulted in the by law being carried by a large majority, there being 67 votes representing assessments of $351,395 in favor of the by-law, and 2 votes representing assessments of $6,000 against it.

VILLENEUVE & FRERE, a somewhat prominent dry goods concern in the St. Sauveur suburbs, Quebec, have assigned on demand. They began business nine years ago, and had worked up quite a trade. Last August they got behind, and then arranged $36,000 of liabilities at 70 cents in the dollar, on time, but this settlement they have not been able to complete.

THERE is some stir among the ruins of the late big fires in this city. Mr. S. F. McKinnon is pulling down the burnt walls of his new building, and as soon as matters are adjusted with his contractors re-building will be commenced. The firm's present location is in the premises formerly occupied by Messrs. Bryce, McMurrich & Co., Bay street.

IN 1893, T. A. Wood began as a grocer in Brockville, being assisted to start by his father, in whose favor a chattel mortgage was registered last fall. He has already assigned.——J. Finner, for many years in the custom shoe business at Renfrew, Ont., has failed.——Fitzpatrick & Phillips, tailors, Gananoque, whose assignment we noted lately, are offering their creditors 25 cents on the dollar.

A SECOND failure has been made by Durno & Co., dry goods dealers at Acton. In July, 1893, R. A. C. Durno, formerly a clerk in Toronto, started this business, but we find he was not successful, for he was obliged to assign a year ago. Then his wife purchased the stock at 50 per cent. Now she, too, assigns.——In 1882, A. D. Mitchell opened a general store at Newbury. Six years later he moved to Glencoe. In this place be erected a brick building, and, apparently, in consequence of this he was obliged to assign.

IN Toronto there are several important failures to notice. The principal one is that of Foster & Pender, dealers in carpets, etc., alsc T. G. Foster & Co., in upholstering supplies. This business was started in 1880. At that time Foster was estimated worth about $3,000 and his partner about half this sum. The business was gradually increased and seemed to prosper, as their statement a year ago showed a surplus of $65,000. Since then some heavy losses have overtaken them. This with severe competition and dull trade, has obliged them to assign.

—AFTER a business career of fourteen years, under different styles of partnership, Hinch & Co., dealers in dry goods, etc., in Napanee, have assigned with liabilities of $60,000. Their assets are composed of stock, $30,000, book debts, $4,000, and real estate stated to be worth $35,000. In 1892 they claimed a surplus in business of $34,000; beside this they had an equity in real estate of $15,000. They always did a large trade with apparently small profits.——An assignment has been made by W. R. Watson, of Woodstock, who has been in grocery business three years, and had no previous experience. ——A compromise is offered by Wm. Sloan, jeweller at Milton, who assigned three weeks ago.

A MEETING of creditors has been called by McSween & Russell, hardware dealers in Leamington, who have been doing business as a firm since November, 1893, when they bought the stock of C. E. Brush, paying more than it was worth.——Another hardware firm anxious for the advice of their creditors is R. Story & Co., of Barrie. Last August they claimed a surplus of $9,000. About a week ago they were urged to pay up. Instead of doing so, they mortgaged their stock for $3,800.——A third meeting of creditors called is that of J. S. Macrault, dry goods dealers in Strathroy. The firm to whom they were principally indebted advised this course.

—IN October, 1885, James Robertson retired from the Toronto dry goods firm of Simpson, Robertson & Simpson with $11,000 cash. This with some Manitoba lands were estimated to be worth $15,000. In June of the following year he bought the dry goods bankrupt stock of Carrie & Sons at St. Thomas. Ambitious to do a larger business, a branch store was opened in Simcoe in 1892. This venture was not a success, and in March last his creditors were called together in this city. His statement then showed liabilities of $58,000 and nominal assets of $80,000. He was then granted an extension of fifteen months. Failing in this arrangement, he again assigns, with liabilities of $48,000 and nominal assets of $54,000.

SEVEN years ago J. W. Dale started a general store in Mitchell with but small capital, and not adding to it, he is now obliged to assign.——Robertson Bros., who were in Whitby, removed to Moosejaw, Alberta, where, in 1884, they closed their business and went to Newmarket. In 1887 a dissolution took place, J. Robertson retiring. Since then Andrew has continued, and not content with a small trade, opened two additional stores. Besides looking after these, he became president of the Newmarket Light & Power Co., all of which was evidently too much for his resources, for he now assigns

AN assignment has been made by Tristram Chislett, general storekeeper at Flesherton Station, who does not owe much.——The bailiff has sold for rent the stock of J. B. Latremoille, confectioner, in Hamilton.——In 1888 J. S. Lillis failed in Hamilton as a cigar maker. Afterward the business was carried on by a joint stock company, composed of hotel keepers and others, under his management. Some of these hotels lost their licenses a year ago, and this resulted in a loss to the company, which now assigns.——The bakery business of E. Waspe, London, has been mortgaged for some time, and the assets are now sold to realize the amount of the claim against him.

"A CALENDAR good for a hundred years" sounds strangely. But it very nearly describes the useful little vest-pocket pamphlet issued by the Western Loan and Trust Company of Montreal, called *The XIXth Century Calendar*. This contains a series of calendars on a dozen different pages. One of these calendars will answer for three different years of the present century; another will answer for 11, and so on. Thus, if one wants to know the date of any particular day of any year of the present century, he turns to an index page, and opposite the year in question finds a number indicating the page of the calendar that will tell him what he wishes to know. The leap years are shown in distinctive type, and have special calendars.

power of a mortgage. This man must have been rather unfortunate when it is remembered that he started with a capital of $2,500 seven years ago.——After the way he neglected his jewellery business at Stirling during a couple of years, no person that knew the habits of J. J. Knowles will greatly wonder that he has assigned.

RECENT advices from Newfoundland report Taylor, Finlay & Co., commission, St. John's, as offering 50 cents on the dollar.——The embarrassment is also reported of C. W. Ross & Co., dry goods dealers at Harbor Grace, their chief creditors being Patterson & Foster, of that place, of whose general business this was once a branch. ——John Munn & Co., the extensive fish and general merchants of Harbor Grace, are understood to be offering their creditors 40 cents on the dollar; 20 cents payable in July, 1895, 10 cents in Dec., 1895, and 10 cents in Dec., 1896. The liabilities amount to over $800,000. A meeting of creditors was held in St. John's last week, and most of the local creditors seem favorable to the offer, but it will be some time before the settlement can be fully consummated.

ON Monday last not a little surprise was in store for the wholesale dry goods trade when the sudden departure from this country of Clinton S. Herbert was announced. Over one hundred firms seem to have been more or less interested in this enterprising individual. Formerly a dentist in Detroit, where he made some money and was the principal stockholder in the house of Winans & Co., dry goods dealers, shortly before coming to Toronto he disposed of his stock there, receiving $27,000 cash for the same. He claimed that this, with a peach farm he owned, made him worth about $38,000. About ten days ago he stated to one of his creditors here that he had invested about $25,000 in the business when he started in August last on Yonge street, corner of Shuter. At first his purchases were cash, and since then they were mostly made on thirty days' time. Before leaving, he disposed of his stock to Nicholas Garland at 60 per cent. discount. Injunction to upset the sale has been applied for.

THE LAST OF THE 1894 CLIP.

Two weeks ago Canadian wool merchants canvassed the factories of the Eastern States for trade in vain. They were unable to obtain bids which would cover the purchase price and allow even a fair margin of profit to themselves. However, the past week has witnessed a change in the situation. The representatives of large American factories visited Toronto and bought up all the available Canadian fleece wool. A Lawrence, Mass., firm had early in the season purchased wool in Toronto, and it has remained in store here since. This was sent forward this week, and the combined shipments amounted to 175,000 lbs., the great bulk of which was sent out by John Hallam. From Toronto the American buyers passed on to Hamilton, where, although we have not been able to obtain figures, it is believed still larger purchases were made. Although the shipments do not appear large, coming as they do when the season is well advanced, they practically exhaust the stocks of this description of wool held in Toronto. Needless to say merchants are much encouraged by these events. The prices paid are considered very satisfactory, the bulk having been bought, we believe, at 20c. per pound.

THE SITUATION.

In his Galt speech, Mr. Foster's reply to Mr. Laurier on the tariff question took the form of a synthesis, in which were marshalled an array of figures showing the increase of the trade, external and internal, of the Dominion, since the adoption of the National Policy. This form of proof is good when it is direct: here it has taken a little too much of an uncertain side-wind. All must allow that the figures are, in many respects, quite formidable. The object of contrasting the trade figures of 1879 with those of to-day is presumably to show that the increases noted are due to the tariff policy. It is this which gives them point and significance. In view of the use made of the figures, it is necessary to be certain that the increase of foreign and domestic trade was due to the cause assumed. This, however, is evidently not the fact in all branches of the expansion. If the foreign trade has increased, it is too much to ask us to believe that the increase is due to the policy of restriction: it must have taken place in spite of restriction. The increase in the imports is due to something else than the discouragement of increased duties. The increase of the cheese exported between the two periods is noted; but if we sold $18,000,000 worth of cheese last year in foreign markets, we had to meet the competition of the world when we got there, and duties on imported cheese could in no way affect this industry. Protection has, to some extent, increased the quantity of farmers' produce consumed in Canada; but if we would arrive at the exact truth, we must take only the increased number of consumers caused by the tariff, and not the whole domestic consumption. The quantity of beef and bread which a farmer eat in 1879 and in 1894 would be about the same.

President Cleveland asks Congress to authorize an issue of $500,000,000 3 per cent. bonds to enable the Executive to sustain the credit of the Government. Should Congress refuse, the authority under which the late loan of $50,000,000 of five per cent. bonds were issued will be acted upon again. This the President makes plain. So long as bonds are made the basis of the issue of National bank notes, 3 per cents are preferable to bonds bearing a higher rate of interest. Gold continues to flow out of the Treasury at an accelerated pace, no less than $7,000,000 having been withdrawn last week. The stock of gold has run so low that it must be replenished, whatever means are taken to do it. A very little thing sometimes flutters the onlookers of the financial world, and this loss of gold has caused some foolish people to sell their United States' bonds. There is in the state of the national Treasury no cause for alarm. The President is bound to issue a new loan for whatever amount may be required, and it will not fail to find takers, if not on as good terms as the November loan, at a moderate rate. If the public credit depended upon Congress authorizing a new loan, difficulty might arise before the authority was given; if Congress were to act promptly now, it could do something to put affairs in a better shape, but hesitation, delay, or even refusal on its part to act, would not be fatal. The resources of the country are great, and the revenue in the past has been so ample that the trouble has been to invent wasteful schemes, such as an unheard-of addition to the pension list, for its absorption. If at last a temporary pinch has come, it can easily be got over. It is unfortunate that the depreciation of silver has rendered that metal unsuitable for money. If anthing could restore it to its former place, it would be the coining of a gold dollar which would contain a dollar's worth of silver measured by its market price. But the trouble is that the market price is variable.

A petition for the appointment of a Royal Commission to enquire into the state of Newfoundland has been signed by 15,000 of the islanders. The giving or refusing to give effect to this petition will depend upon whether the local legislature will endorse it or not. Without such endorsement, no commission is likely to be appointed. The Colonial Secretary has required this action as a warrant for issuing a commission. But it is conceivable that, if the petition were signed by a majority of the population entitled to vote, that fact might go far toward justifying the granting of its prayer. In his Listowel speech, on Wednesday, Mr. Foster expressed the hope that Newfoundland would soon become a part of the Dominion. When he gave expression to this hope, he must be presumed to have expressed the opinion of the Government. This simply means that the Government policy with regard to the acquisition of Newfoundland has not changed.

A bill respecting the Nicaragua Canal has passed the Senate of the United States. The company is called the Maritime Canal Company of Nicaragua; the capital is to be $100,000,000 in $100 shares. Five per cent. bonds to the amount of $70,000,000 may be issued, and as a consideration for endorsing them the United States Government is to receive $70,000,000 of the stock, which, in point of value, could scarcely represent anything, so speculative is the whole thing. In point of success, much would depend upon the completion or non-completion of the Panama rival. $6,000,000 of the stock is to go to the Government of Nicaragua, which grants a lease of the right of way for ninety-nine years, and $1,500,000 to the Government of Costa Rica. The remaining $22,500,000 is to be substituted for former issues, and to go for construction. The commerce of Nicaragua and Costa Rica is to be carried at half rates. The House has a separate bill of its own; the promoters of the Senate bill hope that theirs will, at an early date, be substituted for its rival. The fact that it is necessary to get the endorsation of the Government of the United States to float the bonds is a confession that the scheme has no independent financial basis.

At the meeting addressed by members of the Dominion Government at St. Mary's, on Tuesday, special stress was laid on the fact that the home market is the best market,

and the conclusion was drawn that the building up of a town population is in the interest of the farmers. The home market, it may be admitted, is the best, but it does not follow that the legislative authority ought to be exerted to disturb the natural balance between town and country. If the movement of population from the country to towns was spontaneous, and uninfluenced by legislation, the reasonable conclusion would be that it was best for all parties. But to offer indirect premiums for drafting men from agriculture to the factory is a different thing. What is chiefly to be considered, in this connection, is the welfare of the mass of the population. Whether is the choice of modest independence greatest for the man who takes up his home on such a quantity of land as his own labor and that of his family can cultivate, or of the ordinary factory hand, liable in time of overproduction or crisis to be left without the means of employment and of existence? The increase of a town population is desirable within certain limits and within those limits only. If the natural balance be destroyed by artificial contrivances, evil is done. Protection is not responsible for the whole of migration from farm to factory; agricultural machinery has done its part. But the fact that the migration has gone too far is shown by a scarcity of agricultural labor, and the disproportion between its cost and the price of farm produce. Still, that the men drafted to the towns have by that act got on a more certain road towards independence, is what has yet to be proved.

SPEECH OF THE PRESIDENT, TORONTO BOARD OF TRADE.

Of the numerous topics touched upon in the comprehensive address of the retiring president at the Board of Trade meeting on Wednesday, none seems of greater importance to Canadian business men than the Grand Trunk Railway, and certainly none attracted more attention or evoked more applause, on the occasion in question, than Mr. Blain's references to that road and suggestions concerning it. That a railway burdened with the enormous capital of $105,000 per mile of road (while the Canadian Pacific's is $51,000, and the United States average $63,000), afflicted with too many unprofitable leased lines, and further handicapped by being controlled on the other side of the Atlantic, should not give satisfaction to either its shareholders or its patrons, is no marvel. One of the greatest reliefs possible to the harassed Canadian management of that road would be, we should think, a readjustment of the excessive capital of the Grand Trunk and the removal of the head office to Canada. And nothing short of this is likely to lead to a satisfactory solution of its recurring troubles.

The Ontario Arbitration Act of 1894 is approved as furnishing a simple and speedy means of settling disputes between business men, and is referred to as one of the first steps in the direction of law reform. Mr. Blain criticises the gentlemen of the long robe in respect of the tedious and costly legal processes in use among us, and demands that the whole method of procedure be cheapened, expedited and simplified. There are many, very many, who think as he does about the matter. If some move of the kind suggested be not made, it stands to reason that litigants will, in pursuance of the modern tendency towards economy of time and money, drift into simpler and cheaper modes of settling disputes than the present involved processes of our courts, with the frequent appeals and the bulky bills of costs. And something should assuredly be done to prevent the saddling of heavy costs upon defendants from whom they cannot in justice be demanded.

Cheaper postage in Canada is another subject in which the speaker was clearly in harmony with his hearers. We do not say that Canada should adopt a two-cent rate because the Americans have done it; we are not sure that the department can take that step just yet, for it would only mean more direct taxation to make up for the lessened sum collected by the pleasant method of letter stamps. But we do agree with Mr. Blain that the indiscriminate free delivery of newspapers and periodicals has tended to lower the literary taste and has actually injured legitimate literary enterprise by encouraging a host of vapid, weakly publications which are of no earthly use to either the business man or the family.

The idea of preferential trade with the British Empire, which the Toronto Board of Trade early approved, finds favor with Mr. Blain. "I regard," he says, "a judicious movement towards securing materials and markets within the Empire as a wise and prudent policy, even if it does involve a slight additional outlay." He would establish a reasonable preference as against the rest of the world which would "expand British commerce with great rapidity and insure the continuous occupation of the industrial classes of the Empire." If we could be sure it would do all this the experiment might well be made. But to fulfil one of the requisite conditions assumed by Mr. Blain, and have "all unnecessary restrictions from within removed," would tell very hardly against our restrictive tariff.

Referring to the trying character of the year to our business men, the excess of competition, the lack of adequate profit, the shrinkage in values of commodities—which he puts at 38⅓ per cent. in Canada—the numerous failures, Mr. Blain is disposed to regard 1894 as the most unsatisfactory if not the most disastrous year since Confederation. He properly urges a reduction by the Government of the artificially high rates of interest paid its depositors, and he thinks our bank rate of discount should come down to place us on an equality with other countries in that regard. The conclusion of this able address is in the sensible words: "Retrenchment should be the motto of business men until trade is restored to normal conditions."

THE DRY GOODS TRADE.

What the spring months have in store for the dry goods trade cannot at this season of the year be foretold. But if our interpretation of the signs be correct, the dry goods business of the spring of 1895 will be conducted under improved and more healthy conditions. There will be no "boom" in dry goods. This much is already settled. People are not going to jostle one another in their anxiety to buy goods. Nor do we desire a boom, for coming so soon after a period of industrial depression, it must quickly collapse and bring with it all the evils attending a reaction.

In so far as we can learn, importers have been uniformly careful in their purchases of goods for the coming season. "A burnt child dreads the fire," and we shall be greatly disappointed if, at the end of the season, there is, as has so often been the case, a plethora of goods on the market to be disposed of at slaughter prices. There need be but little fear that importers have gone to the other extreme, and that there will not be enough goods to go around. For although this may happen in certain lines, so perfect are the means of communication and transport, that nothing more than temporary inconvenience will be experienced from this source.

The wholesale trade are not alone inspired with a conservative feeling; retailers have been equally cautious. Although a number of orders have been placed for early shipment, the retail trade generally has expressed a desire to hold off and wait until some idea of the trend of trade

can be obtained before they buy. The shipments of spring goods, up to the present date, are not thought to be so large as those sent forward during January a year ago.

Cotton goods are selling at unheard of low prices, and in all probability will continue to do so for some time. As every one knows, the depressed state of raw cotton markets has brought about the present era of low prices in manufactured cottons. There are those whose interest it is to predict an advancing cotton market, but the cotton "bulls" are having a hard time of it nowadays. The New York Cotton Exchange is uniformly reported from day to day as "dull and dragging," and while the volume of Manchester trade is fairly well maintained, values are low and the situation uninteresting. In all probability planters will restrict their seeding operations for the next crop—raising cotton at present prices cannot be profitable—but even this consideration has failed to arouse the enthusiasm of the buyers in the cotton markets.

Woolens follow closely in the wake of cottons, if they do not pass them, in regard to low values. Knit goods, hosiery, underwear, and gloves, whether of domestic or foreign make, of inferior or superior quality, are selling at prices under those of last year. Tweeds were never lower. There has apparently been an over-production of blankets, and the failure of several manufacturing concerns has thrown stock on the market to be sold at bankrupt prices. Are improved conditions in woolens a probability of the near future? We fear not. The wool market is depressed, and even should it show improvement, since most manufacturers have obtained their raw material for the year at present low prices, the force of competition will prevent any marked advance being made in the price of woolen goods.

Flannels are nothing if not cheap. Since the great break in prices last fall brought about by the competition of flannelettes, prices have ruled low, and must now be dangerously near the cost of production. There is apparently little profit in making flannels, for some of the manufacturers, we understand, are turning their energies into other branches of the textile trade.

SEPARATE SCHOOLS IN MANITOBA.

A thorny question about Separate Schools in Manitoba has once more been brought to the front by a decision of the Privy Council, to the effect that the Catholics have a right of appeal to the Governor-General in Council. What the Governor-General in Council can do in answer to the appeal, if anything, no one seems to know. But it is quite clear that there are certain things in connection with Manitoba schools which they cannot do. Manitoba has elected to have only Public, to the exclusion of Separate Schools, and her right to take this position has been confirmed by the Privy Council, in last resort. The Dominion Government can act only within the limits of its constitutional authority; it cannot usurp legislative authority which belongs to the province. If it called Parliament to its aid, supposing it had power to do so, Parliament could not usurp functions which belong to the legislature of the province. The suggestion has been thrown out that it might pay a part of the Dominion subsidy receivable by Manitoba to the Roman Catholics for the support of Separate Schools. But what would be the nature of such a transaction? Would it not involve the assumption and the exercise of the right of the Dominion to appropriate a part of the revenue of the province? No such right exists. Could the Dominion divide between Common and Separate Schools the lands set apart for schools in Manitoba, lands which were given by the Dominion, and are now held in trust for a specific purpose? This, presumably, would not the less exceed its powers. It is quite possible that the Dominion Government may find there is no way of meeting the appeal of the Catholics for aid to Separate Schools in Manitoba. A grant by Parliament for the purpose will scarcely be proposed, and, if it were, the result of a vote might not be favorable. It is difficult to see how the Roman Catholics can make their victory fruitful in securing the pecuniary aid which it is their object to obtain. There is an opinion abroad that the decision of the Privy Council may lead to a general election before another session of Parliament is held. In that case, the Government would find it necessary to go to the constituencies with a definite policy on this question, and whatever form it took it would be an inconvenient thing for an election issue. This Manitoba school question may to some extent overshadow and obscure the tariff question, if both issues should be presented to the electors at the same time. Whatever the Dominion authorities may do, or aim at, in the premises, there is no prospect that Manitoba will recede from the ground she has taken in favor of one system of Public Schools for the whole province. But the Dominion authorities are likely to wait till the province has an opportunity of acting or refusing to act, which will have the effect of causing further delay if nothing else.

THE A.O.U.W. AND THE I.O.F.

The January issue of the *Canadian Workman* returns to the attack upon this journal for commenting upon the difference between the Ancient Order of United Workmen and the Independent Order of Foresters, in the matter of the ages at which the members of the two societies depart this life. It says we have "vehemently opposed beneficiary societies for revenue, and made a deliberate false comparison between the A.O.U.W. and the I.O.F." But all the foundation it has for this charge that we are "deliberately false" is the very inconsequential fact that we happened to write *four* months, when we should have written *three* months, as the period during which 85 deaths occurred among the I.O.F. It was not a matter of the time during which, but the ages at which, the deaths occurred. Therefore, to make such a bluster about a trifle of that sort, or about age 20 having been mentioned instead of age 21, is only a waste of the *Workman's* valuable space, unless it does the "herring" duty for its readers. Such denunciation furnishes nothing to explain away the force of the figures we presented. Nor does its ludicrous charge, again trotted out, that this journal has been "stuffed by the I.O.F.," solve the problem with which the organ has been confronted—the why and the wherefore of so many old men being found in its list of monthly claims. Neither is its case helped any by saying "one-seventh" in its December issue, and in its January issue coolly assuming that it said "seven per cent." One-seventh of $77.00, for example, is $10.00, but seven per cent. of $77.00 is only $5.39. It seems necessary to be thus explicit, because the *Workman* now declares that it "made no error in its one-seventh." What it said in December was: "The A.O.U.W. has therefore a working expense of a fraction over one-seventh of its death payments." What it says in January is "our running expenses were a fraction under six per cent. of our death payments (not a fraction over seven per cent.) as against the I.O.F. with a fraction over fifty per cent." And thus it goes on correcting its own blunders of its previous issue, leaving the impression that they were ours. But since the *Workman* thinks it of so much consequence to have it shown that in four months there were more than 85 deaths in the I.O.F., we will now repeat the

comparison once more for its benefit, using not 83 and 85 cases, as in the original table, but using all the cases found in the past seven months—July to January inclusive—for the Workmen, and for the four months September, October, November and December, as published in the *Forester* for those months. We hope this will please the organist, and that it will not longer try to evade the point brought out in our first article, which indeed the following figures serve to still further emphasize, viz., that the A.O.U.W. in Ontario is showing itself to be largely composed of old men :—

AGES AT DEATH OF 110 MEMBERS OF THE A.O.U.W.

Months.	Under 35.	35 to 45.	Over 45.	Total.
July	0	3	16	19
August	2	7	11	20
September	1	3	12	16
October	0	3	11	14
November	2	6	7	15
December	2	4	6	12
January	0	6	8	14
Totals	7	32	71	110

AGES AT DEATH OF 131 MEMBERS OF THE I.O.F.

Months.	Under 35.	35 to 45.	Over 45.	Total.
September	14	8	6	28
October	12	5	4	21
November	16	11	9	36
December	21	14	11	46
Totals	63	38	30	131

Now if these figures do not show that there are more old men, 45 years or older, in the A.O.U.W. than there are among the same number of members in the I.O.F., we would thank some one to tell us what lesson they teach. It seems to us that they must mean that the older men throughout the province have seen a bonanza in getting into an Order where the young men will have to pay as much and as often as the old men during the short time the old men have to live. Also, that the young men have fought shy of this Ancient Order for that very reason, and have not been willing to stand in for forty years of increasing assessments, as against the ten or twelve years within which their fathers' and grandfathers' certificates and cheques are likely to meet each other. Take the case of the late George H. Hart, of Picton, dying at age 62 of paralysis in November last, and consider that there were young men in this city, and there may have been one or two in Picton, paying the same assessment, though only 21 years of age. The one, when paying the past year's assessments, had an expectancy of only 12 years and a fraction, while the others had an even chance of 41 years and a fraction. What wonder that the men who are so liable to old age diseases, and who could not get into any other insurance society, should cling to the Order with a death grip, and that the other class should be careless about paying the, for them, very heavy assessments, and be frequently found in suspension, or entirely out of the Order. Would it not be strange if it were otherwise? If there were no question of morality involved, we would say to every man in Ontario who is approaching 45 years of age, get into the nearest A.O.U.W. lodge as quickly as you can, and once you are safely in, persuade as many young men as you possibly can to do likewise. That is the way to put your hand in their pockets for most of the means with which to leave $2,000 to your family. Capital scheme—for the old men. But why should it surprise anybody to find that the young men soon see through the trick, and keep their hands on their purses when invited by men old enough to be their grandfathers to stand in to be fleeced in that fashion. The wickedness of the thing has only to be exposed to cause its attractiveness for young men to be lost. And it is about time some of the old men who have consciences should insist upon the foundations of the Order being recast upon equitable principles. The seventh annual session of the Grand Lodge for Ontario is to be held in Toronto on Wednesday, the 20th of February. There are no less than 29 amendments to the constitution and rules already on the notice paper, including one to issue certificates for $1,000, as well as for $2,000. But there is not a single intimation of one in favor of graded assessments. We shall see if there is a single representative to the Grand Lodge with a conscience enlightened enough to be willing to do justice by making a move in this direction.

Now, as between the A.O.U.W. and the I.O.F., we have nothing to say against the one or the other as fraternal societies. This journal is a strong advocate of fraternal organizations, as such. But we show our friendship to those which introduce counterfeit, or bogus, or unsafe schemes of life insurance, by advising their remedy before it is too late. No journal in the land more repeatedly and consistently warned the Masonic Order of the disaster the brethren were bringing on themselves who continued in connection with the now broken down London Masonic Mutual, founded as it was upon the nonsensical idea that the death losses could be kept below $15 per $1,000. In spite of our warning many of the brethren went on, and now some 1,500 of them find that the structure has tumbled about their ears, at a time when most of them are too old, or too infirm, to get new insurance elsewhere at any price. It will be the same, only far worse, in the case of both the societies named at the head of this article. In the one the inequity of charging old and young the same assessment is so transparent that no one need ever sympathize with them as their assessments rise to the destructive point. In the other, there is just enough counterfeit of the genuine, in its graded rates and small accumulated fund, to deceive the unwary, and to prolong its existence to a time when the crash and loss will be more disastrous and world-wide than would otherwise be possible.

A BANQUET OF FINANCIERS

The business of lending upon land mortgages money which had been gathered by societies from thousands of local depositors, has long since reached great proportions in Canada. And the demand for money for such purposes exceeding the local supply, Canadian managers of companies began, some thirty years ago, to seek for further capital in the London market and in Scotland. It did not require many years' experience to prove that money could be borrowed on debenture abroad and lent at a profit upon mortgages at home; and to-day there are not less than twenty-nine societies of the kind among us which are using forty-five millions of capital thus borrowed. It is a proud boast which these companies are able to make, and with perfect truth so far as we are aware, that not a dollar of this money has ever been lost to a creditor of a Canadian land mortgage company.

As the business grew, the companies became exposed to attempts at legislation, more or less hasty or ill-considered, on the part of lawmakers at Ottawa or in provincial legislatures—attempts which aimed at interference with contracts and which sought to impose, often unwisely, disabilities upon companies in their relations with their borrowers. The combating of such restrictions was for a long time left to individual companies, whose managers would trudge to the capital, session after session, to argue with purblind senators who were possessed with the notion that borrowed money was an injury to men who wish therewith to improve farms or build warehouses. This condition of affairs led, a few years ago, to the forming of an association of land mortgage companies in Ontario, which might, while consulting together upon matters of common right or interest, more effectively resist improper legislation directed against them. This association, now embracing thirty-five companies, has held yearly meetings of managers since 1887.

In anticipation of the 1895 meeting, a number of members of committee proposed to mark in some way the appreciation by the body of the services of their president, Mr. J. Herbert Mason, who has long been recognized as the leading man in matters pertaining to land securities in Ontario. And it was arranged that the testimonial should take the form of a complimentary dinner. This dinner accordingly took place, as we stated last week, in the Toronto Club, on Thursday, 24th ultimo. Fifty gentlemen, prominent in financial affairs in various parts of Ontario, sat down, and the demonstration was a notable one

in every way. The vice-president of the Land Mortgage Companies' Association of Ontario, Mr. H. D. Cameron, of Hamilton, occupied the chair. We are fortunate in being able to give the addresses of the chair and the response of the guest:

Mr. Cameron said:

"GENTLEMEN,—I propose the health of the guest of the evening, John Herbert Mason, president of this association, and president and managing director of the largest and most successful loan company in the Dominion. Mr. Mason is our Nestor. His company is now forty years old, and I hope he and we may be spared to celebrate his jubilee. The company which was founded by Mr. Mason may be regarded as the pioneer loan company. From small beginnings these loan companies have grown until now they control funds of over one hundred millions.

"No thoughtful person will fail to admit that these institutions have been of the very greatest advantage to the farmers and others of Ontario. They have been the means of introducing a large amount of capital into the country, an amount which if returned would materially raise the rate of interest to all borrowers. They have also provided for investors a safe and remunerative investment.

"It was felt that it would be to the advantage of all interested in loan companies that they should have an organization in which all land mortgage companies should be represented—an organization that would enable directors and managers to consult together on matters of common interest, that would enable them unitedly to resist hostile legislation, in short that would more effectually enable them to defend their rights. Such an organization was intended also to cultivate a friendly feeling among those actively engaged in the management of loan companies. Mr. Mason took a leading part in forming such an organization, and one was successfully formed, namely, the Land Mortgage Company's Association, and Mr. Mason was unanimously elected its first president, and has been so elected every year continuously since. The association owes him a great deal for the benefit they have derived from his long experience, his ripe judgment, to say nothing of his eminent natural financial ability. And the success of the association is greatly owing to his prudence, shrewdness, and his uniform urbanity.

"While the association may not have accomplished all that was expected from it, it has certainly done a great deal in creating a kindly feeling among the different companies, and it has successfully resisted unwise attempts made at legislation that was inimical to the best interests of the companies represented. It is quite evident that further attempts will be made by persons imperfectly acquainted with economic laws, to secure legislation that will not only be an injury to the loan companies, but ultimately to those whom such legislation is supposed to benefit. We ask no favors, no special privilege; all we ask is to be let severely alone, and to be allowed to conduct our own business in a just, straightforward and upright manner.

"Our worthy president has been in the habit from year to year of entertaining the members of the association at his private residence in a style which I am sure all who enjoyed his hospitality will agree with me in characterizing as princely. We thought it a proper thing to express in some way our appreciation of Mr. Mason's devotion and ability as our president, as well as of his generous hospitality, to tender him a complimentary dinner—hence our present happy meeting.

"Gentlemen, the health of Mr. Mason, our guest and worthy president."

Mr. Mason said in reply:

"MR. CHAIRMAN AND GENTLEMEN,—I thank you from the bottom of my heart for the exceedingly kind and flattering expressions which accompanied the proposal of this toast, and for the cordial manner in which it has been received. When I consider that this magnificent demonstration is not the outcome of a feeling of gratitude and satisfaction on the part of shareholders who may have reaped pecuniary advantages from my mental and physical labors, but is the unbought and unsolicited evidence of appreciation by and from my fellow craftsmen, each an expert thoroughly understanding the questions in which we have a common interest, and each in a position to indulge in honorable rivalry which puts us on our mettle and lends a spice to all business efforts, it would be mere affectation on my part to pretend that I am not deeply affected. No better testimony, no prouder ovation could be desired by any man, and I assure you that I regard this gathering as one of the proudest and happiest events of my life.

"For forty-five years it has been my fortune to be associated with land mortgage associations in one form or other. My first experience was with a Terminating Building Society, conducted on somewhat similar lines to those now springing up throughout the country, especially in this city. These societies got into disfavor, and it is only now that the memory of them has faded out that it is possible to revive them. The 'Canada Permanent' was formed on different lines, and after we obtained the Act of 1859, providing for a fixed and permanent capital, its character was entirely changed. Under that Act several new societies or companies were formed, the 'Freehold,' 'Huron and Erie,' and 'Western Canada' being among the first.

"The rise and progress of land mortgage companies in Ontario during the last forty years has been somewhat phenomenal. At that period there was only one company now existing which advanced money to Ontario landowners, and that was the Trust & Loan Company, then domiciled in Kingston. Throughout the country there was a great dearth of and a great cry for capital to assist in developing its resources.

"Farmers had small clearings, little or no stock, inferior buildings and rude implements. Manufactures and industrial enterprises were conducted on a small and very primitive scale. In cities, towns and villages buildings for dwellings or for business purposes were generally of wood, of an inexpensive character, devoid of taste, and defective in sanitary and other conveniences. Money was so scarce that throughout the country barter was the common medium of exchange.

"Only by the prospect of large profits could these companies get their stock subscribed. High rates of interest had to be paid for deposits, and of course high rates had to be charged. Not so high, however, as was then being paid to local individual lenders. We have redeemed mortgages bearing fifteen and eighteen per cent., and even more. I remember paying off a mortgage for $1,000 given in payment of $500, lent five years before, by a citizen of Toronto, who is now living. Of course, no other interest was charged. It was soon found that to get cheap money we must go abroad.

"Candian land mortgage companies now hold a deservedly high position in the estimation of British investors, higher than those of any country outside the British Islands, and obtain their capital at a lower rate of interest. This is partly due to the conservative character of the laws under which the majority of them are incorporated, and partly due to their generally good management.

"While they have been the means of distributing a large amount of capital to real estate owners in Ontario, and some of the other more progressive provinces, cases of failure have been exceedingly few, and not one has failed to pay its liabilities in full. Not a dollar has ever been lost by a creditor of an Ontario loan company, nor, as far as I am aware, of any Canadian land mortgage company. This is a record, Mr. Chairman, of which I think we may justly be proud, and which I trust will be perpetuated."

Although it had been planned, very fittingly, as we think, that no toasts should be proposed other than those of "the Queen" and the health of the honored guest, occasion was found during the evening for several volunteer addresses. Hon. Sir Frank Smith, Hon. Thomas Ballantyne, Hon. G. W. Allan, John Crerar, Q.C., G. R. R. Cockburn, M.P., Mr. S. Nordheimer, were all heard from in brief speeches, and a memorable and delightful evening was spent.

BANK OF NOVA SCOTIA.

Such agreeable happenings as the recovery of a sum, previously written off as bad, sufficient to pay three per cent. to one's shareholders, is not a frequent one to bankers. But such was the happy experience of the Bank of Nova Scotia last year. The net earnings of that bank for 1894 were $171,151, equal to 11.41 per cent. on the capital. With the addition, however, of $47,000 of an "old debt, written off as bad" and now recovered, the amount to be appropriated amounted to $218,151, which, with the sum brought forward from 1893, sufficed to pay eight per cent. dividend and to add $100,000 to reserve, making that fund $1,300,000. With two more years of like appropriation the reserve will be equal to the capital, a goal at which a bank's earning power is regarded as fully established.

This important bank has now close upon eleven millions of assets, of which $2,099,000 is invested in provincial, municipal and other bonds, and the best part of another million is in cash or fairly liquid assets. The overdue bills and other moribund assets are small. Of the liabilities to the public, $6,411,000 consist of deposits, barely one-fourth at call, and $1,160,000 in circulation. The proportion due shareholders is $1,500,000 paid capital, $1,300,000 accumulated earnings and the remainder dividend, payable this week. The bank has concluded its sixty-third year, and its position and extent of business do credit to the country.

NORTH AMERICAN LIFE.

The statement of its business for the year 1894, which was forwarded to the Superintendent of Insurance promptly at the close of the year, according to the salutary practice of the North American Life, exhibits some striking features that reflect credit upon this company. Its new business was last year larger than ever before; the increase of cash premiums was the greatest it has ever known; there was a gain in interest receipts, and yet the ratio of expense, instead of being increased, was lessened. To have been able to do this in a year so fraught with difficulty in financial and commercial circles is proof of the live, harac-

ter of the company's representatives in the field, as well as of the firm basis on which it rests and the soundness of its administration.

The assets have now reached the large aggregate of $1,987,446, which is a large superstructure to have reared in fourteen years. But what is of more importance to insurers as regards the earning power of the company and its offering inducements to insurers, the net surplus for policy-holders amounts to $338,216. Referring to this very creditable proportion of surplus, the consulting actuary of the company, Mr. Standen, of New York, says of the North American: "In all essentials, especially those of acquired surplus and surplus-earning power, it is not excelled to-day by any other company."

The mortality of the year was within expectation, though greater than in 1893, which had a very low mortality. The amount paid during the year to policy-holders for death claims, endowments, profits on investment policies, etc., was $133,426. The report is a most creditable one, and worthily illustrates the claim of the president that, to the man whom no other argument by a canvasser will reach, the North American Life offers the argument that one of its policies "will pay" the investor.

HARTFORD FIRE INSURANCE COMPANY.

The exhibit made for 1894 by the Hartford Fire Insurance Company is a very remarkable one, not only in respect of the enormous gross income of the company, which is $7,135,478 for the twelve months—double that of 1887 and five times that of 1867—but also by reason of the growth in surplus, which from $1,100,000 in 1877 has reached the handsome figure of $2,500,000. This is a development in which just pride may be taken by the management of this sound old company, which now leads all the domestic fire insurance companies of the United States in premium receipts. The reputation of the Hartford for honorable dealing has done much towards building up these great receipts, but it would have been impossible to make the profits declared unless there were also energy and sound judgment in the management. The re-insurance of the United States risks of the Guardian at its retirement from that field, is regarded a good stroke for the Hartford, for they were of good quality. The company underwrites in Canada some twelve to fifteen millions a year, and its losses during a period of twenty-three years amounted to only 63½ per cent. of the premiums.

THE NEW YORK LIFE.

The New York Life Insurance Company has been in existence for fifty years, and has built up its business to very handsome figures. Its report for 1894 shows premiums of more than twenty-nine millions of dollars and new insurance of over two hundred millions What is, however, of more importance than volume of business, which this and several other of the big American companies have been racing for, not always wisely, it appears from the report of the State commissioners who examined the assets of the N Y. Life last year, that the company had in June a surplus of seventeen millions. This has now been increased, according to the company's statement, to twenty millions and a quarter over the liabilities calculated on a 4 per cent. standard. It is officially announced that the utmost economy of management is henceforth to be the rule of the company; also that it will discard all book-keeping devices in its reports and publish the various items therein "just as they are understood by the public." This is all in the right direction, but its announcement is a commentary on insurance companies' methods in these particulars.

TEMPERANCE AND GENERAL LIFE.

The improvement in this company's business is made manifest in its ninth annual report. By energy as well as prudent economy, aided by low death losses, the management is able to show an increase in the funds for the year 1894 of more than fifty thousand dollars, the net premiums and interest earnings having reached the satisfactory figure of $142,675, and the losses and expenses being only $86,881. A surplus is shown of $20,739 over all liabilities and capital; a third of this is to be allotted to certain policy-holders; a portion to be paid the company's guarantors, and the remainder to remain in general surplus account.

The interesting statement is made that the mortality experience of the company has been such as to entitle those insured in its Temperance section to profits one-third higher than could fairly be allotted to similar policies in the General section. This experience is in accord with that of the United Provident Institution in the old country, to which reference is made elsewhere, and must prove a strong argument among teetotalers. So far, this year, says the report, the payment of outstanding and deferred premiums have been more prompt and satisfactory than in any previous year, and the new insurance applied for has also been in excess of any previous year's record. It is pleasing to be able to say, with respect to its securities, that the company did not have a single dollar's worth of real estate on its hands, or a single dollar of interest overdue and in arrears, at the close of the year. The company is apparently satisfied, and has reason to be satisfied, with its field of operations, which is Ontario and the Maritime Provinces. Herein they think they can obtain "sufficient business of the highest character at less expense than they can in a wider field or in any other field."

WATERLOO MUTUAL FIRE.

The directors of the Waterloo Mutual Fire Insurance Company, in their thirty-second annual report, attribute the growth of that company's business rather to the increased confidence in and patronage of the mutual system as conducted by that company, than to its cheaper rates as compared with stock companies. The company has more than twenty thousand risks in force and their agregate is $20,699,341. It paid losses during 1894 to the amount of $108,282, and has added to the number of its friends. We understand that this company invariably makes provision for a re-insurance reserve for its mutual policies, while it is customary for several other mutual companies to show a reserve for the cash system business only.

CENTRAL CANADA LOAN AND SAVINGS.

There is no note of complaint in the report of the Central Canada Loan and Savings Company. It is there stated that the result of the year's business has been satisfactory, the earning power being fully maintained; indeed, the year is described as being the best in the history of the company. Gross earnings were $271,975, and net $99,777 The dividend absorbed $72,000 and Rest received $15,000. The balance went to Contingent Fund, which more than makes up for the $6,650 charged against that fund during the year. In fact the report takes the view that prevailing economy among the farmers with a view to paying the interest and principal they owe, rather than incur fresh debt, while it contributes to the dulness in some kinds of business, is resulting beneficially to loan companies.

GUARANTEE COMPANY OF NORTH AMERICA

The annual meeting of shareholders of the Guarantee Company of North America was held at the company's offices, Montreal, on Thurs day, January 24th. The report gives the following figures as to the business of the year 1894: Business in force, 25,405 bonds, covering $43,666,000; gross revenue, $317,124.57; assets, $832,282.56; surplus to shareholders, $314,754.25; total resources, $1,196,282.56. The following gentlemen were elected directors: William J. Withall, E. C. Smith, Hartland S. Macdougall, William Wainwright, George Hague, E. S Clouston, John Cassils, H. W. Cannon (of New York) and Edward Rawlings. The usual dividend of 6 per cent. on the paid-up capital has been paid during the year. At a subsequent meeting Mr. Edward Rawlings was re-elected president and managing director, and Mr. William J. Withall, vice-president of the company for the ensuing year.

TORONTO BOARD OF TRADE.

Between one and two hundred members assembled at the annual meeting of the Toronto Board of Trade on Wednesday afternoon last. The retiring president, Mr. Hugh Blain, was in the chair. Reports were submitted by the treasurer, the secretary, the Harbor Trust and the Exhibition Committee. That of the last named was read by Mr. W. B. Hamilton, who declined re-election. The chairman took occasion to pay a deserved tribute to Mr. Hamilton for his long and faithful services. Next to the chairman of the Exhibition directors, he regarded Mr. Hamilton as having been the most valued worker.

The scrutineers, Messrs. Walter S. Lee, George McMurrich, C B. Watts, and H. C. Dixon, brought in the following report as to officers elected:—

President—Stapleton Caldecott,
First Vice-President—E. B. Osler.
Second Vice-President—E. Gurney.
Treasurer—D. W. Alexander.

The new council is composed of the following members: A. A. Allan, wholesale hats, caps and furs; H. N. Baird, grain merchant; Hugh Blain, wholesale grocer; William Christie, biscuit manufacturer; John Donough, lumber merchant; M. C. Ellis, manufacturing jeweller; William G. Gooderham, of Gooderham & Worts Company; J. H. G. Hagarty, steamboat owner; Peleg Howland, wholesale hardware; John Macdonald, dry goods; J. Herbert Mason, president Canada Permanent Loan Company; W. D. Matthews, grain merchant; M. McLaughlin, miller; Elias Rogers, coal merchant; D. R. Wilkie, cashier Imperial Bank.

Representatives to the harbor commission: Capt W B Hall and George A. Chapman.

Representatives to the Industrial Exhibition: Messrs. D. Gunn, J. D. Laidlaw, and Ald. Joseph Oliver.

Board of arbitration: William Badenach, R. S. Baird, John Carrick, Ald. Thomas Davies, Thomas Flynn, William Galbraith, John Keith, James McIntosh, Thomas McLaughlin, Robt. McLean, J. L. Spink, and J. Sproule.

The retiring president delivered his annual address, to which we have referred editorially. A valuable feature of the general report for 1894 will be the subordinate reports of the various sections of the board. These are the Dry Goods, the Lumber, the Tanners, the Manufacturers, the Jewellers and Silversmiths, and the Marine.

KENTVILLE BOARD OF TRADE

This Nova Scotia board, we are told, is doing good and active work. Its annual meeting took place on the 21st January. After receiving the address of the retiring president, Mr. C. S. Nixon, the election of officers for the ensuing year was proceeded with, and resulted as follows:—

President—M. G. De Wolfe (of J. E. De Wolfe & Co.)

1st Vice-President—Geo. E. Calkin.

2nd Vice-President—W. J. Ross.

Sec.-Treasurer—J. C. Starr, re-elected.

Executive Council—Messrs. C. S. Nixon, Thos. P. Calkin, W. E. Porter, J. E. Mullowney, R. S. Masters, R. W. Eaton, Rufus Porter, B H. Dodge, M.P.P.

Auditors—Messrs. F. C. Rand and F. H. Eaton.

THE OTTAWA CARNIVAL.

Most people were at first apathetic about the winter carnival at Ottawa. Those who liked that sort of thing of course welcomed the idea, others objected to such advertising of our cold winters abroad; but aside from the immediate promoters, there was little enthusiasm in its favor even among Ottawa residents. Then came the withdrawal of the Governor-General's patronage, on the ground that such merry-making was unseemly in view of the Premier's recent obsequies. This, while it might not unnaturally have been expected to be a death-blow to success, had just the opposite effect; it seemed to stimulate the people of the capital to make a success of the carnival. And, in spite of a day or two's rain on the start, the liberal plans were well carried out. From a gentleman who was present, and who had seen winter carnivals elsewhere, we learn that the snow-shoers' procession was a fine sight, rivaling Montreal; that the allegorical display was excellent, the winter games were well patronized, and that the crowd, on some days last week, was really immense. That the excitement was absorbing may be gathered from the following reply, dated 28th, to a business letter sent to Ottawa one day last week:—

"I received yours in due time, but everything here was in such a state of chaos during last week that we could neither give nor receive information. The excitement was so intense, owing to carnival operations, that no one seemed to know anything except in relation to that. Ask any one a question, departmental or mercantile, and you'd most likely receive an answer *re* allegorical procession or storming the ice castle, or snowshoeing bonspeil, tobogganing, or driving tandem, etc. Such was our belated condition all last week."

CURRANTS.

Stocks of currants remaining on this market after the holiday season are not excessive, and the trade is in a very healthy state. The situation abroad is best described in the following letter from Barff & Co., Patras, dated January 4th, which we have received from P. L. Mason, commission merchant, Front street:

The currant market, since our last report at New Year's, has gradually hardened, and fair business has been done, principally with Russia, which continues to buy all offering at fcs. 14 c.i.f. bags Odessa.

As will be seen by note of shipments at foot, the quantity already shipped to Russia is close upon 14,000 tons, and as 1,000 to 2,000 tons are preparing for shipment to same destination, Russia, which hitherto has only imported trifles, now takes rank as one of the principal buyers of currants. When it is borne in mind that these currants are almost entirely used in Russia for wine-making, the great importance to the currant trade of this new factor in the problem will be readily understood—for just as France, before prohibitive duties on currants were imposed, used to consume all the surplus of our crop for wine-making, so may Russia do also. In any case the continued demand from this new quarter has quite revived the drooping spirits of our currant holders—the position is now very firm indeed, with many buyers, but few sellers. There is no Vostizza of Gulf held for shipment.

The stock of currants still remaining on this side consists of about 35,000 tons, which will, we think, easily be run off before the new crop is got in, as a good demand is expected during the spring from all quarters, including the United States, which up till now has only imported 4,500 tons against the usual annual importation of 15,000 tons.

A proposal in the Greek Chamber for retaining each season the estimated surplus of the currant crop over consumption and rendering it useless for eating purposes, was accepted on principle by a majority of members, but when the bill was presented the majority voted against it, so it was lost

HARDWARE AND METALS

Manilla rope is ½c. per lb. cheaper than it was one week ago

The Kingston foundry will be operated in future by a syndicate of employees.

Material advances have been made in the turpentine markets of the Southern States, and Canadian prices are in consequence up 2c. per gal.

Mayor Cowan, of Oshawa, has given $1,000 for the relief of the families of the employees of the Malleable Iron Works, which were burned there recently.

James Watson & Co., Glasgow, Jan, 18th, write: "We have to report a steady market for pig iron during this week, without any fresh feature. Quotations for some of the special brands are rather easier."

It was only on the 14th inst. that the new price list on barb wire appeared, but this has not prevented a change in price during the week. Quotations have been reduced 12½c. per 100 lbs. Barb wire, plain twist and staples are now quoted at $2,87½ per 100 lbs. in 500 lb lots. The meeting that decided upon these changes was held in Toronto.

For some time grinders of paint have been dissatisfied with their returns, and constant talk of higher prices has been heard. The Montreal men are unanimously in favor of a change, but one Toronto house is apparently satisfied with the *status quo*. However, a verbal agreement to raise prices ½c. per lb. has been entered into. It is not likely to prove effective.

The discouut of 20 per cent. allowed off list on bright, annealed, annealed and oiled, and galvanized wire, is changed to 25 per cent., or will be on the revised list, which will go into force on Feb. 1st. We cannot say whether coppered steel and coppered wire are included in this list. The reduction has been brought about by American competition, and as competition in coppered wire is not severe, it may not have been deemed necessary to alter the price list.

Wm. Clendinneng & Co., stove manufacturers, have recently erected new premises at St. Henri, Que., which are a model for convenience and neatness of design. The buildings cover six acres of ground, and a railway siding running into the yard makes shipment an easy matter. The stove department of the extensive concern is 65 x 420 feet; machinery building, 110 x 70 feet; office and warehouse, 180 x 60 feet. There is also an uptown office in Montreal. The pattern vaults are wisely made fire proof. Messrs. Clendinneng & Co., besides stoves, make piping for water works, gas purposes, etc. Their "Active" hot water boiler and their "Leader" and "Universal" stoves will be found in most of the provinces. Wm. Clendinneng, sr., is the well-known and enterprising president of the company, while Wm. Clendinneng, jr., performs with efficiency the functions of vice-president and general manager.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Jan. 31st, compared with those of the previous week:

Clearings.	Jan. 31.	Jan. 24.
Montreal	$10 620,344	$10 363 496
Toronto	4,332,940	5,855,269
Halifax	944,341	968,225
Winnipeg	641,954	752 097
Hamilton	474,206	550,169
Total	$17,013,785	$18,489 256

Aggregate balances this week, $2,733,559. last week, $2,688,970

Total clearings for the five weeks, $96,462,792.

In the year 1894 the Canada Life Assurance Company transacted the largest new business in its entire history of 48 years. The new assurances applied for were $8,900,000, and the new assurances accepted and issued, $7,680,000

—The report of the Waterloo Mutual Fire Insurance Company will be found on page 1014, and that of the Temperance and General Life on page 991 of the present issue

Grocery notes will be found on page 1006

Meetings.

NORTH AMERICAN LIFE ASSURANCE COMPANY.

The annual meeting of this company was held at its head office, Toronto, Tuesday, January 29th, 1895. Mr. John L. Blaikie, president, was appointed chairman, and Wm. McCabe secretary, when the following report was submitted:—

REPORT.

The directors have much pleasure, at the close of such a year of financial stringency as 1894, in presenting a report showing so many proofs of continued prosperity in every important branch of the company's work.

During the year, applications for new insurances and restorations were received for $3,028,900, and insurances thereon for $2,850,460 were granted, being an increase considerably in excess of that of any former year. The premiums actually received in cash show an increase of $63,859.63, being by far the largest of any year in the company's history.

The interest on the investments was well paid, and coupled with the premium income, aggregates $558,394.93, a strong proof of the solidity of the business and investments of the company.

The assets amount to $1,987,446.30, of which the large sum of $244,510 represents the addition to the reserve fund, which now amounts to $1,564,020. During the year the sum of $133,426.52 was paid to policy-holders, and after making full provision, on the most conservative basis, for every liability, there remains the relatively large sum of $338,216 as net surplus available for policy-holders. It is pleasing to report that the results of the company's investment policies, which matured during the year, gave, as heretofore, entire satisfaction to the holders. The allocation of surplus to the investment policies maturing in 1895 was approved as recommended by the company's consulting actuary, whose report of the company's work for 1894 is herewith submitted. The books of the company were closed on the last day of the year, and, as heretofore, the full Government report was promptly mailed to the Superintendent of Insurance at Ottawa.

The auditor made a complete audit of the company's affairs monthly, and at the close of the year verified the cash in hand and in banks, and also examined each mortgage and every other security held by the company. This report and also that of the auditing committee, which made a minute audit quarterly, are herewith submitted. The services of the company's staff of officers, inspectors and agents continue to deserve special commendation.

JOHN L. BLAIKIE,
President.

SUMMARY OF THE FULL FINANCIAL STATEMENT AND BALANCE SHEET FOR THE FINANCIAL YEAR ENDING DECEMBER 31ST, 1894.

Cash income	$ 558,394 93
Expenditure (including death claims, endowments, profits, and all payments to policy-holders)	286,193 40
Assets	1,987,446 30
Reserve fund	1,564,020 00
Net surplus for policy-holders..	338,216 75

Audited and found correct.

WILLIAM MCCABE, Managing Director. JAMES CARLYLE, M.D., Auditor.

EDWARD GALLEY, JAMES SCOTT, } Auditing Committee of the Board.

To the Directors of the North American Life Assurance Co.:

GENTLEMEN,—I have made a very careful investigation of your methods and systems of business as they are indicated by your books, accounts and various home office records. I cannot refrain from saying that this investigation has been unusually interesting to me, because it has so very clearly and conclusively proven to me the great degree of executive and administrative capacity brought to bear by the officers of your company upon even the minuter details of the business.

One consideration has been very forcibly impressed upon my mind as I examined your books and records, and enquired into various details of your business, that the North American Life is being built up on a foundation that is faultless. The structure that you are rearing, year by year, could never have attained such perfect harmony of outline and proportion, and never could have been so solid and enduring as it now is, if the foundation of the company's business had been hastily or carelessly laid in the initial years of your corporate existence.

Life insurance companies are subjected to such a searching public and official scrutiny in every detail of their business, that it is of vital import that no flaw shall be permitted to impair their usefulness or weaken their claim to public confidence.

If you wish to know the secret of your success you must look back to what you and your executive officers did in 1881. What you have done *since* then has been in harmony with the foundation you then laid. You then gave the stamp of your approval and adoption to methods, plans and systems that appealed to a conservative judgment, and which were consistent with an enduring success, and success *has* followed almost as a matter of course.

In view of the serious depression in business circles during the past two years, your increase in premium income is very noteworthy, and will be found to be very unusual. The increase of $63,859.65 in premium income for 1894 evidences the adaptability of your agency staff, and proves that it consists of men of vigor and intelligence who know how to apply their energies with the best effect.

Your gain in interest receipts speaks well for the judiciousness of your investments. The comparatively high rates of interest obtainable is something for which the holders of your deferred dividend policies may be profoundly grateful.

The valuation of your assets, and the determination of your liabilities, have been conducted conservatively, and they show a clear surplus of $338,216.75. This surplus fund shows beyond any question the absolute security you are enabled to offer to policy-holders during even the severest of monetary depression. The profits you are in a position to earn is very largely in excess of what can be earned by companies debarred from privileges of being able to invest their assets in Canadian securities.

Policy-holders are often carried away by the size or age of a life company. The crucial test is the ratio of assets to total liabilities. Next in order of importance probably stands the surplus and surplus-earning power of a company.

With assets held down to a rigid gold basis, you nevertheless fully cover every liability, and have a large margin of safety over and above every requirement

Undoubtedly the North American Life Assurance Company has attained that degree of solidity which can best be understood by comparison with any of the large companies. In all essentials—especially those of acquired surplus and surplus-earning power—it is not excelled to-day by any other company.

Insurers are too apt to overlook these requisites and give undue importance to mere age and size, which, unsupported by other valuable considerations, really count for nothing. Illustrations of this can be seen to day in the United States, where many of the smaller companies, although forced into competition with their larger rivals, are giving much better and more satisfactory returns to their policy-holders than many of the largest companies.

Stupendous assets are offset by correspondingly large liabilities. In the balance sheet they do not add strength, the test of which in well established companies is the true ratio of resources of assets to liabilities, which is absolutely independent of the question of size.

WM. T. STANDEN,
Consulting Actuary.

Mr. John L. Blaikie, in moving the adoption of the report, said:—

GENTLEMEN,—I have a pleasant duty to discharge in moving the adoption of the report and balance sheet now submitted for your approval.

That you will heartily approve of them and adopt them I do not doubt for a moment, as in all the vital particulars that make up solid success in a life assurance company there is most gratifying progress, and results have been attained which cannot fail to afford great satisfaction to policy-holders and guarantors, and at the same time cheer our agents in the prosecution of their arduous labors for the company.

This is fully borne out by the facts and figures to which I invite your attention.

Total cash income for 1894	$558,394 93
" " " 1893	482,514 08
Increase (16 per cent.)	$75,880 85
Total assets, December 31st, 1894	$1,987,446 30
" " " " 1893	1,703,453 39
Increase (17 per cent.)	$283,992 91
Total reserve and surplus funds, December 31st, 1894	$1,902,236 75
Total reserve and surplus funds, December 31st, 1893	1,616,572 26
Increase (18 per cent.)	285,664 49

These large increases are all the more gratifying when we consider the hard times so many have experienced during the past year, and the keenness of the competition for business by all classes of companies.

Any thoughtful and intelligent person who studies these figures cannot fail to come to the conclusion that ample provision is made to meet every contract entered into with its policy-holders, and not only so, but also that the North American Life is building up a large surplus out of which profits for policy-holders alone can come, which compares most favorably with any other company making returns to Government.

Payments to policy-holders for 1894, including death claims, endowments, profits on investment policies, etc., for 1894	$133,426 52
do. do. for 1893	80,665 53
Increase (65 per cent.).....	$52,760 99

The mortality in 1893 was exceptionally light, and though in 1894 it has been greater, it is still largely within expectation, and it has to be borne in mind that there is a much larger amount of risk in the increase of policies in force. There is real satisfaction, however, in paying promptly every fair death claim, as it arises, as has been the practice of the company from the beginning, as in so doing we are fulfilling the functions and purposes of a life assurance company, and helping to provide for widows and helpless children.

When I tell you that the interest and rents due are less than ¾ of 1 per cent. of total assets, you must admit that it speaks well for the care and ability with which the finance committee and the executive officers of the company have discharged their duties.

A comparison of the business of the company as it was five years ago, with what it was at the close of 1894, is at once interesting and encouraging:

	December 31.		Increases.	
	1894.	1889	Amount.	Per-centages.
Assets	$1,987,446 30	$816,710 04	$1,170,736 26	143
Surplus	338,216 75	71,364 63	266,852 12	374
Cash income	558,394 93	291,741 08	266,653 85	91
Insurance in force	14,471,253 00	9,068,862 00	5,402,391 00	60
Payments to policy-holders	133,426 52	59,906 94	73,519 58	123

These figures show that the company's surplus has during the brief period of 5 years increased about four fold, while the assets have increased about one and a-half fold.

The more closely any person scrutinizes the figures of all the life insurance companies doing business in the Dominion of Canada, with a view to ascertain which can do the best for insurers, the more he will be convinced that the North American Life stands in the very front rank.

The independent report made by Mr. Standen, our consulting actuary, is not only of unusual interest, but is also extremely gratifying, endorsing in such an unqualified manner, as it does, all the methods by which the North American Life prosecutes its business, giving it a very high position among successful life insurance companies, as respects solidity, equity and profit earning power for the benefit of its policy-holders.

I gladly avail myself of this opportunity to say the success in which we all rejoice is largely due to ability and devotion to duty of Mr. McCabe, our managing director, of Mr. Goldman, our secretary, and other officers of the company; also to the unceasing care and great professional skill of our medical director, Dr. Thorburn.

During the past fourteen years the company has disbursed for death losses, endowments, profits on investment policies, etc., over three quarters of a million of dollars, and at the present time holds as security for its policy-holders assets, as per balance sheet, of $1,987,446.30, and in addition uncalled guarantee fund of $240,000, or in all the large sum of $2,227,446.30,

thus giving a relative security doubtless unsurpassed by any other company

For my own satisfaction I have examined into the relative position attained by this company and four leading companies. I found this investigation very interesting and satisfactory, and I am sure you will be pleased to hear the result, as it indicates very clearly the great growth and unexcelled position attained by our company.

Comparing the business of the North American Life, at the end of its fourteenth year, with that of the companies referred to at the same period in their history, it will be found that the oldest of these companies had but about one-third the business in force that the North American has, that the surplus of the second was over 20 per cent. less than that of the North American's, that the assets of the third were more than a million dollars less than those of the North American's, while the cash income of the fourth was less than one-half of that of this company. Now, gentlemen, I have said enough in support of the motion to adopt the report and balance sheet, and enough to make us all proud of the North American Life Assurance Company, enough, too, to serve as a stimulus to our numerous agents in the field to renew their labors with redoubled energy and zeal, so that at the close of 1895, a large increase of business will be shown, and a positive benefit accrue to every person who has been induced to become a policy-holder in the company.

During the past year the company paid many death claims, where but for the policy, widows and fatherless children would have been left in dire want and distress. This fact must always be a powerful argument by our agents in canvassing for business, as many men are so circumstanced as to be entirely unable to provide for their families in any other way than by insuring their lives, and hence failure to do this becomes criminal neglect. Many insurers, however, can be approached and convinced by an entirely different kind of argument.

Keen, calculating men are met with, who won't listen to any argument other than it will pay—and our agents can meet such men and satisfy them, that to take out an endowment policy in the North American Life Assurance Company is a paying investment, and at the same time a much safer and sounder one than many of the investments for money now obtainable.

Gentlemen, I would like to repeat what I said on a former occasion, and to do it by way of warning, and that is that a class of companies are pushing business in our midst whose methods are radically unsound, who make contracts that will not mature for many years, making no adequate provision for their payment at maturity, so that the holders of such policies are doomed to cruel and bitter disappointment.

It does appear to intelligent onlookers that it is a most important thing, and in entire disregard of public interests, that any companies should be permitted to carry on such business, and at the same time not be subject to inspection by the Dominion Government in the same way as all the regular life insurance companies are.

In conclusion, I have only to say, let every gentleman here present, whether policy-holder, guarantor, director or agent, not only resolve to push forward the interests of the North American Life Assurance Company, but watch for opportunities of doing so, and thus ensure a large and steadily growing business for the year on which we have now entered.

The vice-president, Hon. G. W. Allan, seconding the resolution, said, that the president had so fully covered every point in the report, that it really left him nothing further to say, except that he fully endorsed every remark of the chairman as to the progress of the company and the solid position it had attained, and as a Canadian institution we could all look forward with perfect confidence to its increased growth and future prosperity. The motion was unanimously carried.

The chairman expressed great regret at the absence, through illness, of Mr. James Scott, chairman of the finance committee, whose able and comprehensive report on the satisfactory position of the investments of the company was read by the Hon. G. W. Allan, who said: I should like to be permitted to add to what Mr. Scott has said, a few words with regard to our mortgage investments. Perhaps I may claim to speak with the advantage of some little experience, having been connected as a director and president with loan companies for over thirty years. I have taken a good deal of interest in the subject as a member of the board of directors of this company, and I can say, without hesitation, to our policy-holders and others, that I doubt very much if there is any other company in the country whose securities are of so high a character as those held by the North American Life. They have been selected with great judgment, and we have the advantage of a man of very large experience in Mr. Galley, who exercises great care in reporting on all properties offered to us for loans.

James Thorburn, M.D., presented his fulland interesting annual report on the mortality experience of the company, after which Mr J. K. Kerr, Q.C., moved a vote of thanks to the medical director for the able manner in which he had conducted the affairs of the medical department. This was seconded by Sir Frank Smith, who expressed confidence in the future of the company and his satisfaction at the excellent financial result of the past year's work.

Hearty votes of thanks were tendered the board, officers and agents of the company, and at a subsequent meeting of the newly-elected board Mr. John L. Blaikie was unanimously re-elected president and Hon. G. W. Allan and J. K. Kerr, Q.C., vice-presidents

CENTRAL CANADA LOAN AND SAVINGS COMPANY OF ONTARIO

The annual general meeting of the shareholders of the Central Canada Loan and Savings Company of Ontario was held in the company's offices, No. 347 George street, Peterborough, on Wednesday, the 23rd day of January, 1895, at 1.30 o'clock p.m

The president, Mr. Geo. A. Cox, having taken the chair, the manager, Mr. F. G. Cox, acting as secretary, the following report and financial statement was read:

REPORT.

The directors have pleasure in laying before the shareholders a statement of the affairs of the company for the year ending 31st December, 1894.

The earnings for the year amount to $271,975.28; deducting cost of management, interest on debentures and deposits, and all other charges, there remains a net profit of $99,777.92, which has been disposed of by the payment of four quarterly dividends at the rate of six per cent. per annum, amounting to $72,000, the transfer of $15,000 to the reserve fund (making that fund now $315,000), and the balance, $12,777.92, to the contingent fund, which now stands at $30,134.71.

The result of the year's business has been satisfactory. The rigid economy being practised by nearly all classes, and especially by the farming community, is enabling borrowers to pay their interest and maturing instalments of principal with more than usual promptitude. This effort upon the part of a large proportion of the community to discharge their existing liabilities, rather than incur new obligations, while contributing to the prevailing depression in many kinds of business, is resulting beneficially to loan companies.

The decreased rate of interest obtainable on desirable loans has been met by the lower rates payable on debentures and deposits; our earning power for the past year has been fully maintained, being the best in the history of the company.

The directors are pleased to be able to report a steady growth in the business of the company, as evidenced by a substantial increase during the year in invested funds, sterling debentures, currency debentures, and deposits.

The somewhat excessive losses of $6,650.78, charged against the contingent fund during the year, have been very fully provided for by an addition of $12,777.92 to that fund from the profits of the year, after making the addition of $15,000 to the reserve fund. The latter fund is now equal to 26¼ per cent. of the paid-up capital

The inspection committee have made a careful examination of the securities, checked the same with the mortgage register, and report everything satisfactory.

The report of the auditors is appended to the financial statement annexed.

Respectfully submitted on behalf of the directors

GEO. A. COX,
President.
